Section 3. (a) The portion of the Virgin Islands quota not allocated pursuant to Section 1, except as specified in Section 4, will be allocated among firms meeting the requirements of paragraphs (1) or (2) of this section. Eligible firms will be allocated quota in accordance with the factors and weights specified in Section 1. Allocation of the portion of the Virgin Islands quota under this Section will be made to firms which: (1) Assembled all watch movements shipped during 1980 from unassembled movements having at least 26 discrete components and all watches (that is, cased movements) during 1980 from at least 29 discrete components, including at least 26 movement components and at least 3 case components; or (2) Made wage payments during 1980 in the territory averaging not less than $.75 per watch movement and $.95 per watch assembled and shipped into the customs territory of the United States. In determining a firm's eligibility under this criterion, the Departments may make appropriate data adjustments to take into account wages paid for the assembly of units not shipped during 1980 and shipments assembled prior to 1980.

(b) Allocation of the portion of the Guam quota not allocated pursuant to Section 2 may be allocated pursuant to § 303.5(b) of Title 15 of the Code of Federal Regulations.

Section 4. Quota set aside for new firms in the Virgin Islands under subsection 5(b) shall be subtracted from the quota amount allocable under Section 3, before allocations are made pursuant to that subsection.

Section 5. (a) Applications from new firms are invited for the calendar year 1981 American Samoa quota. Due to the limited size of the American Samoa quota, the Departments will allocate that quota to the single firm which offers the best prospect of making a meaningful long-term contribution to the economy of the territory.

(b) Applications from new firms are invited for 500,000 units of the calendar year 1981 Virgin Islands quota.

(c) Applicants for new-entrant quotas must complete applicable sections of Form ITA-334P, copies of which may be obtained from the Statutory Import Program Staff, U.S. Department of Commerce, Washington, D.C. 20230. Detailed instructions for completing ITA-334P will be provided by the Statutory Import Programs Staff together with copies of the application form.

(d) The Departments will consider new entrant applications only from

firms which certify to the Departments that they are able and willing to meet the minimum assembly or wage contribution criteria established in Section 3. Following the Secretaries' determination that a qualifying application has been received, an announcement will be published in the **Federal Register** establishing a closing date for further applications. The closing date shall be 30 days from the date of such notice. If the Departments do not receive prior to September 1, 1981, a qualifying application for quota set aside by subsection (b) above, that quota may be reallocated among eligible producers pursuant to § 303.5(b) of Title 15 of the Code of Federal Regulations.

Section 6. Reallocation of calendar year 1981 quota that becomes available will be restricted to those firms satisfying the criteria established in subsection 3(a), to any new entrant firms selected pursuant to Section 5 above, and to the new Guam firm selected in 1980, provided its operations at the time of the reallocation satisfy the criteria established in subsection 3(a).

Section 7. As used in Section 3 of these rules,

(a) "Wages" means all wages up to $17,000 per person paid to residents of the territories employed in a firm's headnote 3(a) watch and watch movement assembly operations. Excluded, however, are wages paid to (i) accountants, lawyers, or other professional personnel who may render special services to the firm, (ii) persons assembling non-headnote 3(a) watches and watch movements, (iii) persons engaged in the repair of non-headnote 3(a) watches and watch movements, and (iv) persons engaged in the strapping and packaging of watches. Wages paid to persons engaged in both headnote 3(a) and non-headnote 3(a) assembly and repair activities shall be credited proportionately for their headnote 3(a) activities, provided the firm maintains production and payroll records adequate for the Departments' verification of the headnote 3(a) portion.

(b) "Discrete movement components" means screws, parts, components and subassemblies not assembled together with another part, component or subassembly at the time of importation into the territory. (A mainplate containing set jewels or shock devices, together with other parts, would be considered a single discrete component, as would a barrel bridge subassembly.) Excluded are dials, dial washers, dial screws, hour wheels, hands, automatic mechanisms and related parts, day-date mechanisms and calendar features, and jewels.

Section 8. (a) All firms must, as a condition for receipt of allocations or reallocations based on subsection 3(a) criteria, certify to the Departments that they will not alter assembly operations during calendar year 1981 in a manner which would result in their failure to satisfy the respective criteria.

(b) If the Departments have reason to believe that a producer has not complied with or is not complying with the certification required by subsection (a) of this Section, they may issue an order requiring the producer to show cause within 30 days of receipt of the order why the duty-free quota to which it would otherwise be entitled should not be cancelled or reduced by the Departments.

BILLING CODE 4310-10/3510-25-M

National Bureau of Standards

Solicitation of Comments on Impact and Applicability of Planned "User-Oriented Data Communication Performance Parameters" Standard

Under the provisions of Public Law 89-306 (79 Stat. 1127; 40 U.S.C. 759(f)) and Executive Order 11717 (38 FR 12315, dated May 11, 1973), the Secretary of Commerce is authorized to establish uniform automatic data processing standards. The National Bureau of Standards (NBS) plans to propose a group of user-oriented data communication performance parameters as a joint Federal Information Processing Standard/Federal Standard in 1982. The draft technical specifications of this planned standard were developed under the auspices of the American National Standards Institute. They are available for review from the National Bureau of Standards, Institute for Computer Sciences and Technology, Building 225, Room B64, Washington, D.C. 20234, ATTN: Data Communication Performance Standard.

NBS is requesting comments on this planned standard and is particularly interested in the following items:

1. The impact of implementing this planned performance standard. Data is solicited on the effort required to implement this planned standard within existing systems through retrofitting and also within planned systems.

2. The applicability of this planned standard. The objectives of this standard are to improve Federal Government procurement and operation of digital telecommunications and teleprocessing systems by defining user-oriented, system independent parameters for describing performance. These are intended to permit the accurate definition of minimum user requirements and to maximize opportunities for competitive acquisition of equipment and services to meet these requirements. Comments are requested on specific applicability statements, consistent with these objectives, which may be included in the standard.

3. Time period required to conform to this planned standard. Comments are solicited on the amount of time which should be allowed for conformance to the planned standard. This planned standard defines performance parameters only.

Work is in process on a planned companion standard that will specify the procedures for determining values for the performance parameters that are defined in this planned standard.

Comments should be provided in writing by May 26, 1981, to the following address: National Bureau of Standards, Director, Institute for Computer Sciences and Technology, Administration Building, Room A200, Washington, D.C. 20234, ATTN: Data Communication Performance Standard.

For additional information contact: Dr. John P. Riganati, Chief, System Components Division, Building 225, Room A219, Washington, D.C. 20234, (301) 921-2706.

Dated: March 23, 1981.

Ernest Ambler,
Director.

National Oceanic and Atmospheric Administration

National Marine Fisheries Service; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of meeting.

SUMMARY: The National Marine Fisheries Service will convene a meeting to discuss the Salmon and Steelhead Conservation and Enhancement Act of 1980 (the "Act"), Public Law 96-561. One part of the Act requires the establishment of an advisory commission. This meeting is necessary to develop the structural organization of this advisory commission and to discuss guidelines and objectives necessary to prepare a comprehensive report as set forth in the Act.

DATE: April 13, 1981, 9:30 a.m. PST to 5:00 p.m.

ADDRESS: Commission Room, Oregon Department of Fish and Wildlife, 506

SW. Mill Street, Portland, Oregon 97208. Seating is limited.

FOR FURTHER INFORMATION CONTACT: H. A. Larkins, Northwest Regional Director, National Marine Fisheries Service, 1700 Westlake Avenue North, Seattle, Washington 98109. Telephone: (206) 442–7575.

Dated: March 23, 1981.

William H. Stevenson,

Deputy Director, National Marine Fisheries Service.

National Technical Information Service

U.S. Government-Owned Inventions; Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and, possibly, foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of patents cited are available from the Commissioner of Patents & Trademarks, Washington, DC 20231, for $.50 each. Requests for copies of patents must include the patent number.

Copies of patent applications cited are available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 for $5.00 each ($10.00 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to avoid premature disclosure. Claims and other technical data will usually be made available to serious prospective licensees upon execution of a non-disclosure agreement.

Requests for information on the licensing of particular inventions should be directed to the addressees cited for the agency-sponsors.

Douglas J. Campion,

Program Coordinator, Office of Government Inventions and Patents, National Technical Information Service, U.S. Department of Commerce.

Chief, Intellectual Prop. Division, OTJAG, Department of the Army, Room 2D 444, Pentagon, Washington, DC 20310

Patent Application 6,158,009: Electroexplosive and Percussion Safe and Arm Device. Filed June 9, 1980.
Patent Application 6,158,042: Gun Breech Mechanism. Filed June 9, 1980.
Patent Application 6,161,548: Vehicle Cargo Box Cover. Filed June 20, 1980.
Patent Application 6,163,372: Dual Rate Firing Mechanism. Filed June 26, 1980.
Patent Application 6,164,213: Laser Scanner Detector of Incoming Projectiles. Filed June 30, 1980.
Patent Application 6,166,429: HNS from 2,4,6-Trinitrobenzyl Chloride and Nitrogenous Bases. Filed July 2, 1980.
Patent Application 6,166,652: Position Transducer. Filed July 7, 1980.
Patent Application 6,166,722: Remote Control of Industrial Fluoroscopes. Filed July 7, 1980.
Patent Application 6,166,733: Fine Tuning Mechanism for Laser Induced Chemical Reactions. Filed July 7, 1980.
Patent Application 6,167,572: Preparation of 1,3,5,7 Tetracetamido—and 1,3,5,7—Tetraaminodamantanes. Filed July 10, 1980.
Patent Application 6,171,515: Improved High Energy. Electrochemical Power Cell. Filed July 23, 1980.
Patent Application 6,180,554: Switched Delay Line for Steerable Null Antenna System. Filed Aug. 25, 1980.
Patent Application 6,180,757: Novel Barrel Devices for Aircraft Armament. Filed Aug. 25, 1980.

BILLING CODE 3510-04-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Proposed Atchafalaya Basin Floodway, Louisiana, Project (Including Atchafalaya Basin Water and Land Resources Study)

AGENCY: US Army Corps of Engineers, DOD, New Orleans District.

ACTION: Notice of intent to prepare a DEIS.

SUMMARY: 1. *Proposed Action.* The proposed action to be analyzed in this DEIS is a multipurpose plan for completion of the Atchafalaya Basin Floodway in Louisiana. This plan would consist of features to enable the Floodway to pass the project flood, to preserve enviornmental values, and to alleviate backwater problems northeast of Morgan City, Louisiana. The action is being taken in response to resolutions of the Committees on Public Works of US Senate and House of Representatives dated 23 March 1972 and 14 June 1972, respectively.

2. *Reasonable Alternatives.* The following actions are being considered in an attempt to meet the above needs: varying distributions of flow between the Mississippi and Atchafalaya Rivers below Old River; levee raising, channel dredging, and channel training in order to bring the Floodway to capacity to pass the project flood; realinement of major distributaries in the Lower Atchafalaya Basin Floodway to reduce the amount of sediment that is being carried into the backswamps; water level management in order to preserve aquatic environmental values; purchase of easements that prevent clearing for agriculture or other development and/or allow public access and/or allow flooding of lands and developments; altering the percentage of flows between the two outlets of the basin; enlargement of the Wax Lake Outlet overbank area; extension of the Avoca Island Levee or construction of ring levees to enclose developed areas to alleviate backwater; flooding bank stabilization in the Atchafalaya River; and means justifiability for mitigation of any adverse impacts.

3. *Scoping Process.*

a. This project has a long history of public involvement. In early 1974 an Agency Management Group (AMG) chaired by the Corps and consisting of the Environmental Protection Agency, the US Fish and Wildlife Service, and the State of Louisiana was formed in response to the 1972 Congressional Resolutions. A preliminary draft EIS prepared by the Corps was made public in November 1974 and a public meeting was held in January 1975. Two major concerns surfaced over the plan presented at the meeting. Fear was expressed that the plan was inadequate to protect Morgan City and other communities at the lower end of the floodway system from flooding, and many people felt that the plan was lacking in methods to preserve environmental values in the floodway. In 1976, at the direction of the Secretary of the Army, studies on the authorized plan were combined with pre-authorization studies to develop a comprehensive plan for the Atchafalaya Basin. The AMG has had numerous meetings since its formation, and it developed a group of 10 multipurpose alternatives that were presented at a series of five public meetings in January 1979. These meetings were attended by over 5,000 people and approximately 25,000 people commented on the primary focus of the meetings which was a discussion of a plan developed by the US Fish and Wildlife Service to purchase the Atchafalaya Basin. In 1980, representatives of environmental organizations, hunting clubs, the oil and gas industry, civic groups, landowner organizations, sport fishing clubs, commercial fishing groups, agricultural interests, timber interests, and minority groups were appraised of the study status. These interests are expected to continue an active role in this study.

b. Significant issues to be analyzed in the EIS include: passage of floodwaters through the floodway and into the Gulf of Mexico, flood protection in the backwater area northeast of Morgan City, public access, preservation of natural resources in the study area, easements versus fee purchase to achieve project purposes, impacts of the proposed plan on biological, cultural, historical, social, economic, and water quality resouces, and project costs.

c. The Environmental Protection Agency will provide water quality input for the EIS. The US Fish and Wildlife Service will provide Planning Aid data for the DEIS and a Coordination Act Report for the FEIS. The agencies comprising the AMG will review the DEIS prior to public release, and coordination with this group will be maintained during the remainder of the study.

d. The DEIS will be coordinated with all required Federal, state, and local agencies, environmental groups, landowner groups, and interested individuals.

4. No further scoping meetings will be held.

5. The DEIS is scheduled to be made available to the public in June 1981.

ADDRESS: Questions concerning the proposed action and DEIS can be answered by Dr. Tom M. Pullen, Jr., US Army Corps of Engineers, Environmental Quality Section (LMNPD–RE), P.O. Box 60267, New Orleans, LA 70160, telephone (504) 838–2525.

Dated: March 18, 1981.

Thomas A. Sands,

Colonel, CE, District Engineer.

[FR Doc. 81-9102 Filed 3-25-81; 8:45 am]

BILLING CODE 3710-84-M

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for Potential Alternatives Formulated to Mitigate the Wildlife Habitat Losses Resulting From Construction of the Tennessee-Tombigbee Waterway, Alabama and Mississippi

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a DEIS.

SUMMARY:

1. *Proposed Action:* The proposed action is to provide mitigation for wildlife habitat losses resulting from construction of the Tennessee-Tombigbee Waterway, Alabama and Mississippi. At this point in the mitigation study a number of independent mitigation alternatives have been identified; however, no one plan has been selected for recommendation to higher authority. The DEIS will include an evaluation of the environmental, social, economic, and engineering impacts associated with the potential mitigation measures.

2. *Alternatives:* The following basic alternatives will be evaluated:

a. No Action—This alternative will be the "without" mitigation conditions against which mitigation impacts will be measured.

b. The results of the Habitat Evaluation Procedures (HEP) analysis prepared by the U.S. Fish and Wildlife Service. The HEP has four mitigation alternatives containing a total of 16 options.

c. The results of the Monetary Evaluation Procedure (MEP) analysis prepared by the U.S. Fish and Wildlife Service. The MEP evaluates man-day and monetary losses and has identified four mitigation alternatives containing a total of 16 options.

d. The results of the "traditional analysis" prepared by the corps of Engineers.

e. Mitigation measures on existing project lands.

3. *Scoping Process:*

a. The scoping process as outlined by the Council on Environmental Quality in the November 29, 1978 Federal Register, National Environmental Policy Act—Regulations, will be utilized to involve Federal, State, and local agencies and other interested persons into the preparation of the DEIS. Identification of significant issues to be addressed in the DEIS will be determined through the scoping process. The agencies and individual views and concerns will be obtained through personal, telephone, and mail contacts in lieu of a formal scoping meeting.

b. Coordination with the U.S. Fish and Wildlife Service as required by the Fish and Wildlife Coordination Act and the Endangered Species Act is being undertaken. Coordination required by other laws will also be conducted.

c. Three workshops will be held in the upper Tombigbee River basin to obtain the views of the concerned public over which alternatives should be considered and identify potentially significant impacts for further analysis. The workshops have been scheduled for 8, 7, and 9 April 1981 at Fulton, Mississippi, Livingston, Alabama, and Columbus, Mississippi, respectively. All workshops will begin at 7:00 p.m. All public information fact sheet has been mailed announcing the workshops and summarizing the status of the study to date.

4. *DEIS Preparation:* It is estimated that the DEIS will be available to the public in August 1981.

ADDRESS: Questions about the proposed action and DEIS can be answered by: Mr. Ken Sims, PD–ES, U.S. Army Engineer District, Mobile, P.O. Box 2288, Mobile, Alabama 36628.

Dated: March 19, 1981.

Lt. Col. Ronald A. Krizman, EN,
Deputy District Engineer.

[FR Doc. 81-9186 Filed 3-25-81; 8:45 am]
BILLING CODE 3710-01-M

Intent To Prepare Draft Environmental Impact Statement (DEIS) for Proposed Flood Control Project on Main Branch, Chisholm Creek, Park City, Sedgwick County, Kans.

AGENCY: US Army Corps of Engineers, DOD, Tulsa District.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: 1. The primary purpose of this project is to provide local flood protection in Main Branch, Chisholm Creek, Park City, Sedgwick County, Kansas.

2. Reasonable Alternative: The alternatives evaluated included no action and two levee alignments.

3. Scoping Process: Public Involvement. A comprehensive public involvement program was developed as a means of disseminating information and soliciting public views. A variety of techniques including formal public meetings, meetings with local interest, and local news media were employed to involve Federal, State, and local agencies, citizen committees, organizations, and the interested public in the planning studies.

a. Significant Issue Requiring In-Depth Analysis: None.

b. Assignments: US Fish and Wildlife Service is preparing a Fish and Wildlife Coordination Act Report.

c. Environmental Review and Consultation Requirements: The draft environmental impact statement will be circulated for review and all comments will be incorporated into the final environmental impact statement.

4. A separate scoping meeting will not be held.

5. Estimated date when the DEIS will be available: June 1981.

ADDRESS: Mr. Buell O. Atkins, Chief, Environmental Resources Branch, US Army Corps of Engineers, Tulsa District, P.O. Box 61, Tulsa, OK 74121 (918) 581–7857, FTS 736–7857.

Dated: March 18, 1981.

James J. Harmon,
Colonel, CE District Engineer.

[FR Doc. 81-9184 Filed 3-24-81; 8:45 am]
BILLING CODE 3710-79-M

Department of the Navy

Disposal of Ordnance Aboard the Sunken German Submarine, U–352; Finding of No Significant Environmental Impact

Pursuant to the provisions of the regulations implementing the procedural provisions of the National Environmental Policy Act (Part 1508.13 of Title 40 CFR), the Department of the Navy gives notice that an environmental impact statement is not being prepared for disposal of ordnance aboard the sunken German submarine, U–352.

Responding to a congressional request, the Navy in early 1980 investigated the sunken German submarine, U–352, located some 20 miles off the North Carolina coast, to ascertain the danger presented by unexploded ordnance to fishermen and sportdivers. The Navy completed the requested survey which identified numerous rounds from the ship's gun and an unexploded torpedo outside the submarine as well as eight torpedoes inside the hull (seven in the forward room and one in a stern torpedo tube). The ordnance outside the vessel was removed and disposed of in a safe manner. The torpedoes in the forward room do not pose a hazard so long as they are left undisturbed, *i.e.*, they will not explode spontaneously, but the torpedo in the aft tube does constitute a hazard as is can be approached from outside the hull. Accordingly, the preferred alternative is to perform an underwater burn to render the ordnance safe. A similar burn was accomplished on the torpedo located outside the hull, although in slightly shallower water and, therefore, the technique could detonate rather than burn and render safe the explosives. In addition, gratings would be welded on the entrances to the submarine to prevent access and accidental detonation of any of the torpodoes inside the hull or their associated exploders, six of which could not be located and could be anywhere in the vessel.

Alternatives considered included no action, which would be irresponsible in light of the obvious safety hazards associated with the entrapped ordnance. Also considered were removal of all interior ordnance, which could be costly and would require partial dismantling of the vessel; and the blowing-in-place of all ordnance and relocation of the wreck in deeper water. Both of these latter alternatives would, in effect, eliminate the vessel's aesthetic and commercial value. This result appears unwarranted as the associated hazards should be eliminated by implementation of the preferred alternative.

One risk associated with the preferred alternative concerns the effectiveness and success of the underwater burn which could, but is not expected to, cause severe damage to the aft section of the submarine were the explosives to detonate.

As a result of the assessment, it has been determined that preparation and review of an environmental statement is not required.

The environmental assessment prepared by the Navy addressing this action is on file and may be reviewed by interested parties at Atlantic Division, Naval Facilities Engineering Command, Norfolk, Virginia 23511 (804/444–7611.

Attn: CDR Eugene P. Fucile, CEC, USN) or at the Environmental Protection and Occupational Safety and Health Division, Office of the Deputy Chief of Naval Operations (Logistics), Room BD 766, Pentagon, Washington, D.C. 20350 (202/697-3689). Additionally, a limited number of copies of the environmental assessment are available to fill single copy requests. For further information, contact either of the aforementioned Navy activities.

Dated: March 17, 1981.

P. B. Walker,

Captain, JAGC, U.S. Navy, Alternate Federal Register Liaison Officer.

DEPARTMENT OF DEFENSE

Defense Investigative Service

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[Notice No. 367]

Memorandum of Understanding

Following is the text of the Memorandum of Understanding between the Defense Investigative Service (DIS) and the Bureau of Alcohol, Tobacco and Firearms (ATF) in which both agencies agree to establish a uniform standard for contractors for the protection of explosive materials and certain ammunition. This Memorandum of Understanding is needed to avoid unnecessary duplication of inspections of contractor facilities by the Department of Defense (DoD) and ATF.

For further information contact the following offices:

Bureau of Alcohol, Tobacco and Firearms, Special Operations Branch, Dan Crowley, 202-566-7591

Department of Defense, Office of the Deputy Under Secretary of Defense/Policy, Directorate of Security Plans and Programs, Lt. Col. Al Mason, 703-697-7641.

Memorandum of Understanding between the Department of Defense and the Bureau of Alcohol, Tobacco and Firearms, Department of Treasury.

1. *Purpose.* A. The purpose of this memorandum is to establish a uniform standard for contractors for the protection of explosive materials and certain ammunition (hereafter referred to as "specified materials") and to avoid unnecessary duplication of inspections of contractors facilities by the Department of Defense (DoD) and the Bureau of Alcohol, Tobacco and Firearms (ATF).

B. DoD activities will include in contracts for the manufacture of storage of the specified materials by contractor-owned contractor-operated facilities a requirement that the specified materials be protected in accordance with the criteria established by the ATF in 27 CFR Part 181, Subpart J and that contractors accept ATF security surveys as appropriate.

C. Defense Investigative Service (DIS) will notify the appropriate ATF Regional Office of the intent to award such a contract. In turn, ATF will advise DIS whether the facility has a license or permit issued by ATF and whether the storage facilities meet the requirements of 27 CFR Part 181, Subpart J. When contracts involving the specified materials are awarded, DIS will notify ATF. Thereafter, ATF will inspect the storage facilities in accordance with its normal schedule and will advise DIS of the results of each inspection. In the event the contractor facility is not one normally inspected by ATF, the appropriate DIS activity will be so notified. In such cases, DIS will perform necessary inspections and surveys of the contractor facility.

2. *Cooperation.* DoD and ATF will cooperate to the greatest extent possible in the development of uniform standards for the safe and secure storage of explosive materials and procedures relating to inspections or surveys of contractor facilities.

3. *Training.* ATF will provide, at DIS's request, orientation on ATF storage requirements. DIS will provide, at ATF's request, orientation on DoD inspection and survey procedures for storage facilities.

4. *Interagency Coordination.* A. The Special Operations Branch of Regulatory Enforcement (ATF) and the Industrial Security Facilities Protection Program Division (DIS) shall serve as liaison points to facilitate communication and cooperation between the two agencies.

B. Within 120 days of the date of this Memorandum of Understanding, DIS will make appropriate notification to those contractor facilities currently involved in the manufacture or storage of the specified material for the DoD and will provide ATF with a listing of those facilities.

Dated: December 31, 1980.

Thomas J. O'Brien,

Director, Security Plans and Programs, ODUSD/Policy Review, Department of Defense.

Dated: December 31, 1980.

G. R. Dickerson,

Director, Bureau of Alcohol, Tobacco and Firearms, Department of Treasury.

BILLING CODE 3810-70-M

DEPARTMENT OF EDUCATION

Discretionary Grant Programs Under the Vocational Rehabilitation Act of 1973, as Amended; Closing Dates for Transmittal of Fiscal Year 1981 Applications

AGENCY: Department of Education.

ACTION: Notice of closing dates for transmittal of fiscal year 1981 applications.

SUMMARY: The purpose of these application notices is to inform potential applicants of closing dates for transmittal of applications for grants awarded by the Department of Education under Title I, III, VI, and VII of the Rehabilitation Act of 1973, as amended. New Catalog of Federal Domestic Assistance (CFDA) numbers have been assigned for these programs and the new numbers are used in these notices. Other information concerning applications and grants is also provided to assist applicants. These notices cover all grant programs administered by the Rehabilitation Services Administration within the Department of Education.

PART I—PROGRAMS LISTED IN CHRONOLOGICAL ORDER

CFDA No. and program	Closing date
84.128A—Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals—Noncompeting Continuation Awards.	May 1, 1981.
84.128B—Projects with Industry—Noncompeting Continuation Awards.	May 1, 1981.
84.128C—Comprehensive Rehabilitation Continuation Awards.	May 1, 1981.
84.128E—Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Disabled Individuals (Spinal Cord Injury System Projects)—Noncompeting Continuation Awards.	May 1, 1981
84.128F—Client Assistance Projects—Noncompeting Continuation Awards.	May 1, 1981.
84.128G—Handicapped Migratory Agricultural and Seasonal Farmworker Vocational Rehabilitation Service Projects—Noncompeting Continuation Awards.	May 1, 1981.
84.132—Centers for Independent Living—Noncompeting Continuation Awards.	May 8, 1981.
84.129—Rehabilitation Long-Term Training—Noncompeting Continuation Awards.	May 18, 1981.
84.129D—Rehabilitation Continuing Education Programs—New and Noncompeting Continuation Awards.	May 18, 1981.

CFDA No. and program	Closing date
84.129Y—Experimental and Innovative Training Noncompeting Continuation Awards.	May 18, 1981.
84.129—Rehabilitation Long-Term Training—New Awards.	May 18, 1981.
84.129Z—State Vocational Rehabilitation Unit In-Service Training Program—New Awards.	May 18, 1981.
84.129F—Client Assistance Projects—New Awards.	June 10, 1981.
84.129G—Handicapped Migratory Agricultural and Seasonal Farmworker Vocational Rehabilitation Service Projects New Awards.	June 10, 1981.
84.129H—Handicapped American Indian Vocational Rehabilitation Service Projects—New Awards.	June 10, 1981.
84.129J—Projects for Initiating Special Recreation Programs for Handicapped Individuals—New Awards.	June 10, 1981.
84.129K—Special Projects and Demonstrations for Making Recreational Activities Accessible to Handicapped Individuals—New Awards.	June 10, 1981.
84.128A—Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals—New Awards.	June 10, 1981.
84.128E—Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals (Spinal Cord Injury System Projects)—New Awards.	June 10, 1981.
84.132—Centers for Independent Living—New Awards.	July 31, 1981.

PART II—APPLICATION NOTICES FOR EACH PROGRAM

84.128A—Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals

CLOSING DATE: May 1, 1981.

Applications are invited for noncompeting continuation projects under the Program of Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals. (This announcement does not cover Spinal Cord Injury System projects supported under this program.)

Authority for this program is contained in Section 311(a)(1) of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 777(a)(1))

Awards are made under this program to States and public and other nonprofit agencies and organizations.

The purpose of this program is to support projects designed to expand or otherwise improve vocational rehabilitation services and other services for severely handicapped individuals.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: To be assured of consideration for funding, an application for a noncompeting continuation award should be mailed or hand-delivered by May 1, 1981.

If the application is late, the U.S. Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.128A, Washington, D.C. 20202.

An application should show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education—

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets SW., Washington, D.C.

The Application Control Center will accept hand delivered applications between 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, or Federal holidays.

AVAILABLE FUNDS: Approximately $3.9 million is available for the support of noncompeting continuation projects in Fiscal Year 1981. This amount is sufficient to fund all eligible projects at the level of support projected for this fiscal year in the approved application.

However, these estimates do not bind the Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to all eligible applicants.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary strongly urges that the narrative portion of the application not exceed 15 pages in length. The Secretary further urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: The following regulations are applicable to this program:

(a) Regulations governing Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals (34 CFR Parts 369 and 373, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Wesley Geigel, Acting Director, Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, Department of Education, 400 Maryland Avenue, S.W., Room 3516, Mary E. Switzer Building, Washington, D.C. 20202. Telephone: (202) 245-3186.

(29 U.S.C. 711(a)(1))

84.128B—Projects With Industry

CLOSING DATE: May 1, 1981.

Applications are invited for noncompeting continuation projects under the Projects with Industry Program.

Authority for this program is contained in Section 621 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 759g)

Agreements are made under this program to employers and nonprofit organizations including any industrial, business or commercial enterprise; labor organization; employer, industrial or community trade organization; rehabilitation facility; or any other agency or organization with the capacity to arrange, coordinate or conduct training and other employment programs and provide supportive services and assistance for handicapped individuals in a realistic work setting.

The purpose of this program is to provide handicapped individuals with training, employment, and supportive services and assistance within business, industry, or other realistic work settings in order to prepare them for competitive employment and permit them to maintain their employment.

CLOSING DATE FOR TRANSMITTAL OF APPLICATION: To be assured of consideration for funding, an application for a noncompeting continuation award, should be mailed or hand delivered by May 1, 1981.

If the application is late, the U.S. Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail should be addressed to the U.S. Department of Education, Application Control Center, Attention 84.128B, Washington, D.C. 20202.

An application should show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stampted by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

AVAILABLE FUNDS: Approximately $5,500,000 is available for support of noncompeting cotinuation projects in Fiscal Year 1981. This is the same amount as was available in Fiscal Year 1980. The range of funded projects is expected to be from approximately $20,000 to $300,000.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to all applicants who are eligible to apply for noncompeting continuation support under this Notice.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 15 pages in length. The Secretary further urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Projects with Industry Program (34 CFR Parts 369 and 379, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Thomas J. Fleming, Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, 400 Maryland Avenue, S.W., Room 3518, Mary E. Switzer Building, Washington, D.C. 20202. Telephone (202) 245-3186.

(29 U.S.C. 759g)

84.128C—Comprehensive Rehabilitation Centers

CLOSING DATE: May 1, 1981.

Applications are invited for noncompeting continuation projects under the Comprehensive Rehabilitation Centers Program.

Authority for this program is contained in Section 305 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 775)

Awards are made under this program to State vocational rehabilitation units.

The purpose of the Comprehensive Rehabilitation Centers Program is to establish or operate comprehensive rehabilitation centers which serve primarily as centers for the development, delivery, and coordination of vocational rehabilitation services and other services needed by handicapped persons in the community.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: To be assured of consideration for funding, an application for a noncompeting continuation award, must be mailed or hand delivered by May 1, 1981.

If the application is late, the U. S. Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail should be addressed to the U. S. Department of Education, Application Control Center, Attention 84.128C, Washington, D. C. 20202.

An application should show proof of mailing consisting of one of the following:

(1) A legibly dated U. S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U. S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proff of mailing acceptable to the U. S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand-delivered must be taken to the U. S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S. W., Washington, D.C.

The Application Control Center will accept hand-delivered applications between the hours of 8:30 a.m. and 4:30 p.m. (Washington, D. C. time) daily, except Saturdays, Sundays, or Federal holidays.

AVAILABLE FUNDS: $2,000,000 is available for support of non-competing continuation projects in fiscal year 1981, the same amount as was available in fiscal year 1980. Funded projects are expected to be about $200,000 each.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to grantees who were awarded Comprehensive Rehabilitation Center projects during Fiscal Year 1980.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 15 pages in length. The Secretary further urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Comprehensive Rehabilitation Centers Program (34 CFR Parts 369 and 372, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Wesley Geigel, Director, Divisions of Rehabilitation Facilities, Rehabilitation Services Administration, Department of Education, Room 3616, Mary E. Switzer Building, 400 Maryland Avenue, SW., Washington, D.C. 20202. Telephone: (202) 245-0075.

(29 U.S.C. 775)

84.128E—Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Disabled Individuals (Spinal Cord Injury System Projects)

CLOSING DATE: May 1, 1981.

Applications are invited for noncompeting continuation projects under the Special Projects and Demonstrations for Providing Vocational Rehabilitation Service Program (Spinal Cord Injury System Projects).

Authority for this program is contained in Section 311(a)(1) of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 777(a)(1))

Awards are made under this program to States and public and other nonprofit agencies and organizations.

The purpose of this program is to support projects designed to expand or otherwise improve vocational rehabilitation services and other rehabilitation services for individuals with spinal cord injuries.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: To be assured of consideration for funding, an application for a noncompeting continuation award should be mailed or hand delivered by May 1, 1981.

If the application is late, the U.S. Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.128E, 400 Maryland Avenue, SW., Washington, D.C. 20202.

An application should show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, SW., Washington, D.C.

The Application Control Center will accept hand delivered applications between the hours of 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, or Federal holidays.

AVAILABLE FUNDS: Approximately $4.75 million is available for the support of noncompeting continuation projects in fiscal year 1981. This amount is sufficient to fund all eligible projects at approximately the same level of support as was provided in fiscal year 1980.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to all eligible applicants.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary strongly urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: The following regulations are applicable to this program.

(a) Regulations governing the Program of Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals (34 CFR Parts 369 and 373, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: J. Paul Thomas, Project Manager, Model Spinal Cord Injury Systems Program, Rehabilitation Services Administration, Department of Education, 400 Maryland Avenue, S.W., Room 3430, Mary E. Switzer Building, Washington, D.C. 20202. Telephone (202) 245-0515.

(29 U.S.C. 777(a)(1))

84.128F—Client Assistance Projects

CLOSING DATE: May 1, 1981.

Applications are invited for noncompeting continuation projects under the Client Assistance Projects Program.

Authority for this program is contained in Section 112 of the Rehabilitation Act of 1963, as amended. (29 U.S.C. 732)

Awards are made under this program to State vocational rehabilitation agencies.

The purpose of the Client Assistance Projects Program is to support projects designed to inform and advise all clients and client applicants in the project area of all available benefits and their rights in seeking these benefits under the Rehabilitation Act.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: To be assured of consideration for funding, an application for a noncompeting continuation award should be mailed or hand-delivered by May 1, 1981.

If the application is late, the U.S. Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

APPLICATION DELIVERED BY MAIL: An application sent by mail for a continuation project must be addressed to the appropriate Regional Office of the U.S. Department of Education as follows:

Region I

RSA Regional Commissioner, Department of Education, John F. Kennedy Federal Building, Room E-400, Government Center, Boston, Massachusetts 02203

Region II

RSA Regional Commissioner, Department of Education, 26 Federal Plaza, Room 4106, New York, New York 10007

Region III

RSA Regional Commissioner, Department of Education, 3535 Market Street, P.O. Box 13716, Philadelphia, Pennsylvania 19101

Region IV

RSA Regional Commissioner, Department of Education, 101 Marietta Street, N.W., Suite 903, Atlanta, Georgia 30323

Region V

RSA Regional Commissioner, Department of Education, 300 South Wacker Drive, 15th Floor, Chicago, Illinois 60606

Region VI

RSA Regional Commissioner, Department of Education, 1200 Main Tower Building, Room 2040, Dallas, Texas 75202

Region VII

RSA Regional Commissioner, Department of Education, 324 East 11th Street, Kansas City, Missouri 64106

Region VIII

RSA Regional Commissioner, Department of Education, Federal Office Building, Room 978, 19th and Stout Streets, Denver, Colorado 80294

Region IX

RSA Regional Commissioner, Department of Education, Federal Office Building, 50 United Nations Plaza, San Francisco, California 94102

Region X

RSA Regional Commissioner, Department of Education, Arcade Building, 1321 Second Avenue (MS 622), Seattle, Washington 98101

An application should show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the appropriate U.S. Department of Education Regional Office.

The Regional Office will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (local time) daily, except Saturdays, Sundays, and Federal holidays.

AVAILABLE FUNDS: Approximately $2,940,000 is available for support of noncompeting continuation projects in Fiscal Year 1981. This amount is sufficient to fund all eligible projects at the level of support projected for the appropriate budget period in the approved application.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to grantees who are eligible to apply for noncompeting continuation grant support under this Notice.

Applications must be prepared and submitted in accordance with the regulations, instruction, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 15 pages in length. The Secretary further urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Client Assistance Projects Program (34 CFR Parts 369 and 370, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Leslie B. Cole, Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, U.S. Department of Education, Room 3516, Mary E. Switzer Building, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone: (202) 245-3187.

(29 U.S.C. 732)

84.128G—Handicapped Migratory Agricultural and Seasonal Farmworker Vocational Rehabilitation Service Projects

CLOSING DATE: May 1, 1981.

Applications are invited for noncompeting continuation projects under the Handicapped Migratory Agricultural and Seasonal Farmworkers Vocational Rehabilitation Service Projects Program.

Authority for this program is contained in Section 312 of the Rehabilitation Act of 1973, as amended.

(29 U.S.C. 777(b))

Awards are made under this program to State vocational rehabilitation agencies or local agencies administering a vocational rehabilitation program under written agreements with State agencies.

The purpose of this program is to support projects for providing vocational services to handicapped migratory agricultural workers or handicapped seasonal farmworkers.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: To be assured of consideration for funding, an application for a noncompeting continuation award, should be mailed or hand delivered by May 1, 1981.

If the application is late, the U.S. Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail for a continuation project must be addressed to the appropriate Regional Office of the U.S. Department of Education as follows:

Region I

RSA Regional Commissioner,
Department of Education,
John F. Kennedy Federal Building, Room E-400,
Government Center,
Boston, Massachusetts 02203

Region II

RSA Regional Commissioner, Department of Education, 26 Federal Plaza, Room 4106, New York, New York 10007

Region III

RSA Regional Commissioner, Department of Education, 3535 Market Street, P.O. Box 13716, Philadelphia, Pennsylvania 19101

Region IV

RSA Regional Commissioner, Department of Education, 101 Marietta Street, N.W., Suite 908, Atlanta, Georgia 30323

Region V

RSA Regional Commissioner, Department of Education, 300 South Wacker Drive, 15th Floor, Chicago, Illinois 60606

Region VI

RSA Regional Commissioner, Department of Education, 1200 Main Tower Building, Room 2040, Dallas, Texas 75202

Region VII

RSA Regional Commissioner, Department of Education, 324 East 11th Street, Kansas City, Missouri 64106

Region VIII

RSA Regional Commissioner, Department of Education, Federal Office Building, Room 978, 19th and Stout Streets, Denver, Colorado 80294

Region IX

RSA Regional Commissioner, Department of Education, Federal Office Building, 50 United Nations Plaza, San Francisco, California 94102

Region X

RSA Regional Commissioner, Department of Education, Arcade Building, 1321 Second Avenue (MS 622), Seattle, Washington 98101

An application should show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the appropriate U.S. Department of Education Regional Office.

The Regional Office will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (local time) daily, except Saturdays, Sundays, and Federal holidays.

AVAILABLE FUNDS: Approximately $1,200,000 is available for support of noncompeting continuation projects in Fiscal Year 1981. This amount is sufficient to fund all eligible projects at the level of support projected for the appropriate budget period in the approved application.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to grantees who are eligible to apply for noncompeting continuation grant support under this Notice.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 15 pages in length. The Secretary further urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Handicapped Migratory Agricultural Farmworkers Vocational Rehabilitation Service Projects Program (34 CFR Parts 369 and 375, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Roberta Church, Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, U.S. Department of Education, Room 3516, Mary E. Switzer Building, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone (202) 245-3157.

(29 U.S.C. 777(b))

84.132—CENTERS FOR INDEPENDENT LIVING

CLOSING DATE: MAY 8, 1981.

Applications are invited for noncompeting continuation projects under the Centers for Independent Living Program.

Authority for this program is contained in Section 711 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 796e)

Awards are made under this program to State vocational rehabilitation units and nonprofit organizations which currently have approved projects under this authority.

The purpose of the Centers for Independent Living Program is to plan, establish, and operate centers for independent living which offer a combination of independent living services for severely handicapped individuals or groups of severely handicapped individuals so that they may live more independently in family and community, or secure and maintain employment, with the maximum degree of self-direction.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: To be assured of consideration for funding, an application for a noncompeting continuation award, must be mailed or hand delivered by May 8, 1981 for projects with September start date.

If the application is late, the U.S. Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail should be addressed to the U.S. Department of Education, Application Control Center, Attention 84.132, Washington, D.C. 20202.

An application should show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept hand-delivered applications between the hours of 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, or Federal holidays.

AVAILABLE FUNDS: Approximately $15,000,000 is available for support of noncompeting continuation projects in fiscal year 1981. This amount is sufficient to fund all eligible projects at approximately the same level as was provided in fiscal year 1980.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to grantees who were awarded Center for Independent Living projects during Fiscal Year 1980. Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 15 pages in length. The Secretary further urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Centers for Independent Living (34 CFR Part 366, 46 FR 5410, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: William J. Bean, Ph.D., Special Assistant for Independent

Living Projects, Rehabilitation Services Administration, Department of Education, Room 3216, Mary E. Switzer Building, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone: (202) 245-0755.

(29 U.S.C. 796e)

84.129—Rehabilitation Long-Term Training

CLOSING DATE: May 18, 1981.

Applications are invited for noncompeting continuation projects under the Rehabilitation Long-Term Training Program.

Authority for this program is contained in Section 304 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 774)

Awards are made under this program to State vocational rehabilitation agencies and other public or nonprofit agencies or organizations, including institutions of higher education.

The purpose of the Rehabilitation Long-Term Training Program is to support projects designed for training personnel available for employment in public and private agencies involved in the rehabilitation of physically and mentally handicapped individuals, especially those who are the most severely disabled.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: To be assured of consideration for funding, an application for a noncompeting continuation award, must be mailed or hand delivered by May 18, 1981.

If the application is late, the Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail for a continuation project (except for continuation applications in the field of Prosthetics-Orthotics and continuation applications for projects of national scope) must be addressed to the appropriate Regional Office of the Department of Education as follows:

Region I

RSA Regional Commissioner, Department of Education, John F. Kennedy Federal Building, Room E-400, Government Center, Boston, Massachusetts 02203

Region II

RSA Regional Commissioner, Department of Education, 26 Federal Plaza, Room 4106, New York 10007

Region III

RSA Regional Commissioner, Department of Education, 3535 Market Street, P.O. Box 13716, Philadelphia, Pennsylvania 19101

Region IV

RSA Regional Commissioner, Department of Education, 101 Marietta Street, N.W., Suite 903, Atlanta, Georgia 30323

Region V

RSA Regional Commissioner, Department of Education, 300 South Wacker Drive, 15th Floor, Chicago, Illinois 60606

Region VI

RSA Regional Commissioner, Department of Education, 1200 Main Tower Building, Room 2040, Dallas, Texas 75202

Region VII

RSA Regional Commissioner, Department of Education, 324 East 11th Street, Kansas City, Missouri 64106

Region VIII

RSA Regional Commissioner, Department of Education, Federal Office Building, Room 978, 19th and Stout Streets, Denver, Colorado 80294

Region IX

RSA Regional Commissioner, Department of Education, Federal Office Building, 50 United Nations Plaza, San Francisco, California 94102

Region X

RSA Regional Commissioner, Department of Education, Arcade Building, 1321 Second Avenue (MS 622), Seattle, Washington 98101

A noncompeting application sent by mail for a project in the field of Prosthetics-Orthotics or for a project of national scope must be addressed to the U. S. Department of Education, Application Control Center, Attention 84.129, Washington, D.C. 20202.

An application should show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the appropriate Department of Education Regional Office or, for projects in the field of Prosthetics-Orthotics or projects of national scope, to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

Each Regional Office and the Application Control Center will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (local time) daily, except Saturdays, Sundays, and Federal holidays.

AVAILABLE FUNDS: Approximately $13,000,000 is available for support of noncompeting continuation projects in Fiscal Year 1981. This reflects a reduction from the Fiscal Year 1980 level for the Rehabilitation Training Grant Program. The range of funded projects is expected to be from $25,000 to $175,000.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to grantees who have been conducting rehabilitation long-term training projects during the 1980-1981 academic year and who are eligible to apply for noncompeting continuation grant support under this Notice.

Application must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 15 pages in length. The Secretary further urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Rehabilitation Long-Term Training Program (34 CFR Parts 385 and 386, 45 FR 86378, December 30, 1980); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Harold F. Shay, Director, Division of Manpower Development, Rehabilitation Services Administration, Department of Education, Room 3321, Mary E. Switzer Building, 400 Maryland Avenue, S.W., Washington, D.C. 20202, telephone (202) 245-0079.

(29 U.S.C. 774)

84.129D—Rehabilitation Continuing Education Programs

CLOSING DATE: New Awards—May 18, 1981.

Noncompeting Continuations—May 18, 1981.

Applications are invited for new and noncompeting continuation projects under the Rehabilitation Continuing Education Program.

Authority for this program is contained in Section 304 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 774)

Awards are made under this program to State vocational rehabilitation agencies, and other public or nonprofit agencies and organizations, including institutions of higher education.

The purpose of this program is to support training centers that serve either a Federal region or another multi-State geographical area and provide for a broad integrated sequence of training activities that focus on meeting recurrent training needs of rehabilitation personnel employed in public and nonpublic programs providing rehabilitation services to severely physically and mentally disabled individuals.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: An application for a new grant must be mailed or hand delivered by May 18, 1981. To be assured of consideration for funding, an application for a noncompeting continuation award should be mailed or hand delivered by May 18, 1981. If an application for a noncompeting continuation award is received after that date, the Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

APPLICATIONS SENT BY MAIL: An application sent by mail for a Rehabilitation Continuing Education Program must be addressed to the appropriate Regional Office of the Department of Education as follows:

Region I

RSA Regional Commissioner, Department of Education, John F. Kennedy Federal Building, Room E–400, Government Center, Boston, Massachusetts 02203

Region II

RSA Regional Commissioner, Department of Education, 26 Federal Plaza, Room 4108, New York, New York 10007

Region III

RSA Regional Commissioner, Department of Education, 3535 Market Street, P.O. Box 13716, Philadelphia, Pennsylvania 19101

Region IV

RSA Regional Commissioner, Department of Education, 101 Marietta Street, NW., Suite 903, Atlanta, Georgia 30323

Region V

RSA Regional Commissioner, Department of Education, 300 South Wacker Drive, 15th Floor, Chicago, Illinois 60606

Region VI

RSA Regional Commissioner, Department of Education, 1200 Main Tower Building, Room 2040, Dallas, Texas 75202

Region VII

RSA Regional Commissioner, Department of Education, 324 East 11th Street, Kansas City, Missouri 64106

Region VIII

RSA Regional Commissioner, Department of Education, Federal Office Building, Room 270, 19th and Stout Streets, Denver, Colorado 80294

Region IX

RSA Regional Commissioner, Department of Education, Federal Office Building, 50 United Nations Plaza, San Francisco, California 94102

Region X

RSA Regional Commissioner, Department of Education, Arcade Building, 1321 Second Avenue (MS 622), Seattle, Washington 98101

An application for new awards must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

Applicants for new and noncompeting continuation projects are encouraged to use registered or at least first class mail. Each late applicant for a new project will be notified that its application will not be considered.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the appropriate Department of Education Regional Office. The Regional Office will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (local time) daily, except Saturdays, Sundays and Federal holidays.

An application for a new project that it hand delivered will not be accepted after 4:30 p.m. on the closing date.

AVAILABLE FUNDS: $2,925,000 is available for Rehabilitation Continuing Education Programs in fiscal year 1981. Funds are available within each Federal Region as follows:

Region I	[1] $237,467
Region II	293,557
Region III	362,280
Region IV	[2] 440,357
Region V	329,416
Region VI	345,910
Region VII	[1] 230,085
Region VIII	208,363
Region IX	[3] 279,638
Region X	209,925

[1] Noncompeting continuation only.
[2] $127,000 committed for noncompeting continuation only.
[3] $203,000 committed for noncompeting continuation only.

Those Regions in which all Fiscal Year 1981 funds are committed to noncompeting continuation grants are identified. No applications for new projects will be accepted in these Regions.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to grantees who have been conducting Rehabilitation Continuation Education Programs in fiscal year 1980. Additional forms and instructions may be obtained by writing to the appropriate Rehabilitation Services Administration Regional Commissioner in the Department of Education Regional Office.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not required.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Rehabilitation Continuing Education Programs (34 CFR Parts 385 and 389, 45 FR 86378, December 30, 1980); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Harold F. Shay, Director, Division of Manpower Development, Rehabilitation Services Administration, Department of Education, Room 3321, Mary E. Switzer Building, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone: (202) 245–0079.

(29 U.S.C. 774)

84.129Y—Experimental and Innovative Training

CLOSING DATE: May 18, 1981.

Applications are invited for noncompeting continuation projects under the Experimental and Innovative Training Program.

Authority for this program is contained in Section 304 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 774)

Awards are made under this program to State vocational rehabilitation agencies, and other public or nonprofit agencies and organizations, including institutions of higher education.

The purpose of this program is to train new types of rehabilitation personnel and to demonstrate new and improved methods of training rehabilitation personnel.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: To be assured of consideration for funding, an application for a noncompeting continuation award must be mailed or hand delivered by May 18, 1981.

If the application is late, the Department of Education may lack sufficient time to review it with other noncompeting continuation applications and may decline to accept it.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.129Y, Washington, D.C. 20202.

An application should show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Applicant Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (Washington, D.C. time), daily except Saturdays, Sundays, and Federal holidays.

AVAILABLE FUNDS: $1,000,000 is available for support of noncompeting continuation projects in Fiscal Year 1981. This amount reflects the over-all budgetary reduction from the Fiscal Year 1980 level for the Rehabilitation Training Program. The range of funded projects is expected to be from approximately $50,000 to $135,000 per project.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to September cycle grantees who have been conducting experimental and innovative training projects during the 1980–1981 academic year and who are eligible to apply for noncompeting continuation grant support under this Notice.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 15 pages in length. The Secretary also urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Experimental and Innovative Training Program (34 CFR Parts 385 and 387, 45 FR 86378, December 30, 1980); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Harold F. Shay, Director, Division of Manpower Development, Rehabilitation Services Administration, Department of Education, Room 3321, Mary E. Switzer Building, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone: (202) 245–0079.

(29 U.S.C. 774)

84.129—Rehabilitation Long-Term Training

CLOSING DATE: May 18, 1981.

Applications are invited for new projects under the Rehabilitation Long-Term Training Program.

Authority for this program is contained in Section 304 of the Rehabilitation Act of 1973, as amended.

(29 U.S.C. 774)

Awards are made under this program to State vocational rehabilitation agencies and other public or nonprofit agencies and organizations, including institutions of higher education.

The purpose of the Rehabilitation Long-Term Training Program is to support projects designed for training personnel available for employment in public and private agencies involved in the rehabilitation of physically and mentally handicapped individuals, especially those who are the most severely disabled.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: An application for a grant must be mailed or hand delivered by May 18, 1981.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail for a new rehabilitation long-term training project, must be addressed to the U.S. Department of Education, Application Control Center, Attention 84–129, Washington, D.C. 20202.

An application must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building No.

3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand delivered application between 8:30 A.M. and 4:30 P.M. (Washington, D.C. time), daily except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 P.M. on the closing date.

AVAILABLE FUNDS: Approximately $4,500,000 is available for support of new rehabilitation long-term training projects in fiscal year 1981. This reflects a reduction from the fiscal year 1980 budget level for the Rehabilitation Training Program. It is expected that about 95 new grants will be awarded. The range of funded projects is expected to be from approximately $25,000 to $175,000.

There will be separate competitions for each of the rehabilitation fields in which rehabilitation long-term training grants are awarded, if warranted by the number of new applications received in each field.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to grantees who have been conducting rehabilitation long-term training projects during the 1980–1981 academic year. Additional copies may be obtained by writing to the Division of Manpower Development, Rehabilitation Services Administration, Office of Special Education and Rehabilitative Services, U.S. Department of Education, Room 3321, Switzer Building, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instuctions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: Regulations to this program include the following:

(a) Regulations governing the Rehabilitation Long-Term Training Program (34 CFR Parts 385 and 386, 45 FR 86378, December 30, 1980); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Harold F. Shay, Director, Division of Manpower Development, Rehabilitation Services Administration, Department of Education, Room 3321, Mary E. Switzer Building, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone (202) 245–0079.

(29 U.S.C. 774)

84.129Z—State Vocational Rehabilitation Unit In-Service Training Program

CLOSING DATE: May 18, 1981.

Applications are invited for new projects under the State Vocational Rehabilitation Unit In-Service Training Program.

Authority for this program is contained in Section 304 of the Rehabilitation Act of 1973, as amended.

(29 U.S.C. 774)

Awards may be made under this program to State vocational rehabilitation agencies and other public or nonprofit agencies or organizations, including institutions of higher education.

The purpose of this program is to support special projects for training personnel employed by State vocational rehabilitation units in program areas essential to the effective management of the State unit program of vocational rehabilitation services or in skill areas which will enable State unit personnel to improve their ability to provide vocational rehabilitation services to severely handicapped individuals.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: An application for a grant must be mailed or hand delivered by May 18, 1981.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail for a State vocational rehabilitation unit in-service training project must be addressed to the appropriate Regional Office of the Department of Education as follows:

Region I

RSA Regional Commissioner, Department of Education, John F. Kennedy Federal Building, Room E–400, Government Center, Boston, Massachusetts 02203

Region II

RSA Regional Commissioner, Department of Education, 26 Federal Plaza, Room 4106, New York, New York 10007

Region III

RSA Regional Commissioner, Department of Education, 3535 Market Street, P.O. Box 13716, Philadelphia, Pennsylvania 19101

Region IV

RSA Regional Commissioner, Department of Education, 101 Marietta Street, NW., Suite 903, Atlanta, Georgia 30323

Region V

RSA Regional Commissioner, Department of Education, 300 South Wacker Drive, 15th Floor, Chicago, Illinois 60606

Region VI

RSA Regional Commissioner, Department of Education, 1200 Main Tower Building, Room 2040, Dallas, Texas 75202

Region VII

RSA Regional Commissioner, Department of Education, 324 East 11th Street, Kansas City, Missouri 64106

Region VIII

RSA Regional Commissioner, Department of Education, Federal Office Building, Room 978, 19th and Stout Streets, Denver, Colorado 80294

Region IX

RSA Regional Commissioner, Department of Education, Federal Office Building, 50 United Nations Plaza, San Francisco, California 94102

Region X

RSA Regional Commissioner, Department of Education, Arcade Building, 1321 Second Avenue (MS 622), Seattle, Washington 98101

An application must show proof of mailing consisting of one of the following:

1. A legibly dated U.S. Postal Service postmark.

2. A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

3. A dated shipping label, invoice, or receipt from a commercial carrier.

4. Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the appropriate Department of Education Regional Office.

The appropriate Regional Office will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (local time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

AVAILABLE FUNDS: $3,000,000 is available for State Vocational Rehabilitation Unit In-Service Training

in Fiscal Year 1981. The allowance for each Federal Region is as follows:

Region I	$240,502
Region II	253,086
Region III	307,411
Region IV	388,567
Region V	364,259
Region VI	359,927
Region VII	201,376
Region VIII	165,173
Region IX	261,248
Region X	157,482

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages will be mailed to grantees who have been conducting State vocational rehabilitation unit training projects during Fiscal Year 1980. Additional forms and instructions may be obtained by writing to the appropriate Rehabilitation Services Administration Regional Commissioner in the Department of Education Regional Office.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the State Vocational Rehabilitation Unit In-Service Training Program (34 CFR Parts 385 and 388, 45 FR 86378, December 30, 1980); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FOR FURTHER INFORMATION: Harold F. Shay, Director, Division of Manpower Development, Rehabilitation Services Administration, Department of Education, Room 3321, Mary E. Switzer Building, 400 Maryland Avenue SW., Washington, D.C. 20202, telephone (202) 245-0079.

(29 U.S.C. 774)

84.128F—Client Assistance Projects

CLOSING DATE: June 10, 1981.

Applications are invited for new projects under the Client Assistance Projects Programs.

Authority for this program is contained in Section 112 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 732)

Awards are made under this program to State vocational rehabilitation agencies.

The purpose of the Client Assistance Projects Program is to support projects designed to inform and advise all clients and client applicants in the project area of all available benefits and their rights in seeking these benefits under the Rehabilitation Act.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: An application for a new award must be mailed or hand delivered by June 10, 1981.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.128F, Washington, D.C. 20202.

An application must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

APPLICATION DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5073, Regional Office Building 3, 7th and D Streets SW., Washington, D.C.

The Application Control Center will accept hand delivered applications between 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

AVAILABLE FUNDS: Approximately $500,000 is available for support of new projects in Fiscal Year 1981. Based on an average grant amount of approximately $100,000, it is expected that about five or six new grants will be awarded. Projects may be funded up to five years, with annual renewal.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages are available and may be obtained by writing to the Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, U.S. Department of Education, Room 3516, Mary E. Switzer Building, 400 Maryland Avenue SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

SPECIAL PROCEDURES: Every applicant is subject to the State and areawide clearinghouse review procedures under OMB Circular A-95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A-95 requires the applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A-95 but did not receive any clearinghouse comments.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Client Assistance Projects Program (34 CFR Parts 369 and 370, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Leslie B. Cole, Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, U.S. Department of Education, Room 3516, Mary E. Switzer Building, 400 Maryland Avenue SW., Washington, D.C. 20202. Telephone: (202) 245-3187.

(29 U.S.C. 732)

84.128G—Handicapped Migratory Agricultural and Seasonal Farmworker Vocational Rehabilitation Service Projects

CLOSING DATE: June 10, 1981.

Applications are invited for new projects under the Handicapped Migratory Agricultural and Seasonal Farmworker Vocational Rehabilitation Service Projects Program.

Authority for this program is contained in Section 312 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 777(b))

Awards are made under this program to State vocational rehabilitation agencies or local agencies administering a vocational rehabilitation program under written agreements with State agencies.

The purpose of this program is to support projects for providing vocational rehabilitation services to handicapped migratory agricultural workers or handicapped seasonal farmworkers.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: An application for a grant award must be mailed or hand delivered by June 10, 1981.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.128G, Washington, D.C. 20202.

An application must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Pstal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail. Each later applicant will be notified that its application will not be considered.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets SW., Washington, D.C.

The Application Control Center will accept hand delivered applications between 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sunday, and Federal holidays.

AVAILABLE FUNDS: Approximately $330,000 is available for support of new projects in Fiscal Year 1981. Based on an average grant amount of approximately $110,000, it is expected that about three new grants will be awarded.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages may be obtained by writing to the Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

SPECIAL PROCEDURES: Every applicant is subject to the State and areawide clearinghouse review procedures under OMB Circular A–95.

An applicant should check with its appropriate Federal Regional Office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A–95 requires the applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A–95 but did not receive any clearinghouse comments.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Handicapped Migratory Agricultural and Seasonal Farmworkers Vocational Rehabilitation Service Projects Program (34 CFR Parts 369 and 375, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Roberta Church, Division of Innovative Programs and Demonstrations, Rehabilitation Services Adminstration, U.S. Department of Education, Room 3516, Mary E. Switzer Building, 400 Maryland Avenue SW., Washington, D.C. 20202. Telephone: (202) 245–3187.

(29 U.S.C. 777(b))

84.128H—Handicapped American Indian Vocational Rehabilitation Service Projects

CLOSING DATE: June 10, 1981.

Applications are invited for new projects under the Handicapped American Indian Vocational Rehabilitation Service Projects Program.

Authority for this program is contained in Section 130 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 750)

Awards are made under this program to the governing bodies of Indian tribes located on Federal and State reservations.

The purpose of the Handicapped American Indian Vocational Rehabilitation Service Program is to support projects designed to provide vocational rehabilitation services to handicapped American Indians who reside on Federal or State reservations in order to prepare them for suitable employment.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: An application for a grant must be mailed or hand-delivered by June 10, 1981.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.128H, Washington, D.C. 20202.

An application must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying

on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets SW., Washington, D.C.

The Application Control Center will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

AVAILABLE FUNDS: $650,000 is available for support of new projects in Fiscal Year 1981. It is expected that three new projects will be awarded. The range of funded projects is expected to be from approximately $125,000 to $400,000.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages may be obtained by writing to the Division of State Program Assistance, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue SW., Room 3211, Mary E. Switzer Building, Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

SPECIAL PROCEDURES: Every applicant is subject to the State and areawide clearinghouse review procedures under OMB Circular A-95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A-95 requires the applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A-95 but did not receive any clearinghouse comments.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Handicapped American Indian Vocational Rehabilitation Service Projects Program (34 CFR Parts 369 and 371, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Martin Spickler, Ph.D., Acting Associate Commissioner, Office of Program Operations, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue SW., Room 3030, Mary E. Switzer Building, Washington, D.C. 20202. Telephone (202) 245-0212.

(29 U.S.C. 750)

84.128J—Projects for Initiating Special Recreation Programs for Handicapped Individuals

CLOSING DATE: June 10, 1981.

Applications are invited for new projects under the Program of Projects for Initiating Special Recreation Programs for Handicapped Individuals.

Authority for this program is contained in Section 316 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 777f)

Awards are made to State and public and other nonprofit agencies and organizations.

The purpose of this program is to support projects which initiate programs of recreational services for handicapped individuals.

CLOSING DATE FOR TRANSMITTAL OF APPLICATION: An application for a grant award must be mailed or hand delivered by June 10, 1981.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.128J, Washington, D.C. 20202.

An application must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets SW., Washington, D.C.

The Application Control Center will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (Washington D.C. time) daily, except Saturdays, Sundays and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

AVAILABLE FUNDS: $2,000,000 is available for support of new projects in Fiscal Year 1981. It is expected that about 35 new grants will be awarded. The range of funded projects is expected to be from approximately $50,000 to $100,000.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages may be obtained by writing to the Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

SPECIAL PROCEDURES: Every applicant is subject to the State and areawide clearinghouse review procedures under OMB Circular A-95.

An applicant should check with its appropriate Federal Regional Office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A-95 requires the applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A–95 but did not receive any clearinghouse comments.

APPLICABLE REGULATIONS: Regulations applicable to this program include the following:

(a) Regulations governing the Projects for Initiating Special Recreation Programs for Handicapped Individuals (34 CFR Parts 369 and 378, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Wesley Geigel, Acting Director, Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, 400 Maryland Avenue SW., Room 3516, Mary E. Switzer Building, Washington, D.C. 20202. Telephone (202) 245–3186.

(29 U.S.C. 777f)

84.128K—Special Projects and Demonstrations for Making Recreational Activities Accessible to Handicapped Individuals

CLOSING DATE: June 10, 1981.

Applications are invited for new projects under the Program of Special Projects and Demonstrations for Making Recreational Activities Accessible to Handicapped Individuals.

Authority for this program is contained in Section 311(a)(3) of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 777a(a)(3))

Awards are made under this program to States and public and other nonprofit agencies and organizations.

The purpose of this program is to operate programs and, where appropriate, to renovate and construct facilities to demonstrate methods of making recreational activities fully accessible to handicapped individuals.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: An application for a grant must be mailed or hand delivered by June 10, 1981.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.128K, Washington, D.C. 20202.

An application must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets SW., Washington, D.C.

The Application Control Center will accept hand delivered applications between 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, or Federal holidays.

Applications that are hand delivered will not be accepted after 4:30 p.m. on the closing date.

AVAILABLE FUNDS: $1 million is available for the support of new projects in Fiscal Year 1981. It is expected that about five new grants will be awarded. The range of funded projects is expected to be from approximately $50,000 to $250,000.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages may be obtained by writing to the Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary strongly urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

SPECIAL PROCEDURES: Every applicant is subject to the State and areawide clearinghouse review procedures under OMB Circular A–95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A–95 requires the applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A–95 but did not receive any clearinghouse comments.

APPLICABLE REGULATIONS: The following regulations are applicable to this program:

(a) Regulations governing the Program of Special Projects and Demonstrations for making Recreational Activities Accessible to Handicapped Individuals (34 CFR Parts 369 and 374, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Wesley Geigel, Acting Director, Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, Department of Education, 400 Maryland Avenue SW., Mary E. Switzer Building, Washington, D.C. 20202. Telephone: (202) 245–3186.

(29 U.S.C. 777a(a)(3))

84.128A—Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals

CLOSING DATE: June 10, 1981.

Applications are invited for new projects under the Program of Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals. (This announcement does not cover Spinal Cord Injury System projects supported under this program.)

Authority for this program is contained in Section 311(a)(1) of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 777(a)(1))

Awards are made under this program to States and public and other nonprofit agencies and organizations.

The purpose of this program is to support projects designed to expand or otherwise improve vocational rehabilitation services and other rehabilitation services for severely handicapped individuals.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: An application for a grant must be mailed or hand delivered by June 10, 1981.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.128A, Washington, D.C. 20202.

An application must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail.

APPLICATIONS DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets SW., Washington, D.C.

The Application Control Center will accept hand delivered applications between the hours of 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

PROGRAM INFORMATION: In fiscal year 1981 applicants are encouraged to submit applications with a single disability focus which are designed to provide services in any of the following disability areas:

(a) Arthritis
(b) Blindness
(c) Cerebral Palsy
(d) Deafness
(e) Epilepsy
(f) Heart Disease
(g) Mental Illness
(h) Mental Retardation
(i) Multiple Sclerosis
(j) Specific Learning Disability

AVAILABLE FUNDS: Approximately $1,250,000 is available for the support of new projects under this program. Based on an average grant amount of approximately $125,000 it is expected that 10 new grants will be awarded.

These estimates do not bind the Department of Education to a specific number of grants or to the amount of any grant.

APPLICATION FORMS: Application forms and program information packages may be obtained by writing to the Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, Department of Education, 400 Maryland Avenue SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary strongly urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

SPECIAL PROCEDURES: Every applicant is subject to the State and areawide clearinghouse review procedures under OMB Circular A-95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A-95 requires the applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A-95 but did not receive any clearinghouse comments.

APPLICABLE REGULATIONS: The following regulations are applicable to this program:

(a) Regulations governing Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals (34 CFR Parts 369 and 374, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: Wesley Geigel, Acting Director, Division of Innovative Programs and Demonstrations, Rehabilitation Services Administration, Department of Education, 400 Maryland Avenue SW., Room 3516, Mary E. Switzer Building, Washington, D.C. 20202. Telephone: (202) 245-3186.

(29 U.S.C. 711(a)(1))

84.128E—Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals (Spinal Cord Injury System Projects)

CLOSING DATE: June 10, 1981.

Applications are invited for new Spinal Cord Injury System projects under the Program of Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals.

Authority for this program is contained in Section 311(a)(1) of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 777(a)(1))

Awards are made under this program to States and public and other nonprofit agencies and organizations.

The purpose of this program is to support projects designed to expand or otherwise improve vocational rehabilitation services and other rehabilitation services for individuals with spinal cord injuries.

CLOSING DATE FOR TRANSMITTAL OF APPLICATIONS: An application for a grant must be mailed or hand delivered by June 10, 1981.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.128E, 400 Maryland Avenue SW., Washington, D.C. 20202.

An application must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail. Each late application will be notified that its application will not be considered.

APPLICATION DELIVERED BY HAND: An application that is hand delivered must be taken to the U.S. Department of

Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets SW., Washington, D.C.

The Application Control Center will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

AVAILABLE FUNDS: Approximately $750,000 is available for the support of new projects in this grant program. Based on an average grant amount of approximately $250,000 it is expected that three new grants will be awarded.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages may be obtained by writing to: J. Paul Thomas, Project Manager, Model Spinal Cord Injury Systems Program, Rehabilitation Services Administration, Department of Education, 400 Maryland Avenue SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Secretary strongly urges that the narrative portion of the application not exceed 50 pages in length. The Secretary further urges that applicants not submit information that is not requested.

SPECIAL PROCEDURES: Every applicant is subject to the State and areawide clearinghouse review procedures under OMB Circular A–95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A–95 requires the applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A–95 but did not receive any clearinghouse comments.

APPLICABLE REGULATIONS: The following regulations are applicable to this program:

(a) Regulations governing Special Projects and Demonstrations for Providing Vocational Rehabilitation Services to Severely Handicapped Individuals (34 CFR Parts 369 and 373, 46 FR 5416, January 19, 1981); and

(b) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 75 and 77).

FURTHER INFORMATION: J. Paul Thomas, Project Manager, Model Spinal Cord Injury Systems Program, Rehabilitation Services Administration, Department of Education, 400 Maryland Avenue SW., Room 3430, Mary E. Switzer Building, Washington, D.C. 20202. Telephone: (202) 245–0515.

(29 U.S.C. 777(a)(1))

84.132—Centers for Independent Living

CLOSING DATE: July 31, 1981.

Applications are invited for new projects under the Centers for Independent Living Program.

Authority for this program is contained in Section 711 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 796e)

Awards are made under this program to the designated State vocational rehabilitation unit. Awards may also be made to local public agencies or private nonprofit orgranizations within a State, if the designated State Unit has not submitted an application within six months after the Commissioner begins accepting applications in any fiscal year. January 2, 1981, has been established as the date in fiscal year 1981 on which the Commissioner began to accept applications.

The purpose of the Centers for Independent Living Program is to plan, establish, and operate centers for independent living which offer a combination of independent living services for severely handicapped individuals or groups of severely handicapped individuals so that they may live more independently in family and community, or secure and maintain employment, with the maximum degree of self-direction.

CLOSING DATES FOR TRANSMITTAL OF APPLICATIONS: Applications for new awards must be mailed or hand delivered by July 31, 1981.

APPLICATIONS DELIVERED BY MAIL: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention 84.132, Washington, D.C. 20202.

An application must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with the local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

APPLICATIONS DELIVERED BY HAND: An application that is hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building No. 3, Seventh and D Streets SW., Washington, D.C.

The Application Control Center will accept a hand delivered application between 8:30 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

AVAILABLE FUNDS: Approximately $3,000,000 is available for support of new projects in Fiscal Year 1981. It is estimated that each new award will average $200,000.

However, these estimates do not bind the U.S. Department of Education except as may be required by applicable statute and regulations.

APPLICATION FORMS: Application forms and program information packages may be obtained by writing to the Special Assistant for Independent Living Projects, Rehabilitation Services Administration, U.S. Department of Education, Room 3216, Mary E. Switzer Building, 400 Maryland Avenue SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with regulations, instructions, and forms included in the program information packages. The Secretary strongly urges that the narrative portion of the application not exceed 25 pages in length. The Secretary further urges that applicants not submit information that is not requested.

PROGRAM INFORMATION: Section 711(a) of the Rehabilitation Act of 1973, as amended, authorizes the award of

grants to "any designated States unit which administers the State plan under Section 705 * * *," which by definition is the same unit which administers the State plan under Section 110 of the Title I Vocational Rehabilitation Program. However, the Act states in Section 711(d) that "If, within six months after the date in each fiscal year in which the Commissioner begins to accept applications from designated State units under this section, a designated State unit in a State has not submitted an application, the Commissioner may accept application for grants under this section from local public agencies or private nonprofit organizations within the State."

The effect of section 711(d) is to provide designated State Units of the respective States both priority access and preemptive access if that priority is exercised in any fiscal year to grants authorized by section 711 of the Rehabilitation Act.

In those States with two designated State Units, one serving the visually impaired or blind, and another State Unit serving all other disabilities, if either or both fail to apply within six months after the Commissioner begins to accept applications, the Commissioner may accept applications which are submitted by the closing date for local public agencies, or private nonprofit organizations within that State. In order to be advised of the possibility of participation in a timely manner, interested local public agencies or private, nonprofit organizations should get in touch with the State rehabilitation unit(s) in their respective State to determine if the State Unit(s) intends to apply during fiscal year 1981.

If any designated State Unit submits an application after the six month period described above but before the closing date, the application will be judged in competition with all other applications and will not preempt applications from local public agencies or private nonprofit organizations within the respective State.

SPECIAL PROCEDURES: Every applicant is subject to the State and areawide clearinghouse review procedures under OMB Circular A–95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A–95 requires the applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on the application.

In its application each applicant must provide—

(a) The comments of each clearinghouse that commented on the application; or

(b) A statement that the applicant used the procedures of Part I of OMB Circular A–95 but did not receive any clearinghouse comments.

APPLICABLE REGULATIONS: Regulations govering this program include the following:

(a) Regulations governing the Centers for Independent Living Program (34 CFR Part 366, 46 FR 5410, January 19, 1981); and

(b) Education Department General Administration Regulations (EDGAR) (34 CFR Parts 75 and 77).

FOR FURTHER INFORMATION CONTACT: William J. Bean, Ph.D., Special Assistant for Independent Living Projects, Room 3216, Mary E. Switzer Building, 400 Maryland Avenue SW., Washington, D.C. 20202. Telephone: (202) 245–0755.

(29 U.S.C. 796e)

Dated: March 13, 1981.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Office of the Secretary

Conduct of Employees; Notice of Waiver Pursuant to Section 605(a)(3) of the Department of Energy Organization Act (Pub. L. 95–91)

Section 605(a)(3) of the Department of Energy Organization Act (Pub. L. 95–91) authorizes the Secretary of Energy to waive the post-employment restrictions of section 605(a)(1) of the Department of Energy Organization Act to permit a former employee with outstanding scientific or technological qualifications to make appearances before or communications to the Department in connection with a particular matter in a scientific or technological field, where it has been determined that such a waiver would serve the national interest.

It has been established to my satisfaction that Philip R. Clark, formerly Associate Director for Reactors in the Division of Naval Reactors, has outstanding technological qualifications in the fields of nuclear power technology, reactor development and operation, and reactor core disposal. I am further satisfied that it serves the national interest to grant a waiver for Mr. Clark with respect to his activities as Vice President, Nuclear Activities, of the General Public Utilities Service Corporation relating to—

(1) evaluation, decontamination, and recovery of the Unit II nuclear power plant at the Three Mile Island nuclear power station,

(2) evaluation and resumption of operation of the Unit I nuclear power plant at the Three Mile Island nuclear power station, and

(3) disposal of radioactive waste from nuclear power plants situated at the Three Mile Island Nuclear Power Station and the Oyster Creek Nuclear Power Station.

I have, therefore waived the post-employment appearance and communication prohibitions of section 605(a)(1) of the Department of Energy Organization Act, with respect to contact with Department of Energy officials by Mr. Philip R. Clark in regard to the stated activities in his capacity as Vice President, Nuclear Activities, of the General Public Utilities Service Corporation.

Dated: March 12, 1981.

James B. Edwards,

Secretary of Energy.

[FR Doc. 81-8225 Filed 3-25-81; 8:45 am]

BILLING CODE 6450-01-M

Energy Policy Task Force; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Energy Policy Task Force.

Date and time: Thursday, April 30, 1981—1:00 p.m.

Place: Department of Energy, 1000 Independence Avenue, S.W., Forrestal Building, Room 4A110, Washington, D.C. 20585.

Contact: Georgia Hildreth Deputy Advisory Committee Management Officer, Department of Energy, Forrestal Building, Room 6G087, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Telephone: 202–252–5187.

Purpose of the task force: To advise the Department of Energy on the broad range of policy and programmatic issues in energy.

Tentative agenda:

- The purpose of the meeting is to draft a consensus document which will be considered by DOE, along with public comments, in the development of the National Energy Plan (NEP III).
- Public Comment (10 minute rule).

Public participation: The meeting is open to the public. Written statements may be filed with the Task Force either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact the Advisory Committee Management Office at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The

Chairperson of the Task Force is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Public Reading Room, Room 1E190, Forrestal Building 1000 Independence Avenue, S.W., Washington, D.C., between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Executive summary: Available approximately 30 days following the meeting from the Advisory Committee Management Office.

Issued at Washington, D.C., on March 20, 1981.

Georgia Hildreth,

Deputy Advisory Committee Management Officer.

[FR Doc. 8227 Filed 3-25-81; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

[Docket No. ERA-FC-80-029; CFC Case No. 61008-8049-01-12]

BASF Wyandotte Corp.; Order Granting Exemptions

AGENCY: Economic Regulatory Adminstration, Department of Energy.

ACTION: Order granting exemptions from the prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: On July 14, 1980, BASF Wyandotte Corporation (PWC) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) seeking a permanent exemption for a new major fuel burning installation (MFBI) from the provisons of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 et seq.) (FUA or the Act), which prohibit the use of petroleum or natural gas as a primary energy source in certain new MFBI's. Rules setting forth the procedure for petitioning and the criteria for exemptions from the prohibitions of FUA are contained at 10 CFR Parts 501 and 503 (45 FR 38270, June 6, 1980).

PWC requested a permanent fuels mixture exemption to burn petroleum or natural gas in a mixture with industrial waste gas in a 307 million BTU's per hour boiler to be installed at BWC's Geismar, Louisiana, facility.

Pursuant to section 212(d) of the Act, and subject to specified terms and conditions stated herein, ERA hereby issues this order granting a permanent fuels mixture exemption to BWC to permit the use of petroleum (No. 6 oil) or natural gas in a mixture with industrial waste gas. As specified in the terms and conditions, the amount of petroleum or natural gas used in the exempted unit shall not exceed 25 percent of the total annual BTU heat input of the primary energy sources used in the unit.

FOR FURTHER INFORMATION CONTACT:

Ellen Russell, Case Manager, New MFBI Branch, Office of Fuels Conversion, Economic Regulatory Administration, 2000 M Street, NW., Room 3128, Washington, DC 20461, (202) 653-4477

Douglas F. Mitchell, Office of the General Counsel, Department of Energy, 1000 Independence Avenue, SW, Forrestal Building, Room 6B-178, Washington, DC 20585, (202) 252-2967

The public file containing a copy of all documents and supporting materials on this proceeding is available for inspection upon request at: ERA, Room B-110, 2000 M Street, NW. Washington, DC, Monday through Friday, 8:00 a.m.-4:30 p.m.

SUPPLEMENTARY INFORMATION: In its petition for a permanent fuels mixture exemption for the 307 million BTU per hour field-erected boiler, BWC certified that the unit would not burn more than 25 percent petroleum or natural gas in a mixture with industrial waste gas (classified alternate fuels by ERA).

In accordance with the procedural requirements of FUA and FRA's regulations, ERA accepted BWC's petition and published notice of its acceptance in the **Federal Register** on September 12, 1980 (45 FR 60486). The Notice of Acceptance provided a 45-day public comment period during which interested persons could submit written comments on the petition for exemption and could request that a public hearing be convened. This period expired on October 27, 1980. No comments were received, nor was a public hearing requested.

ERA's staff reviewed the information contained in the record of this proceeding and prepared a Tentative Staff Analysis dated February 23, 1981, which recommended that ERA grant a permanent fuels mixture exemption to BWC permitting the use of a mixture of petroleum or natural gas and industrial waste gases in the boiler, provided that the amount of petroleum or natural gas used in the unit not exceed 25 percent of the total annual BTU heat input of the primary energy source used in the unit. A Notice of the Availablilty of the Tentative Staff Analysis on BWC's petition was published in the **Federal Register** on February 27, 1981 at 46 FR 14378. In that notice a 14-day period was provided for interested persons to submit written comments on the Tentative Staff Analysis or to request a public hearing. No comments were received, nor was a public hearing requested.

As required by section 701(f) and (g) of the Act, ERA provided copies of BWC's petition to the Environmental Protection Agency and the Federal Trade Commission for their comments. No comments have been received from either agency.

ERA has determined that BWC has satisfied the requirements of 10 CFR § 503.38(c). Accordingly, pursuant to section 212(d) of FUA, and subject to the terms and conditions stated below, ERA hereby grants BWC a permanent fuels mixture exemption to use a mixture of industrial waste gas and natural gas or petroleum in the new boiler in an amount not to exceed 25 percent of the total annual Btu heat input of the primary energy sources used in the boiler.

Terms and Conditions

Section 214(a) of the Act gives ERA the authority to attach terms and conditions to any order granting an exemption. Accordingly, this order is granted subject to the following terms and conditions:

1. The quality of any petroleum to be burned in the unit will be of the lowest grade available, which is technically feasible, and capable of being burned consistent with applicable environmental requirements.

2. The amount of natural gas or petroleum used in BWC's new boiler shall not exceed 25 percent of the total annual Btu heat input of the primary energy source of the unit.

3. In accordance with the reporting requirement in 10 CFR 503.38(g) BWC shall submit an annual report to the Economic Regulatory Administration (ERA), Case Control Unit (Fuel Use Act), Box 4629, Room 3214, 2000 M Street, NW., Washington, D.C. 20461, each year on the anniversary of the boiler being placed in service containing the following: A certified statement of the percentage of natural gas and petroleum used in the boiler, including an identification of the actual quantities of natural gas, petroleum and waste gases used, as well as the higher heating value of those fuels. The following format shall be used:

Fuel type	Amount used (MCF/bbls)	BTU equivalent	Percent of annual fuel consumption
Industrial waste gases			
Petroleum			
Natural gas			

On August 11, 1980, DOE published in the **Federal Register** (45 FR 53199) a notice of proposed amendments to the guidelines for compliance with the National Environmental Policy Act of 1979 (NEPA). The grant or denial of a permanent fuels mixture exemption under the provisions of 10 CFR 503.38(c) has been identified as an action which normally does not require an Environmental Impact Statement or an Environmental Assessment (categorical exclusion). This classification raises a rebuttable presumption that the grant or denial of the exemption will not significantly effect the quality of the human environment. BWC provided, as a part of its petition, a duly executed certification stating that prior to operating the boiler under the requested exemption it will secure all applicable environmental permits and approvals. The completed Environmental Checklist submitted by BWC pursuant to 10 CFR § 503.5(b) has been reviewed by DOE's Office of Environment, with consultation from the Office of the General Counsel. BWC responses to the questions contained therein indicate that the operations of the boiler will have no impact on those areas regulated by specified laws that impose consultation requirements on DOE, and otherwise affirms the applicability of the categorical exclusion to this FUA action. ERA has not received any public comments relating to this action which raise a substantial question regarding the categorical exclusion in this case. Therefore, no additional environmental review is deemed to be required.

Effective Date of Order

The exemption granted by this order shall become effective on May 26, 1981.

Judicial Review

Pursuant to section 702(c) of the Act, any person aggrieved by this order may at any time before (60 days after publication) may petition for judicial review in accordance with the procedures outlined in 10 CFR § 501.69.

Issued in Washington, D.C., on March 19, 1981.

Robert L. Davies,

Assistant Administrator, Office of Fuels Conversion, Economic Regulatory Administration.

[FR Doc. 81-9217 Filed 3-25-81; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Project Nos. 4015-000; 4019-000]

Arkansas Power & Light Co., and Arkansas Electric Cooperative Corp.; Application for Preliminary Permit

March 19, 1981.

Take notice that the Arkansas Power and Light Company (AP&L) filed on January 11, 1981, and the Arkansas Electric Cooperative Corporation (AEC) filed on January, 16, 1981, competing applications [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for preliminary permits for a proposed hydroelectric power project that would be known as the Lock and Dam No. 2 Project, FERC Project Nos. 4015 and 4019, respectively. The proposed project is located on the White River in Independence County, Arkansas. The applications are on file with the Commission and are available for public inspection. Correspondence with the Arkansas Power and Light Company, should be directed to: Mr. W. Henry Jones; Manager, Civil Engineering; Arkansas Power and Light Company; Post Office Box 551; Little Rock, Arkansas 72203. Correspondence with the Arkansas Electric Cooperative Corporation, should be directed to: Mr. Louis Fish, Assistant General Manager; Arkansas Electric Cooperative Corporation; 8000 Scott Hamilton Drive; Little Rock, Arkansas 72209. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project No. 4015 would consist of: (1) the existing Lock and Dam No. 2 (the dam is 31 feet high and has a crest length of 658 feet and the lock is 147 feet long and 38 feet wide); (2) a reservoir of negligible storage capacity; (3) a new powerhouse, adjacent to Lock No. 2, having a generating capacity of 8,400 kW; (4) a new switchyard; (5) a new transmission line; and (6) appurtenant facilities. AP&L estimates that the average annual energy output would be 48,000,000 kWh. The proposed Project No. 4019 would utilize the same lock and Dam No. 2 and its reservoir, and would also include a new powerhouse adjacent to Lock No. 2 having a generating capacity of 15,000 kW. AEC estimates that the average annual energy output would be 80,000,000 kWh. The owner of Lock and Dam No. 2 is the White River Investment Corporation.

Purpose of Project—AP&L proposes to utilize a portion of the energy generated and sell the remainder to the AEC and local municipalities. AEC proposes to utilize all the energy generated for the benefit of it's members.

Proposed Scope and Cost of Studies Under Permit—AP&L seeks issuance of a preliminary permit for a period of two years and AEC seeks issuance for a period of three years. Both Applicants would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, project power potential, and all information necessary for inclusion in an application for a license. AP&L estimates the cost of the studies under the preliminary permit to be between $20,000 and $50,000 and AEC estimated the cost to be between $38,000 and $80,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described applications for preliminary permit. (A copy of each application may be obtained directly from the respective Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before May 26, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than July

27, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (b) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about these applications should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before May 26, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4015 and/or 4019. Any comments, notices of intent, competing applications protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9110 Filed 3-25-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4038-000]

Cities of Oglesby and Ladd, Ill.; Application for Preliminary Permit

March 19, 1981.

Take notice that the Cities of Oglesby and Ladd, Illinois (Applicants) filed on January 21, 1981, a joint application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 4038 to be known as the Starved Rock Lock and Dam located on the Illinois River in La Salle County, Illinois. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Honorable Harry A. Volant, Mayor of Ladd, Main Stret, Ladd, Illinois 61329; Honorable Alan Pittman, Mayor of Oglesby, P.O. Box 10, Oglesby, Illinois 61348. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize the existing U.S. Army Corps of Engineers' Starved Rock Lock and Dam. The proposed project would consist of: (1) a proposed powerhouse containing five generating units with a total installed capacity of 9 MW; and (2) appurtenant facilities. The Applicant estimates that the average annual energy output would be 39.42 GWh.

Purpose of Project—The Applicants propose to utilize the power output generated within their respective cities. Any excess power would likely be sold to the Illinois Power Company.

Proposed Scope and Cost of Studies Under Permit—Applicant seeks issuance of a preliminary permit for a period of 24 months, during which time Applicant would accomplish hydrological, engineering, environmental, and economic feasibility studies on the project and prepare an application for FERC license. Applicant estimates cost of studies under its permit would be approximately $55,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—This application was filed as a competing application to Mitchell Energy Company Project No. 3568 filed on October 14, 1980, under 18 CFR (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 16, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made a response to this notice of application for preliminary permit for Project No. 4038. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower

Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Room 208 RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. RP80-146-001]

Columbia Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

March 19, 1981.

Take notice that Columbia Gas Transmission Corporation (Columbia) on March 13, 1981 tendered for filing the following revised tariff sheets to its FERC Gas Tariff:

Original Volume No. 1

Seventieth Revised Sheet No. 16
Eighteenth Revised Sheet No. 16A
Third Revised Sheet No. 16B

Original Volume No. 2

Substitute First Revised Sheet No. 693

Columbia states that the foregoing tariff sheets to Original Volume No. 1 are necessary in order to place into effect on April 1, 1981, which is the end of the suspension period, rates which comply with the conditions set forth in ordering Paragraph (E) of the Commission's suspension order herein of October 30, 1980. Columbia's filing is on file and subject to inspection in the Commission's Office of Public Information.

Columbia further states that substitute First Revised Sheet No. 693 to its Original Volume No. 2 is being reissued to reflect an effective date of April 1, 1981.

Copies of this filing were served upon the Company's jurisdictional customers, interested state commissions and to each of the parties set forth on the official service list in this proceeding.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before April 3, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. RP80-145-001]

Columbia Gulf Transmission Co.; Proposed Changes in FERC Gas Tariff

March 19, 1981.

Take notice that Columbia Gulf Transmission Company (Columbia Gulf) on March 13, 1981 tendered for filing the following revised tariff sheets to its FERC Gas Tariff to become effective April 1, 1981:

Original Volume No. 1

First Substitute Twenty-Sixth Revised Sheet No. 7

Original Volume No. 2

Substitute Seventh Revised Sheet No. 72
Substitute Seventh Revised Sheet No. 73
Substitute Fourth Revised Sheet No. 92
Substitute Fourth Revised Sheet No. 93
Substitute Fourth Revised Sheet No. 126
Substitute Fifth Revised Sheet No. 145
Substitute Fifth Revised Sheet No. 146
Substitute Fourth Revised Sheet No. 263
Substitute Third Revised Sheet No. 320
Substitute Third Revised Sheet No. 337
Substitute Third Revised Sheet No. 386
Substitute Third Revised Sheet No. 387
Substitute Second Revised Sheet No. 416
Substitute Second Revised Sheet No. 417
Substitute Third Revised Sheet No. 440
Substitute Third Revised Sheet No. 484
Substitute Third Revised Sheet No. 493
Substitute Third Revised Sheet No. 567
Substitute Third Revised Sheet No. 596
Substitute Second Revised Sheet No. 628
Substitute First Revised Sheet No. 663
Substitute First Revised Sheet No. 677
Substitute First Revised Sheet No. 702
Substitute Second Revised Sheet No. 750
Substitute Second Revised Sheet No. 820
Substitute Second Revised Sheet No. 821
Substitute Second Revised Sheet No. 848
Substitute Second Revised Sheet No. 849
Substitute First Revised Sheet No. 937
Substitute First Revised Sheet No. 1052
Substitute First Revised Sheet No. 1097

Columbia Gulf states that such tariff sheets are necessary to place its rates suspended by Commission Order issued October 30, 1980 in this proceeding into effect at the end of the prescribed suspension period and to consolidate proceedings herein with proceedings in Docket No. RP80-146. The rates contained in the subject tariff sheets to give effect to (1) the elimination of all costs associated with facilities which will not be in service by February 28, 1981; and (2) to give effect to change in its Account 282—Accumulated Deferred Income Taxes resulting from Internal Revenue Service Refund pursuant to Article VI B of the Approved Stipulation and Agreement at Docket No. RP76-94 et. al.

Copies of this filing were served upon all of columbia Gulf's jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before April 3, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Project No. 4194-000]

Indiana Municipal Power Agency; Application for Preliminary Permit

March 19, 1981.

Take notice that Indiana Municipal Power Agency (Applicant) filed on February 13, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for proposed Project No. 4194 to be known as Brookville Waterpower Project located on the East Fork Whitewater River in Franklin County, Indiana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Frank R. Rudolph, Chairman, Indiana Municipal Power Agency, 5920 Castleway West Drive, Indianapolis, Indiana 46250. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize an existing U.S. Army Corps of Engineers' dam and reservoir and the Applicant's facilities would be located mostly on U.S. lands. The proposed project would consist of: (1) an existing outlet conduit to be reinforced with a new steel liner; (2) a proposed penstock; (3) a proposed powerhouse containing generating units with a total installed capacity of 9.5 MW; (4) a proposed tailrace channel which would connect with the existing outlet channel; (5) proposed Transmission lines; and (6) appurtenant facilities. The Applicant estimates that the average annual energy output would be 25,800 MWh.

Purpose of Project—The power generated by the proposed project would be sold by the Applicant to his customers.

Proposed Scope and Cost of Studies Under Permit—Applicant has requested a 36 month permit to prepare a definitive project report, including preliminary design and economic feasibility studies, and soil and foundation data. The cost of the aforementioned activities along with obtaining agreements with other Federal, State, and local agencies is estimated to be $290,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Application—This application was filed as a competing application to Continental Hydro Corporation Project No. 3393 filed on August 27, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 16, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made a response to this notice of application for preliminary permit for Project No. 4194. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Room 208 RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9129 Filed 3-25-81; 8:45 am]
BILLING CODE 6450-85-M

[Docket No. ER81-181-000]

Bangor Hydro-Electric Co.; Electric Rates; Suspension; Denial of Rejection and Waiver; Summary Disposition; Intervention

Issued March 19, 1981.

Before Commissioners: Georgiana Sheldon, Acting Chairman; Matthew Holden, Jr., George R. Hall and J. David Hughes.

Order Accepting for Filing, and Suspending Proposing Rates, Denying Motion To Reject, Denying Waiver of Notice, Granting Summary Disposition, Granting Intervention, and Establishing Procedures

Background

On December 22, 1980, as completed on January 22, 1981,[1] Bangor Hydro-Electric Company (Bangor) filed a proposed increase in firm power rates to five wholesale customers.[2] The proposed rates would increase Bangor's revenues by approximately $194,136, or 16%, based on a twelve-month test period ending December 31, 1979.[3] Bangor requests an effective date of February 28, 1981, for the revised rates.

Notice of Bangor's submittal was issued on December 31, 1980, with protests or petitions to intervene due on or before January 15, 1981. On January 15, 1981, Eastern Maine Electric Cooperative Inc. (Eastern Maine) filed a protest, petition to intervene, and motion to reject or, in the alternative, for a five-month suspension. In support of its motion to reject, Eastern Maine asserted that Bangor's filing was deficient in a number of respects relating to demand and energy allocation.[4]

Eastern Maine also raised a number of issues regarding calculation of cash working capital, the inclusion of PURPA expenses and other items in rate base, Bangor's capital structure and requested return on common equity, and other cost of service issues which, according to Eastern Maine, warrant a five-month suspension of the proposed rates. On January 23, 1981, Lubec Water and Electric District (Lubec) filed a late protest and petition to intervene which adopted in its entirety the petition submitted by Eastern Maine.

---

[1] Bangor's submittal was not completed until January 22, 1981, when Bangor filed additional information in response to a deficiency letter of January 14, 1981.

[2] The customers are Stonington and Deer Isle Power and Light Company, Lubec Water and Electric District, Union River Electric Cooperative, Inc., Eastern Maine Electric Cooperative, and Swan's Island Electric Cooperative. *See* Attachment for A for rate schedule designations.

[3] The proposed rates, *inter alia*, would increase the demand charge from $4.15 to $7.00 per kW, change the energy charge from $.009 to $.0846 per kWh, and increase the minimum monthly charge from $311.25 to $525.00.

[4] Eastern Maine states that it did not have sufficient time to determine whether additional information submitted by Bangor immediately prior to Eastern Maine's pleading would cure the deficiencies in Bangor's filing.

On January 30, 1981, Bangor filed a response to Eastern Maine's petition, in which Bangor asserts that its original filing complied with the Commission's abbreviated filing requirements, and thus that its rates should be permitted to become effective sixty days after the date of its original tender.[5] In the alternative, Bangor requests a minimum suspension period for the proposed rates and any waiver of notice necessary to maintain its originally requested effective date of February 26, 1981.

Discussion

In its late petition to intervene, Lubec alleges that as a wholesale customer of Bangor it will be directly and adversely affected by the proposed rate increase, and that its interest will not be adequately represented by any other party to this proceeding. Although Lubec's petition was untimely filed, it will not delay this proceeding or prejudice the rights of any other party to permit Lubec's intervention. The Commission finds that participation in this proceeding by Lubec, as well as Eastern Maine, is in the public interest, and that good cause exists to grant Lubec's late petition to intervene. Accordingly, Lubec and Eastern Maine, will be permitted to intervene in this proceeding.

Bangor's filing as completed in accordance with the regulations on January 22, 1981, substantially complies with the Commission's filing requirements.[6] Therefore, we shall deny Eastern Maine's motion to reject the filing. Since the Commission does not find that good cause exists to waive the notice requirements, we shall also deny Bangor's request for waiver.

The inclusion of costs related to PURPA reporting requirements in Bangor's wholesale cost of service is prohibited by the Commission's regulations, and therefore will be summarily rejected.[7] In addition, as pointed out by Eastern Maine, Bangor has included in its rate base the unamortized portion of its investment in two cancelled nuclear generating plants which were to have been built by New England Power Company (NEP). In *New England Power Co.*, Opinion Nos. 49 and 49–A, issued July 19, 1979, and March 26, 1980, the Commission declined to permit NEP to reflect such a rate base inclusion for cancelled facilities. In subsequent suspension orders involving NEP, we have summarily rejected the company's requested rate base treatment.[8] Consistent with our resolution of this issue with respect to NEP's treatment of the same facilities, we shall summarily reject Bangor's rate base inclusion of the unamortized balance of its write-off. However, in light of the minimal impact on total revenue requirements of the two summary dispositions required by this order, Bangor will not be required immediately to refile its cost of service and rates to reflect the rejection of these items. Nonetheless, these adjustments must be reflected in the final compliance cost of service upon which the rates in this proceeding will ultimately be based. The Commission finds that the remaining issues raised by Eastern Maine and Lubec are appropriate issues for further consideration in the evidentiary hearing ordered below.

Our analysis indicates that Bangor's proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential, or otherwise unlawful. Accordingly, we shall accept the proposed rates for filing, as modified by summary disposition, and suspend them as ordered below.

In a number of suspension orders,[9] we have addressed the considerations underlying the Commission's policy regarding rate suspensions. For the reasons given there, we have concluded that rate filings should generally be suspended for the maximum period permitted by statute where preliminary study leads the Commission to believe that the filing may be unjust and unreasonable or that it may run afoul of other statutory standards. We have acknowledged, however, that shorter suspensions may be warranted in circumstances where suspension for the maximum period may lead to harsh and inequitable results. Such circumstances have been presented here. The Commission notes that while a number of substantive issues have been raised by the intervenors, our analysis indicates that the proposed rates may not produce excessive revenues. Thus, we do not believe that a maximum suspension is necessary or appropriate. A nominal suspension and a refund obligation should provide adequate protection to the affected customers pending the outcome of a hearing. Accordingly, we shall exercise our discretion to suspend the rates for only one day from 60 days after completion of the filing, permitting the rates to take effect subject to refund thereafter on March 25, 1981.

The Commission orders

(A) Eastern Maine's motion to reject Bangor's filing is hereby denied.

(B) Bangor's request for waiver of the Commission's notice requirements is hereby denied.

(C) Bangor's revised rates are hereby accepted for filing and suspended for one day, to become effective on March 25, 1981, subject to refund.

(D) Bangor's inclusion of costs related to PURPA reporting requirements in its jurisdictional cost of service and Bangor's rate base inclusion of the unamortized balance of its investment in cancelled nuclear facilities are hereby rejected. Such summary dispositions shall be reflected in any compliance cost of service upon which rates in this proceeding are ultimately based.

(E) Pursuant to the authority contained in, and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the DOE Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure, and the regulations under the Federal Power Act [18 CFR, Chapter I (1979)], a public hearing shall be held concerning the justness and reasonableness of Bangor's rates.

(F) Lubec's and Eastern Maine's petitions to intervene are hereby granted subject to rules and regulations of the Commission; *Provided however,* that participation by the intervenors shall be limited to matters set forth in their petitions to intervene; and *Provided, further,* that the admission of the intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders by the Commission entered in this proceeding.

(G) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days of the issuance of this order in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. Such conference shall be held for purposes of expediting discovery, establishing a procedural schedule, including submittal of a case-in-chief by Bangor, and pursuing other appropriate

[5] On February 5, 1981, Eastern Maine and Lubec filed a reply to Bangor's response. That pleading would not suggest determinations other than expressed herein.

BILLING CODE 6450-85-M

[Project No. 4217-000]

Mason County Public Utility District No. 3; Application for Preliminary Permit

March 19, 1981

Take notice that Mason County Public Utility District No. 3 (Applicant) filed on February 17, 1981, and application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for proposed Project No. 4217 to be known as Rock Creek Hydroelectric Project located on Rock Creek in Mason County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Dennis E. Rohr, General Manager, Mason County PUD No. 3, P.O. Box 400, Shelton, Washington 98584. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would consist of: (1) a 70-foot long, 30-foot high concrete thin arch diversion structure; (2) a 40-inch diameter, 3000-foot long penstock; (3) and above-ground concrete powerhouse containing a single generating unit with a rated capacity of 1,800 kW; and (4) appurtenant facilities. The Applicant estimates that the average annual energy output would be 6.1 million kWh.

Purpose of Project—Project energy would be used by the Applicant.

Proposed Scope and Cost of Studies Under Permit—Applicant has requested a 36-month preliminary permit to prepare a project report, including preliminary designs, and results of geological, hydrological, environmental and economic feasibility studies. Applicant has indicated that: (a) no new roads would be required for conducting the studies; and (b) no test pits, borings, or other foundation exploration would be required during the preliminary permit stage, as the facilities would be built on rocky formations. The cost of the above activities, along with preparation of an environmental inpact report, obtaining agreements with the Forest Service and other Federal, State, and local agencies, preparing a license application, conducting final field surveys and preparing designs is estimated by the Applicant to be $90,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before May 4, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of itent allows an interested person to file the competing application no later than July 6, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedures, 18 CFR § 1.8 or §1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in §1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before May 4, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4217. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, NW, Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative

of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9121 Filed 3-25-81; 8:45am]
BILLING CODE 6450-85-M

[Project No. 4245-000]

Municipal Electric Power Association of Virginia; Application for Preliminary Permit

March 19, 1981.

Take notice that Municipal Electric Power Association of Virginia (Applicant) filed on February 23, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 4245 to be known as Cave Run Lake Dam located on Licking River in Bath and Rowan Counties near Salt Lick and Farmers, Kentucky. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. R. M. Amyx, Executive Secretary, MEPAV, 311 Ironfronts, P.O. Box 753, Richmond, VA 23206. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize an existing U.S. Army corps of Engineers' dam and reservoir. Project No. 4245 would consist of: (1) a proposed intake section; (2) a proposed powerhouse located adjacent to and on the north side of the existing stilling basin; (3) proposed transmission lines; and (4) appurtenant facilities. The Applicant estimates the capacity of their proposed project to be 15.2 MW, and the annual energy output to be 36.6 GWh.

Purpose of Project—The Applicant would utilize its energy within its own power system.

Proposed Scope and Cost of Studies under Permit—Applicant has requested a 36 month permit to prepare a definitive project report, including preliminary design and economic feasibility studies, hydrological studies, environmental and social studies, and soil and foundation data. The cost of the aforementioned activities along with obtaining agreements with other Federal, State, and local agencies is estimated to be $230,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Application—This application was filed as a competing application to Eastern States Energy and Resources, Inc., Project No. 3421 filed on September 2, 1980, under 18 CFR (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 17, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4245. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Room 208 RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. EL80-36]

Southern California Edison Co.; Order Granting Motion to Withdraw Petition and Terminating Docket

Issued March 19, 1981

Before Commissioners: Georgiana Sheldon, Acting Chairman; Matthew Holden, Jr., George R. Hall and J. David Hughes.

On January 7, 1981, the United States Department of the Air Force (USAF) filed a motion to withdraw its prior pleading in this docket and to terminate the docket. The proceeding had been initiated by the USAF when it filed a motion on April 1, 1980, to compel Southern California Edison Company (Edison) to file with the Commission a contract between the USAF and Edison. The USAF also sought a declaratory order invalidating certain provisions of the contract. Notice of the motion to withdraw the prior pleading was issued on January 28, 1981, with protests due by February 13, 1981. No responses have been filed.

In its original filing, the USAF stated that the contract provided for Edison to wheel electrical energy allocated to the USAF from the Parker Davis project of the Western Area Power Authority to two delivery points at Edwards Air Force Base. According to the USAF, a dispute arose as to the treatment of this service in connection with the sale of electrical energy at retail by Edison to the USAF at a third delivery point. Notice of the USAF's original filing was issued on April 15, 1980, and Edison filed a timely petition to intervene and answer.

The USAF's filing of January 7, 1981, states that the parties have reached agreement and that there is no need to pursue this matter further. Edison has concurred in the motion to withdraw and to terminate.

Discussion

Under § 1.11(d)(2) of our Rules of Practice and Procedure, a pleading such as that of the USAF, which is in the nature of a complaint, may be withdrawn only upon express Commission approval. From the facts presented it appears that the parties no longer require Commission resolution of their controversy and that no interested party opposes termination of this docket. We therefore find that good cause exists to permit the USAF to withdraw its motion and petition, and we shall authorize such withdrawal. The Commission by this order expresses no opinion as to the merits of any contention raised in the pleadings.

The Commission orders:

(A) The USAF's motion to withdraw its April 1, 1980 motion and petition is hereby granted.

(B) Docket No. EL80-28 is hereby terminated.

(C) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

Transwestern Pipeline Co., et al.; Filing of Pipeline Refund Reports and Refund Plans

March 19, 1981.

Take notice that the pipelines listed in the Appendix hereto have submitted to the Commission for filing proposed refund reports or refund plans. The date of filing, docket number, and type of filing are also shown on the Appendix.

Any person wishing to do so may submit comments in writing concerning the subject refund reports and plans. All such comments should be filed with or mailed to the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before April 3, 1981. Copies of the respective filings are on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER80-38 and ER80-121]

West Texas Utilities Co., Filing

March 19, 1981.

The filing company submits the following:

Take notice that on February 24, 1981, West Texas Utilities Company ("WTU") submitted for filing an unexecuted service agreement between WTU and Western Farmers Electric Cooperative, Inc., providing for service by WTU to the cooperative under WTU's FERC Rate Schedule TR-1.

WTU states that copies of the filing have been sent to the cooperative and to the Public Utility Commission of Texas. WTU proposes to make the unexecuted service agreement effective as of June 5, 1980.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions of protest should be filed on or before April 7, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Project No. 4098-000]

The Wisconsin Public Power Incorporated System and the City of Black River Falls; Application for Preliminary Permit

March 19, 1981.

Take notice that Wisconsin Public Power Incorporated System and the City of Black River Falls (Applicant) filed jointy on February 2, 1981, an application for perliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for proposed Project No. 4098 to be known as Hatfield Dam located on the Black River in Jackson and Clark Counties, Wisconsin. The application is on file with the Commission and is availalbe for public inspection. Correspondence with the Applicant should be directed to: The Wisconsin Public Power Incorporated System c/o Richard Olson, P.O. Box 927, Madison, Wisconsin 53701. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize the exising Hatfield Dam and Lake Arbutus. Project No. 4098 would consist of: (1) a existing dam with a concrete overflow section having a maximum height of 52 feet and total length of 747 feet, and three embankment sections with a maximum height of 30 feet and a total length of 2400 feet; (2) an existing reservoir with a surface area of 945 acres at normal surface elevation of 885 feet. (m.s.l.), and a storage capacity of 10,800 acre-ft.; (3) an existing power canal; (4) three existing steel penstocks; (5) an existing powerhouse; (6) existing transmission lines; and (7) appurtenant facilities. Applicant estimates the installed capacity of the proposed project to be 6.0 MW.

The Applicant estimates that the average annual energy output would be 20 GHh.

Purpose of Project—Energy produced at Project No. 4098 would be delivered to Northern States Power Company for credit to municipal members of Wisconsin Public Power Incorporated or the City of Black River Falls.

Proposed Scope and Cost of Studies Under Permit—Applicant seeks issuance of a 36 month perliminary permit to prepare definitive project reports including preliminary structural evaluation, preliminary generation potential and final project feasibility assessment that will include environmental and social studies, and project impact on water resources. In addition, Federal, State, and local government agencies will be consulted concerning the environmental effects of the project. The cost of the studies is estimated to be $54,000.

Purpose of Preliminary Permit—A perliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the

proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments.—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Application.—Anyone desiring to file a competing application must submit to the Commission, on or before May 26, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than July 27, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions to Intervene.—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10. for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before May 26, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4096. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

National Petroleum Council, Air Quality Task Group of the Committee on Environmental Conservation; Meeting

Notice is hereby given that the Air Quality Task Group of the Committee on Environmental Conservation will meet in April and May 1981. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Environmental Conservation will analyze the environmental problems of the oil and gas industries and the impact of current environmental control regulations on the availability and costs of petroleum products and natural gas. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location and agenda of the Air Quality Task Group meetings follows:

The Air Quality Task Group will hold its third meeting on Wednesday, April 15, 1981, starting at 9:30 a.m., in the Mount Vernon Room, Sheraton-Carlton Hotel, 923 Sixteenth Street, N.W., Washington, D.C.; and the fourth meeting on Wednesday, May 20, 1981, at 9:30 a.m., in the Ohio Room, Capital Hilton Hotel, Sixteenth and K Streets, N.W., Washington, D.C.

The tentative agenda for the meeting follows:

1. Discuss Task Group assignments.
2. Review preliminary draft sections of the Task Group report.
3. Discuss any other matters pertinent to the overall assignment of the Air Quality Task Group.

The meeting is open to the public. The Chairman of the Air Quality Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Air Quality Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform L. A. Vickers, Office of Oil and Natural Gas, Fossil Energy, 202/633-8363, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room IE-190, DOE, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between the hours of 8 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on March 6, 1981.

Roger N. A. LeGassie,

Acting Assistant Secretary for Fossil Energy.

FEDERAL COMMUNICATIONS COMMISSION

[Report No. B-10]

AM Broadcast Applications Accepted for Filing and Notification of Cut-Off Date

Released: March 20, 1981.

Cut-Off Date: April 30, 1981.

The Commission has learned that one of the applications listed as accepted for filing on AM cut-off list B-8 (Mimeo No. 07040, released February 20, 1981) was omitted from the notice published in the **Federal Register** on February 23, 1981 (46 FR 13575).

Therefore, for the following applications, the March 30, 1981 cut-off date previously announced is hereby rescinded and a new cut-off date announced. Because these applications are in conflict with others previously accepted for filing and listed as subject to a cut-off date for conflicting applications, no application which would be in conflict with these applications will be accepted for filing. Petitions to deny these applications must be on file with the Commission not later than the close of business on April 30, 1981.

Minor amendments to these applications, and to those they are in conflict with, may be filed as a matter of

right not later than the close of business on April 30, 1981.

BILLING CODE 6712-01-M

Alfred E. Bloch; Order To Show Cause, Suspension and Designation Order

In the Matters of Revocation of License of Alfred E. Bloch, 5032 Oak Leaf Avenue, Carmichael, California 95608, (PR Docket No. 81–124); Licensee of Station KA6IVA in the Amateur Radio Service and Alfred E. Bloch, 5032 Oak Leaf Avenue, Carmichael, California 95608 (PR Docket No. 81–125); Licensee of Station KAOB–7346 in the Citizens Band Radio Service and Suspension of License of Alfred E. Bloch, 5032 Oak Leaf Avenue, Carmichael, California 95608, (PR Docket No. 81–126); and Novice Class Amateur Radio Operator License and Application of Alfred E. Bloch, 5032 Oak Leaf Avenue, Carmichael, California 95608, For Technician Class Amateur Radio Operator License (PR Docket No. 81–127). Order To Show Cause, Suspension and Designation Order designating applications for consolidated hearing on stated issues.

Adopted: March 9, 1981.

Released: March 16, 1981.

The Chief, Private Radio Bureau, has under consideration the Amateur radio station license, KA6IVA, the Novice Class Amateur radio operator license, and the Citizens Band radio station license, KAOB–7346, of Alfred E. Bloch. The Amateur licenses were issued for a five year term on January 4, 1980. The CB license was issued for a five year term on April 22, 1977. Also under consideration is Bloch's application to upgrade his Novice Class license to Technician Class dated January 23, 1980.

1. Information before the Commission indicates that on January 23, 1980, Robert G. Harkins appeared at the Commission's District Office in San Francisco, California, and submitted an Application for Individual Amateur Radio Station and/or Operator License (FCC Form 610) for a change of class of operators license from Novice to Technician Class in the name of Alfred E. Bloch. Harkins then proceeded to take the written portion of the Commission's examination (Element 3) associated with that application. Harkins signed all associated Commission examination papers with Bloch's name and otherwise represented to the Commission that he was Bloch, in an attempt to fraudulently obtain a Technician Class Amateur radio operator license for Bloch, in willful violation of Section 97.129 of the Commission's Rules.[1] The information further indicates that this was all done with the agreement, knowledge and consent of Bloch who paid Harkins one hundred dollars ($100.00) to take the examination for him.

2. On January 23, 1980, Bloch was issued an Interim Amateur Permit (FCC Form 660–B) authorizing him Technician Class privileges, based upon the successful completion of the above examination. Bloch voluntarily returned this permit to Commission authorities on April 28, 1980.

3. On June 8, 1978, Bloch was mailed a Notice of Violation/Notice of Apparent Liability to Monetary Forfeiture (FCC Form 793–L) for operating his CB station KAOB–7346, on an unauthorized frequency (Section 95.471 of the Commission's Rules) and failing to identify by his FCC-assigned call sign (Section 95.455(a) of the Commission's Rules) on May 18, 1978. At the inspection of his station on May 21, 1978, it was discovered that his CB station employed a non-type accepted transmitter (Section 95.641(c)(2) of the Commission's Rules).[2] Bloch was assessed a forfeiture of $150.00 which he paid on June 26, 1978.

4. Section 312(a)(2) of the Communications Act of 1934, as amended, provides that radio station licenses may be revoked "because of conditions coming to the attention of the Commission which would warrant it in refusing to grant a license . . . on an original application. Section 312(a)(4) of the Communications Act of 1934, as amended, provides that radio station licenses may be revoked for willful violation of the Commission's Rules. Section 303(M)(1)(F) of the Communications Act of 1934, as amended, provides that an operator license may be suspended upon proof sufficient to satisfy the Commission that the licensee has obtained or attempted to obtain an operator's license by fraudulent means. Accordingly, IT IS ORDERED that Bloch SHOW CAUSE why the licenses for Amateur radio station KA6IVA and for Citizens Band radio station KAOB–7346 SHOULD NOT BE REVOKED, and that Bloch's Novice Class Amateur radio operator's license IS SUSPENDED for the remainder of the license term. The suspension will be held in abeyance if Bloch requests a hearing or submits a written statement for consideration.[3]

3. It Is Further Ordered, that Bloch's application for a Technician Class Operator's license is designated for hearing on the issues specified below.

6. It Is Further Ordered, that if Bloch desires a hearing on the revocation, suspension and/or application matters, he must file a written request for a hearing within 30 days of his receipt of this Order.[4] [5] If a hearing is requested, the time, place, and Presiding Judge will be specified by subsequent order.

7. It Is Further Ordered, that if Bloch waives his right to a hearing on the revocation and/or the suspension matters, those matters will be certified to the Commission for administrative disposition pursuant to Section 1.92(c) of the Rules.[6] If Bloch does not file a written appearance in triplicate on the application matter, as required by Section 1.221(c), within 30 days of his receipt of this Order, the application will be dismissed with prejudice pursuant to Section 1.221(c).[7]

8. It Is Further Ordered, that the revocation, suspension, and application proceedings are consolidated for hearing pursuant to Section 1.227 of the Commission's Rules and shall be resolved upon the following issues:

(a) To determine whether Bloch fraudulently obtained or attempted to obtain a Technician Class Amateur radio operators license in wilful violation of Section 97.129 of the Commission's Rules.

(b) To determine whether on May 18, 1978, Bloch operated his CB station in wilful violation of Sections 95.455(a) and 95.471 of the Commission's Rules (Now CB Rules 30(a) and 17(a)).

(c) To determine whether on May 21, 1978, Bloch's CB station violated

[1] Section 97.129 of the Commission's Rules states that "[n]o licensed radio operator or other person shall obtain or attempt to obtain, or assist another to obtain or attempt to obtain, an operator license by fraudulent means."

[2] Part 95 of the Commission's Rules has been revised and renumbered. The rules cited herein are those which were in effect on the date of operation.

[3] Any contrary provisions of Section 1.85 of the Rules are waived.

[4] Any contrary provisions of Sections 1.85 and 1.221(c) of the Rules are waived.

[5] The enclosed form should be used to request or waive hearing. It should be returned to the Federal Communications Commission, Washington, D.C. 20554.

[6] Any contrary provisions of Section 1.85 of the Rules are waived.

95.641(c)(2) of the Commission's Rules (Now CB Rule 19(a)).

(d) To determine, in light of the evidence adduced pursuant to issues (a), (b), and (c), whether Alfred E. Bloch has the requisite qualifications to remain a Commission licensee.

(e) To determine whether the licenses for Amateur radio station KA6IVA and/or Citizens Band radio station KAOB-7346 should be revoked.

(f) To determine whether the suspension order for Bloch's Novice Class Amateur radio operator's license should be affirmed, modified, or dismissed.

(g) To determine whether the grant of Bloch's application for Technician Class Amateur radio operator's license would serve the public interest, convenience and necessity.

9. It Is Further Ordered, that the proceedings in this case shall be consolidated with the proceedings in the case of Robert G. Harkins (PR Docket Nos. 81-121, and 81-123), pursuant to Section 1.227 of the Rules.

10. It Is Further Ordered, that a copy of this Order shall be sent by Certified Mail—Return Receipt Requested and by Regular Mail to the licensee at his address of record (as shown in the caption).

Chief, Private Radio Bureau.

Raymond A. Kowalski,

Chief, Compliance Division.

[FR Doc. 81-9144 Filed 3-25-81; 8:45 am]

BILLING CODE 6712-01-M

Flanagan, Flanagan and Cross, Inc. and Columbia Women's Radio Inc.; Hearing Designation Order

In re Applications of Flanagan, Flanagan and Cross, Inc., Columbia, North Carolina; Req: 105.7 MHz, Channel 289, 100 kW (H&V), 456 feet (BC Docket No. 81-162, File No. BPH-790926AC) and Columbia Women's Radio, Inc., Columbia, North Carolina; Req: 105.7 MHz, Channel 289, 100 kW (H&V), 256 feet (BC Docket No. 81-163, File No. BPH-800519AC) for Construction Permit for a New FM Station. Hearing Designation Order designating applications for consolidated hearing on stated issues.

Adopted: March 4, 1981.

Released: March 17, 1981.

By the Chief, Broadcast Bureau:

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications of Flanagan, Flanagan and Cross, Inc. (Flanagan) and Columbia Women's Radio, Inc. (Columbia).

2. *Flanagan.* Section 73.210 of the Commission's Rules requires that the main studio of an FM station be located within the city of license, but that on a showing of good cause the main studio may be located outside that community. Flanagan proposes to locate its main studio 10.2 miles east of Columbia on Highway 64. Justification has not been provided for the proposed studio location. Accordingly, an issue will be specified.

3. *Columbia.* Analysis of the financial data submitted by Columbia reveals that $72,888.13 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment down payment	$23,750.00
Equipment payments with interest	6,819.63
Land	3,000.00
Building	6,000.00
Miscellaneous	13,500.00
Loan repayments	3,868.50
Operating costs (3 months)	14,250.00
Total	72,888.13

Columbia has shown only $69,000 is available from a bank loan and stock subscriptions to meet this requirement. Accordingly, a limited financial issue will be specified.

4. Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purpose of comparison, the areas and populations which would receive FM service of 1 mV/m or greater intensity, together with the availability of other primary aural services in such areas, will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to either of the applicants.

5. Except as indicated by the issue specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

6. Accordingly, It Is Ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications Are Designated for Hearing in a Consolidated Proceeding, before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine whether the proposal of Flanagan to locate its main studio outside its community of license is in compliance with Section 73.210 of the Commission's Rules with respect to location of the main studio, and if not, whether circumstances exist which warrant a waiver of that Section.

2. To determine with respect to Columbia:

(a) the source and availability of funds above the $69,000 indicated; and

(b) whether, in light of the evidence adduced pursuant to (a) above, Columbia is financially qualified to construct and operate the proposed station.

3. To determine which of the proposals would, on a comparative basis, better serve the public interest.

4. To determine, in the light of the evidence adduced pursuant to the foregoing issue, which of the applications, if either, should be granted.

7. It is Further Ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

8. It is Further Ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and Section 73.3594(g) of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by Section 73.3594(g) of the Rules.

Federal Communications Commission.

Richard J. Shiben,

Chief, Broadcast Bureau.

By:

Larry D. Eads,

Acting Chief, Broadcast Facilities Division, Broadcast Bureau.

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

[Interstate Commerce Commission Ex Parte No. 230 (Sub No. 5)]

Exemption of Joint Through Water/Rail Rates; Filing of Petition

Notice is given that a petition has been filed by the U.S. Flag Far East Discussion Agreement members asking this Commission to take action pursuant

to section 19 of the Merchant Marine Act, 1920, (the Act) (4 U.S.C. 876) with respect to the impending exemption of joint through water/rail rates announced by the Interstate Commerce Commission in its Ex Parte No. 230 (Sub No. 5)

Specifically this Commission is requested to take the following actions: (1) Pursuant to Section 19(1)(c) of the Act, ask the ICC to suspend or annul its announced rule in Ex Parte No. 230 (Sub No. 5) to exempt rail and truck service provided by rail carriers in connection with trailer on flatcar (TOFC) and container on flatcar (COFC) service for ex-water shipments from the provisions of Title 49, Subchapter IV of the U.S. Code, at least until the Commission is able to implement an appropriate regulatory regime covering joint through water/rail rates; and (2) If the ICC declines to accede to the above request, pursuant to Section 19(3) of the Act, the Commission should submit the facts of the matter to the President with a request to suspend or annul the ICC exemption order, at least for the time needed by the Commission to implement an appropriate regulatory regime.

Interested persons may inspect and obtain a copy of the petition at the Washington Office of the Federal Martime Commission, 1100 L Street, N.W., Room 11101, or may inspect the petition at the Field Offices located at New York, New York; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested persons may submit comments to the Secretary, Federal Maritime Commission, Washington, D.C. 20573 on or before April 16, 1981. An original and fifteen copies of such comments shall be submitted and a copy thereof served on petitioner.

By the Commission: March 18, 1981.

Joseph C. Polking,

Acting Secretary.

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Notice of Proposed de Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and, except as noted, received by the appropriate Federal Reserve Bank not later than April 19, 1981.

A. *Federal Reserve Bank of New York* (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

Barclays Bank Limited and Barclays Bank Internation Limited, London, England (commercial finance; Southern California): to relocate the operations of their subsidiary, BarclaysAmerican/Business Credit, Inc., from an office at 1901 Avenue of the Stars, Los Angeles, California, to offices at the following three locations: 3550 Wilshire Boulevard, Los Angeles, California; 18321 Ventura Boulevard, Tarzana, California; 18662 MacArthur Boulevard, Irvine, California. The subsidiary engages in making secured commercial loans to small and medium-sized businesses, and serves Los Angeles, Orange, and surrounding counties.

B. *Federal Reserve Bank of Chicago* (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. St. Joseph Bank and Trust Company, South Bend, Indiana (mortgage banking acitivites; Michigan): to engage,through its indirect subsidiary, St. Joseph Mortgage Co., Inc., South Bend, Indiana, in originating, acquiring, selling, and servicing residential, commercial, and industrial mortgage loans. These activities would be conducted from an office in the vicinity of 3777 Sparks Drive S.E., Grand Rapids, Michigan, serving an area within a 50-mile radius of Grand Rapids, Michigan.

2. St. Joseph Bank and Trust Company, South Bend, Indiana (mortgage banking activities; Michigan): to engage, through its indirect subsidiary, St. Joseph Mortgage Co., Inc., South Bend, Indiana, in originating, acquiring, selling, and servicing residential, commercial, and industrial mortgage loans. These activities would be conducted from an office in the vicinity of 3715 West Main Street, Kalamazoo, Michigan, serving an area within a 50-mile radius of Kalamazoo, Michigan.

C. *Federal Reserve Bank of Kansas City* (Thomas M. Hoenig, Assistant Vice President) 925 Grand Avenue, Kansas, City, Misouri 64198:

Farmers Enterprises, Inc., Albert, Kansas (finance activities; Kansas): to engage in the activity of making loans and other extensions of credit for the account of its subsidiary bank. This activity would be conducted from an office in Great Bend, Kansas, serving Barton County, Kansas. Comments on this application must be received not later than April 24, 1981.

D. *Other Federal Reserve Banks:* None.

Board of Governors of the Federal Reserve System, March 20, 1981.

Jefferson A. Walker,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Delhi Bancshares, Inc.; Formation of Bank Holding Company

Delhi Bancshares, Inc., Delhi, Iowa, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 98.2 percent of the voting shares of Delhi Savings Bank, Delhi, Iowa. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Delhi Bancshares, Inc., Delhi, Iowa, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire Delhi Insurance Agency, Delhi, Iowa, and thereby to engage in the activities of acting as general insurance agent in a town with a population of less than 5,000. These activities would be performed from offices of Applicant's subsidiary savings bank in Delhi, Iowa, and the geographic area to be served is Delhi, Iowa, and its immediate surrounding area. Such activities have been specified by the Board in section 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 16, 1981.

Board of Governors of the Federal Reserve System, March 19, 1981.

Jefferson A. Walker,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

FOREIGN CLAIMS SETTLEMENT COMMISSION

Privacy Act of 1974; Vietnam Claims Program Records System Notice and Systems of Records Annual Publication

AGENCY: Foreign Claims Settlement Commission of the United States.

ACTION: Notice.

SUMMARY: The Foreign Claims Settlement Commission (FCSC) hereby publishes for comment an additional records system to be established on April 28, 1981 and designated "FCSC–34," "Vietnam, Claims for Losses Against." Any person interested in commenting on this system may do so by submitting comments in writing to

the Office of the Executive Director, (Privacy Officer), Foreign Claims Settlement Commission, 1111–20th Street, N.W., Washington, D.C. 20579. Comments must be submitted on or before April 27, 1981. This additional record system will be added to the present Privacy Act System of Records.

EFFECTIVE DATE: The system of records designated "Vietnam Claims for Losses Against" shall be established and become effective on April 28, 1981 as published hereinafter unless amended by notice published prior to that date. The existing systems of records continue in effect.

FOR FURTHER INFORMATION CONTACT: Karl D. Klauck, Deputy General Counsel, Foreign Claims Settlement Commission, 1111–20th Street, N.W., Washington, D.C. 20579; Telephone No. (202) 653–6166.

SYSTEM NAME:

Vietnam, Claims for Losses Against

SYSTEM LOCATION:

Foreign Claims Settlement Commission, 1111 20th Street, N.W., Washington, D.C. 20579.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Natural and Juridical persons who allege losses against Vietnam.

CATEGORIES OF RECORDS IN THE SYSTEM:

Claim application form containing name and address of claimant and representative, if any; date and place of birth or naturalization; nature and amount of claim; description, ownership, and value of the property; and evidence to support claim for the purpose of receiving compensation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title VII, International Claims Settlement Act of 1949, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records are used for the purpose of adjudicating claims of individuals; issuance of decisions concerning eligibility to receive compensation under the Act; notifications to claimants of rights to appeal; and preparation of certifications of awards, if any, to Treasury Department for payment. Names and other information furnished by claimants may be used for verifying citizenship status with INS. The information contained in this system of records is considered by the Commission to be public information which may be disclosed as a routine use to interested persons who make inquiries about the claims program or individual claims therein including but limited to members of Congress or Congressional staff, staff of the Office of Management and Budget, other persons interested in the work of the Commission, and members of the news media.

Law Enforcement: In the event that a system of records maintained by FCSC to carry out its functions indicates a violation or potential violation of law, whether civil or criminal or regulatory in nature, and whether arising by general statute or particular program statute or order issued pursuant thereto, the relevant records in the system or records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM

STORAGE:

Paper records maintained in file folders.

RETRIEVABILITY:

Filed numerically by claim number.

Alphabetical index used for identification of claim.

Indexing by other information in the claim.

SAFEGUARDS:

At FCSC: Building employs security guards.

Records are maintained in locked room accessible to authorized FCSC personnel and other persons when accompanied by such personnel.

RETENTION AND DISPOSAL:

Records maintained under 5 U.S.C. 301. Disposal of records will be in accordance with 44 U.S.C. 3301–3314 when such records are determined no longer useful.

SYSTEM MANAGER(S) AND ADDRESS:

Office of the Executive Director, Foreign Claims Settlement Commission, 1111 20th Street, N.W. Washington, D.C. 20579. (Phone 202/653–6156)

NOTIFICATION PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Claimant on whom the record is maintained.

Annual Publication: The purpose of this document is to give notice that the Privacy Act Systems of Records identified in a notice published at 42 FR 48152, September 22, 1977, with amending notices published at 42 FR 57346, November 2, 1977, and at 44 FR 58542, October 10, 1979, continues in effect without change.

Dated at Washington, D.C. on March 23, 1981.

Richard W. Yarborough,

Chairman.

BILLING CODE 4410-01-M

GENERAL ACCOUNTING OFFICE

Regulatory Reports Review; Violation of Federal Reports Act

Notice is hereby given that the Federal Communications Commission has promulgated the following revised information collection requirement without first obtaining clearance from the General Accounting Office as required by the Federal Reports Act, 44 U.S.C. 3512 (1976):

The FCC is using Form 753, Restricted Radiotelephone Operator Permit Application. The form is not the one that was approved by the Comptroller General on August 24, 1978, B–180227 (R0222). The FCC materially revised the form by adding a new question to the form after approval was granted. The form also incorporates a temporary permit under the same title which was approved as Form 753–T, B–180227 (R0638). These changes constitute a revision of the form which requires another clearance under 44 U.S.C. 3512.

Section 3512(c) of title 44, United States Code, provides in part:

> * * * an independent regulatory agency shall not conduct or sponsor the collection of information upon an identical item from ten or more persons, other than Federal employees, unless, in advance of adoption or revision of any plans or forms to be used in the collection—
>
> (1) the agency submitted to the Comptroller General the plans or forms, together with the copies of pertinent regulations and of other related materials as the Comptroller General has specified, and
>
> (2) the Comptroller General has advised that the information is not presently available to the independent agency from another source within the Federal Government and has determined that the proposed plans or forms are consistent with the provisions of this section. * * *

The clearance granted by GAO on August 24, 1978, is hereby revoked. Accordingly, the Commission has no effective clearance for Form 753,

Restricted Radiotelephone Operator Permit Application, currently in use as required by the Federal Reports Act.

Norman F. Heyl,

Regulatory Reports Review Officer.

BILLING CODE 1610-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service
Centers for Disease Control

Cooperative Agreements for State-Based Diabetes Control Programs; Availability of Funds Based on the Fiscal Year 1981 Continuing Resolution

The Centers for Disease Control (CDC) announces the availability of funds for fiscal year 1981 for cooperative agreements for State-based diabetes Control Programs, Catalog of Federal Domestic Assistance Number 13.283. This cooperative agreement program, authorized by Section 301(a) (42 U.S.C. 241a) of the Public Health Service Act, as amended, was announced in the Federal Register (45 FR 30140) dated May 7, 1980.

The objective of the cooperative agreement program is to improve the quality of life and the effectiveness of health services for diabetics. Eligible applicants are official State health agencies. Applicants must complete a baseline assessment of diabetes morbidity and mortality data and care resources information; establish a framework for coordination of interested parties; and develop a plan of action for reducing diabetes morbidity, mortality, and economic costs among intervention populations.

It is expected that approximately $3 million will be available in fiscal year 1981 for cooperative agreements for State-based Diabetes Control Programs. Of this amount, $2,715,000 has already been awarded to the 12 States changing to cooperative agreements from contract programs begun in fiscal year 1977. It is anticipated that the remaining $285,000 will be available for award to supplement the 12 diabetes programs funded in fiscal year 1981 and the 8 begun in fiscal year 1980. Individual supplemental awards are not expected to exceed $50,000. No new cooperative agreements are planned during fiscal year 1981. Cooperative agreements are usually funded for 12 months in a 3 to 5 year project period. Funding estimates outlined above may vary and are subject to change due to the uncertainties in the appropriation process.

Applicants are encouraged to collaborate with schools of medicine and/or public health and other selected diabetes education and care providers on the development of their proposals. Priorities for awarding these supplemental funds in fiscal year 1981 will include but will not be limited to the following:

1. Epidemiologic investigations to identify and describe diabetic populations with higher rates of perinatal morbidity and mortality, nephropathy, retinopathy and/or lower extremity amputations, and the causal factors associated with these higher rates.

2. Epidemiologic investigations that describe and compare hospitalization rates, lower extremity amputation rates, mortality rates, and/or other acute complication rates in Type I, insulin-dependent diabetes mellitus (IDDM) and Type II, noninsulin-dependent diabetes mellitus (NIDDM), diabetics.

3. Studies concerning the effect of different diabetic education and self-care methodologies on the incidence of acute complications (e.g., diabetic ketoacidosis) in specific diabetic populations.

4. Assessment of the validity/reliability of process and outcome indicators proposed in the working draft of the CDC-State recommendations for measuring the effectiveness of patient and professional education.

5. Special pilot study concerning implementation and evaluation of State-based program performance indicators/measures recommended in *The Final Report of the Evaluability Assessment of the CDC Diabetes Control Program.*

6. Development of a model training program for State-based diabetes control program managers and/or technical staff in chronic diseases epidemiology.

7. Development of strategies for the translation and dissemination of new and efficacious knowledge in diabetes health care delivery into the primary care setting. These strategies, in particular, should include involvement of schools of medicine and/or public health and other selected diabetes education and care providers in the actual implementation and evaluation of proposal activities.

Supplemental applications should be submitted on or before May 15, 1981. Due to the time limitations for awarding these funds before September 30, 1981, it may not be possible to consider applications received after may 15, 1981.

Supplemental applications are subject to review as governed by OMB Circular A-95 and the National Health Planning and Resources Development Act, Pub. L. 93-641, as amended. Guidelines, application forms, and information may be obtained from and applications must be submitted to Grants Management Officer, Procurement and Grants Office, Centers for Disease Control, Atlanta, Georgia 30333.

Dated: March 19, 1981.

William C. Watson, Jr.,

Acting Director, Centers for Disease Control.

BILLING CODE 4110-86-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection

[Docket No. N-81-1054]

Brooks Engineering Co.; Hearing

AGENCY: Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection, HUD.

ACTION: Notice of hearing in the matter of Brooks Engineering Company, 43-80-MH.

SUMMARY: A hearing pursuant to 24 C.F.R. 3282.152 will commence at 10:00 a.m. on May 13, 1981 at University North Building, Suite 1170, 1875 Connecticut Ave., N.W., Washington, D.C. 20009, on the Department of Housing and Urban Development's preliminary determination to disqualify Brooks Engineering Company, 801 Old Spanish Trail—Suite 101, Slidell, Louisiana 70458, as a design Approval Primary Inspection Agency and Production Inspection Primary Inspection Agency.

FOR FURTHER INFORMATION CONTACT: Honorable Martin J. Linsky, Administrative Law Judge, Universal North Building, Room 1170, 1875 Connecticut Avenue, N.W., Washington, D.C.

SUPPLEMENTARY INFORMATION: Brooks Engineering Company, (BEC), was granted provisional acceptance to perform Design Approval Primary Inspection Agency (DAPIA) functions on September 28, 1976. This provisional acceptance was ultimately extended to April 1, 1978. On January 11, 1979, BEC was granted full acceptance to perform DAPIA functions, contingent upon continued adequacy of performance as assessed under 24 C.F.R. 3282.451-.454. Only July 9, 1980, the Department's contractor, the National Conference of

States on Building Codes and Standards, Inc., (NCSBCS), submitted a DAPIA Performance Review rating BEC "Not Adequate".

Brooks Engineering Company was granted full acceptance to perform Production Inspection Primary Inspection Agency (IPIA) functions on July 6, 1978. BEC's IPIA performance was subsequently rated inadequate in a NCSBCS IPIA Performance Review dated August 8, 1980.

On January 6, 1981, the Department issued two letters notifying BEC that the Secretary has preliminarily determined that BEC should be disqualified as a DAPIA and as an IPIA pursuant to 24 CFR 3282.356. BEC requested a hearing on the matter in a letter dated January 12, 1981.

A hearing will commence at 10:00 a.m. on May 13, 1981 before the Honorable Martin J. Linsky at the address set forth above. The hearing will be held in accordance with 24 CFR 3282.152 (g) and 5 U.S.C. 556.

Interested persons may participate in writing and in the oral portion of the hearing pursuant to 24 C.F.R. 32382.153. The presiding officer may determine that such participation should be limited or barred so as not to unduly prejudice the rights of the parties involved or unnecessarily delay the proceedings.

Issued at Washington, D.C., March 23, 1981.

William O. Anderson,

General Deputy Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer protection.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Canada Goose Management Program, Wisconsin; Meeting

As authorized by the Fish and Wildlife Act of 1956 (16 USC 742a *et seq.*), announcement is made of the following public meeting:

The U.S. Fish and Wildlife Service, in cooperation with the Wisconsin Department of Natural Resources, will conduct a public meeting to obtain comments on (1) the results of the Canada goose management program conducted in east-central Wisconsin during the past five years, and (2) recommendations for future management of Canada geese in this area.

The meeting, which is open to the public, will begin at 9 a.m. on April 14, 1981, in Room 021 of the Wisconsin DNR Office Building, GEF2, 101 South Webster Street, Madison, Wisconsin.

Members of the public may file written statements during the meeting. To the extent that time permits, public presentation of oral statements at the meeting will be allowed.

Requests for information about the meeting should be addressed to: Regional Director, Region 3, U.S. Fish and Wildlife Service, Federal Building, Ft. Snelling, Twin Cities, MN 55111 or John Ellis, Senior Staff Wildlife Biologist, telephone (612) 725-3313.

F. Eugene Hester,

Acting Deputy Director

March 20, 1981.

BILLING CODE 4310-55-M

Geological Survey

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: U.S. Geological Survey, Department of the Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that Union Oil Company has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS-G 2358, Block A-442, High Island Area, offshore Texas.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Geological Survey is considering approval of the Plan and that it is available for public review at the offices of the Conservation Manager, Gulf of Mexico OCS Region, U.S. Geological Survey, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: U.S. Geological Survey, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837-4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the U.S. Geological Survey makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in a revised Section 250.34 of Title 30 of the Code of Federal Regulations.

Dated: March 18, 1981.

Lowell G. Hammons,

Conservation Manager, Gulf of Mexico OCS Region.

[FR Doc. 81-9089 Filed 3-25-81; 8:45 am]

BILLING CODE 4310-31-M

Bureau of Land Management

Montana and North Dakota; Intent To Hold a Public Hearing and the Opening of a Comment Period on the Federal Coal Production Goals for the Fort Union Coal Production Region and on the Setting of a Preliminary Federal Leasing Target

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Public hearing and opening of comment period.

SUMMARY: This notice advises the public that the Fort Union Regional Coal Team intends to hold public hearings to receive oral and written comments in order to assist the Secretary of the Interior in his review of the federal coal production goals for the Fort Union coal production region. The hearings will also be for the purpose of soliciting comments and advice on the setting of a preliminary federal leasing target. This latter information will be used by the Regional Coal Team in developing a recommendation to the Secretary on a preliminary leasing target to guide planning until October 1981, when a final leasing target will be adopted.

The hearings will be held in Miles City, Montana and Dickinson, North Dakota Individuals wishing to comment orally at the public hearings are asked to provide written copies of their remarks if possible. Oral and written comments will be accepted at the public hearings. Written comments should be addressed to the BLM Montana State Director at the address given below.

The above hearings are to be held concurrently with informational meetings being held at various locations in eastern Montana and western North Dakota during the last week of April and the first week of May, 1981.

DATE: Written comments will be accepted until close of business, May 13, 1981. A public hearing will be held in Dickinson, North Dakota on Thursday, April 30, 1981. The hearing will start at approximately 8:45 p.m., following a general informational meeting which begins at 7:30 p.m. The hearing will be at the Gate City Savings and Loans Association Building, Community Room, 204 Simms Street, Dickinson, North Dakota. A public hearing will also be held in Miles City, Montana on

Wednesday, May 6, 1981. The hearing will start at approximately 8:45 p.m., following an informational meeting which begins at 7:30 p.m. The hearing will be held at the Miles Community College, Room 107, 2000 Dickinson, Miles City, Montana.

ADDRESS: Written comments on the production goals and setting of a preliminary leasing target should be addressed to the Bureau of Land Management, Montana State Director, P.O. Box 30157, Billings, Montana 59107.

FOR FURTHER INFORMATION CONTACT: David Darby, Fort Union Project Manager or, Bill Frey, Assistant Fort Union Project Manager, Bureau of Land Management (906), P.O. Box 30157, Billings, Montana 59107. Telephone FTS: 585–6632, Commercial: 406–657–6632.

SUPPLEMENTARY INFORMATION: The Department of Energy (DOE) issued updated national and regional coal production goals on January 26, 1981. These coal production goals are intended to guide the Department of the Interior (DOI) and the Regional Coal Team (RCT) in setting a federal leasing target for the Fort Union Federal Coal Production Region.

DOE Final Production Goals Fort Union Region

(Million tons annually)

	1990	1995
Low	34.6	53.9
Medium	51.1	85.9
High	80.0	105.8

The coal production goals developed by DOE are provided at three levels of energy consumption growth rates: low, medium, and high. Due to the uncertainties regarding coal consumption over the next ten to fifteen years, especially for electric utilities and synthetic fuels, the range in the goals is substantial. The DOE final production goals have been provided to the Fort Union RCT.

The Federal coal management regulations (43 CFR 3420.3–2(d)) require that the RCT consider the regional situation and recommend adjustments to the regional production goals based on such factors as (1) public comment received in writing or in hearing(s) held by the team in the region, (2) state government, Bureau of Land Management State Office, Indian tribe and regional development policies, (3) administrative capacity to satisfy the indicated level of leasing based on the Department of Energy's final production goals, and (4) other information available to the regional coal team which they believe should receive consideration by the Secretary in his review of the final regional production goals.

The Regional Coal Team is also charged under the regulations with providing advice to the Secretary to be used in the setting of a preliminary leasing target. This target will also be based on the final regional production goals and other relevant information. The preliminary leasing target itself, once established, will be the subject of further hearings and public comments, in addition to consultation with the Governors of Montana and North Dakota, prior to the adoption of a final leasing target.

The purpose of this notice is to call for public comment on the production goals in order to assist the regional coal team in formulating its recommendation to the Secretary, and to solicit comments to be used by the RCT in developing a recommendation to the Secretary on a preliminary leasing target.

Dated: March 19, 1981.

Michael J. Penfold,

State Director.

BILLING CODE 4310-84-M

Environmental Impact Statement and Scoping Meetings, Energy Synfuels Associates, Coal Gasification Facility

March 20, 1981.

AGENCY: Department of the Interior, Bureau of Land Management.

ACTION: Notice of intent to prepare environmental impact statement and public scoping meetings.

SUMMARY: Notice is hereby given that the Bureau of Land Management (BLM), Department of the Interior, will act as lead agency for preparation of a draft environmental impact statement (EIS) in accordance with Section 102(2)(c) of the National Environmental Policy Act of 1969. The draft EIS will address the environmental consequences of a coal gasification facility proposed by Emery Synfuels Associates, which includes Mountain Fuel Resources, Mono Power Company, and Conoco Coal Development Company. Mountain Fuel Resources, located at 36 South State, Suite 1540, Salt Lake City, Utah 84111 is acting as the contact for all of the applicants.

The statement will address the proposed Emery Synfuels Project, a coal gasification plant with the capacity to produce 68 million standard cubic feet per day of synthetic natural gas and 3,880 tons per day of liquid methanol. The project would utilize public lands and could require funding from the Department of Energy and loan guarantees from the United States Synfuels Corporation.

The plant would be located in either Emery or Carbon County, Utah, and could involve construction of a reservoir on U.S. Forest Service, Manti Lasal National Forest lands. Interested persons are invited to submit comments which may be helpful in preparation of the draft EIS. Comments should be sent to State Director, Bureau of Land Management, 136 East South Temple, Salt Lake City, Utah 84111.

DATES: Representatives of the Bureau of Land Management will conduct issue scoping meetings on May 4, 1981, in Salt Lake City in Room 128 of the Salt Palace; on May 5 in Price, Utah, at the College of Eastern Utah, Gomer Peacock Room; May 6, 1981, at Castledale, Utah, at the Emery County High School; and May 7, 1981, in Green River at Green River High School. All meetings will be at 7:00 p.m. The meetings will be held to receive public input and comments concerning the need for the project, potential alternatives and the significant issues that should be addressed in the EIS. A record will be made of the meetings and comments will be used in determining the issues and alternatives discussed in the EIS.

The BLM encourages the public and affected Federal, State, and local agencies to attend these meetings and provide their input. Any person or group which desires to submit comments, questions, or recommendations may do so at the meetings or by submitting them to BLM at the address given above.

FOR FURTHER INFORMATION: Additional information concerning the proposed project and environmental impact statement can be obtained from either Gregory Thayn, Bureau of Land Management, Utah State Office, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111, or Lynn G. Leishman, Richfield District Office, 150 East 900 North, Richfield, Utah 84701.

Donald L. Prendleton,

District Manager.

BILLING CODE 4310-84-M

Casper District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Public Law 92-463, that a meeting of the Casper District Advisory Board will be held on April 24, 1981.

The meeting will begin at 10:00 a.m. in the conference room of the Bureau of Land Management Office at 951 Rancho Road, Casper, Wyoming.

The agenda for the meeting will include: (1) review of board function; (2) review of fiscal year 1981 range betterment projects; (3) outlook for range betterment projects in 1982; (4) election of chairman and vice-chairman; (5) review of allotment management plans; (6) modification of existing fences to meet design standards on antelope ranges.

The meeting is open to the public. Interested persons may make oral statements or file written statements for the board's consideration. Anyone wishing to make an oral statement should notify the District Manager, Bureau of Land Management, 951 Rancho Road, Casper, Wyoming by April 22, 1981. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the board meeting will be maintained in the District Office and be available for public inspection within 30 days following the meeting.

Robert E. Wilber,

District Manager.

BILLING CODE 4310-84-M

[M50209]

Montana; Invitation; Coal Exploration License Application

Members of the public are hereby invited to participate with Spring Creek Company in a program for the exploration of coal deposits owned by the United States of America in the following described lands located in Big Horn County, Montana:

T. 8 S., R. 39 E., P.M.M.,
Sec. 14, S½;
Sec. 15, SE¼;
Sec. 22, NE¼, N½SW¼, SW¼SW¼, NW¼SE¼; and

Sec. 23, N½NE¼, NW¼.
T. 8 S., R. 40 E., P.M.M.,
Sec. 29, SW¼; and
Sec. 30, E½, NE¼SW¼.

Any party electing to participate in this exploration program shall notify, *in writing*, both the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107, and Spring Creek Coal Company, c/o NERCO, Inc., 111 SW Columbia, Portland, Oregon 97201. Such written notice must refer to serial number M 50209 and be received no later than 30 calendar days after publication of this Notice in the Federal Register or 10 calendar days after the last publication of this Notice in this newspaper, whichever is later. This Notice will be published for two consecutive weeks.

This proposed exploration program is fully described and will be conducted pursuant to an exploration plan to be approved by the U.S. Geological Survey and the Bureau of Land Management State Office, Granite Tower Building, 222 North 32nd Street, Billings, Montana.

Roland F. Lee,

Chief, Branch of Lands and Minerals Operations.

[FR Doc. 81-9140 Filed 3-25-81; 8:45 am]

BILLING CODE 4310-84-M

Realty Action—Exchange; Public Lands in Fergus County, Mont.

March 19, 1981.

The following described land has been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716 (M 43877):

Principal Meridian, Montana

T. 20 N., R. 18 E.,
Sec. 1, E½SE¼.
T. 20 N., R. 19 E.,
Sec. 5, SW¼NE¼, E½SW¼, and SE¼;
Sec. 6, Lots 6 and 7, and E½SW¼; and
Sec. 8, NE¼NW¼.

Aggregating 554.31 acres.

In exchange for these isolated tracts of public land, the United States Government will acquire the following land:

Principal Meridian, Montana

T. 23 N., R. 22 E.,
Sec. 19, Lot 6;
Sec. 20, Lot 6;
Sec. 21, Lots 5, 6, 7, and 8;
Sec. 28, Lot 1, NW¼NE¼, and NE¼NW¼; and
Sec. 29, Lots 2, 3, 4, and 6.
T. 22 N., R. 23 E.,
Sec. 6, Lot 2.
T. 23 N., R. 23 E.,
Sec. 31, Lots 4 and 5.

Aggregating 384.91 acres.

The purpose of the exchange is to acquire private land within the Upper Missouri Wild and Scenic River Corridor and to dispose of isolated tracts of public land that are uneconomical to manage. The exchange is consistent with the Bureau's planning for the lands involved. The public will be well served by making the exchange.

The lands to be exchanged are equal in value based on a current fair market value appraisal.

The terms and conditions applicable to the exchange are:

1. Only the surface estate will be exchanged. Mineral rights will be reserved.

2. The public land will be exchanged subject to all valid existing rights, e.g. (rights-of-way, easements and leases of record).

Detailed information concerning the exchange including the Environmental Assessment and Land Report are available for review at the Lewistown District Office, Airport Road, Lewistown, Montana 59457.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, Drawer 1160, Lewistown, Montana 59457. Any adverse comments will be evaluated by the Secretary, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the Secretary, this realty action will become the final determination of this Department.

Roland F. Lee,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Bureau of Land Management, Utah; Restriction of Use of Motorized Vehicles on Public Lands

March 18, 1981.

Notice is hereby given that use of motorized vehicles on certain public lands in the Goblin Valley area is temporarily restricted, in accordance with the provisions of 43 CFR, Subpart 8364. These restrictions do not apply to emergency, law enforcement, and Federal or other government vehicles while being used for official or emergency purposes, or vehicles authorized by permit, contract or statute.

The area affected by this restriction is located approximately 13 miles north of Hanksville, Utah. The area is accessible from the entrance road to Goblin Valley State Reserve and lies adjacent to the State Reserve at its entrance. The area comprises 20 acres of the eastern slope of Wild Horse Butte and the flats to the east connecting with the entrance road to Goblin Valley State Reserve.

The purpose of this emergency closure is to prevent excessive erosion, unnecessary destruction of plant life, public health and safety and the natural environment. The area has been excessively used by ORV's, resulting in conditions which necessitate this closure. This action has resulted from consultation with the Utah Division of Parks and Recreation and complaints received from visitors to Goblin Valley State Reserve.

The entire area will be signed at common points of ORV access.

Maps showing the area are available at the Moab District Office in Moab, Utah, and the Price Area Office in Price, Utah.

This notice is effective March 26, 1981 and will be in effect until June 1, 1981.

Gene Nodine,

District Manager.

Public Hearings; Hualapai-Aquarius Draft Grazing Environmental Impact Statement

The Phoenix District, Bureau of Land Management, will conduct two public hearings to receive written and oral testimony on the Hualapai-Aquarius Draft Grazing Environmental Impact Statement. The hearings will be held in Kingman, Arizona at 7:30 p.m. on April 22, 1981 at the Mohave County Fairgrounds and in Phoenix, Arizona at 7:30 p.m. on April 23, 1981 at the Rodeway Inn, 3400 Grand Avenue.

Persons giving oral testimony will be limited to 5 minutes, with written submissions invited at the hearings. Depending upon the number of persons desiring to testify, the presiding officer may expand the speaking list at his discretion to a maximum of 10 minutes.

Speakers will be heard, if present, in their established order on the witness list. After the last witness has been heard, the presiding officer will consider the request of any person present who wishes to testify. Only one witness will be allowed to represent the viewpoints of a single organization. However, any witness will be permitted to give testimony germane to the draft statement if offered as the views of a private citizen.

Written requests to testify orally should be received at the Phoenix District, 2929 W. Clarendon Avenue, Phoenix, Arizona 85017, prior to the close of business on April 17, 1981. Requests should identify which hearings will be attended and what organizations, if any, are represented, and should be signed by the prospective witness. Timely notification will allow BLM to prepare in advance a list of speakers in the order they will be called.

Comments on the draft statement, whether written or oral, will receive equal consideration in preparation of the final document. Written statements will be accepted on or before May 12, 1981.

Dated: March 17, 1981.

Clair M. Whitlock,

State Director.

BILLING CODE 4310-84-M

Salem District Advisory Council; Meeting

Notice is hereby given, in accordance with Public Law 94–597 and 43 CFR Part 1780, that a meeting of the Bureau of Land Management's Salem District Advisory Council will be held on April 9, 1981 at 7:00 p.m. at BLM Salem District Office, 1717 Fabry Road, SE, Salem, Oregon.

The District Manager urgently needs Advisory Council advice on the following agenda items:

—A review of Land Use Alternatives being considered for the District's Eastside Planning Area and development of specific advice to the District Manager regarding a preferred alternative.

—A review and discussion of draft BLM Program Priority Guides for Oregon.

The meeting is open to the public. Interested persons may make oral statements for the Council's consideration. Anyone wishing to make an oral statement must notify the District Manager at P.O. Box 3227, Salem, Oregon 97302 prior to April 2, 1981. Depending upon the number of persons wishing to make an oral statement, a per person time limit may be established.

Summary minutes of the meeting will be maintained in the District Office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

Dated: March 18, 1981.

Edward G. Steuber,

District Manager.

BILLING CODE 4310-84-M

[Or 23558; 2310 (943.4)]

Oregon; Proposed Continuation of and Withdrawal

The Bureau of Land Management, U.S. Department of the Interior, proposes that the existing land withdrawal made by the Secretarial Order of December 31, 1930 be continued in its entirety as to the following described land for a 20-year period, pursuant to Section 204 of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2751, 43 U.S.C. 1714:

Willamette Meridian

East Shore Loon Lake

T. 23 S., R. 10 W.,
Sec. 1, Lots 17 and 18.
Containing 51.51 acres in Douglas County, Oregon.

The purpose of the original withdrawal is to protect the recreational values for potential development by the State of Oregon. The State has abandoned its plans for recreational development and the purpose of the withdrawal is proposed to be modified to include the land as an addition to the existing Bureau of Land Management Loon Lake Recreation Site. The land is currently segregated from operation of the public land law generally, including the mining laws. No change is proposed in the segregative affect.

Notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal continuation. All interested persons who desire to be heard on the proposal must submit a written request for a hearing to the undersigned on or before May 1, 1981. Upon determination by the State Director, Bureau of Land Management, that a public hearing will be held, a notice will be published in the **Federal Register** giving the time and place of such hearing. In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the proposed withdrawal continuation may be filed with the undersigned officer on or before May 1, 1981.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. He will review the withdrawal rejustification to insure that continuation would be consistent with the statutory objectives of the programs for which the land is dedicated; the area involved is the minimum essential to meet the desired needs; the maximum concurrent utilization of the land is

provided for; and an agreement is reached on the concurrent management of the land and its resources. He will also prepare a report for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and if so, for how long. The final determination on the continuation of the withdrawal will be published in the Federal Register. The existing withdrawal will continue until such final determination is made.

All communications in connection with this proposed withdrawal continuation should be addressed to the undersigned officer, Bureau of Land Management, U.S. Department of the Interior, P.O. Box 2965, Portland, Oregon 97208.

Dated: March 18, 1981.

Champ C. Vaughan, Jr.,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

[UT-080]

Utah Vernal District; Request for Formal Expression of Intent From Synfuels Project Developers

AGENCY: Bureau of Land Management.

ACTION: Notice.

SUMMARY: The Bureau of Land Management is planning to respond to anticipated right-of-way applications from synfuels developers for use of public lands in the Uintah Basin of Utah.

In order to comply with the National Environmental Policy Act in an effective manner, BLM proposed to cover all firm synfuels project proposals in a single environmental impact statement (EIS). The work is being planned in cooperation with the State of Utah and local officials. This combined program will expedite the processing of applications for all projects included and avoid the need for numerous individual EIS's prepared one after another.

Lloyd Ferguson, BLM Vernal District Manager, is requesting that all oil shale, tar sands, and related synfuels industries contact his office if they anticipate a need for a right-of-way across public lands within the next two to three years. In order for projects to be considered in the expedited EIS program, BLM needs from each developer a formal (written and signed) expression of intent to file right-of-way applications.

Those developers who furnish a letter of intent subsequently will be asked to provide preliminary (partial) applications, including project description and funds, to BLM by May 15, 1981.

The determination of project proposals is needed to ensure that the EIS process can proceed effectively and without delay.

Completion of the EIS process would require about 12 months after receipt of adequate project descriptions. BLM's goal is to complete the EIS process by the end of May, 1982, in order that public land right-of-way decisions can be made for projects planning construction starts in the summer of 1982.

Three separate levels will be considered in the proposed EIS. (1) A site specific analysis sufficient to met NEPA and permitting requirements will address those projects which file completed right-of-way applications. (2) A cumulative analysis will address synthetic fuels development on a regional basis and consider impacts of a full scale commercial synthetic fuel industry. (3) A conceptual analysis will address those projects which plan to proceed with development but are not yet prepared to submit detailed right-of-way applications. For this latter group supplemental Environmental Assessment may be required when detailed permit needs are finalized.

Further information can be obtained by contacting the BLM Vernal District, 170 South Fifth East, Vernal, Utah 84078 (phone (801) 789-1362) or the BLM Utah State Office Project Management Staff, 136 East South Temple, Salt Lake City, Utah 84111 (phone (801) 524-5645).

Lloyd H. Ferguson,

District Manager.

March 19, 1981.

BILLING CODE 4310-84-M

[AA-6683-A2]

Alaska Native Claims Selection; Notice of Publication

On December 12, 1975, Stuyahok Limited, for the Native village of New Stuyahok, filed selection application AA-6683-A2 under the provisions of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 701; 43 U.S.C. 1601, 1611 (1976)) (ANCSA), for the surface estate of certain lands in the New Stuyahok area.

On November 14, 1978, the State of Alaska filed general purposes grant selection application AA-21700, pursuant to Sec. 6(b) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 340; 48 U.S.C. Ch. 2, Sec. 6(b)), for certain lands in the New Stuyahok area.

The following described lands have been properly selected by Stuyahok Limited. Section 6(b) of the Alaska Statehood Act of July 7, 1958, provides that the State may elect *vacant, unappropriated,* and *unreserved* public lands in Alaska. Therefore, the following State selection application is hereby rejected as to the following described lands:

Seward Meridian, Alaska (Unsurveyed)

State Selection AA-21700

T. 7 S., R. 46 W.,
Sec. 25, all.
Containing approximately 640 acres.

On November 25, 1974, Stuyahok Limited, for the Native village of New Stuyahok, filed selection application AA-6683-L pursuant to Sec. 12(a) of ANCSA for the surface estate of certain lands in the vicinity of New Stuyahok. The following described lands have been properly selected by Stuyahok Limited both under Secs. 12(a) and 12(b) of ANCSA. By letter of April 3, 1978, Stuyahok Limited elected to receive conveyance of these lands pursuant to Sec. 12(b) of ANCSA. Therefore, village selection application AA-6683-L is hereby rejected as to the following described lands:

Seward Meridian, Alaska (Unsurveyed)

T. 7 S., R. 46 W.,
Sec. 25, all.
Containing approximately 640 acres.

Further action on village selection application AA-6683-L as to those lands not rejected herein will be taken at a later date.

The State selected lands rejected above was not a valid selection and will not be charged against the village corporation as State selected lands. Further action on the subject State selection application as to those lands not rejected herein will be taken at a later date.

As to the lands described below, the application submitted by Stuyahok Limited, as amended, is properly filed and meets the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(b) of ANCSA, containing approximately 640 acres, is considered proper for acquisition by Stuyahok Limited and is hereby approved for conveyance

pursuant to Sec. 14(a) of the Alaska Native Claims Settlement Act:

Seward Meridian, Alaska (Unsurveyed)

T. 7 S., R. 46 W.,
Sec. 25, all.

Containing approximately 640 acres.

The conveyance issued for the surface estate of the lands described above shall contain the following reservation to the United States:

The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613(f)).

There are no easements to be reserved to the United States pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act.

The grant of lands shall be subject to:

1. Issuance of a patent confirming the boundary description of the lands hereinabove granted after approval and filing by the Bureau of Land Management of the official plat of survey covering such lands;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 341; 48 U.S.C. Ch. 2, Sec. 6(g))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)(2)) (ANCSA), any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law; and

3. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 703; 43 U.S.C. 1601, 1613(c)), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

The village of New Stuyahok has been reallocated 650 acres of land pursuant to Sec. 12(b) of the Alaska Native Claims Settlement Act. To date, approximately 640 acres of the 12(b) reallocation have been approved for conveyance. The remaining entitlement of approximately 10 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of the Alaska Native Claims Settlement Act, conveyance of the subsurface estate of the lands described above shall be granted to the Bristol Bay Native Corporation when conveyance is granted to Stuyahok Limited for the surface estate, and shall be subject to the same conditions as the surface conveyance.

There were no inland water bodies considered to be navigable within the above-described lands.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in the Anchorage Times.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Alaska Native Claims Appeal Board, provided, however, pursuant to Pub. L. 96-487, this decision constitutes the final administrative determination of the Department of the Interior concerning navigability of water bodies.

Appeals should be filed with the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510, with a copy served upon both the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513, and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501. The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until April 24, 1981 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements of filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the adverse parties to be served are:

State of Alaska, Department of Natural Resources, Division of Research and Development, 323 East Fourth Avenue, Anchorage, Alaska 99501

Stuyahok, Limited, New Stuyahok, Alaska 99636

Bristol Bay Native Corporation, P.O. Box 198, Dillingham, Alaska 99576

Ann Johnson,

Chief, Branch of Adjudication.

Arizona; Safford District Advisory Council; Meeting

Notice is hereby given, in accordance with Pub. L. 94-579 and 43 CFR Part 1780, that a meeting of the Safford District Advisory Council will be held May 14, 1981 at Safford, Arizona at 10:00 a.m. at the Safford District Office, 425 East 4th Street, Safford, Arizona.

Agenda for the meeting will include:

1. Safford District Modified Fire Suppression Plan.
2. Snowbird Use (Accommodating Facilities).
3. State Director's Resource Management Plan (RMP) Guidelines.
4. Gila Resource Area RMP Preplanning Analysis.
5. Gila-Peloncillo Habitat Management Plan.
6. Winkelman Management Framework Plan Decisions.
7. Wilderness Program.
8. Business from the floor.

The meeting is open to the public. Interested persons may make oral statements to the council between 1:00 p.m. and 2:00 p.m. A written copy of the oral statement must be provided at the conclusion of the presentation. Written statements may also be filed for the council's consideration. Anyone wishing to make an oral statement must notify the District Manager at the above address by May 13, 1981. Depending upon the number of persons wishing to make an oral statement, a pre-person time limit may be considered.

Summary minutes of the meeting will be maintained in the district office and will be available for public inspection and reproduction (within regular business hours) within 30 days following the meeting.

Fritz U. Rennebaum,

Acting District Manager.

BILLING CODE 4310-84-M

Idaho Falls District; Medicine Lodge Resource Management Plan and Environmental Impact Statement; Notice of Intent

In accordance with 43 CFR 1601.3(g), the Bureau of Land Management, Idaho Falls District, intends to begin the preparation of a Resource Management

Plan (RMP) and Environmental Impact Statement for the Medicine Lodge Resource Area located in eastern Idaho. The area encompasses portions or all of Bonneville, Clark, Fremont, Jefferson, Madison, and Teton counties. Approximately 800,000 acres of public land are in the area.

The general types of issues anticipated are grazing/wildlife competition, recreation use, wilderness, mineral activity, timber management, and land tenure.

The disciplines to be represented on the interdisciplinary team include, range management, recreation, wildlife and fisheries biology, geology, forestry, archaeology, soils and watershed, lands, social science and economics.

Public participation during the issue identification phase of the planning process will be accomplished through 3 public meetings in Dubois, St. Anthony and Idaho Falls in early June. In addition information and response mail-out forms will be used as well as personal contact with individuals, organizations and agencies.

Further information and documents pertaining to the planning process may be obtained from O'dell A. Frandsen, District Manager, Bureau of Land Management, 940 Lincoln Road, Idaho Falls, Idaho 83401. Telephone (208–529–1020).

Dated: March 17, 1981.

O'dell A. Frandsen,

District Manager.

[OR 20290 (WASH)]

Washington; Proposed Continuation of Withdrawal

The Bureau of Land Management, U.S. Department of the Interior, proposes that the existing land withdrawal made by the Executive Order of September 29, 1919, be continued in its entirety as to the following described land for a 20-year period, pursuant to Section 204 of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2751, 43 U.S.C. 1714:

Willamette Meridian

Public Water Reserve No. 67

T. 25 N., R. 25 E.,
Sec. 35, N½SW¼, SW¼SW¼.

Containing 120.00 acres in Douglas County, Washington.

The purpose of the withdrawal is to protect an existing permanent water source. The land is currently segregated from operation of the public land laws generally, including non-metalliferous mineral location under the mining laws, but not the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawal.

Notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal continuation. All interested persons who desire to be heard on the proposal must submit a written request for a hearing to the undersigned on or before April 27, 1981. Upon determination by the State Director, Bureau of Land Management, that a public hearing will be held, a notice will be published in the Federal Register giving the time and place of such hearing. In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the proposed withdrawal continuation may be filed with the undersigned officer on or before April 27, 1981.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. He will review the withdrawal rejustification to insure that continuation would be consistent with the statutory objectives of the programs for which the land is dedicated; the area involved is the mininum essential to meet the desired needs; the maximum concurrent utilization of the land is provided for; and an agreement is reached on the concurrent management of the land and its resources. He will also prepare a report for consideration by the Secretary of the Interior, the president, and Congress, who will determine whether or not the withdrawal will be continued and if so, for how long. The final detremination on the continuation of the withdrawal will be published in the Federal Register. The existing withdrawal will continue until such final determination is made.

All communications in connection with this proposed withdrawal continuation should be addressed to the undersigned officer, Bureau of Land Management, U.S. Department of the Interior, P.O. Box 2965, Portland, Oregon 97208.

Dated: March 16, 1981.

Champ C. Vaughan, Jr.,

Acting Chief, Branch of Lands and Minerals Operations.

Winnemucca District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 92–463 that a meeting of the Winnemucca District Grazing Board will be held on May 5, 1981. The meeting will begin at 10:00 A.M. in the conference room of the Bureau of Land Management Office at 705 East Fourth Street, Winnemucca, Nevada.

The agenda for the meeting will include:

1. Range Improvements
2. Discussion of comments received on Paradise/Denio Draft EIS
3. Coordinated Resource Management Planning
4. Wild Horse and Burros
5. Sonoma/Gerlach EIS

The meeting is open to the public. Interested persons may make oral statements to the Board between 1:00 and 2:00 P.M. on May 5, 1981 or file written statements for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, 705 East Fourth Street, Winnemucca, Nevada 89445, by April 21, 1981. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the Board meeting will be maintained in the District Office and available for public inspection (during regular business hours) within 30 days following the meeting.

Dated: March 17, 1981.

Frank C. Shields,

District Manager for State Director, Nevada.

BILLING CODE 4310-84-M

Office of the Secretary

Part-Time Career Employment Program

AGENCY: Department of the Interior.

ACTION: Final instructions and requirements implementing the Federal Employees Part-Time Career Employment Act of 1978.

SUMMARY: These instructions and requirements will govern the operation of the Department of the Interior's (DOI) part-time career employment program and will be incorporated as a permanent part of the DOI Departmental Manual (Part 370, Chapter 340) as prescribed by Pub. L. 95–437, the Federal Employees Part-Time Career Employment Act of 1978 (5 U.S.C. 3401 et seq.).

The Act narrows the definition of part-time career employment in the

Federal government from scheduled work of less than 40 hours per week to scheduled work of beween 16 and 32 hours per week. The Act requires most Federal agencies to expand part-time employment opportunities, and changes the personnel ceiling and fringe benefit provisions governing part-time career Federal employees.

EFFECTIVE DATE: March 18, 1981.

FOR FURTHER INFORMATION CONTACT: Donna Waters, Division of Employment, Office of the Secretary, Office of Personnel, U.S. Department of the Interior, Washington, D.C. 20240, (202) 343–7764.

SUPPLEMENTARY INFORMATION:

Background

On May 28, 1980, the Department of the Interior (DOI) published proposed instructions to govern the implementation of a part-time career employment program within DOI, as required by Pub. L. 95–437, the Federal Employees Part-Time Career Employment act of 1978 (5 U.S.C. 3401 et seq.), and invited comments from the public on its proposed instructions. Comments were received from several union organizations and individual employees within DOI. As a result of comments and suggestions received during the prescribed 60 day comment period, DOI will modify its initial proposal to reflect the following issues discussed below.

370 DM 340, 1.6B Part-Time Career Employment Practices

The majority of the comments on this paragraph were received from bureau personnel offices. Sentence number two (2) gave the reader the strict impression that management *will* advertise all positions that b come vacant and review them for feasibility of utilizing part-time career appointments. It is the Department of the Interior's decision that the language used in this sentence should not reference mandatory advertisements of all vacancies. However, the sentence should reflect that management shall use the principles set forth in the merit promotion plan to fill vacant positions. Consequently, the consideration of reassignments transfers, etc. will be permitted and remain a prerogative of management.

Other comments on this paragraph alluded to the Part-Time Coordinator making decisions to approve or deny requests from employees to convert from full-time to part-time schedules without prior management input. Managers and supervisors would only be able to provide input to the Coordinator for his or her approval on the conversion. A suggestion was made that managers and supervisors have responsibility for approving or denying employee requests for conversion to part-time and informing the Coordinator of their decision. This comment was accepted and 370 DM 340, 1.6B was amended to reflect the change.

The Department of the Interior has examined and considered all the comments brought to its attention during the 60 day public comment period.

Accordingly, the Department of the Interior is issuing final instructions governing the operation of its part-time career employment program and incorporating these requirements as prescribed by Pub. L. 95–437 as set forth below.

Dated: March 18, 1981.

Richard R. Hite,

Deputy Assistant Secretary of the Interior.

Department of the Interior Departmental Manual

Personnel—370 DM Addition to FPM

Chapter 340—Part-Time Employment Program—370 DM 340.1.1

Subchapter 1. *General Provisions.*

1.1 *Purpose.* These instructions implement Pub. L. 95–437, the Federal Employees Part-Time Career Employment Act of 1978, by establishing a continuing program in the Department of the Interior (DOI) to provide career part-time employment opportunities.

1.2 *Definitions.* Part-time career employment means regularly scheduled work of from 16 to 32 hours per week performed by employees in competitive or excepted positions in tenure groups I or II, except positions for which basic pay is fixed at a rate equal to or greater than the minimum rate fixed for grade GS–16.

A. Tenure group I includes employees serving under career appointments in the competitive service who either have completed a probationary period or are not required to serve a probationary period. It also includes permanent employees in the excepted service whose appointments carry no restrictions or conditions such as a trial period.

B. Tenure group II includes employees in the competitive service who are serving on a probationary period under both career-conditional and career appointments. It also includes employees in the excepted service who are serving trial periods (or whose tenure is like career-conditional tenure in the competitive service).

1.3 *Policy.* Many individuals in our society possess great productive potential which goes unused because they cannot meet the requirements of a standard workweek. To provide increased part-time career employment opportunities for such people, it is the policy of the DOI to provide part-time career employment opportunities in positions through grade GS–15 of the General Schedule (or equivalent) and in hourly paid blue-collar positions, subject to agency resource and mission requirements.

1.4 *Scope.* The provisions of these instructions are applicable to all DOI offices at headquarters and in the field; and to all persons newly appointed as part-time permanent employees after April 7, 1979. Part-time employees hired prior to April 8, 1979, are excluded from coverage, unless there is a break in their part-time employment after April 7, 1979.

1.5 *Program Coordination.* The Director of Personnel, Office of Personnel, is responsible for overall administration of the DOI part-time career employment program.

Chapter 340 Part-Time Employment Program 370 DM 340.1.5A

A. The Chief, Division of Employment, Office of Personnel, by delegation from the Director of Personnel, serves as the Departmental coordinator and is responsible for:

(1) Providing Departmentwide coordination of program operations.

(2) Overseeing implementation and operation of program goals and timetables throughout the Department.

(3) Preparing required consolidated agency reports on part-time employment.

(4) Responding to bureau requests for advice and assistance on part-time employment.

B. The head of each bureau (and bureau level office) is responsible for:

(1) Establishing a part-time employment program consistent with the intent of Pub. L. 95–437, and DOI requirements.

(2) Ensuring that managers, supervisors, and employees are appropriately informed of the basic requirements of part-time career employment; and informed of position management and work assignment techniques that can lead to the most productive use of part-time workers.

(3) Designating a bureau coordinator for the program who will, as appropriate:

(a) consult on the bureau's part-time employment program with interested parties in special emphasis areas (Federal Women's Program and Hispanic Employment Program Managers, Selective Placement Program Coordinators, etc.) and with employee organizations; maintain liaison with groups interested in promoting part-time employment opportunities.

(b) respond to requests for advice and assistance on part-time employment within the agency.

(c) monitor progress in expanding part-time employment opportunities.

(d) report on part-time employment as required by DOI and the Office of Personnel Management (OPM).

Chapter 340 Part-Time Employment Program 370 DM 340.1.5C

C. The DOI will report twice a year to the Office of Personnel Management on the part-time employment program (0218–OPM–SA). The program will be reviewed through internal personnel management evaluations.

1.6 *Part-Time Career Employment Practices.* Goals and timetables must be established for all bureau programs.

A. On on annual basis, as apart of the human resource and budget process, management will set organizational goals for

establishing part-time career positions or converting full-time positions to part-time, and develop a time-table setting forth interim and final deadlines for achieving the goals. Decisions on part-time employment will be based on such factors as mission, occupational mix, workload fluctuations, affirmative action, geographic dispersion, effect on providing services to the public, and employee interest in part-time employment.

B. Positions which become vacant shall be reviewed for feasibility of utilizing part-time career appointments. Part-time positions will be advertised in accordance with the principles set forth in the merit promotion plan to fill vacancies. Employees may request and receive consideration to switch from full-time to part-time schedules. Requests to convert from full-time to part-time should be addressed in writing to the employee's immediate supervisor and include all reasons for the request. The immediate supervisor or manager with input from the bureau coordinator will decide whether or not to grant the request. Employees requesting a change from full-time to part-time employment will be advised by their servicing personnel office of effects on pay and fringe benefits.

C. Career part-time employees are entitled to coverage under the Federal Employees Group Life Insurance and Federal Employees Health Benefits Programs. The Government contribution for health insurance of eligible part-time employees will be prorated on the basis of the fraction of a full-time schedule worked, as provided by Office of Personnel Management regulations.

D. Effective Fiscal Year 1981, DOI will be required to count permanent part-time employees on a fractional basis against end-of-year personnel ceilings. For example, a permanent employee with a work schedule of 20 hours per week will count only ½ an employee against the employment ceiling for September 30, 1981.

E. Effective Fiscal Year 1982, all agencies (excluding the U.S. Postal Service) will shift to a full-time equivalent/work year (FTE) system of ceiling allocation and control for *all* employment subject to ceiling.

Privacy Act of 1974—Revision and Update of Notices of Systems of Records

Correction

In FR Doc. 80-25223, appearing at page 55831 in the issue for Thursday, August 21, 1980, make the following change:

On page 55839, the center column, the material under the heading "System Manager(s) and Address:" should read as set forth below:

For the Office of the Secretary: Staff Assistant, Office of the Assistant Secretary—Policy, Budget, and Administration, U.S. Department of the Interior, Washington, D.C. 20240. (2) For the Office of the Solicitor: Administrative Officer, Office of the Solicitor, U.S. Department of the Interior, Washington, D.C. 20240. (3) For the Office of Hearings and Appeals: Director, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Blvd., Arlington, Virginia 22203. (4) For the Office of Water Research and Technology, U.S. Department of the Interior, 18th and C Streets, NW., Washington, D.C. 20240.

BILLING CODE 1505-01-M

Water and Power Resources Service

Colorado-Big Thompson Project; Proposed Green Mountain Reservoir Operating Policy

The Water and Power Resources Service (formerly the Bureau of Reclamation) has the responsibility to operate and maintain the Colorado-Big Thompson Project in accordane with the provisions of Senate Document 80 (Act of August 9, 1937, 50 Stat. 564). The Regional Director, Lower Missouri Region, proposes a policy whereby water would be made available from the storage capacity of Green Mountain Reservoir, Colorado-Big Thompson Project, Colorado. This notice only announces the proposed operating policy and does not declare intent to begin formal contract negotiations for water service from Green Mountain Reservoir. After a period of 45 days for public review and comment of the proposed operating policy, the final Green Mountain Reservoir operating policy will be published in the **Federal Register**. Notices will be published in the **Federal Register** prior to formal negotiations for any potential contracts.

The proposed operating policy specifically defines the water supply and water service operations available from Green Mountain Dam and Reservoir, defines the processes and costs by which water users may subordinate power generation for their water supply needs, and provides a solution for repayment of reimbursable costs for the dam and reservoir.

The Water and Power Resources Service constructed Green Mountain Dam and Powerplant as features of the Colorado-Big Thompson Project. The Colorado-Big Thompson Project was recommended by the Secretary of the Interior, and approved by the President on December 21, 1937, pursuant to section 4 of the Act of June 25, 1910 (36 Stat. 835), and Subsection B of Section 4 of the Fact Finders' Act (Act of December 5, 1924, 43 Stat. 672).

Funds for construction of the project were appropriated by the Interior Department Appropriation Act of 1938 (Act of August 9, 1937, 50 Stat. 564). Senate Document 80, under the heading entitled "Manner of Operation of Project Facilities and Auxiliary Features," paragraph number 5, provides for construction and operation of Green Mountain Reservoir.

Green Mountain Reservoir, located on the Blue River, a tributary of the Colorado River in north-central Colorado, was initially operated in 1947. The action *United States* v. *Northern Colorado Water Conservancy District* et al., Civil Nos. 2782, 5016, and 5017 in the United States District Court, Colorado District, has interpreted portions of Senate Document 80. Those interpretations have recognized the rights of users in the Colorado River Basin for multiple-purpose use of the water stored in Green Mountain Reservoir.

The public is invited to submit written comments on this proposed operating policy for Green Mountain Reservoir. The Regional Director, Lower Missouri Region, will review comements submitted and, based on the number, source, and nature of the comments, will decide whether to hold a public hearing. The final operating policy will be approved by the Secretary of the interior and published in the **Federal Register**. All comments concerning this proposed operating policy should be directed within 45 days of this notice to Mr. Robert Berling, Project Manager, Water and Power Resources Service, South Platte River Projects, P.O. Box 995, Loveland, Colorado 80537.

Proposed Operating Policy

1. Green Mountain Reservoir has a total storage capacity of 153,639 acre-feet of water. Of that total capacity, 52,000 acre-feet is reserved for replacement of water diverted to the Eastern Slope through Colorado-Big Thompson Project operations. The remaining water is used primarily for hydropower generation purposes and is available for irrigation, domestic, municipal, and industrial uses.

2. Water uses are defined in four cateogries. Irrigation is water used for commercially grown agricultural crops. Domestic water is used for household purposes, watering farm livestock, poultry, domestic animals, and home gardens and lawns. Municipal water is used for municipal corporations and their inhabitants to promote life, safety, health, comfort, and business pursuits. Municipal purposes do not include irrigation of crops within the corporate boundaries. Industrial water is used for business concerns either directly or

indirectly in manufacturing or mining processes.

3. Water will be released from Green Mountain Reservoir to replace out-of-priority Colorado-Big Thompson Project diversions and to make up natural flow shortages in the Colorado River. Releases are made to provide a flow of 1,250 cubic feet per second at the site of the Shoshone Diversion Dam. That flow is measured at the stream gage at Dotsero, Colorado. The releases shall be administered as natural flows by the Colorado Division of Water Resources Division Engineer.

a. Releases may be called by the Division Engineer from the 52,000 acre-foot replacement pool only in quantities corresponding to the amount stored or diverted out of priority for Colorado-Big Thompson Project use, up to 1,250 cubic feet per second measured at the Dotsero gage.

Releases from the 100,000 acre-foot power pool will make up natural flow shortages up to the specified flow of 1,250 cubic feet per second at the Dotsero gage from April 15 through October 15. The Division Engineer shall administer these releases as natural flow. The releases are available for downstream users without charge.

4. The purpose and nature of releases from the 100,000 acre-foot power pool, in excess of what is required to maintain 1,250 cubic feet per second at the Dotsero gage, will be determined by the Regional Director, Lower Missouri Region. The Regional Director will consult with the Regional Director, Upper Colorado Region, for that determination. Absent a determination otherwise, such releases shall be made at times and in quantities dictated by power requirements of the Colorado-Big Thompson Project. When water in addition to the amount required to provide 1,250 cubic feet per second at Dotsero is released solely for power generation from the 100,000 acre-foot power pool, such water shall be considered as natural flow and available without charge for downstream users.

5. When water in addition to the amount required to provide 1,250 cubic feet per second at Dotsero is released primarily to meet certain users' needs and not to generate power, although power may be generated, then an agreement will be required between the users and the Regional Director, Lower Missouri Region, subordinating power generation to the users' need. If the uses are for irrigation and domestic purposes, then subordination charges would only include a portion of the operation and maintenance costs of Green Mountain Dam and Reservoir plus the cost of providing replacement power or paying the difference between the cost of replacement power and the revenues received from the power generated by the water releases to the user. Power interference charges would be less if the additional storage releases are used for power generation. The interference charge would be required due to the lower power head and lower releases during the winter months. If the uses are for industrial or municipal purposes, the Regional Director, Lower Missouri Region, after consultation with the Regional Director, Upper Colorado Region, may establish additional water service charges for repayment of construction costs. Power interference and operation and maintenance charges would be determined annually by the Regional Director, Lower Missouri Region.

6. Agreements, under the same terms and conditions mentioned in paragraph 5, may be made with water users upstream of the Dotsero gage but downstream from Green Mountain Reservoir.

7. Agreements may be made with water users above Green Mountain Reservoir where service can be effected. Such agreements would provide for power interference charges similar in principle to the stipulations and decrees in the action *United States* v. *Northern Colorado Water Conservancy District* et al., Civil Nos. 2782, 5016, and 5017. A charge would be imposed for operation and maintenance and, except for irrigation and domestic uses, a water service charge for repayment of project construction costs would also be imposed. Due to the physical location of Dillion Reservoir and the rights of the Denver Board of Water Commissioners, a firm water supply from Green Mountain Reservoir may not be possible for potential upstream contractors without alternate storage or an exchange arrangement with the Denver Board of Water Commissioners.

8. The Regional Director, Lower Missouri Region, in consultation with the Regional Director, Upper Colorado Region, will determine the amount and uses of water released in excess of the quantity needed to maintain 1,250 cubic feet per second at the Dotsero gage on a long-term and a short-term basis. Such uses shall be presented to the Colorado Water Conservation Board for concurrence; however, lack of concurrence shall not preclude implementation. Agreements will be made on a first-come, first-served basis.

9. Revenues resulting from such arrangements will be credited to the operation and maintenance costs of Green Mountain Dam and Reservoir, power replacement, and to the repayment of appropriate project costs.

Dated: March 20, 1981.

Clifford I. Barrett,

Assistant Commissioner, Water and Power Resources.

BILLING CODE 4310-09-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special rule 247 was published in the Federal Register on July 3, 1980, at 45 FR 45539. For compliance procedures, refer to the Federal Register issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service and to comply with the appropriate statutes and Commission regulations. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g.s., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient interest in the form of verified

statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statment in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Volume No. OP2-[illegible]

Decided March 17, 1981.

By the Commission, Review Board Number 1, Members Parker, Chandler and Taylor.

MC 154603, filed January 12, 1981. Applicant: SPRINGMEIER SHIPPING COMPANY, INC., 1123 Hadley St., St. Louis, MO 63101. Representative: R. F. Koreger (same address as applicant), 314-241-0660. As a *broker of general commodities* (except household goods,), between points in the U.S.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 81-9093 Filed 3-25-81; 8:45 am]
BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following broker, freight forwarder or water carrier applications are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date notice of the application is published in the **Federal Register**. Failure to file a protest within 30 days will be considered as a waiver of opposition to the application. A protest under these rules shall comply with Rule 247(e)(3) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding, as specifically noted below), and specify with particularity the facts, matters, and things relied upon. The protest shall not include issues or allegations phrased generally. A protestant shall include a copy of the specific portion of its authority which it believes to be in conflict with that sought in the application, and describe in detail the method—whether by joinder, interline, or other means—by which protestant would use this authority to provide all or part of the service proposed. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission. A copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named. If the protest includes a request for oral hearing, the request shall meet the requirements of section 247(e)(4) of the special rules and shall include the certification required in that section.

Section 247(f) provides, in part, that an applicant which does not intend timely to prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in it dismissal.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administratively acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service is either (a) required by the public convenience and necessity, or, (b) will be consistent with the public interest and the transportation policy of 49 U.S.C. § 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, such duplication shall not be construed as conferring more than a single operating right.

Applicants must comply with all specific conditions set forth in the grant or grants of authority within 90 days after the service of the notification of the effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Volume No. OP3-068

Decided: September 25, 1980.

By the Commission, Review Board No. 3, members Parker, Fortier and Hill. (Member Hill not participating.)

MC 130942 (Sub-1F), filed June 30, 1980, published in the Federal Register issue of October 8, 1980, and republished, as corrected, this issue. Applicant: CONSOLIDATED TOURS, INC., 2111 University Ave., St. Paul, MN 55114. Representative: Andrew R. Clark, 1000 First National Bank Bldg., Minneapolis, MN 55402. To engage in operations, in interstate or foreign commerce, *as a broker*, at St. Paul, MN, in arranging for the transportation, by motor vehicle, of *passengers and their baggage*, between points in the U.S. The purpose of this republication is to reflect the correct territory sought.

Agatha L. Mergenovich,
Secretary.

[No. 37427 [1]]

Cortex Pipeline Co.—Petition for Declaratory Order—Commission Jurisdiction Over Transportation of Carbon Dioxide by Pipeline

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Decision.

SUMMARY: In this decision, the Commission concludes that interstate pipeline transportation of carbon dioxide gas is not subject to its jurisdiction. This affirms the tentative conclusion noticed in the Federal Register at 45 FR 85177 on December 24, 1980.

FOR FURTHER INFORMATION CONTACT: Richard B. Felder or Jane F. Mackall (202) 275-7656.

SUPPLEMENTARY INFORMATION: Our original tentative conclusion set forth in the December notice was based on an analysis of the plain meaning of the pertinent statute, formerly section 1(1)(b) of the Interstate Commerce Act (originally part of the Hepburn Act of 1906) and now 49 U.S.C. 10501(a)(1)(C), as supported by the legislative history, that all gas types classified by origin or source are excluded from our jurisdiction. Consequently, carbon dioxide gas, the subject of the petitions, is also excluded, when transported by pipeline.

The only comments were filed by Arco Oil and Gas Company, one of the petitioners, and it agrees with our tentative conclusion. Under these circumstances, we affirm our original tentative conclusion that we do not have jurisdiction. No further action is required.

This decision does not significantly affect the quality of the human environment or conservation of energy resources and will not have an adverse impact on small business.

It is ordered:

This proceeding is discontinued.

Decided: March 18, 1981.

By the Commission, Acting Chairman Alexis, Commissioners Gresham, Clapp, Trantum, and Gilliam

Agatha L. Mergenovich,
Secretary.

[1] Embraced in this decision is No. 37428, Arco Oil and Gas Company—Petition for Declaratory Order—Jurisdiction Over Interstate Pipeline Transportation of Carbon Dioxide.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special Rule 247 was published in the Federal Register of July 3, 1980, at 45 FR 45539. For compliance procedures, refer to the Federal Register issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(E). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient interest in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Volume No. OP4-74,

Decided March 20, 1981.

By the Commission, Review Board No. 2, Members Carleton, Fisher and Williams.

MC 117786 (Sub-125), filed February 5, 1981. Applicant: RILEY WHITTLE, INC., P.O. Box 19038, Phoenix, AZ 85005. Representative: Baldo J. Lutich, 1441 E. Thomas Rd., Phoenix, AZ 85014. Transporting *general commodities* (except household goods, classes A and B explosives, and commodities in bulk), between points in Sumter County, GA and Barbour County, AL, on the one hand, and, on the other, points in the U.S.

Agatha L. Mergenovich,
Secretary.

BILLING CODE 7035-01-M

Rerouting Traffic Under Service Order No. 1344

[ICC ORDER NO. 4-A]

Service Date: March 24, 1981.

To all railroads: Upon further consideration of I.C.C. Order No. 4, and good cause appearing therefor:

It is ordered: I.C.C. Order No. 4 is vacated.

This order shall become effective at 11:59 p.m., March 20, 1981, and shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. A copy shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., March 19, 1981.

Interstate Commerce Commission.

Joel E. Burns,

Agent.

BILLING CODE 7035-01-M

[Permanent Authority Decisions Volume No. 46]

Restriction Removals; Decision-Notice

Decided: March 20, 1981.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR 1137. Part 1137 was published in the Federal Register of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Spoon, Alepough, and Shaffer.

Agatha L. Mergenovich,

Secretary.

MC 16831 (Sub-41)X, filed March 9, 1981. Applicant: MID SEVEN TRANSPORTATION COMPANY, 2323 Delaware Avenue, Des Moines, IA 50317. Representative William L. Fairbank, 2400 Financial Center, Des Moines, IA 50309. Applicant seeks to remove restrictions in the lead and Sub-Nos. 16, 24F, 27F, 30F, 32F, 33F, and 39F certificates to (1) broaden the commodity descriptions from (a) iron and steel articles, steel forgings, steel sheets, strips, and plates, steel lating and grounds, wrought pipe, iron and steel bolts and nuts, steel washers, steel forms used and unused for concrete construction, steel tubings, steel rings, rough, reinforced bars, steel stampings, steel bars, round and flat, steel wire, steel rivets, steel welding rods, and steel screws, aluminum sheets, bars, tubing, structurals, extrusions and plates to "metal products", petroleum products and iron and steel articles to "petroleum, natural gas and their products and metal products", and structural steel, brick, and heating equipment to "metal products, clay, concrete, glass or stone products, and building materials in the lead; (b) agricultural implements, agricultural equipment, industrial equipment, drainage systems, stump cutters, log splitters, and tree spades, parts, attachments, and accessories, contractors and construction equipment and supplies, lawn mowers, snowblowers, garden tractors, shredders, and tillers, parts and accessories to "machinery" in Sub-Nos. 24F part (1), 30F, and 33F part 1(a) and (b); (c) wheels, wheel tire assemblies, braking systems and parts, couplers, hubs, axles, spindles, tires, and jacks to "rubber and plastic products and transportation equipment", and iron and steel articles and materials and supplies used in the manufacture of iron and steel articles to "metal products and material equipment and supplies used in the manufacture of metal products" in Sub-No. 30F; (d) irrigation systems and agricultural equipment, to "metal products and machinery" in part (1) of Sub-No. 32F; and (e) water purification equipment and water purification materials to "machinery and chemicals and related products" in Sub-No. 39F; (2) authorize service to all intermediate points between Chicago, IL, and Des Moines, IA, in the lead; (3) change city-wide to county-wide authority from: (a) Des Moines to Polk, Warren, Dallas, and Madison Counties, IA, and Kewanee to Henry County, IL, in the lead; (b) Palla to Marion County, IA in Sub-No. 24F; (c) Atlantic to Cass County, IA in Sub-No. 30F; (d) Atkinson to Holt County, NE in Sub-No. 32F; and (e) Ames and Muscatine to Story and Muscatine Counties, IA, Eau Claire to Eau Claire and Chippewa Counties, WI, in Sub-No. 39F; (4) expand one-way authority to two-way or radial authority between (a) Henry County, IL, and points in Iowa within 60 miles of Des Moines, IA; Kankakee County, IL, and points in IA; Putnam County, IL, and points in IA; Chicago, IL, and Des Moines, IA, in the lead; and (b) Marion County, IA, and points in IL, IN, KY, MI, MN, NE, OH, SD, and WI in Sub-No. 24F; (5) remove the restrictions (a) " in containers" in the lead; (b) "commodities in bulk" in the lead and Sub-No. 27F; (c) "commodities in bulk, in tank vehicles" in Sub-No. 30F; (d) "originating at and destined to" in the lead and Sub-Nos. 16, 27F and 32F; and (e) "ex-water" and "ex-rail" in Sub-No. 27F; and (6) remove the facilities limitations in the lead and Sub-Nos. 16, 24F, 27F, 30F, and 32F.

MC 19193 (Sub-19)X, filed March 10, 1981. APPLICANT: LAFFERTY TRUCKING COMPANY, 3709 Beale Avenue, Altoona, PA 16601. Representative: S. Berne Smith, P.O. Box 1166, Harrisburgh, PA 17108. Applicant seeks to remove restrictions in its lead and Sub-Nos. 10, 11, 14F, 16F, and 18F permits to (1) broaden the commodity description to "such commodities as are dealt in by grocery and food business houses and material, equipment and supplies" from such merchandise as is dealt in by wholesale, retail and chain grocery and food business houses and equipment, materials, and supplies in the part of the lead, 10, 11, and 14F; from store fixtures and store equipment, uncrated, used in the conduct of wholesale, retail, and chain grocery and food business houses in part of the lead and Sub-No. 10; and from bananas and frozen fruits in part of the leads; (2) remove the except liquid chemicals and coal tar products, in bulk, in tank vehicles restriction in Sub-No.11; and (3) broaden the territorial description to "between points in the U.S." under continuing contract(s) with named shippers in all subs.

MC 21259 (Sub-6)X, filed March 13, 1981. APPLICANT: GERTSEN CARTAGE CO., INC., 3000 Hirsch Street, Melrose Park, IL. 60160. Representative: Anthony C. Vance, Suite 301, 1307 Dolley Madison Blvd., McLean, VA 22101. Applicant seeks to remove restrictions from its Sub-No. 2F

certificate to (1) remove all exceptions to its general commodity authority, except classes A and B explosives; and (2) delete the exrail and water restriction on its authority between Chicago, IL and points in 11 states.

MC 50563 (Sub-165)X, filed March 9, 1981. APPLICANT: THE MASON AND DIXON LINES, INC., P.O. Box 969, Kingsport, TN 37662. Representative: Kim D. Mann, 7101 Wisconsin Ave. NW, Suite 1010, Washington, DC 20014. Applicant seeks to remove restrictions in its Sub-Nos. 96, 136, 138, 142, 146, 149, 153, 155, 159, 160, 164, 174 and 175 certificates to (1) broaden the commodity description from general commodities (with exceptions) to general commodities (except class A and B explosives) in Sub-Nos. 96, 142, 159, and 164; from pipe, fittings, couplings, connections, and accessories (except pipe used in, incidental to, or in connection with the discovery, development, production, and preservation of natural gas and petroleum, and in the construction, operation, maintenance, repair, servicing, and dismantling of plants and facilities for the refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products) to "metal products, building materials, and clay, concrete, glass or stone products" in Sub-No. 136; from steel articles and commodities used in the production of steel articles (except lime, limestone, and limestone products, and commodities in bulk) in Sub-No. 138, iron castings (except those which because of size or weight requires the use of special equipment in Sub-No 146, and cast iron pressure pipe, valves, hydrants, and hydrant sections and parts, attachments, accessories, and supplies in Sub-Nos. 146 and 149 to "metal products"; from alloys and silicon metals (except in bulk) in Sub-No. 153 to "ores and minerals and metal products"; from paper and paper products, and materials, equipment and supplies in Sub-No. 155 to "pulp, paper and related products"; from wooden boxes, pallets, platforms, and skids in Sub-No. 160 to "lumber and wood products"; and from foodstuffs (except in bulk) in Sub-No. 174F to "food and related products" (2) authorize service at all intermediate points in connection with its regular routes between points in S.C. in Sub-No. 164, (3) remove restriction limiting service to the transportation of traffic originate at or destined to named points in Sub-Nos. 136, 146, 149 and 164 (4) remove facilities limitations in (a) Sub-Nos. 136 and 146 and replace Holt, AL with Tuscaloosa County, AL, (b) Sub-No. 138 and replace Kokomo, IN with Howard County, IN, (c) Sub-No. 149 and replace Albertville, AL with Marshall County, AL, (d) Sub-No 153 and replace Mt. Meigs, AL with Montgomery County, AL, (e) Sub-No. 155(f) Sub-No. 160 and replace Moundville, AL with Hale County, AL, and (g) Sub-No. 175F and Shelbyville, KY with Shelby County, KY, (5) remove restriction limiting service to the transportation of shipments moving from, to, or through points in York County, SC in Sub-No. 164, and (6) change one-way to radial authority between (a) points in Tuscaloosa County, AL with points in 14 states and D.C. in Sub-No. 136, and 146(b) points in Howard County, IN, and points 8 states, a described portion of PA, and D.C. in Sub-No. 138, (c) points in Marshall County, AL, and, points in a described portion of the US in Sub-No. 149, (d) points in Montgomery County, AL, and, points in a described portion of the US in Sub-No. 153, (e) points in Jackson county, AL, and, points in 17 states and DC in Sub-No. 155, (f) points in Hale County, AL, and, points in 19 states and DC in Sub-No. 160, (g) points in 4 named GA counties, and points in IL and IN, in Sub-No. 174F, and (h) points in 14 states, and, Shelby County, KY in Sub-No. 175F.

MC 103993 (Sub-1075)X, filed March 9, 1981. Applicant: MORGAN DRIVE-AWAY, INC., 28651 U.S. 20 West, Elkhart, IN 46515. Representative: James B. Buda (same as applicant). Applicant seeks to remove restrictions in its Sub-No. 524 certificate to (1) broaden the commodity description to "transportation equipment" from motor homes, in truckaway service, and campers and camp coaches, and (2) broaden the territorial description by removing the restriction excluding service in HI, in its "between points in the U.S." territorial authority.

MC 110410 (Sub-31)X, filed March 9, 1981. Applicant: BENTON BROS. FILM EXPRESS, INC., 168 Baker St., N.W., Atlanta, GA 30313. Representative: Warren A. Goff, 2008 Clark Tower, 5100 Poplar Ave., Memphis, TN 38137. Applicant seeks to remove restrictions in its Sub-Nos. 7F, 24F, and 29F certificates to (1) broaden the commodity descriptions: Sub-No. 7F, to "general commodities (except classes A and B explosives)" from general commodities, with the usual exceptions; Sub-No. 24F, to "machinery," from parts and supplies for copying machines; and Sub-No. 29F, to "food and related products" from instant tea, and (2) broaden the territorial descriptions by substituting county-wide authority in place of specified cities, airports or facilities, to authorize radial transportation: Sub-No. 7F, between points in Fulton and DeKalb Counties, GA (airport at Atlanta, GA), and Duval, Orange, Hillsborough, and Dade Counties, FL (airports at Jacksonville, Orlando, Tampa, and Miami, FL), and points in FL, and described portions of GA; Sub-No. 24F, between Atlanta, GA (facilities near Atlanta, GA), and points in FL; and Sub-No. 29F, between Hillsborough County, FL (Plant City, FL), and points in Cobb County, GA (Marietta, GA), and Atlanta, GA.

MC 113658 (Sub-47)X, filed March 3, 1981. Applicant: SCOTT TRUCK LINE, INC., 5280 Newport Street, Commerce City, CO 80022. Representative: Rick A. Rude, Suite 611, 1730 Rhode Island Avenue NW., Washington, DC 20036. Applicant seeks to remove restrictions in its Sub-Nos. 2, 5, 8, 11, 13, 15, 18, 21, 23, 24, 25, 32, 34, 35, 36, 37, 38, and 39 certificates to (1) change general commodities (with exceptions) to "general commodities (except classes A and B explosives)" in Sub-Nos. 8, and 16; (2) broaden specific commodities authorities in Sub-Nos. 2, 5, 11, 13, 15, 21, 23, 24, 25, 32, 34, 35, 37, 38, and 39, from food products, frozen foods, meat, meat products, meat by-products, articles distributed by meat packinghouses, animal feed supplements, beet and cane sugar, alcoholic liquors, margarine, shortening and peanut butter to "food and related products; (3) broaden specific commodities authority in its Sub-Nos. 32 and 36, from chemicals, drugs, toilet preparations, phosphates, potassium, soda ash, sodium sesquicarbonate and phosphoric acid to "chemicals or allied products"; (4) to authorize service at all intermediate points along described regular routes, in its Sub-Nos. 2 and 8, Denver, CO, and Chicago, IL, Denver, CO, and Imperial, NE, and Chicago, IL, and Winterset, IA; (5) remove originating at or destined to restrictions in Sub-Nos. 2, 5, 11, 13, 15, 21, and 38; (6) remove facilities limitations in Sub-Nos. 2, 5, 21, 24, 34, 35, 37, 38, and 39; (7) remove the exception of (a) Creston, IA, from a radially described portion of IA in Sub-No. 8, and (b) AK and HI from nationwide authority in Sub-Nos. 21 and 35 and AK, HI, and KS, in Sub-No. 21; (8) substitute Will County, IL, for Plainfield, IL, in Sub-No. 37; Cook County, IL, for Franklin Park, IL, in Sub-No. 34; Chickasaw County, IA, for New Hampton, IA, in Sub-No. 5; Weld, Morgan, and Logan Counties, CO, for Greely, Ft. Morgan and Sterling, CO, in Sub-No. 13; Ford County, KS, for Dodge City, KS, in Sub-Nos. 21 and 35; Jewell County, KS, for Mankato, KS, in Sub-No. 38; Finney

County, KS, for Holcomb, KS, in Sub-No. 39; Jefferson County, AL, for Birmingham, AL, in Sub-No. 24; El Paso County, CO, for Colorado Springs, CO, in Sub-Nos. 34 and 36; and Warren County, NJ, for Belvidere, NJ, New Castle County for Wilmington, DE, Essex County, NJ, for Nutley, NJ, and Somerset County, NJ, for Branchburg, NJ, in Sub-No. 32; (9) replace one-way with two-way authority on its regular route between Denver, CO, and Chicago, IL, Denver, CO, and Imperial, NE, and Chicago, IL and Winterset, IA, in Sub-NOS. 2 and 8; (10) replace one-way with radial authority between (a) Chickasaw County, IA, and CT, MD, MA, NJ, NY, PA, VA, WV, and DC in Sub-No. 5; (b) Denver, CO, and 16 eastern and midwestern States in Sub-No. 11; (c) Weld, Morgan, and Logan Counties, CO, and 16 eastern and midwestern States in Sub-No. 13; (d) Denver, CO, and 14 midwestern and southern States in Sub-No. 15; (e) Chicago, IL, and Denver, CO, in Sub-No. 16, (f) Ford County, KS, and points in the U.S. in Sub-Nos. 21F and 35F; (g) New Haven, CT, Port Newark and Port Elizabeth, NJ, Philadelphia, PA, Wilmington, DE, New York, NY, and Norfolk, VA, and Chicago, IL, and Kenosha, WI, in Sub-No. 23F; (h) Jefferson County, AL, and 14 eastern and midwestern States in Sub-No. 24F; (i) Kenosha, WI, and Des Moines, IA, Omaha, NE, and Denver, CO, in Sub-No. 25F; (j) Essex, Somerset and Warren Counties, NJ, and Chicao, IL, Dallas, TX, Atlanta, GA, and San Leandro, Bell, and Fresno, CA, in Sub-No. 32F; (k) Cook County, IL, and El Paso County, CO, in Sub-No. 34; (l) Carteret, NJ, and Chicago, IL, and Denver and Boulder, CO, in Sub-No. 36F; (m) Jewell County, KS, and 12 midwestern and eastern States in Sub-No. 38F; and (n) Finney County, KS, and points in the U.S.; and (o) remove tacking restrictions.

Note.—Carrier's authority to tack will be governed by 49 CFR 1042.

MC 117344 (Sub-292)X, filed March 12, 1981. Applicant: THE MAXWELL CO., 10300 Evendale Dr., Cincinnati, OH 45241. Representative: James R. Stiverson, 1396 West Fifth Ave., Columbus, OH 43212. Applicant seeks to remove restrictions in its Sub-Nos. 145 (part 10), 260, 261, 269F, 276F and 283F certificates (1) to broaden its various specified commodity descriptions such as vegetable oils and cotton seed oil in Sub-No. 145 (part 10), synthetic latices in Sub-No. 260, Bisphenol in Sub-No. 261, corn syrup, sugar and blends of corn syrup and sugar in Sub-No. 269F, sugar and corn products in Sub-No. 276F and petroleum, petroleum products and chemicals in Sub-No. 283F, which are limited to movement in bulk, to "commodities, in bulk"; (2) to remove the equipment restriction "in tank vehicles" from Sub-Nos. 145 (part 10), 260, and 276F and "in tank or hopper type vehicles" from Sub-No. 261; (3) to broaden specific facilities to county-wide authority as follows: in Sub-No. 145 (part 10) facilities near Jacksonville, IL to Mercer County, IL; in Sub-No. 261 facilities at Haverhill, OH to Scioto County, OH; and in Sub-No. 283F, facilities in Boyd County, KY, Lawrence County, OH and Wayne County, WV to Boyd County, KY, Lawrence County, OH and Wayne County, WV; (4) broaden specific facilities to the city authority as follows: in Sub-No. 260 facilities at or near Owensboro, KY to Owensboro, KY, and in Sub-No. 276F facilities at Cincinnati, OH to Cincinnati, OH; (5) to expand its one-way authority to radial authority as follows: Sub-No. 145 (part 10) between Mercer County, IL, and, points in AR, IA, KS, KY, MI, MN, MO, NE, OH, TN and WI; in Sub-No. 260 between Owensboro, KY, and, Omaha, NE; in Sub-No. 261 between Scioto County, OH, and, points in the U.S.; in Sub-No. 269F between Cincinnati, OH, and St. Louis, MO and points in IL, MI, MS, NC, TN, VA, and WV; in Sub-No. 276F between Cincinnati, OH, and, points in AR, IL, IN, IA, KS, KY, LA, MD, MI, MS, MO, NY, PA, TN, VA, WV and WI; and in Sub-No. 283F between Boyd County, KY, Lawrence County, OH and Wayne County, WV, and, points in the U.S. in and east of MN, IA, MO, AR and LA; (6) to remove restrictions against service to AK, HI and OH in its nationwide authority in Sub-No. 261; and (7) to remove the "originating at" restriction in Sub-No. 276F.

MC 119789 (Sub-731)X, filed March 10, 1981. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 226188, Dallas, TX 75226. Representative: James K. Newbold, Jr. (same as above). Applicant seeks to remove restrictions in its Sub-Nos. 372, 402, 421F, 440F, 443F, 458F, 463F, 482F, 490F, 505F, 566F, 570F, 633F, 639F, 657F and 691F certificates to (1) remove the "in bulk" and "not frozen" restrictions in Sub-Nos. 639F, 657F and 691F, (2) remove restrictions requiring prior transportation by water in Sub-Nos. 372, 440F and 463F and (3) replace authority to serve specified facilities at named points to city-wide or county-wide authority, Dallas, TX, in Sub-Nos. 402, 490F and 633F; McKinley County, NM, in Sub-No. 421F; Union County, LA for Bernice, LA, in Sub-No. 443F; Hemphill County, TX for Canadian, TX, in Sub-No. 458F; Galveston County, TX for Galveston, TX, in Sub-No. 482F; Quachito County, AR for East Camden, AR, in Sub-No. 505F; Weatherford, TX, in Sub-No. 566F; Hendricks County, IL for Danville, IL, Jefferson County, IN for Mount Vernon, IN, and Phelps County, MO for Rolla, MO, in Sub-No. 570F; Chicago and Decatur, IL, in Sub-No. 639F; Fresno County, CA for Fresno, CA, in Sub-No. 657F; and Hidalgo County, TX for Alamo and Donna, TX, in Sub-No. 691F.

MC 126716 (Sub-4)X, filed March 13, 1981. Applicant: WESTON TRUCKING COMPANY d.b.a. WESTON TRUCKING, III C Street, Encinitas, CA 92024. Representative: Warren A. Goff, 2008 Clark Tower, 5100 Poplar Ave., Memphis, TN 38137. Applicant seeks to remove restrictions in its lead and Sub-No. 2 certificates to (1) delete all exceptions to its general commodity authority except classes A and B explosives; (2) eliminate the ex-air restrictions in each certificate; and (3) replace airports or specific point authority with city- or county-wide authority: lead, San Clements with Orange County, CA, Camp Pendleton, Fallbrook, Vista, San Marcos, Escondido, Miramar, Santee, San Ysidro, Chula Vista, Coronado, San Diego, La Jolla, Del Mar, Soloan Beach, Encinitas, Carlsbad, and Oceanside with San Diego County, CA; lead and Sub-No. 2, Los Angeles International Airport with Los Angeles, CA; and Sub-No. 2, San Diego International Airport with San Diego County, CA; McCarran International Airport at Las Vegas, NV with Clark County, NV.

MC 127042 (Sub-306)X, filed March 3, 1981. Applicant: HAGEN, INC., P.O. Box 3208, Sioux City, IA 51102. Representative: Joseph B. Davis (same as applicant). Applicant seeks to remove restrictions in its Sub-Nos. 37, 180, 233F, 44, 229F, 88, 204F, 226F, 382F, 113, 120, 130, 195, 221F, 296F, 137 certificates and E-17 and E-18 letter notices to (1) broaden the commodity descriptions (a) to "food and related products" from vegetable oil compounds, dessert toppings, and coffee whitener, (except commodities in bulk), in Sub-No. 37: from frozen foodstuffs (except in bulk) in Sub-No. 180; from foodstuffs (except commodities in bulk) in Sub-No. 233F; from bakery products, other than frozen in Sub-No. 44; from frozen fruits and vegetables, in containers in Sub-No. 229F; from foodstuffs (except frozen foodstuffs, commodities in bulk, dairy products, and potato products) in Sub-No. 113; from (1) canned goods (not frozen) and (2) agricultural commodities in mixed loads with the commodities in (1) in Sub-No. 120; from cheese and

cheese products, fresh meats and food products, meats, meat products, and meat by-products and articles distributed by meat packinghouses, and dairy products (except commodities in bulk, in tank vehicles), dairy products, in Sub-No. 137; from dairy products (except commodities in bulk, in tank vehicles) in E-letter notice 17; from meat, products and meat by-products, articles distributed by meat packinghouses, and dairy products in E-letter notice 18; from salad dressings, sauces, vanilla, vinegar, cooking oil, pancake syrup, pickles, olives, cherry peppers, honey and mustard (except commodities in bulk) in Sub-No. 196; (b) to "chemicals and related products" from cleaning, washing, scouring, and polishing compounds, (except commodities in bulk) in Sub-Nos. 165 and 255F; from cleaning, polishing, and scouring compounds, waxes, janitor supplies, weed killers, and sodium hypochlorite solutions (except commodities in bulk) in Sub-Nos. 221F and 226F, (c) to "such commodities as are dealt in by drug, discount and variety stores, hospitals, and grocery stores," from frozen foods in Sub-No. 66, from meat, meat products, and meat by-products, and articles distributed by meat packinghouses (except commodities in bulk, and hides) in Sub-No. 204F and from cleaning compounds, polishing compounds, sodium hypochlorite solution, soap based compounds, rust preventive lube oils, rust preventive lube oils and greases, deodorants, disinfectants, fabric softeners, textile softeners, plastic bags, and coffee filters (except commodities in bulk) in Sub-No. 226F, and (d) to "such commodities as are dealt in by drug and grocery stores" from hair dryers, tissue paper, paper tape, curlers, toilet preparations, shampoo and store display racks (except commodities in bulk) in Sub-No. 130; (2) eliminate the restriction limiting transportation to vehicles with mechanical refrigeration in Sub-Nos. 282F, 165, 255F, and 221F; (3) eliminate the "in tandk vehicle" restriction in Sub-Nos. 204F, 137, and E-letter notice E17; (4) remove the facilities limitation in (a) Sub-Nos. 37, 180, and 233F and replace with Kansas City, MO–KS commercial zone, (b) Sub-Nos. 66, 204F, 226F, 282F, and replace with Lake, and Will Counties, IL and Cook County, IL (c) Sub-No. 165 and replace with Jefferson County, WI (d) Sub-No. 255F, (e) Sub-No. 195, (f) Sub-Nos. 221F and 226F, (g) Sub-No. 130, (h) Sub-No. 137 and replace Green Bay, WI with Brown County, WI; Cudahy, WI with Milwaukee County, WI; Clinton, IA with Clinton County, IA; LaCross, WI with LaCrosse County, WI and Monroe, WI with Greene County, WI; (5) delete the "originating at and destined to" named points restriction in Sub-Nos. 37, 180, 44, 66, 204F, 226F, 282F, 137, 165, and 195, (6) change one-way to radial authority in (a) Sub-No. 37 between Kansas City, MO, and points in 12 States, (b) Sub-No. 180 between Kansas City, KS, and, IL and MO, (c) Sub-No. 233F between Kansas City, MO, and points in 8 States, (d) Sub-No. 44 between Sioux City, IA, and points in NE (except Omaha) and points in 11 States, (e) Sub-No. 229F between Sioux City, IA, and, points in 8 States, (f) Sub-No. 66 between Lake County, IL and Chicago, IL to points in 3 States, (g) Sub-No. 204F between Chicago, IL, and, points in 15 States, (h) Sub-No. 226F between Will County, IL, and points in 11 States, (i) Sub-No. 282F between Cook County, IL, and, points in 8 States, (j) Sub-No. 113 between points in named States, (k) Sub-No. 120 between points in named northwestern and midwestern States, (l) Sub-No. 130 between Minneapolis, MN, and, points in 14 States (m) Sub-No. 137 between Brown County, WI, and, points in SD, between Milwaukee, WI, and, points in 4 States, between Minneapolis, MN, and points in WI, and, points in 6 States and a point in IL; between Green County, WI, and, points in 6 States and a point in IL; between Clinton County, IA, and, points in 6 States; between Brown and LaCrosse, Counties, WI, and, points in 2 States; between points in named States; between points in WI, and, points in 3 States, and named Oregon Counties, (n) Sub-No. 165 between Jefferson County, WI, and points in 19 States, (o) Sub-No. 255F between Milwaukee, WI, and, points in 19 States, (p) Sub-No. 195 between Denver, CO, and, points in 15 States, (q) Sub-No. 221F between Omaha, NE, and, points in 5 States, and, (r) Sub-No. 226F between Omaha, NE, and, points in 12 States.

MC 127303 (Sub-87)X, filed March 6, 1981. Applicant: ZELLMER TRUCK LINES, INC., P.O. Box 343, Granville, IL 61326. Representative: E. Stephen Heisley, 805 McLachlen Bank Building, 666 Eleventh Street NW., Washington, D.C. 20001. Applicant seeks to remove restrictions in its Sub-No. 55F certificate to (1) broaden the commodity description from chemicals, plastic, and plastic products, (except commodities in bulk), to "chemicals and related products; and rubber and plastic products"; in part (1) of the certificate; and remove an in bulk restriction from the materials portion of the authority; (2) replace authority to serve named plantsites with authority to serve a county or city: Blue Earth County, MN, for a facility at Mankato, MN; Licking County, OH, for a facility at Newark, OH; Worcester County, MA, for a facility at Clinton, MA; and Grundy and Peoria Counties, IL, for facilities at Morris and Mapleton, IL and Chicago, IL, for a facility at Chicago, IL; and (3) remove the exception AK and HI from nationwide authority.

MC 127524 (Sub-30)X, filed March 18, 1981. Applicant: QUADREL BROS. TRUCKING CO., INC., 1603 Hart Street, Rahway, NJ 07065. Representative: David L. Middleton, 1603 Hart Street, Rahway, NJ 07065. Applicant seeks to remove restrictions in its Sub-No. 17F certificate (1) to broaden its commodity description from chemicals in bulk to "commodities in bulk", (2) to replace city-wide authority with county-wide authority: Essex County, NJ for Newark, NJ, (3) to provide radial service in place of existing one-way authority between Essex County, NJ, and Baltimore, MD, and (4) remove the restriction limiting service to the transportation of traffic having a prior or subsequent movement by water.

MC 134477 (Sub-438)X, filed March 12, 1981. Applicant: SCHANNO TRANSPORTATION, INC., 5 West Mendota Rd., West St. Paul, MN 55118. Representative: Thomas D. Fischbach, P.O. Box 43496, St. Paul, MN 55164. Applicant seeks to remove restrictions in its Sub-Nos. 162, 189, 194, 200, and 332 certificates to (1) broaden its commodity descriptions from foodstuffs (except in bulk), and foodstuffs, (except commodities in bulk), in vehicles equipped with mechanical refrigeration, to "food and related products", in all of the above sub-numbers; (2) replace its cities and/or facilities with city or county-wide authority (a) in Sub-Nos. 194 and 332, Independence, MO, with Jackson County, MO, (b) in Sub-No. 189, facilities at or near Kansas City, KS, with Kansas City, KS, (c) in Sub-No. 200, facilities at or near Independence, MO, with Jackson County, MO; and (3) eliminate the originating at and destined to restrictions in each certificate and (4) replace one-way with radial authority between: Kansas City, MO and points in eastern states in Sub-No. 162; Kansas City, KS and points in eastern states in Sub-No. 189; Jackson County, MO and points in southern mid western states, in Sub-No. 194, 200 and 332.

MC 135430 (Sub-5)X, filed March 6, 1981. Applicant: LEAVITT'S FREIGHT SERVICE, INC., 3855 Marcola Rd., Springfield, OR 97447. Representative: David E. Wishney, P.O. Box 837, Boise, ID 83701. Applicant seeks to remove restrictions in its Sub-Nos. 2F and 4F

certificates to (1) broaden the commodity descriptions to "lumber or wood products" and "building materials" from: (a) laminated wood products, prefabricated wooden timbers, trusses, beams, lumber, treated poles, pilings and posts in Sub-No. 2F, and (b) treated wood products in Sub-No. 4F, (2) substitute Siskiyou County, CA, for Weed, CA; and (3) replace one-way with radial authority between (a) OR and WA, CA, ID, NV, MT, WY, CO, UT, AZ, and NM, (b) WA, and ID, CA, and NV, and (c) Siskiyou County, CA and NV in Sub-No. 2F; and (d) in Sub-No. 4F (1) OR and WA and AZ, CO, MT, NM, UT, and WY, and (2) ID and MT and AZ, CA, CO, MT, NV, OR, UT, and WA.

MC 142801 (Sub-8)X, filed March 9, 1981. Applicant: CECO TRANSPORT, INC., 1400 Kensington Road, Oak Brook, IL 60521. Representative: Thomas M. O'Brien, 10 S. LaSalle Street, Suite 1600, Chicago, IL 60603. Applicant seeks to remove restrictions in its Sub Nos. 2F, 3F and 6F permits to (1) broaden the commodity descriptions from bakery goods to "food and related products" in Sub 2F, from bottle caps and jar caps to "such commodities as are dealt in or used by manufacturers of glass containers" in Sub 3F, and from glass containers and closures for glass containers to "such commodities as are dealt in or used by manufacturers of glass containers" in Sub 6F; and (2) broaden the territorial authority to serve between points in the U.S. under continuing contract(s) with named shippers in those authorities.

MC 144122 (Sub-80)X, filed March 12, 1981. Applicant: CARRETTA TRUCKING, INC., South 100, Route 17 North, Paramus, NJ 07652. Representative: Charles J. Williams, P.O. Box 186, Scotch Plains, NJ 07076. Applicant seeks to remove restrictions in its Sub-No. 51 certificate to (1) broaden its commodity description from general commodities (with exceptions), to "general commodities (except classes A and B explosives);" (2) remove the plantsite facilities and authorize radial authority (a) in part (1), between New York, NY, and points in CA, GA, IL, IN, MO, OR, TX, WA, and WI, and (b) in part (2), between Philadelphia, PA, and points in IL, MO, and WI.

MC 144682 (Sub-55)X, filed March 4, 1981. Applicant: R. R. STANLEY, 1738 Empire Central, Dallas, TX 75235. Representative: Edwin M. Snyder, P.O. Box 45538, Dallas, TX 75245. Applicant seeks to remove restrictions in its Sub-Nos. 9F, 18F, 23F, 27F, 30F, 31F, 33F, 35F, 41F, 42F, and 45F to (1) broaden the commodity descriptions from foodstuffs in Sub-Nos. 9F, 23F, 30F, 31F, and 42F, animal feed, feed ingredients and additives in Sub-No. 18F, hams in Sub-No. 27F, malt beverages in Sub-Nos. 35F, 41F, and 45F, and meat and meat products in Sub-No. 33F, to "food and related products"; and from cleaning compounds, scouring compounds, and washing compounds, and soap, in Sub-No. 42F, to "chemicals and related products;" (2) remove except in bulk restrictions in Sub-Nos. 9F, 18F, 23F, 27F, 30F, 31F, and 42F; (3) remove "in containers" in Sub-No. 27F; (4) remove originating at or destined to restrictions in Sub-Nos. 27F and 31F; remove facilities limitations at Denison, TX in Sub-No. 9F; Vernon, Irvine, and Cerritos, CA, and Columbus, OH, in Sub-No. 18F; Vacaville, CA, in Sub-No. 23F; Dallas, TX, in Sub-Nos. 27F and 42F; Sherman, TX, in Sub-No. 30F; Watsonville, CA, in Sub-No. 31F; and Mansfield, TX, in Sub-No. 33F; (5) substitute Grayson County, TX, for Denison, TX, in Sub-No. 9F; Los Angeles County, CA, for Vernon and Cerritos, CA and Orange County, CA, for Irvine, CA, in Sub-No. 18F; Solano County, CA, for Vacaville, CA, in Sub-No. 23F; Grayson County, TX, for Sherman, TX, in Sub-No. 30F; Santa Cruz County for Watsonville, CA, in Sub-No. 31F; Tarrant County, TX, for Mansfield, TX, in Sub-No. 33F; Pima County, AZ, for Tucson, AZ, Coconino County, AZ, for Flagstaff, AZ, and Cache County, UT, for Logan, UT, in Sub-No. 45F; (6) replace one-way with radial authority between (a) Grayson County, TX, and 12 western States in Sub-No. 9F; (b) Los Angeles County and Orange Counties, CA, and AZ, NM, OH, WA, UT, and TX, and between Columbus, OH, and TX, in Sub-No. 18F; (c) Solano County and CO, OK, and TX in Sub-No. 23F; (d) Dallas, TX, and CA and FL in Sub-No. 27F; (e) Grayson County, TX and numerous States in Sub-No. 30F; (f) Santa Cruz County, CA, and TX in Sub-No. 31F; (g) Tarrant County and 8 western States in Sub-No. 33F; (h) Jefferson County, CO, and ID, OK, and TX in Sub-No. 35F; and (i) Dallas, TX, and CA, AZ, NM, CO, and LA in Sub-No. 42F.

MC 145695 (Sub-7)X, filed March 6, 1981. Applicant: MAZCO SYSTEMS, INC., 140 Grand Street, Carlstadt, NJ 07072. Representative: Roy A. Jacobs, 550 Mamaroneck Avenue, Harrison, NY 10528. Applicant seeks to remove restrictions in its lead and Sub No. 3 permits to (1) broaden the commodity description from "artificial kidneys, dialysate solution, dialysis treatment equipment, and dialysis materials and supplies" to "such commodities as are dealt in by manufacturers of artificial kidneys and dialysis machines" and (2) broaden the territorial description to "points in the United States" under continuing contract(s) with a named shipper.

MC 146071 (Sub-33)X, filed February 13, 1981, previously noticed in the Federal Register of March 4, 1981, republished as corrected in this issue. Applicant: DEETZ TRUCKING, INC., 316 Oak Street, Strum, WI 54770. Representative: Jack B. Wolfe, Suite 350, 1600 Sherman St., Denver, CO 80203. Applicant seeks to remove restrictions from its Sub-Nos. 1F, 6F, 7F, 9F, 10F, 11F, 12F, 13F, 17F, 20F, 24F, 27F, 28F, 29F, and 30F certificates by (1) broadening the commodity descriptions (a) from specific named food stuff items such as meats, frozen foods, cheese, etc., to "food and related products" in Sub-Nos. 1F, 7F, 9F, 10F, 20F, 27F, 28F, and 29F, (b) from various agricultural goods such as tractor exhaust pipes, augers, etc., to "machinery, farm products, lumber and wood products, rubber and plastic products, metal products, and building materials" in Sub-No. 6F, (c) from tractor exhaust pipes, mufflers, etc., to "machinery, metal products, and rubber and plastic products" in Sub-No. 11F, (d) from sewer pipe, pipe fittings, manhole covers, etc., to "rubber and plastic products", "clay, concrete, glass or stone products", and "metal products" in Sub-No. 12F, (e) from clay products and refractory products to "clay, concrete, glass or stone products" in Sub-No. 24, and (f) by removing all exceptions on commodity descriptions, such as hides; commodities in bulk; machinery; size and weight commodities; those described in sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, etc., wherever they appear in each of the above-numbered certificates; (2) replacing authority to serve specified facilities at named points and authority to serve specified points with county-wide authority: in Sub-No. 1F, facilities at Huron, SD with Beadle County, SD; in Sub-No. 6F, facilities at Hall, IA, Lennox and Sioux Falls, SD with Sioux County, IA, Lincoln and Minnehaha Counties, SD, respectively; in Sub-No. 7F, Fairmount, MN and Eau Claire, WI with Martin County, MN and Eau Claire County, WI; in Sub-No. 9F, facilities at Sioux Falls, SD, Estherville and Sioux City, IA with Minnehaha County, SD, Emmett and Woodbury Counties, IA, respectively; in Sub-No. 10F, Green Bay, WI with Brown County, WI; in Sub-No. 11F, facilities at Arcadia, Black River Falls, Mineral Point, Neilsville, Viroque, and Wautoma, WI with Trempealeau, Jackson, Iowa, Clark, Vernon, Waushara

Counties, WI, respectively; in Sub-No. 12F, facilities at West Bend, WI with Washington County, WI; in Sub-No. 13F, facilities at Eau Claire and Ladysmith, WI with Eau Claire and Rusk Counties, WI; in Sub-No. 17F, facilities at Monroe, WI with Green County, WI; in Sub-No. 20F, facilities at Deerfield, IL with Lake County, IL; in Sub-No. 27F, facilities at LeMars and Sioux City, IA with Plymouth and Woodbury Counties, IA; in Sub-No. 28F, facilities at Eau Claire, WI and Fairmont, MN with Eau Claire County, WI and Martin County, MN; in Sub-No. 29F, facilities at Green Bay and West Bend, WI with Brown and Washington Counties, WI; and in Sub-No. 30F, facilities at Madison, WI with Dane County, WI; (3) removing the restriction "except AK and HI" in Sub-Nos. 6F, 11F, 12F, 13F, and 17F; (4) removing the "originating at or destined to" restrictions in Sub-Nos. 7F, 13F, and 20F; and (5) in all sub-numbers except Sub-No. 13F, expanding one way authorities to authorize radial service between specified cities or counties in IA, IL, MN, SD, and WI, and points in the U.S. or numerous specified States located throughout the U.S. The purpose of this republication is to correct the commodity descriptions in part (1) (b) and (c).

MC 146573 (Sub-16)X, filed March 10, 1981. Applicant: LA SALLE TRUCKING, INC., P.O. Box 46, Peru, IL 61354. Representative: E. Stephen Heisley, 804 McLachlen Bank Bldg., 666 Eleventh St. NW., Washington, DC 20001. Applicant seeks to remove restrictions in its lead certificate to (A) broaden the commodity description from chemicals, plastic and plastic products to "chemicals and related products, and rubber and plastic products" in part (1) of the lead, and also remove the in bulk exception, and (B) replace plantsite and city-wide authority with county-wide authority, and remove the exception to service being performed in AK and HI, to authorize between points in Blue Earth, Freeborn, and Nicollet Counties, MN (Mankato, MN), Licking County, OH (Newark, OH), Worcester County, MA (Clinton, MA), Grundy and Peoria Counties, IL (Morris and Mapleton, IL), and Chicago, IL (facilities near Chicago, IL), and points in the U.S.

MC 146909 (Sub-1)X, filed March 13, 1981. Applicant: PIONEER VAN LINES, INC., 1810 Park Place Bldg., Seattle, WA 98101. Representative: J. G. Dail, Jr., P.O. Box LL, McLean, VA 22102. Applicant seeks to remove restrictions from its lead certificate to replace city-wide authority with county-wide authority: Hennepin and Ramsey Counties, MN for Minneapolis, MN; St. Louis County, MN for Duluth, MN; Ward County, ND for Minot, ND; and King, Kitsap, Pierce, and Snohomish Counties, WA for Seattle, WA.

MC 147273 (Sub-4)X, filed March 13, 1981. Applicant: KENNETH SHAFER, d.b.a. K & T HOT SHOT SERVICE, P.O. Box 1558, Proctorville, OH 45669. Representative: John M. Friedman, 2930 Putnam Ave., Hurrican, WV 25526. Applicant seeks to remove restrictions in Sub-No. 3F certificate to (1) broaden the commodity description from machinery, machine parts, nickel and nickel alloys, and iron and steel articles to "machinery and metal products;" (2) remove the "except AK and HI" restriction; and (3) eliminate "except commodities in bulk and those requiring special equipment" restrictions.

MC 148860 (Sub-2)X, filed March 13, 1981. Applicant: D.M.T. TRUCKING, INC., 2700 Broening Highway, Baltimore, MD 21222. Representative: Theodore Polydoroff, Suite 301, 1307 Dolley Madison Blvd., McLean, VA 22101. Applicant seeks to remove restrictions in its Sub-No. 1F certificate to broaden its commodity description from automobiles, trucks, cabs, and chassis, in secondary movements in truckaway service, and parts for such commodities to "transportation equipment."

Operating Rights Applications; Decision-Notice

The following operating rights applications, filed on or after July 3, 1980, are filed in connection with pending finance applications under 49 U.S.C. 10926, 11343 or 11344. The applications are governed by Special Rule 252 of the Commission's General Rules of Practice (49 CFR 1100.252).

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Persons submitting protests to applications filed in connection with pending finance applications are requested to indicate across the front page of all documents and letters submitted that the involved proceeding is directly related to a finance application and the finance docket number should be provided. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. However, the Commission may have modified the application to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements as to the finance application *or* to the following operating rights applications directly related thereto filed within 45 days of publication of this decision-notice (or if the application later becomes unopposed),appropriate authority will be issued to each applicant (except where the application involves duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice by effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 3, Members Krock, Joyce, and Dowell.

Dated: December 16, 1981.

MC 98868 (Sub-4), filed February 3, 1981. Applicant: CURLEY'S TRUCKING, INC.—CONVERSION, P.O. Box 352, Odessa, TX 79760. Representative: William D. Lynch, P.O. Box 912, Austin, TX 78767. Transporting Oilfield equipment and pipe, when moving as oilfield equipment. Pipe when it is to be used in the construction of pipe lines of any and every other character or use other than oilfield equipment, between the points within the area covered by the existing certificate of the applicant; except that the applicant is prohibited from transporting pipe when not moving as oilfield equipment, where both origin and destination are places on the certificated routes of regular route common carrier motor carriers, when such pipe is less than four inches (4") in diameter and is also less than twenty-eight feet (28') in length. This restriction does not apply to pipe moving to from bond and lone star, Texas. Trenching machines, tractors, drag lines, back fillers, caterpillars, road building machinery, batch bins, ditching machinery, bulldozers, heavy mixers, finishing machinery, power hoists, cranes, heavy machinery, pile driving rigs, paving machines and equipment, graders, construction equipment, boilers, scrapers, irrigation and drainage machinery, road maintainers, electric motors, pumps, transformers, circuit breakers, turbines, bridge construction equipment, shovels, planes, lathes, air compressors, rotaries, prefabricated houses, bulk station storage tanks, heavy tanks, pump machinery, erection machinery and equipment, refinery machinery and equipment, boats and prefabricated steel girders, threshing machines, sawmill machinery, telephone and telegraph poles, coreosote and other pilings, heavy furnaces or ovens, pipe (including iron, steel, concrete, composition or corrugated), punches, presses, iron or steel girders, beams, columns, posts, channels and trusses, generators and dynamos, iron or steel castings, sheets, and plates, industrial hammers, industrial machinery, including laundry, ice making, air conditioning, baker, bottling, gin, crushing, dredging, mill, brewery, textile, water plant and wire covering, twistings or laving, derricks, hoists, steam or internal combustion engines, rollers, power shovels, safes, vaults, bank doors, and gasoline, fuel oil and other storage tanks, when said commodities are not moving as oilfield equipment, as follows:

The holder of this authority may transport the above named commodities together with its attachments and its detached parts thereof between incorporated cities, towns and villages only when the commodity to be transported weighs 4,000 pounds or more in a single piece or when such commodity, because of physical characteristics other than weight, requires the use of "special devices, facilities or equipment" for the safe and proper loading or unloading thereof. Absorbers (scrubbers); air or gas lift equipment; amplifiers, seismic; anodes, magnesium; armatures (heavy) and parts; assemblies, backside, casinghead, Christmas tree, stuffing, knock-off, screen setting, seating and set shoe; asphalt plant; asphalt or pipe line coating, in barrels or drums; bailers; barges, benders, pipe; blowout preventers, booms, crane, truck, dragline, derrick and tractor; brakes and parts; bridges, portable buckets, clam shell, dragline and shovel; bug blowers; cable tool drilling machines; cable tools; cat heads; chains, loading, in barrels; casing spiders; chlorine and other chemicals in steel cylinders or tanks (not tank trucks); gas compressors; connection racks; conveyors; core barrels; coring units; clutches (heavy); crown blocks; crank shafts (heavy); cross-arms and their hardware; cross-ties; cylinder, engine and compressor; dehydration units; derrick ramps; derrick starting leg; derrick skids; derrick steps; derrick substructure; drill bits; drill collars; drilling line; drilling hose; draw works; drilling rig machinery; elevators; elevator bails; engine substructures; empty cylinders; extensions, derrick base; engine compound; finger boards; floor skids; fronts, rig or derrick; fishing tools; fouble boards; fuel oil and gasoline (not including movement in tank trucks or tank trailers); garages, portable; guards, chain and belt; grief stems or kelly joints; guns, mud; gravity meters; heat exchangers; hooks; jack shafts; kelly and pipe straightner; ladders, derrick; light plants; machinery, pipe screening, pipe screwing, pipe slotting, pipe threading or cutting, pipe wrapping; water well machinery, water well surveying machinery; milling machine; marsh buggies; magnetic field balances; magnetometers; masts; monorail systems; mud boats; mud houses; mud mixers; mud tanks; mufflers, (heavy); mouse holes; nipples, iron, cement perforators; planers, power; plow; poles, gin; power transmission equipment (towers); pressure devices; rails, steel; railroad engines, cars and equipment; rat holes; radiators (heavy); reamers; reinforcing steel retorts, iron or steel; river clamps; rods, reinforcing and sucker (single and bundles); recording equipment, road lumber; rig timbers; seismic shooting equipment; slips; shale shakers; screens; substitutes; speed reducers; smoke stacks; starting units; stand pipes; swivels; suctions; spears and fishing tools; takeoffs, power; tool joints; towers; treating plants; tongs; traveling blocks; tubing and tubing heads; valves; V-belt drives; utility houses; welding machines; wire line, rope or cable, on reels; lift equipment; anchors; angles (heavy); mud, including drilling mud and conditioners (not including movements in tank trucks or tank trailers); propellers or shafts; blades, including bit, scraper and grader; boring machines or mills, including parts and equipment; dam and power plant machinery and equipment (control gates); collars, including drill or pipe; counterbalances, including counter shafts and weights; hoppers; printing machines; telephone equipment (cables, reels, switchboards); tools in boxes and houses; trailer, mounted units, including mounted workover units; treaters; blocks; jacks (heavy); joints, including expansion or kelly; core drilling machines; core drilling equipment; protectors (attached to pipe); and heaters, when not moving as oilfield equipment as follows: The holder of this authority may transport the above-named commodities (beginning with the commodity "Absorbers") together with its attachments and its detached parts thereof, between points in the pick-up and delivery limits of the regular route common carrier motor carriers in incorporated cities, towns and villages only when the commodity to be transported weighs 4,000 pounds or more in a single piece or when such commodity, because of physcial charcteristics other than weight, require the use of "special devices, facilities or equipment" for the safe and proper loading or unloading and transportation thereof. The term "special devices, facilities or equipment," is construed to

mean only those operated by motive or mechanical power; and all commodities to be transported, beginning with "trenching machines", together with attached and detached parts thereof, must require specialized equipment for the safe and proper loading or unloading and transportation thereof between points in Texas.

Notes.—The purpose of this application is to convert Certificate of Registration No. MC-98868 (Sub-No. 2) into a Certificate of Public Convenience and Necessity. Conversion is necessary because in MC-F-14427, applicant acquired the interstate operating rights of J. E. Cox and Sons, Inc.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Motor Carriers Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the Federal Register of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the Federal Register issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

BILLING CODE 7035-01-M

[Finance Docket No. 28272, etc.]

Star Lake Railroad Co., et al.; Exemptions and Authorization of Construction and Operation

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Exemptions and Authorization of Construction and Operation.

SUMMARY: The Interstate Commerce Commission authorizes the construction of an 82-mile rail line in McKinley and San Juan Counties NM, by the Star Lake Railroad Company (Star Lake). It also exempts several related transactions from its regulatory requirements. Prior approval will not be required for (1) control of Star Lake by The Atchison, Topeka and Santa Fe Railway Company (Santa Fe), (2) an operating agreement between Star Lake and Santa Fe, and (3) the issuance of construction notes by Star Lake.

DATES: These exemptions are effective on the date of this publication in the **Federal Register**.

ADDRESSES: Petitioner's Representative: R. K. Knowlton, Milton E. Nelson, Jr., Michael W. Blaszak, 80 East Jackson Boulevard, Chicago, IL 60604.

FOR FURTHER INFORMATION CONTACT: Ellen D. Hanson, (202) 275–7245.

SUPPLEMENTARY INFORMATION:

Finance Docket No. 28272, Star Lake Railroad Company-Rail Construction and Operation in McKinley County, New Mexico; Finance Docket No. 29030, the Atchison, Topeka and Santa Fe Railway Company-Operating Agreement-Star Lake Railroad Company, Exemption Under 49 U.S.C. 11343–11347; Finance Docket No. 29228, Star Lake Railroad Company-Construction Notes, Exemption Under 49 U.S.C. 10505 from 49 U.S.C. 11301; Finance Docket No. 29602, The Atchison, Topeka and Santa Fe Railway Company—Control—Star Lake Railroad Company, Exemption from 49 U.S.C. 11343.

On September 3, 1976, Star Lake filed an application in Finance Docket No. 28272 seeking authority under 49 U.S.C. 10901 to construct approximately 82 miles of railroad line. The proposed line would extend from the existing main transcontinental railroad line of the Santa Fe at a point near Baca (Prewitt) to Star Lake Junction, NM, with branch lines extending from the latter point to Gallo Wash and Star Lake, NM. Star Lake is a wholly owned subsidiary of Santa Fe.

On December 31, 1979, Santa Fe and Star Lake jointly filed a petition seeking exemption under 49 U.S.C. 10505 from the requirement of our prior approval of (1) the issuance of construction notes by Star Lake to Santa Fe, under 49 U.S.C. 11301, (in Finance Docket No. 29228) and (2) an operating agreement between Star Lake and Santa Fe under 49 U.S.C. 11343 (in Finance Docket No. 29030). Each of these transactions is related to Star Lake's construction proposal. Notice of the petition was published in the **Federal Register** on April 29, 1980 (45 FR 28540). No comments have been submitted.

On our own motion, we have initiated the proceeding in Finance Docket No. 29602 to consider the control relationship between Star Lake and Santa Fe.

On March 3, 1980, the construction proceeding was designated for handling throught written verified statements. Continental Divide Trail Society (Society) filed a verified statement opposing the application. In addition, the Pueblo Pintado Chapter of the New Mexico Navajo Ranchers Association (Chapter) and an individual named Martin Martinez jointly filed a petition to intervene (along with verified statements in opposition). On August 15, 1980, their intervention was authorized and their statements accepted for consideration.

On February 20, 1981, we extended the time for issuing a decision in this proceeding to March 23, 1981. We also indicated that we would decide this case and the related exemption proceeding on a consolidated record.

Preliminary Matter

On June 30, 1980, the Society filed a motion to reply to applicant's reply statement, under 49 CFR 1100.49. It has failed to demonstrate just cause for departure from our general rule prohibiting such pleadings. Accordingly, the motion will be denied.

Pertinent Facts

A. The Rail Construction Proceeding:

Star Lake proposes to construct and operate a rail line in the "San Juan Basin," a region in northwestern New Mexico rich in low-sulfur coal. See the map in Appendix A.[1] Appendix B

[1] Appendix A is filed as part of the original document with the Office of the Federal Register.

Continued

describes the proposed route in more detail.

The region through which the proposed rail corridor would run is sparsely populated. It borders, but does not encroach upon, the Navajo Indian reservation. Livestock grazing is the primary agricultural activity in the region.

Stations will be established in South Hospah, Star Lake Junction, Star Lake, and Gallo Wash. Of the total mileage from each of the points to the nearest existing railroad station at Grants, NM, almost 60 percent has only light duty or dirt roads, about 23 percent has medium duty roads, and less than 18 percent has heavy duty capability.

There is some coal mining activity currently in the region. However, rail service to Star Lake, Hospah and Gallo Wash, NM, should result in vastly increased productivity. The final environmental impact statement ("EIS") prepared in conjunction with this proceeding concludes that if the rail line is not built, various coal mines would not be developed, "and coal production from the region would amount to 14.5 million tons in 1990, approximately 18.5 million less than if the railroad were built." [2] Star lake estimates that construction will take about 21 months and will cost approximately $61.1 million.

Star Lake states that two utility companies, Tucson Electric Power Company and Texas Utilities, Inc., have already secured contractual rights to coal fields adjacent to Star Lakes's proposed right-of-way. The coal reserves of these two companies are estimated to be approximately 368 million tons. In addition, there are other adjacent reserves without firm development plans. Applicant argues that rail service will constitute an integral part of the development of these resources, which will supply needed additional power to the western States. It estimates that annually 4.5 million tons of coal will be transported to market by 1986, and 9 million tons annually by 1990.

In addition, applicant contends that increased coal production will spur the region's economic growth, benefiting the entire State of New Mexico. Finally, Star Lake argues that the proposed rail corridor is environmentally superior to all alternate corridors considered, and cites the EIS in support of this contention.

Applicant is a noncarrier, wholly owned subsidiary of Santa Fe. It was incorporated on August 6, 1976, to construct and operate a railroad. Its investment will consist only of the right-of-way and normal track structure and related facilities. Santa Fe intends to operate over and maintain the line pursuant to an operating agreement with applicant. In doing so, it will provide motive power, rolling stock and related equipment.

Star Lake has actively (although to date unsuccessfully) sought shipper participation in financing the line's construction. It is prepared, however, to meet the estimated $61 million construction cost through the issuance of construction notes to Santa Fe, using payments under their operating agreement to retire the notes. [Santa Fe, which has submitted balance sheets and income statements covering recent periods, states its ability to meet these costs out of its general corporate funds and supplemental borrowing from lending institutions to the extent required.]

Protestant Martinez is a Navajo Indian who resides near the proposed rail corridor. The Chapter is an organization representing Navajo Indians in this region. Generally, they contend that the proposed line threatens the livelihood (primarily ranching), as well as religious, cultural, social and historical values, of persons living in the San Juan Basin. Additionally, they challenge applicant's fitness (financially and otherwise), arguing, in part, that coal development plans in this area are highly speculative; that applicant lacks adequate working capital; and that applicant has engaged in improper practices in order to acquire rights-of-way along the proposed rail corridor. They also claim that applicant has not adequately explained its relationship to corporations which own coal deposits in the region, and which would (as opposed to the public) reap any gains stemming from this proposal. They argue further that Santa Fe, not Star Lake, is the proper applicant here.

In arguing that applicant has not shown a public need for the proposed rail construction, these protestants state further that coal demand is decreasing. On the other hand, they argue that, if the demand for coal increases, implementing this plan would seriously and adversely affect the local population, insofar as employment opportunities would not benefit the local population, but rather non-Indians migrating to the area.

Finally, they claim that this proposal is contrary to a number of Federal laws designed to protect the local (Indian) population's religious, social, and environmental concerns.

The Society's position is that alternative rail lines should be considered to that proposed by applicant. It contends that the proposed line will have an adverse environmental impact upon the proposed Continental Divide Trail, which has been designated a national scenic trail under the National Parks and Recreation Act of 1978 (Public Law 95-675). It argues that the proposed rail corridor will impair the trail's recreation potential. It suggests that the EIS is inadequate and should be reevaluated and modified Finally, the society suggests that while an alternate route would not eliminate the crossing of the trail by the railroad, it could mitigate adverse impacts.

In reply to the Society, applicant argues that the EIS adequately addresses the issues raised and properly concludes that the proposed route is superior from an environmental, sociological and engineering standpoint. Applicant states that it will take steps to substantially mitigate any adverse impacts of its proposal (including fencing the right-of-way, restricting contractors from excessive disturbances of the terrain, and requiring contractors to return disturbed areas to their pre-construction condition).

Inasmuch as Star Lake has proceeded with construction plans in reliance upon the EIS, it argues that it would be unjust to now reopen issues previously considered in the EIS. It states that the attendant delays would result in largely increased construction costs and preclude it from meeting its completion date. This, it alleges, would result in hardship to prospective shippers, as well as power consumers in the West and Southwest.

In reply to the remaining protestants, applicant maintains that it is fit, financially and otherwise, to proceed with the rail construction and has the necessary financing. The fact that it is a new, untried company or affiliated with Santa Fe, cannot serve as a basis for denying this proposal, it states. Regarding protestants' allegations of "bad faith" practices in acquiring rights-of-way, Star Lake notes that this issue is currently being litigated before the Commissioner of Indian Affairs in a Department of Interior proceeding. Applicant argues that this rail construction proceeding is not the

---

Copies may be obtained by writing to Office of the Secretary, Interstate Commerce Commission, 12th and Constitution Ave. NW., Washington, D.C. 20423.

[2] Volume 2 of EIS, Chapter VIII at page SLR VIII-1. The EIS was prepared by the U.S. Department of Interior, Bureau of Land Management (the lead agency). It was made available for public inspection as of February 20, 1979. Notice of the final EIS appeared in the Federal Register on March 12, 1979, at 44 F.R. 13579, and it became final 30 days later.

proper forum for determining that particular issue.

With respect to public need, applicant contends that the many benefits accruing to the public as a consequence of its proposal far outweigh possible disadvantages which may befall protestants. Moreover, applicant argues that protestants have not demonstrated whether or to what extent its proposal will adversely affect the religious and sociological concerns of the local population.

B. The Exemption Proceeding

As previously stated, Star Lake proposes to execute an operating agreement with Santa Fe, whereby the latter company would perform all operations over the railroad line. Also, Star Lake proposes to issue construction notes to its parent company to finance the rail construction. The notes would be retired through payments received by Star Lake pursuant to the operating agreement.

Acquisition by a rail carrier of trackage rights over, or joint ownership in, or joint use of, a railroad line owned or operated by another rail carrier is a transaction that requires our approval under 49 U.S.C. 11343. To seek Commission approval, an application must be filed in compliance with 49 CFR Part 1111. Also, a carrier may not issue securities to another person without our approval under 49 U.S.C. 11301. This approval must be sought through an application filed pursuant to 49 CFR 1115. Petitioners contend, however, that their proposals should be exempted from our review, under 49 U.S.C. 10505, because they are in-house type transactions of limited scope. They claim that the transactions will not affect the general public, shippers or other carriers, nor alter any existing operations or competitive balance.

Discussion and conclusions

A. THE RAIL CONSTRUCTION PROCEEDING:

Under the provisions of 49 U.S.C. 10901, a rail carrier may not construct and operate an additional rail line without first obtaining a certificate of public convenience and necessity authorizing such action. This proceeding involves a proposal to construct and operate a new railroad line by a newly established corporation (Star Lake). Additionally, actual operations over the line would be performed by applicant's parent corporation (Santa Fe).

The provisions of 49 U.S.C. 10901 apply to new railroad lines proposed for construction and operation by a corporation not previously considered a carrier subject to our jurisdiction. See *Texas & C. R.R.* v. *Northside Ry.*, 276 U.S. 475 (1928). Moreover, they apply to new lines constructed by an entity which will not itself perform operations over the line if these operations are controlled by or with the nonoperating owner. See *Texas & N.O. R. Co. Abandonment*, 317 I.C.C. 245 (1960); *Harris County Houston Ship Channel Nav. Dist. Operation*, 290 I.C.C. 83 (1953).

Initially, we conclude that Star Lake is a carrier subject to our jurisdiction, and its proposal is subject to the provisions of section 10901. We reach this determination in light of Star Lake's relationship to Santa Fe (the railroad which would actually perform operations over the proposed line) and the degree of control it will exercise over the line and operations. Additionally, Star Lake will hold itself out to provide transportation service. The presence of that "holding out" to transport the property of anyone who might choose to use the service is a salient factor in fixing common carrier status. *Pennsylvania R. Co. Merger New York Central R. Co.*, 347 I.C.C. 536, 549 (1974); *Status of Bush Universal, Inc.*, 342 I.C.C. 550, 564 (1973); *State of Vt. and Vermont Ry., Inc., Acquisition and OP.*, 320 I.C.C. 609, 611–12 (1964). See also *Union Stock Yard & Transit Co.* v. *United States*, 308 U.S. 213 (1939); *United States* v. *California*, 297 U.S. 175 (1936); *United States* v. *Brooklyn Eastern District Terminal*, 249 U.S. 296 (1919).

Having determined that the proposal is subject to 49 U.S.C. 10901, we may now weigh its merits under that section. We find that the public convenience and necessity requires or permits the proposed rail construction.

Construction of the proposed line is essential to coal development in the affected region. Barring the introduction of rail service, it is doubtful that coal mining plans would go forward. The need to foster the development of additional energy resources is great, particularly at a time when our nation is actively seeking to reduce its reliance upon foreign oil. The consequence of the proposed rail construction will be to spur coal development in the San Juan Basin, and ultimately to provide power to consumers at numerous points in the western United States.

Notwithstanding our general concern to foster energy growth, we must still weigh the benifits of this specific proposal in light of protestants' contentions. These arguments fall into two general categories. Initially, we must question whether the benefits of this proposal outweigh real and/or potential adverse impacts upon the particular region and its population. Secondly, is this particular applicant fit, financially and otherwise, to proceed with the propose construction?

The EIS addresses environmental concerns articulated by protestants. Regarding air quality, water resources, soils and vegetation, the EIS indicates that the proposed rail corridor would have a relatively minor impact upon the region. It reaches similar conclusions regarding land use, recreation, and agricultural grazing in the area.[3] In each instance, these findings reflect the fact that disturbances to the region stemming from the rail construction will be limited to a small fraction of the total acreage.[4]

There will, of course, be unavoidable adverse impacts upon fossil materials and archeological sites in the region. However, a relatively small number of sites will be disturbed within the region. Furthermore, applicant will, as noted, take steps to salvage information from the affected sites prior to and during construction, and to mitigate adverse impacts. To insure that applicant does so we will condition our authorization of this proposal accordingly.

The EIS also points out some positive impacts upon the region beyond the actual development of coal resources. The proposed rail construction would result immediately in increased employment opportunities and enhanced income, as well as the future development of additional coal mines in the region which would otherwise not exist. Economic benefits to the local Indian population would help to offset potential negative impacts experienced by the local population as a result of social change.

Finally, the proposed rail corridor appears to be clearly superior to the

---

[3] See Volume 2 of the EIS, Chapter III, "Impacts of the Proposed Action."

[4] Ibid.

Concerning recreation, the report indicates that "activities would not be appreciably affected . . . because those occuring within the corridor are primarily a dispersed type. The recreationist participating in these activities is not dependent on the 289.6 acres of public lands within the 2,954 acres of committed land in the right-of-way." See page SLR III-11.

Regarding grazing, the EIS indicates that nearly 3000 acres of right-of-way would be removed from livestock grazing during the economic life of the railroad (after which the land would be returned to grazing). It states that "a low adverse impact would be realized by most livestock operators affected . . . due to the relatively low number of AUMs (animal unit months) lost." It is estimated that 5 to 10 Indian operators would be affected by the proposal, which would result in the unavoidable loss of 402 AUMs for the life of the railroad. See page SLR III-12, and also Chapter V of Volume 2, "Unavoidable Adverse Impacts" at page SLR V-1.

alternatives considered.[6] As previously noted, the absence of rail service from the region would serve to substantially curtail potential coal development. Other modes of transport are impractical and inefficient, as well as environmentally unsound.

Star Lake considered several alternate rail corridors to the one proposed, assessed as inferior in the EIS. Essentially, alternate rail corridors have either similar or worsened environmental impacts.

We conclude that the environmental impacts of the proposal do not warrant denial of this application. While there will be a measure of disturbance to the region and some of its inhabitants, benefits stemming from the proposed action outweigh negative consequences.

The Chapter and Mr. Martinez contend that Star Lake is not the proper applicant in this case since Santa Fe will actually operate the line. Star Lake clearly intends to undertake the proposed construction; it is an appropriate applicant for this purpose. It is equally clear, however, that Santa Fe will be wholly responsible for operations conducted on the line, as well as its maintenance. Accordingly, we will require Santa Fe to join in this application, as the "operating" applicant, as a prior condition to our issuance of a certificate. [We will issue a certificate authorizing construction by Star Lake and operation by Santa Fe, with each applicant bearing the pertinent service obligations imposed by the Act.] This will help insure that the public will clearly understand the corporate relationship of Star Lake and Santa Fe and each one's participation and legal responsibilities with respect to the line.

Joint protestants have also raised a number of issues concerning Star Lake's fitness. As noted, these issues relate to (1) applicant's financial viability, particularly since Star Lake is a new company without any "track record"; (2) the corporate relationship of applicant to other Santa Fe subsidiaries which have mineral holdings in the area; (3) the manner in which applicant acquired rights-of-way in the area; and (4) whether applicant's proposal is violative of various federal statutes.

The mere fact that an applicant is a new company about to assume a measure of financial risk cannot alone provide a basis for denying its proposal, particularly where the proposal is otherwise found to be required or permitted by the public convenience and necessity. Also, applicant has stated that regardless of whether it receives financial support from prospective shippers on the line, it will be able to derive financial support from its parent corporation, Santa Fe. Moreover, it appears that over time, coal production will increase in the area and the line's profits will increase correspondingly. These factors, coupled with the readiness of applicant and its parent to assume the financial risk involved favor our authorizing the venture. See *Construction By Lowell & Southern R.R.*, 117 I.C.C. 1 (1926).

The corporate relationship between applicant, Santa Fe, and other Santa Fe subsidiaries, is not a basis for denial where there is no evidence demonstrating that applicant would engage in discriminatory practices. Moreover, applicant's amended "return to questionnaire" indicates that while applicant is affiliated with several companies which own coal deposits in the area, these deposits have been leased to other (unrelated) firms. Consequently, applicant's affiliates will not act as shippers once the proposed operations are under way.

Protestants' allegations of "misconduct" in obtaining rights-of-way from landowners are serious ones. However, this issue is being fully addressed in another forum (Department of Interior, Bureau of Indian Affairs). The Resolution of this issue will affect applicant's ability to go forward with its proposal regardless of whether we find a public need for the proposed construction in this proceeding. Consequently, we will not seek to resolve this issue.

Protestants also claim that applicant's failure to plan for rail passenger service is violative of 25 U.S.C. 312 and 313. Section 312 concerns, and as here pertinent, the granting of rights-of-way to railroads through Indian lands by the Secretary of the Department of Interior provided that certain conditions are met. Section 313 sets forth maximum "width" specifications of rights-of-way. Applicant claims that the former statute, adopted 80 years ago, is inconsistent with the comprehensive scheme adopted by Congress in the *Railroad Passenger Service Act of 1970* [45 U.S.C. 501 *et seq.*], and should no longer be interpreted as having any force and effect. Regarding section 313, applicant states that is has filed a request with the Department of Interior (in accordance with that agency's regulations) for a right-of-way in excess of the maximum width.

These are also matters within the specific jurisdiction of the Department of Interior and that agency is the proper forum for litigating claims under Title 25 (*Indians.*). We emphasize that our decision in this proceeding is *permissive*. Consequently, notwithstanding a finding of public need for a proposed rail construction, applicant is not required to consummate the transaction, and may not be able to proceed further with its proposal if precluded from so doing by the dictates of another governmental entity having statutory authority which impacts upon the rail construction.

Joint protestants also have challenged this proposal in view of its allegedly negative impact upon the religious practices of Indians in the region; the environment generally, and historic structures in the vicinity.[6] These matters were addressed appropriately in the EIS and protestants have failed to adduce concrete evidence supporting their arguments.

Under 49 U.S.C. 10901(e), we have discretionary power to impose labor protection provisions in authorizing a railroad to construct and operate a new line. In this proceeding, however, the evidence demonstrates that while the proposed line construction and operation will result in additional employment opportunities, it will not adversely impact existing employees. Accordingly, we will not impose the labor protection requirements here.

Lastly, joint protestants' contention that applicant's verified statements in support of its proposal were not timely filed is incorrect.

B. THE EXEMPTION PROCEEDING

Statutory Criteria. After our publication of this proposal in the **Federal Register**, the Staggers Rail Act of 1980 (Pub. L. No. 96–448, section 213, 94 Stat. 1895, October 14, 1980) amended 49 U.S.C. § 10505. As a general rule, administrative agencies are required to apply the law in effect at the time of decision. See *Ziffrin, Inc.* v. *United States*, 318 F. 2d 1058, 1066–1067 (D.C. Cir. 1978). Therefore, we will apply the law as amended by the 1980 Act to this case.

Section 10505, as amended, authorizes us to exempt a transaction when we find that (1) continued regulation is not necessary to carry out the rail transportation policy of 49 U.S.C. 10101a and (2) either the transaction is of limited scope or regulation is not necessary to protect shippers from the abuse of market power.

---

[5] See Volume 20 of the EIS, Chapter VIII, "Alternatives to the Proposed Action." See also, Volume 1 of the EIS, Chapter VIII.

[6] Specifically, protestants argue that the proposal violates 42 U.S.C. 1996 (American Indian Freedom Act), 16 U.S.C. 470F (National Historic Preservation Act), and 42 U.S.C. 4331 (National Environmental Policy Act).

The transactions for which Star Lake and Santa Fe seek exemption are in-house transactions. Clearly, each reflects the best business judgment of the two companies with respect to the financing and ultimate operation of the line. We are reluctant to substitute or our judgment for theirs where no useful public purpose would be served through our prior review and approval of the transaction.

Our prior approval of the proposed securities issuance is unnecessary to carry out the transportation policy of 49 U.S.C. 10101a, and would be inconsistent with our policy to minimize the need for Federal regulatory control. Regulation of the financing agreement is not necessary to protect shippers from the abuse of market power. Moreover, Santa Fe has demonstrated its willingness and ability to finance the rail construction (as evidenced through its submission of financial data in the rail construction proceeding).

Similarly, the proposed trackage rights agreement is merely an adjunct to the rail construction proposal, limited in scope, and will not adversely impact either shippers or other carriers. Regulation of the transaction is unnecessary to carry out the rail transportation policy of 49 U.S.C. 10101.

Our decision to exempt a trackage rights agreement does not relieve a carrier of its obligation to protect the interests of employees as otherwise required by 49 U.S.C. Subtitle IV. We have determined that the employee protective provisions developed in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605, 614 (1978), as modified by *Mendocino Coast Ry. Inc.—Lease and Operate*, 360 I.C.C. 653, 664–5, (1980), apply to employees involved in trackage rights transactions. Accordingly, these protective provisions will be imposed here.

Final matters

Inasmuch as Star Lake is a carrier subject to our jurisdiction, we must consider the control of Star Lake by Santa Fe in light of 49 U.S.C. 11343. Under this section our approval of the control relationship is required. Accordingly, we have instituted the proceeding in Finance Docket No. 29602 to consider the corporate relationship of Sante Fe and Star Lake.

We have already exempted as a class "transactions within a corporate family that do not result in adverse changes in service levels, significant operational changes, or a change in the competitive balance with carriers outside the corporate family." 49 CFR 1111.5(c)(3). See *Railroad Consolidation Procedures*, 45 FR 62991, September 23, 1980.

In this proceeding, the involved transaction is tantamount to a "continuance in control" by Santa Fe of Star Lake. The consequences of the transaction, within a corporate family, weighed against the criteria of 49 CFR 1111.5(c)(3), clearly qualify it for exemption from regulation.

The exemption does not, however, relieve the carriers of their obligation to protect the interests of employees as otherwise required by 49 U.S.C. subtitle IV. See 49 U.S.C. 10505(g)(2). We have determined that the employee protective provisions developed in *New York Dock Ry.—Control—Brooklyn Eastern Dist.*, 360 I.C.C. 60 (1979), satisfy the statutory requirements for protection of employees involved in control transactions under 49 U.S.C. 11343. Accordingly, these protective provisions will be imposed here.

We Find

In Finance Docket No. 28272: (1) The present and future public convenience and necessity require or permit the construction and operation of the railroad line described in Appendix B subject to the conditions that (1) Santa Fe join in this proposal as an applicant with respect to the operations over the line and (2) applicants take all necessary steps to mitigate adverse impacts upon the environment stemming from this construction.

(2) The expenses of the proposal will not impair the ability of applicant to perform its obligation to the public.

(3) Employees will not be adversely affected.

(4) This action does not significantly affect energy consumption.

(5) To the extent that certain adverse environmental impacts will result from this action even after all necessary mitigating steps are taken by applicants, such impacts are outweighed by other factors as discussed in this decision, and do not warrant denial of the application.

In Finance Docket Nos. 29036, 29228, and 29602:

(1) Commission regulation of these matters is not necessary to carry out the rail transportation policy of 49 U.S.C. 10101a.

(2) Regulation of the transaction in Finance Docket No. 29228 is not necessary to protect shippers from an abuse of market power. The transaction in Finance Docket No. 29036 is limited in scope.

The transaction in Finance Docket No. 29602 is within the class of transactions which are exempt from regulation under 49 CFR 1111.5(c)(3).

(3) This decision will not operate to relieve any rail carrier from an obligation to protect the interests of employees as required by 49 U.S.C. Subtitle IV.

(4) This decision is not a major federal action significantly affecting either energy consumption or the quality of the human environment.

It is ordered:

In Finance Docket No. 28272: (1) This decision shall be effective on the date of service. A certificate will be issued upon compliance by Santa Fe with the condition that it join in the proposal as an applicant for the purpose of performing the operations over the line. The certificate will authorize construction by Star Lake and operation by Santa Fe.

(2) Star Lake and Santa Fe, respectively, shall report to the Commission in writing within 15 days after the date upon which construction was completed and operations were commenced over the line.

(3) When Santa Fe files schedules establishing rates and charges, the schedules shall refer to this certificate and decision by date and docket number.

(4) If the authority granted by this certificate and decision is exercised Star Lake shall, within 60 days, submit two copies of journal entries required to record the transaction.

In Finance Docket Nos. 29228, 29036, and 29602: (1) Pursuant to 49 U.S.C. 10505 we exempt the transaction in 1) Finance Docket No. 29228 from 49 U.S.C. 11301, and 2) Finance Docket Nos. 29036 and 29602 from 49 U.S.C. 11343, subject to the conditions for the protection of railroad employees imposed by 49 U.S.C. subtitle IV.

(2) Star Lake and Santa Fe shall have 60 days after completing these transactions to submit three copies of sworn statements showing all journal entries, if any, required to record the transactions.

(3) Notice of our action shall be given to the general public by delivery of a copy of this decision to the Director, Federal Register, for publication.

(4) These exemptions will continue in effect for two years from the effective date of this decision. Star Lake and Santa Fe must consummate the transactions during that time in order to take advantage of the exemption.

(5) These decisions shall be effective on the date published in the Federal Register.

Dated: March 19, 1981.

By the Commission, Acting Chairman Alexis, Commissioners Crenshaw, Clapp, Trantum, and Gilliam.

Agatha L. Mergenovich,
Secretary.

Appendix B[1]

Description of the proposed railroad line:

The route will begin at a connection on the existing line of the Atchison, Topeka and Santa Fe Railway Company's Albuquerque Division near Baca, NM (Railroad name for Prewitt); thence in a southeasterly direction around Haystack Mountain; thence northward for about 20 miles to the Continental Divide; thence northeasterly about 10 miles to Tucker Gap, thence north 5 miles through the Pueblo Pintado Canyon to a junction point of the line (Star Lake Junction), the right fork branching to the southeast for about 10 miles terminating in the Star Lake area of McKinley County, and the left fork from the junction branching to the northwest for about 10 miles terminating in the Gallow Wash area of San Juan County. The line will not past through any incorporated city or village.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Antitrust Division

United States v. Amtel, Inc., et al.; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. Section 16(b) through (h), that a proposed Final Judgment, Stipulation and Competitive Impact Statement (CIS), as set forth below, have been filed with the United States District Court for the District of Massachusetts in *United States v. Amtel, Inc., et al.*, Civil Action No. 80-1563-C. The Complaint in this case alleged that five corporations engaged in a combination and conspiracy to fix prices of standard screws sold to distributors in violation of Section 1 of the Sherman Act, 15 U.S.C. § 1. The proposed Final Judgment would enjoin the defendants from entering into, adhering to, maintaining or furthering any contract, agreement, understanding, plan, program, combination or conspiracy with any other person who sells or manufactures standard screws to raise, fix, stabilize, maintain or adhere to prices, discounts or other terms or conditions for the sale of standard screws. The proposed Final Judgment further would enjoin the defendants from communicating with, exchanging with or requesting from any other person who sells to distributors or manufactures standard screws information about any past, present, future or proposed price, discount or other term or condition for the sale of standard screws or the consideration of whether to make any change in any actual or proposed price, discount or other term or condition for the sale of standard screws. Communications concerning manufacturing or production costs, unless necessary for the licensing of a proprietary product, similarly would be enjoined. Each defendant would be required to notify all employees with management responsibility for the sale of standard screws or any responsibility for or authority over the establishment of prices for standard screws of the requirements and prohibitions of the proposed Final Judgment.

Public comment is invited within the statutory 60-day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to Anthony V. Nanni, Chief, Trial Section, Room 3266, Antitrust Division, Department of Justice, Washington, D.C. 20530 (telephone: 202/633-2541).

Joseph H. Widmar,
Director of Operations.

United States District Court for the District of Massachusetts

Civil Action No.: 80-1563-C
Filed: March 18, 1981

United States of America, Plaintiff, v. *Amtel, Inc.; Elco Industires, Inc.; NL Industries, Inc.; Reed & Prince Manufacturing Company; and Textron Inc.*, defendants.

Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. The parties consent that the court may file and enter a Final Judgment, in the form attached to this stipulation, on the court's own motion or on motion of any party at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act [15 U.S.C. § 16(b)-(h)], and without further notice to any party or other proceedings, if plaintiff has not withdrawn its consent, which it may do at any time before entry of the judgment by serving notice of its withdrawal on defendants and filing that notice with the court.

2. If plaintiff withdraws its consent or if the proposed judgment is not entered pursuant to this stipulation, the stipulation shall be of no effect whatever and the making of it shall be without prejudice to any party in this or any other proceeding.

Dated: March 13, 1981.

For the plaintiff: Richard J. Favretto, *Acting Assistant Attorney General;* Mark Leddy, Anthony V. Nanni, Steven M. Woghin, Charles F. B. McAleer, *Attorneys, U.S. Department of Justice.*

For the defendants: Robert Flanders, Esquire, *Edwards & Angell, Attorney for Amtel, Inc.;* William Joseph Linklater, Esquire, *Baker & McKenzie, Attorney for Elco Industries, Inc.;* Kenneth Hart, Esquire, *Donovan, Leisure, Newton & Irvine, Attorney for NL Industries, Inc.;* Robert Buchanan, Esquire, *Sullivan & Worcester, Attorney for Reed & Prince Mfg. Co.;* Henry Sailer, Esquire, *Covington & Burling, Attorney for Textron Inc.*

United States District Court for the District of Massachusetts

Civil Action No.: 80-1563-C
Filed: March 18, 1981

United States of America, Plaintiff, v. *Amtel, Inc.; Elco Industires, Inc.; NL Industries, Inc.; Reed & Prince Manufacturing Company; and Textron Inc.*, defendants.

Final Judgment

Plaintiff, United States of America, having filed its complaint herein on July 15, 1980, and plaintiff and defendants, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law and without this Final Judgment constituting any evidence against or an admission by any party with respect to any such issue;

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law and upon consent of the parties, it is hereby,

Ordered, adjudged and decreed as follows:

I

This court has jurisdiction of the subject matter of this action and of the parties. The complaint states a claim upon wich relief may be granted against each defendant under Section 1 of the Sherman Act (15 U.S.C. § 1).

II

As used in this Final Judgment:

A. "Person" means any individual, partnership, firm, corporation, association or other business or legal entity;

B. "Standard screws" means externally threaded fasteners produced to a standardized published specification and sold wholesale through any of the various types of distributors including independent wholesalers, groups of wholesale distributors, and buying organizations.

III

This Final Judgment applies to each defendant and to each of its officers, directors, agents, employees, subsidiaries, successors and assigns, and to all other persons in active concert or participation with any of them who receive actual notice of this Final Judgment by personal service or otherwise. This Final Judgment does not apply to: (a) any activities between a defendant and any of its parent, subsidiary or commonly-owned corporations; or (b) activities otherwise permitted by the Webb-

[1] Appendix A filed as part of the original document.

Pomerene Act (15 U.S.C. 61–66) and relating solely to sales for export outside the United States.

IV

Each defendant is enjoined and restrained from directly or indirectly entering into, adhering to, maintaining or furthering any contract, agreement, understanding, plan, program, combination or conspiracy with any other person who sells or manufactures standard screws to raise, fix, stabilize, maintain or ahere to prices, discounts or other tumors or conditions for the sale of standard screws.

Each defendant is enjoined and restrained from communicating with, exchanging with, or requesting from any other person who sells to distributors or manufactures standards screws information about (1) any past, present, future or proposed price, discount or other term or condition for the sale of standard screws or the consideration of whether to make any change in any actual or proposed price, discount or other term or condition for the sale of standard screws, or (2) manfacturing or production costs relating to standard screws other than necessary communications between an actual or prospective licensee and licensor relating to the licensing of a proprietary product. This Section V does not apply to (1) any communication that is made to the public or the trade generally but is not made directly to any other person who sells to distributors or manufactures standard screws; or (2) any necessary communication in connection with a bona fide contemplated or actual purchase or sales transaction.

VI

Each defendant is enjoined and restrained from belonging to or participating in any capacity in a trade association comprised primarily of companies in the threaded fastener industry organized by George P. Byrne, Jr., Robert M. Byrne, or Richard C. Byrne or in which any of those individuals holds office, is employed, or has any managerial authority.

VII

A. Each defendant shall, within 60 days after entry of this Final Judgment, furnish a copy of it to each of its employees who has management responsibility for the sale of standard screws or any responsibility for or authority over the establishment of prices for standard screws.

B. Each defendant shall furnish a copy of this Final Judgment to each person who becomes an employee described in subsection A of this section, within 60 days after such position is assumed.

C. Each defendant shall distribute, at least every two years to each of its employees described in subsections A and B of this section: (1) a copy of this Final Judgment or a summary thereof; and (2) a written directive about the defendant's policy requiring compliance with the Sherman Act and with the Final Judgment. The directive shall include an admonition that noncompliance will result in appropriate disciplinary action, which may include dismissal, and advice that the defendant's legal advisors are available to coner about any compliance questions. The defendant shall require that each employee submit to it a signed statement, which it shall retain in its files, acknowledging receipt of the Final Judgment or summary thereof and the directive; that he or she has read them; that he or she has been advised and understands that noncompliance will result in appropriate disciplinary action, which may include dismissal; that he or she has been advised and understands that noncompliance with the judgment may also result in conviction for contempt of court and a fine or imprisonment or both.

D. Each defendant shall file with the court and serve on the plaintiff, within 90 days from the date of entry of this Final Judgment, an affidavit as to the fact and manner of its compliance with subsection A of this section.

VIII

Each defendant shall require, as a condition of the sale or other disposition of all, or substantially all, of the total assets of its standard screw business, that the acquiring party agree to be bound by the provisions of this Final Judgment. The acquiring party shall file with the court and serve on the plaintiff its consent to be bound by this Final Judgment.

IX

For the purpose of determining or securing compliance with this Final Judgment, upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division or his agent made to any defendant at its principal office, subject to any legally recognized privilege:

A. On reasonable notice to the defendant, which may have counsel present, duly authorized representatives of the Department of Justice shall be permitted:

1. Access, during office hours of the defendant, to inspect and copy all books, ledgers, accounts, correspondence, memoranda and other records and documents in the possession or under the control of the defendant relating to any matters contained in this Final Judgment; and

2. Subject to the reasonable convenience of the defendant and without restraint or interference from it, to interview officers, directors, employees or agents of the defendant, any of whom may have counsel present, regarding any matter contained in this Final Judgment.

B. The defendant shall submit such reports in writing, under oath if requested, with respect to any matters contained in this Final Judgment as may be requested.

C. No information or documents obtained by the means provided in this Section IX shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the executive branch of the United States, except in the course of legal proceedings to which the United States is a party or for the purpose of securing compliance with this Final Judgment or as otherwise required by law.

D. If, at the time information or documents are furnished by a defendant to plaintiff, the defendant represents and identifies in writing the material in the information or documents to be of a type described in Rule 26(c)(7) of the Federal Rules of Civil Procedure and the defendant marks each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then plaintiff shall give the days' notice to the defendant before divulging the material in any legal proceeding (other than a grand jury proceeding) to which the defendant is not a party.

X

Jurisdiction is retained by this court for the purpose of enabling any of the parties to apply to this court at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of its provisions, for the enforcement of compliance with it or for the punishment of any violation of it.

XI

This Final Judgement shall be in effect for the period of ten years following the date of its entry.

XII

Entry of this Final Judgment is in the public interest.

Dated: ———————.

Andrew A. Caffrey,

Chief Judge.

United States District Court for the District of Massachusetts

Civil Action No.: 80–1563–C

United States of America, Plaintiff, v. *Amtel, Inc.; Elco Industries, Inc.; NL Industries, Inc.; Reed & Prince Manufacturing Company; and Textron Inc.*, Defendants.

Competitive Impact Statement

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act (the "Act"), 15 U.S.C. § 16(b)—(h), the United States files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I

Nature and Purpose of the Proceeding

On July 15, 1980, the United States filed a civil antitrust complaint under Section 4 of the Sherman Act (15 U.S.C. § 4) to enjoin the above-named corporate defendants from continuing or renewing violations of Section 1 of the Sherman Act (15 U.S.C. § 1).

The complaint alleges that beginning as early as 1957 and continuing at least until sometime in 1977, the defendants engaged in a conspiracy to restrain interstate commerce by fixing the prices of standard screws sold wholesale through various types of distributors. The complaint seeks a judgment by the court that the defendants engaged in a combination and conspiracy in restraint of trade in violation of Section 1 of the Sherman Act and an order enjoing them from continuing or resuming such activities in the future.

Proceedings in this case were stayed pending disposition of a companion criminal prosecution, *United States v. Amtel, Inc., et al.*, Criminal No. 80–244–C (D. Mass.). The indictment, filed on July 15, 1980, charged the above-named defendant corporations and

three individuals with a criminal violation of the Sherman Act arising out of the same conspiracy alleged in the complaint. The criminal case has been concluded. Four of the corporations (Amtel, Inc.; NL Industries, Inc.; Reed & Prince Manufacturing Company; and Textron Inc.) pleaded *nolo contendere* and were fined a total of $700,000. Two of the individuals also pleaded *nolo contendere*. Each received a one year suspended sentence and one year probation. They were fined a total of $60,000. The remaining corporation and individual defendant were found not guilty after trial.

II

The Terms of the Alleged Conspiracy

The conspiracy revolved around the activities of a trade association known as the United States Wood Screw Service Bureau. Each defendant was a member of this trade association and each sold standard screws wholesale through various types of distributors. The complaint alleges that the defendants conspired to fix the prices wholesalers were charged for such screws.

As stated in the complaint, the defendants, for the purpose of forming and effectuating the conspiracy, made telephone calls and held meetings through which they: (1) agreed to increase the published prices of standard screws sold to distributors; (2) agreed to the "base" or published discount level and discussed additional discounts for such screws; and (3) policed adherence to their agreements. The complaint further alleges that in order to effectuate their conspiracy, the defendants published prices and discounts in accordance with agreements reached and exchanged with one another proposed and published prices and discounts. According to the complaint, the conspiracy caused prices to be raised, maintained and stabilized at non-competitive levels, restrained competition between the defendants in the sale of standard screws, and deprived purchasers of such screws of free and open competition. During the period of time covered by the complaint, the total amount of such sales by the defendants exceeded $1 billion.

III

Explanation of the Proposed Final Judgment

The United States and all the defendants have stipulated that the court may enter the proposed Final Judgment at any time after compliance with the Act. The Final Judgment provides that there is no admission by any party with respect to any issue of fact or law. Under the provisions of Section 2(e) of the Act, entry of the proposed Final Judgment is conditioned upon a determination by the court that the proposed Final Judgment is in the public interest.

Standard screws are defined in the proposed Final Judgment as externally threaded fasteners produced to a standardized published specification and sold wholesale through various types of distributors including independent wholesalers, groups of wholesale distributors, and buying organizations. This definition is consistent with the focus of the investigation leading to the criminal indictment and the filing of the complaint.

The proposed Final Judgment enjoins the defendants from entering into, adhering to, maintaining or furthering an agreement with any other person who sells or manufactures standard screws to raise, fix, stabilize, maintain or adhere to prices, discounts or other terms or conditions for the sale of standard screws.

The proposed Final Judgment also enjoins the defendants from communicating with, exchanging with, or requesting from any other person who sells to distributors or manufactures standard screws any information about (a) past, resent, future or proposed price, discount or other term or condition for sale of standard screws or (b) the consideration of whether to change an actual or proposed price, discount or other term or condition for the sale of standard screws. Communications concerning manufacturing or production costs, unless necessary for the licensing of a proprietary product, are similarly enjoined. This restriction on communications does not apply in two situations. It does not apply to public communications which have not been made directly to anyone engaged in the manufacture or sale of standard screws. Nor does it apply to any necessary communication made in connection with a bona fide contemplated or actual purchase or sales transaction.

The proposed Final Judgment requires each defendant to advise those employees with either sales management or pricing responsibility for standard screws of the obligations imposed upon them by the judgment and the Sherman Act. Each defendant must furnish each such employee with a copy of the the Final Judgment within 60 days after the judgment is entered. In addition, every employee who assumes a position with sales management or pricing responsibility must receive a copy of the judgment within 60 days after assuming that position. Each defendant is also required to distribute at least every two years to each employee described above, a copy of the judgment or a summary of it, along with a directive describing the defendant's policy requiring compliance with the judgment and the Sherman Act. The directive must warn employes that noncompliance with the Final Judgment or the Sherman Act will result in disciplinary action, including possible dismissal. The directive shall also notify employees that legal advisors are available to confer with them on any compliance question. Each affected employee must submit a statement to his employer acknowledging that he has received and read the judgment (or summary) and the directive, that he has been advised and understands that noncompliance will result in disciplinary action, which may include dismissal, and that he understands that noncompliance with the judgment could lead to a conviction for contempt of court and result in a fine or imprisonment or both.

Finally, the proposed Final Judgment provides that each defendant require, as a condition of the sale or other disposition of all or substantially all, of the total assets of its standard screw business that the acquiring party agree to be bound by the provisions of the Final Judgment. The acquiring party must file with the court and serve on the United States its consent to be bound by the judgment.

In order to determine compliance with the Final Judgment, the Department of Justice is given access to the files and records of the defendants, subject to reasonable notice requirements, and may for the same purpose interview defendants' officers, directors, agents or employees. Upon the written request of the Department of Justice, defendants shall submit written reports with respect to any of the matters contained in the Final Judgment.

The Final Judgment is to be in effect for ten years from its date of entry.

IV

Remedies Available to Private Litigants

Section 4 of the Clayton Act (15 U.S.C. § 15) provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages such person has suffered, as well as costs and reasonable attorney's fees. The entry of the proposed Final Judgment will neither impair nor assist any person in prosecuting any private antitrust claim arising out of the conspiracy charged in the complaint. Under Section 5(a) of the Clayton Act, 15 U.S.C. § 16(a), this Final Judgment may not be used as prima facie evidence in legal proceedings against the defendants.

Shortly after the commencement of this case and the criminal case by the United States, a number of private actions were filed in various federal district courts throughout the United States seeking treble damages. The cases were consolidated in the District of Massachusetts and are now before Chief Judge Andrew A. Caffrey.

V

Procedures Available for Modification of the Proposed Final Judgment

As provided by the Act, any person believing that the proposed Final Judgment should be modified may submit written comments to Anthony V. Nanni, Department of Justice, Antitrust Division 10th & Constitution Avenue, N.W., Washington, D.C. 20530, within the 60-day period provided by the Act. The comments and the department's responses to them will be filed with the court and published in the Federal Register. All comments will be given due consideration by the Department of Justice, which remains free to withdraw its consent to the proposed Final Judgment at any time prior to its entry if it should determine that some modification is appropriate and necessary to the public interest. The proposed Final Judgment provides that the court will retain jurisdiction over this action, and that the parties may apply to the court for such orders as may be necessary or appropriate for its modification or enforcement.

VI

Alternatives to the Proposed Final Judgment

The proposed Final Judgment will dispose of the United States' claim for injunctive relief against the defendants. The only

alternative available to the Department of Justice is a trial of this case on the merits. Such a trial would require a substantial expenditure of public funds and judicial time. Since the relief obtained in the proposed Final Judgment is substantially similar to the relief the Department of Justice would expect to obtain after winning a trial on the merits, the United States believes that entry of the proposed Final Judgment is in the public interest.

VII

Determinative Materials and Documents

No materials and documents of the type described in Section 2(b) of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16(b)) were considered in formulating the Final Judgment.

Respectfully submitted,

Steven M. Woghin,

Attorney, U.S. Department of Justice, Antitrust Division, Room 3256, 10th and Constitution Avenue, N.W., Washington, D.C. 20530, 202/633-2417.

[FR Doc. 81-9081 Filed 3-25-81; 8:45 am]

BILLING CODE 4410-01-M

Office of the Attorney General

Establishment of Attorney General's Task Force on Violent Crime

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Public Law 92-463, 86 Stat. 770-776, 5 U.S.C. App. I, Supp. II), and with the concurrence of the Office of Management and Budget, the Attorney General has determined that establishment of the Attorney General's Task Force on Violent Crime is in the public interest in connection with the performance of duties imposed on the Department of Justice by law.

The Task Force will make specific recommendations to the Attorney General on ways in which the federal government can do more to assist in controlling violent crime without limiting the Department of Justice's efforts against organized crime and white collar crime. In the first phase of its activities the Task Force will review the present allocation of resources for federal law enforcement efforts, federal support of state and local law enforcement efforts, and federal exchanges of information and expertise with state and local entities. The Task Force will consider measures the Department could undertake with its existing substantive and jurisdictional framework to assure the appropriate federal role and the most effective allocation of resources in combatting the problem of violent crime. In its second phase the Task Force will focus on changes in federal statutes, funding levels and allocation of resources which might increase the federal government's impact in this area, consistent with appropriate federal-state relations and the competing needs for federal resources.

The Task Force will consist of eight members covering a wide range of experience in the field of law enforcement. Members will be appointed by the Attorney General.

The Committee will function solely as an advisory body in compliance with the provisions of the Federal Advisory Committee Act. Its charter will be filed under the Act 15 days from the date of the publication of this notice.

Interested persons are invited to submit comments regarding the establishment of the Task Force and its areas of concern to the Committee Management Liaison Officer, Attorney General's Task Force on Violent Crime, U.S. Department of Justice, Room 4416, Washington, D.C. 20530, phone: 202-633-1617.

William French Smith,

Attorney General.

BILLING CODE 4410-01-M

Drug Enforcement Administration

Manufacturer of Controlled Substances, Registration Application, Knoll Pharmaceutical Co.

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on November 12, 1980, Knoll Pharmaceutical Company, Production Department, 30 North Jefferson Road, Whippany, New Jersey 07981, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic class of controlled substances listed below:

Drug	Schedule
Dihydromorphine (9145)	I
Hydromorphone (9150)	II

Any other such applicant, and any person who is presently registered with DEA to manufacture such substances, may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, N.W., Washington, D.C. 20537, Attention: DEA Federal Register Representative (Room 1203), and must be filed no later than April 27, 1981.

Dated: March 18, 1981.

Frederick A. Rody, Jr.,

Acting Administrator, Drug Enforcement Administration.

[FR Doc. 81-9220 Filed 3-25-81; 8:45 am]

BILLING CODE 4410-09-M

Importation of Controlled Substances; Application

Correction

In FR Doc. 81-8013, on page 16094, in the issue of Monday, March 16, 1981, in the third column, the second paragraph, the fourth line, "Stephan" is corrected to read "Stepan".

BILLING CODE 1505-01-M

NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE

Fisheries Subgroup of the Independent Areas Task Force (IATF); Meeting

Pursuant to Sec. 10(a)(2), of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that the Fisheries Subgroup of the Independent Areas Task Force (IATF) of the National Advisory Committee on Oceans and Atmosphere (NACOA) will meet Monday and Tuesday on April 6-7, 1981. The Subgroup will meet in the B-100 conference room of Page Building #1, 2001 Wisconsin Avenue, NW., Washington, D.C.

The sessions, which will be open to the public, will convene at 1:00 p.m. and adjourn at 5:00 p.m. on Monday, April 6, and will convene at 9:00 a.m. and adjourn at 4:00 p.m. on Tuesday, April 7.

NACOA has initiated a study to formulate national goals and objectives for the oceans in the decade of the 1980's and beyond. To support the conduct of this study, the Secretary of Commerce has established the IATF for NACOA. The IATF will be responsible for the preparation of preliminary recommendations in the areas of energy, fisheries, marine transportation, ocean minerals, ocean operations and services, and waste management and pollution.

Persons desiring to attend will be admitted to the extent seating is available. Persons wishing to make formal statements should notify the Chairperson of the Subgroup on Fisheries, Jay G. Lanzillo, in advance of

the meeting. The Chairperson retains the prerogative to impose limits on the duration of oral statements and discussion. Written statements may be submitted before or after each session.

Additional information concerning this meeting may be obtained through the NACOA Executive Director, Mr. Steven N. Anastasion, or Clarence P. Idyll, the Staff Member for the Fisheries Subgroup. The mailing address is: NACOA, 3300 Whitehaven Street, NW. (Suite 438, Page Building #1), Washington, DC 20235.

Steven N. Anastasion,

Executive Director.

BILLING CODE 3510-12-M

NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

Expansion Arts Panel (Interdisciplinary/Community Cultural Centers); Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Expansion Arts Panel (Interdisciplinary/Community Cultural Centers) to the National Council on the Arts will be held on April 1-3, 1981, from 9:00 a.m.-5:30 p.m. in room 1340 of the Columbia Plaza Office Complex, 2401 E St., N.W., Washington, D.C. 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and (9)(b) of section 552b of Title 5 United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6070.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

[FR Doc. 81-9148 Filed 3-25-81; 8:45 am]

BILLING CODE 7537-01-M

NATIONAL TRANSPORTATION SAFETY BOARD

[M-AR 81-13]

Safety Recommendations, Responses; Availability

On March 12 the National Transportation Safety Board forwarded letters to the Federal Aviation Administration containing the following safety recommendations:

A-81-21 and -22.—Shortly after takeoff from Dallas/Fort Worth (Texas) Airport on March 3, 1980, a Beech King Air (65A90), N30AA, operating as an air taxi passenger flight, experienced an explosive decompression at 11,500 feet m.s.l. when the forward left-hand cabin window failed. The pilot reduced power, slowed the aircraft, and started immediate descent to Love Field at Dallas. The aircraft was landed without further incident.

The Board's investigation and review of pertinent Service Difficulty Reports indicate that corrective action is necessary to reduce the potential for similar occurrences. Accordingly, the Board recommends that FAA:

Amend Airworthiness Directive 77-23-07 to require more frequent inspections of cast acrylic windows and consider reducing the length of the crack or craze at which the windows must be replaced. (A-80-21)

Advise owners/operators of affected Beech aircraft of the hazards of operating their aircraft with crazed or cracked cast acrylic windows, and recommend that cast windows be replaced with stretched acrylic windows at the earliest opportunity. (A-80-22)

A-81-24 and -25.—On July 21, 1980, a Scenic Airlines Cessna 404, N28835, crashed during takeoff from Grand Canyon National Park Airport, Tusayan, Ariz., when the left engine turbocharger failed, causing a substantial power loss. The aircraft was not able to climb or maintain altitude because the pilot failed to establish immediately a minimum drag configuration, which further degraded the aircraft's performance significantly. (See report No. NTS B-AAR-81-2, 46 FR 17662, March 19, 1981).

A second similar accident occurred on March 21, 1980, at Houston, Texas, when an Eagle Commuter Airlines Piper PA-31-350 crased after takeoff when a power loss occurred in the right engine during a night departure. Investigation revealed that the aircraft was about 90 ft above the runway and at, or just below, V_{yse} when power was lost.

The Board cites its special study, "Light Twin-Engine Aircraft Accidents Following Engine Failures, 1972-1976" (NTS B-AAS-79-2) and reiterates a recommendation issued to the FAA on December 31, 1979 (45 FR 3411, January 17, 1980):

Periodically disseminate to pilots, certificated flight instructors, and FAA inspectors and their designees, additional information on how to manage light twin-engine aircraft following an engine failure, using advisory circulars, safety seminars, or other means at its disposal. (A-79-96)

Addressing the issue of emergency response to engine loss on takeoff, as an interim measure the Board now recommends that FAA:

Require that pilot training programs for 14 CFR Part 135 certificate holders which operate light twin-engine aircraft include specific ground and flight training in: (1) the factors related to achieving and maintaining V_{yse}; (2) the capability of company aircraft to maintain level flight at airspeeds below V_{yse} while in a single-engine configuration; (3) the capability of company aircraft to accelerate to V_{yse} while in a single-engine configuration; and (4) rapid appraisal of those situations in which a controlled, straight-ahead emergency landing is the safest or only option available. (A-81-24)

Require that aircraft flight manuals for light twin-engine aircraft used in 14 CFR Part 135 operations contain data related to those conditions in which the aircraft, in a single-engine configuration and at airspeeds between V_{mc} and V_{yse}, has the capability to maintain level flight. (A-81-25)

Each of the above aviation safety recommendations is designated "Class II, Priority Action."

Responses to Marine Safety Recommendations Recently Received from the U.S. Coast Guard

M-74-30, M-74-22 through -27, M-74-29, M-74-31, M-74-38 through -42, M-75-19 through -21, M-75-23, and M-75-25 through -27.—Letter of February 11 reports on status of these recommendations, addressed by USCG's Task Group on Tanker Safety at the joint USCG/NTSB quarterly meeting held April 29, 1980:

M-74-20: USCG will require safety meetings on tankships to address hazards of tank cleaning, gas freeing, tank entry, and tank venting; safety information will be disseminated to unlicensed crewmembers.

M-74-22: USCG views as impractical the ducting of cargo vapors over the downwind side of a ship during gas freeing; alternative action is not warranted.

M-74-23: Inert gas systems will be required on existing product tankers larger than 40,000 dwt and existing crude oil tankers larger than 20,000 dwt. Installation of inert gas systems on smaller domestic tankers is being studied. A Maritime Administration study relates to gas freeing techniques, including dilution and displacement methods.

M-74-24: A project initiated in May 1974 has shown flame screens to be inadequate for quenching flames propagating through

pipelines, but USCG will continue to evaluate.

M–74–25: USCG proposes to inform crews in the safe use of emergency equipment by holding periodic meetings on each tankship. Pamphlets CG–174, CG–474, and CG–482 exemplify USCG's crew indoctrination efforts in the safe use of emergency equipment aboard tank vessels.

M–74–26: It is appropriate to enhance emergency equipment requirements for chemical tankers. USCG sees need to have similar equipment on board petroleum tank vessels, and will evaluate.

M–74–27: USCG finds impractical equipment functional or location requirements to assure that piping components on tank vessels cannot cause cargo to spill when men enter cargo tanks, regardless of the operation to be performed. An increased emphasis on crew training would be a suitable complement to recently promulgated regulations.

M–74–29: USCG does not concur in requiring that a written cargo-loading plan be made and posted each time cargo is to be transferred aboard chemical tankers and a check procedure be developed to assure achieving the desired gating.

M–74–31: USCG does not concur in having all operators of chemical tank vessels maintain updated operating manuals aboard each ship showing the proper operation of piping systems for anticipated transfer operations. A color coded cargo piping plan covered by 46 CFR 153.910, Safety Rules for Self-Propelled Vessels Carrying Hazardous Liquids, is a more effective method for indicating the position of each valve during cargo loadings than is a written manual.

M–74–38: USCG concurs in including in periodic Coast Guard examinations the inspection and testing of machinery and other equipment to be used in tank cleaning operations.

M–74–39: USCG reports that the Task Group considers unfeasible the provision in future tank vessel design for the relief of explosive pressures in cargo tanks where explosive vapors might be expected to accumulate. A better method of preventing explosion is through improved safety measures and more stringent operating requirements.

M–74–40: USCG does not concur in utilizing systems safety techniques to evaluate proposed methods of tank cleaning operations before approving cargo-tank internal design features of tankships. Due to the minimal safety benefits gained by optimizing tank designs and due to the fitting of inert gas systems on many tank vessels, USCG believes that no further work on this recommendation is warranted.

M–74–41: USCG does not concur in utilizing systems safety techniques to establish basic tank cleaning guidelines in the form of procedural regulations. The Task Group does not believe that quantifiable gains in overall tanker safety would be realized by regulating tank cleaning but, rather, conjects that industry innovation and research might be hindered.

M–74–42: USCG concurs in holding safety meetings regarding tank cleaning of tank vessels. Written procedures are already available in industry manuals, and additional instructions are not warranted.

M–75–19: USCG does not concur in prohibiting the deliberate drainage of cargoes into the pumproom bilges of tankships as this is not feasible. The Task Group believes that tank vessels should be operated in such a way as to minimize the length of time residues are retained in the bilges.

M–75–20: USCG does not concur that piping systems entering pumprooms are to be designed to preclude even accidential discharge of cargoes into pumproom bilges. The discussion re M–75–19 is responsive to M–75–20.

M–75–21: USCG has promulgated regulations (46 CFR 32.35–15) prohibiting installation of air compressors in pumprooms of new tankships. However, installation of air compressors in pumprooms was not found to be a common feature abord the U.S. tankship fleet.

M–75–22: USCG believes 46 CFR 32.60–20 is adequate in requiring pumproom ventilation.

M–75–23: A proposed rule (docket CGD 79–065), expected to be published in April 1981, will address prohibition of workshops and storage of tools in pumprooms of tankships in which the bilges are not prohibited by regulation from containing cargoes or cargo residue.

M–75–25 and M–75–26: USCG, while now reevaluating needs for formal hazard analysis to identify pumproom explosion risks, does not feel that system safety hazard analysis is needed for vessel inspection or plan review.

M–75–27: USCG does not concur in issuing regulations to require adequate management and shipboard supervision during transportation and handling of hazardous cargoes on tankships. Adequate regulations in both CFR Titles 33 and 46 have already been promulgated with respect to this issue.

M–80–30 through –35 and M–76–2 and M–76–9 (reiterated).—Letter of February 11 is in response to recommendations issued last June 4 following investigation of the collision of *M/V Inca Tupac Yupanqui* and Barge *Panama City* at Good Hope, La., August 30, 1979. (45 FR 41550, June 19, 1980.) USCG's comments:

M–80–30: At three meetings of the Intergovernmental Maritime Consultative Organization (IMCO), USCG has made a priority item the requirement for two separate and independent steering gear control systems on cargo vessels. Amendments to Regulation 29 of Chapter II–I of the 1974 SOLAS Convention will become effective in late 1981.

M–80–31: USCG views as adequate 33 CFR 164.15(c)—"Persons are available to rapidly anchor the vessel in an emergency." However, the entire Subpart 15 of 33 CFR Part 164 is inoperative since confined or congested waters have never been described, an issue to be addressed in a proposed rulemaking.

M–80–32: USCG concurs in seeking international agreement to require all ships of more than 500 gross tons to use noncombustible materials in the construction of accommodation spaces, and first sought this during the 1948 Safety of Life at Sea Convention. Sufficient member countries failed to ratify amendments to the 1960 SOLAS Convention. The 1967 fire safety amendments, incorporated into the 1974 SOLAS Convention, came into force on May 25, 1980. A recent IMCO Resolution A.327(IX) would require that all new cargo ships over 500 gross tons have noncombustible bulkheads within stairway and corridor enclosures, and that all ceilings, linings, draft stops and grounds must be constructed on noncumbustible materials. The 1974 SOLAS requires all new tank vessels of over 500 gross tons to be constructed of noncombustible materials. None of these regulations require retrofitting except when a ship undergoes major reconstruction. Retrofitting would oppose a severe economic burden on the world fleet.

M–80–33 and M–80–34: USCG does not concur in these recommendations dealing with location and operational design of loading facilities. Federal regulations are not the answer to proper port planning. USCG suggests careful review by the Corps of Engineers, Coast Guard, Environmental Protection Agency, and other agencies before granting permits and licenses.

M–80–35: USCG concurs in increased monitoring of vessels carrying or transferring liquefied gases in or near the Port of New Orleans. New regulations under 33 CFR 161.11(b) and 161.3(c) have been published.

M–76–2: USCG continues its nonconcurrence in requiring oceangoing vessels in designated restricted waters to have emergency steering stations manned. Following rejection of the manned emergency steering station proposal by IMCO, USCG promulgated 33 CFR 164.25 to require that vessels conduct regular and timely tests of the steering gear and other related vessel control and navigation systems. Ongoing regulatory project CGD 79–038b will identify tests and drills on a regular basis to ensure steering gear system reliability and vessel crew familiarity.

M–76–2: USCG will address in a separate letter this reiterated recommendation regarding emergency contingency plans for responding to catastrophic accidents occurring in waterways which carry large quantities of hazardous materials.

NOTE: Copies of the Board's recommendation letters, as well as responses and related correspondence, are provided free of charge. All requests for copies must be in writing, identified by recommendation number. Address requests to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

(49 U.S.C. 1903(a)(2), 1906)

Margaret L. Fisher,

Federal Register Liaison Officer.

March 20, 1981.

BILLING CODE 4910–58–M

NUCLEAR REGULATORY COMMISSION

Availability of Staff Supplement to the Draft Report on Human Engineering Guide to Control Room Evaluation

Notice is given that the Commission's Office of Nuclear Reactor Regulation has published a supplement to NUREG/CR-1580, the Human Engineering Guide to Control Room Evaluation draft report. The supplement is identified as NUREG-0659, and is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C., and in all other Commission Local Public Document Rooms.

NUREG/CR-1580 was published in July, 1980, as a draft version of the control room design review guidelines described in Task I.D of the NRC Action Plan developed as a result of the TMI-2 accident. The guidelines are intended to provide guidance for a detailed control room design review to identify and correct design deficiencies. This review will be performed by all operating reactor licensees and applicants for operating licenses.

This staff supplement to the draft guidelines has been issued to provide staff responses to comments on the draft guidelines and supplemental material not contained in the draft guidelines. The supplemental material consists of (1) draft systems review guidelines, (2) sample checklists, and (3) an outline of the staff's procedure for evaluating completed licensee and applicant control room design reviews.

Interested persons may submit comments on the supplemental material provided in NUREG-0659. Operating reactor licensees, applicants for operating licenses, public interest groups, and designated Federal agencies and organizations with experience in human factors analysis are being provided with copies of NUREG-0659. Comments received by the commission will be made available for public inspection at the Commission's Public Document Room in Washington, D.C.

The **Federal Register**, notice of availability of the draft guidelines (FR 45, No. 163 at page 5551) advised that the Commission staff planned to meet with operating reactor licensees and applicants for operating licenses, human factors engineering experts, and other interested parties at some time after comments on the draft guidelines had been received, but prior to publication of the final guidelines. These meetings have now been scheduled, and will be held on April 22 and 24, 1981, in Room P-118 of the Commission's Bethesda offices at 7920 Norfolk Avenue, Bethesda, Maryland. The meetings will begin at 9:00 AM. Topics to be addressed at the public meetings include a review of the planned format and content of the revised guidelines (NUREG-0700, to be published shortly after the scheduled public meetings) and a discussion of the licensee and applicant control room design review process. Also, the staff plans to discuss the draft systems review guidelines given in NUREG-0659, and will consider comments on this draft material as well as comments on other material contained in NUREG-0659.

To balance meeting attendance, it is requested that licensee and applicant representatives from NRC Regions III, IV and V plan to attend the April 22 meeting, and that representatives from NRC Regions I and II plan to attend the April 24 meeting. Other individuals and organization representatives may attend either meeting. Persons intending to attend these meetings should advise the Commission by contacting the NRC officer identified below and indicating which meeting they plan to attend.

To the extent possible, written comments received by April 15, 1981, will be discussed by the staff during the meetings. Comments should be addressed to the NRC officer listed below. Written or verbal comments will also be accepted at the meetings, but the staff may not be in a position to discuss these comments. Comments received after April 30, 1981, will be considered by the staff if it is practical to do so, but assurance of consideration of these comments cannot be given. Persons desiring to present their comments during the meetings should advise the NRC officer listed below of their intent.

For further information, contact Voss A. Moore, Division of Human Factors Safety, Officer of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C., 20555. Telephone (301) 492-8448.

Dated at Bethesda, Md., this 20th day of March 1981.

Voss A. Moore,

Chief, Human Factors Engineering Branch, Division of Human Factors Safety.

[FR Doc. 81-9185 Filed 3-25-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-237-SP; 50-249-SP (Spent Fuel Pool Modification)]

Commonwealth Edison Co. (Dresden Station, Units 2 and 3); Further Hearings on Proposed Amendment of Facility Operating License

March 17, 1981.

On August 3, 1978, the United States Nuclear Regulatory Commission (the Commission) issued a notice of "Proposed Amendments to Operating Licenses" relating to the above identified facilites (43 FR 35763, August 11, 1978). The proposed amendments would permit an increase in the storage capacity of the spent fuel pool at Dresden Station.

Hearings on the proposed amendments were held on November 19, 20, and 21, 1980, in Morris, Illinois. At those hearings applicant's counsel informed the Board of a possible fuel channel assembly bowing problem.

On March 17, 1981, it is ordered, That testimony on the question of fuel channel assembly bowing will be received and arguments by the parties, limited to thirty minutes each, will be heard in support of their respective answers to Board question #2[1] on April 20, 21st if necessary.

In: The O'Hare Hilton Motel at O'Hare International Airport Chicago, Illinois the session on April 20th, 1981, will begin at 1:00 P.M. in the Montgolfier Room, East Mezzanine.

The members of the Atomic Safety and Licensing Board designated by the Atomic Safety and Board Panel to conduct the above notice hearing are Dr. Linda W. Little, Dr. Forrest J. Remick, as technically qualified members, and John F. Wolf, Esquire, as chairman.

Members of the Public are invited to attend this evidentiary hearing.

For the Atomic Safety and Licensing Board.

John F. Wolf,

Administrative Judge.

BILLING CODE 7590-01-M

[Docket No. 50-335]

Florida Power & Light Co.; Issuance of Amendment to Facility Operating License and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has

[1] Board Question #2. Based on a review and analysis of the various unresolved generic safety issues under continuing study, what relevance is there, if any, to the proposed spent fuel modification?

Further, what is the potential health and safety implication of any relevant issues remaining unresolved?

issued Amendment No. 39 to Facility Operating License No. DPR–67, issued to Florida Power & Light Company (the licensee), which revised the Technical Specifications for operation of the St. Lucie Plant, Unit, No. 1 (the facility), located in St. Lucie County, Florida. The amendment is effective as of its date of issuance.

The amendment deletes certain non-radiological water quality requirements of the Appendix B Technical Specifications, deletes license conditions associated with the Appendix B Technical Specifications changes and adds reporting requirements.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has prepared an environmental impact appraisal for this action and has concluded that an environmental impact statement is not warranted because there will be no environmental impact attributable to the action other than that which has already been predicted and described in the Commission's Final Environmental Statement for the facility dated June 1973.

For further details with respect to this action, see (1) the application for amendment dated April 12, 1979, as supplemented September 10, 1979, and February 26, 1980, (2) Amendment No. 39 to License No. DPR–67, and (3) the Commission's Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 10th day of March 1981.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 81-9190 Filed 3-25-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50–461 OL, 50–462 OL]

Illinois Power Co., et al. (Clinton Power Station, Units 1 and 2, Application for Operating License); Memorandum and Order (Summarizing Special Prehearing Conference, Summarizing Telephone Conference, and Ordering Second Special Prehearing Conference)

March 18, 1981.

A Special Prehearing Conference was held on January 29, 1981 in Urbana, Illinois. During a general discussion of the contentions of the petitioner for intervention, Prairie Alliance (PA), and a detailed discussion of a number of such contentions, it became apparent that many of the contentions failed to meet the specificity and basis requirements of 10 CFR 2.714(b).

The NRC Staff offered to meet with representatives of PA in order to explain what the Staff considered to be the deficiencies in PA's contentions. The petitioner agreed to participate in such a meeting. Counsel for Applicant was invited to participate in the meeting, also, but declined to do so. Applicant's Counsel indicated that he would view favorably such an effort by Staff and petitioner but expressed concern about any delay that might result. Staff indicated that it believed a period of four to six weeks would be required for petitioner to prepare and submit amended contentions and that it did not think that such a delay would significantly affect the proceeding. In response to Board questions, Staff said that it projected issuance dates of October 1982 for the Safety Evaluation Report and March 1982 for the Final Environmental Report. Considering these projections and the fact that Prairie Alliance does not have benefit of counsel, the Board granted the petitioner an additional period not to exceed six weeks in which to consult with the Staff and submit revised contentions.

In a telephone conference on March 11, 1981, in which representatives of all parties participated, Prairie Alliance advised that it would mail its amended contentions no later than March 30, 1981. Further, all parties agreed that a Second Special Prehearing Conference would be held in Illinois beginning at 9:00 a.m. on April 14, 1981.

Order

In view of the foregoing it is, this 18th day of March 1981, *it is ordered:*

That the Second Special Prehearing Conference will be held in the Plaza Room of the University Inn, East John and Third Streets, Champaign, Illinois, beginning at 9:00 a.m. on April 14, 1981.

For the Atomic Safety and Licensing Board.

Oscar H. Paris,

Administrative Judge.

BILLING CODE 7590-01-M

[Docket Nos. 50–387–OL and 50–388–OL]

Pennsylvania Power & Light Co., et al. (Susquehanna Steam Electric Station, Units 1 and 2); Reconstitution of Board

Pursuant to the authority contained in 10 CFR § 2.721 (1980), the Atomic Safety and Licensing Board for *Pennsylvania Power & Light Company, Et. Al.* (Susquehanna Steam Electric Station, Units 1 and 2, Docket Nos. 50–387–OL and 50–388–OL, is hereby reconstituted by appointing the following Administrative Judges to the Board: Mr. James P Gleason and Dr. Paul W. Purdom. Mr. Charles Bechhoefer and Dr. Oscar H. Paris were members of this Board, but, because of schedule conflicts are unable to serve.

As reconstituted, the Board is comprised of the following Administrative Judges:

James P. Gleason, Chairman
Mr. Glenn O. Bright
Dr. Paul W. Purdom

All correspondence, documents and other materials shall be filed with the Board in accordance with 10 CFR 2.701 (1980). The addresses of the new Board are:

Administrative Judge James P. Gleason,
513 Gilmoure Drive,
Silver Spring, Maryland 20901
Dr. Paul W. Purdom,
245 Gulph Hills Road,
Radnor, Pennsylvania 19087

Issued at Bethesda, Md., this 19th day of March 1981.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

[FR Doc. 81-9192 Filed 3-25-81; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-463 CP and 50-464 CP]

Philadelphia Electric Co. (Fulton Generating Station, Units 1 and 2); Reconstitution of Atomic Safety and Licensing Appeal Board

Notice is hereby given that, in accordance with the authority conferred by 10 CFR 2.787(a), the Chairman of the Atomic Safety and Licensing Appeal Panel has reconstituted the Atomic Safety and Licensing Appeal Board for this construction permit proceeding to consist of the following members:

Richard S. Salzman, Chairman
Dr. W. Reed Johnson
Christine N. Kohl

Dated: March 20, 1981.

C. Jean Bishop,
Secretary to the Appeal Board.

BILLING CODE 7590-01-M

[Docket No. 50-267]

Public Service Co. of Colorado and Fort St. Vrain Generating Station; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 23 to Facility Operating License No. DPR-34 issued to the Public Service Company of Colorado, which revised Technical Specifications for operation of the Fort St. Vrain Generating Station (the facility) located in Platteville, Colorado. The amendment is effective as of the date of its issuance.

The amendment specifies certain license conditions for the conduct of a test program and revises the Technical Specifications to: (1) extend the minimum sample flow limits to cover the reactor power range of 70 to 100 percent, (2) define the times to start depressurization, (3) extend the core residence time of the fuel test elements and (4) specify operator action time limits for power-to-flow ratios as per S.L. 3.1. This amendment is based on revised data and analysis which correct certain inconsistencies with the FSAR for this facility, identified in 1977. These inconsistencies had resulted in a hold in the test program at the 70 percent level while they were resolved. Now that they are resolved, the hold in the test program is no longer needed, and the Fort St. Vrain Nuclear Generating Station may continue previously authorized testing, rise-to-power ascension up to the designed 842 MWt for the duration of the testing program. Subsequent power operation above the 70 percent level will be subject to a review and evaluation of the test results by Public Service Company of Colorado and the NRC.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5 (d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated November 16, 1977, January 3, 1979, January 21, 1981 and January 30, 1981, (2) Amendment No. 23 to License No. DPR-34 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, (PDR), 1717 H Street, N. W., Washington, D. C. and at the Local PDR in Greeley, Colorado. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 16th day of March 1981.

For the Nuclear Regulatory Commission.

James R. Miller,
Chief, Standardization and Special Projects Branch, Division of Licensing.

[FR Doc. 81-9194 Filed 3-25-81; 8:45 am]
BILLING CODE 7590-01-M

Development of a Safety Goal; Preliminary Policy Considerations

In accordance with its previously announced Plan for Developing a Safety Goal (45 FR 71023, October 27, 1980), the Nuclear Regulatory Commission hereby publishes for public comment a preliminary statement of policy considerations concerning that subject. A detailed discussion supporting this statement is being published separately as NUREG-0764, "Toward a Safety Goal: Discussion of Preliminary Policy Considerations." A copy of NUREG-0764 and of NUREG-0739, "An Approach to Quantitative Safety Goals for Nuclear Power Plants," submitted to the Commission by the Advisory Committee on Reactor Safeguards in October 1980 are available for inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. Single copies of NUREG-0764 and NUREG-0739 are available upon written request and at no cost to persons who wish to comment; requests should be made to the NRC-GPO Sales Program, Attention: Sales Manager, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (Phone 301-492-9530). Copies may also be purchased from the NRC-GPO Program and the National Technical Information Service, Springfield, Virginia 22161. Comments on the statement and on NUREG-0764 and on NUREG-0739 will be considered in work leading to the preparation of a policy paper for submittal for Commission consideration. That work includes further studies, public meetings, and workshops. Salient activities will be publicly announced in order to secure broad participation. (For a description of that further work, see NUREG-0735, included in 45 FR 71023, October 27, 1980.)

Comments and suggestions are solicited concerning the entire subject matter of this statement and NUREG-0764 or any of their aspects. In addition, the Commission solicits comments on certain additional, specific questions appearing at the end of this notice.

Written comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, and should be received by May 26, 1981. Late comments will be considered, but only to the extent practicable to do so.

For further information contact Mr. George Sege, Office of Policy Evaluation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, (202) 634-3295.

Dated at Washington, District of Columbia, this 23d day of March 1981.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,
Secretary of the Commission.

PRELIMINARY POLICY CONSIDERATIONS

I. Introduction

A. Background

In accordance with the Plan for Developing a Safety Goal (NUREG-0735; also published in 45 FR 71023, October

27, 1980), the Commission is issuing for public comment this preliminary statement of considerations involved in developing a safety goal. This preliminary statement has been prepared in furtherance of the Commission's intent to seek to define more clearly the level of protection of the public health and and safety that it believes is adequate.

In accordance with further provisions of the Plan, the comments received will constitute a part of the considerations leading to preparation of the eventual safety goal. In addition to consideration of the written comments, workshops and public meetings will be held. A subsequent paper will be prepared by the Office of Policy Evaluation and is scheduled to be submitted to the Commission for its consideration in August 1981. After consideration of that paper, the Commission intends to seek additional public comment on the proposed policy statement. Those comments will also be considered in the preparation of the final safety goal itself.

B. Purpose and Scope of the Preliminary Statement

The purpose of this preliminary statement is to elicit comments by indicating the kinds of considerations which may enter into an articulation of the Agency's safety goal.

The Advisory Committee on Reactor Safeguards has prepared "An Approach to Quantitative Safety Goals for Nuclear Power Plants" (NUREG–0739, available on request). Commenters are urged to obtain and use that document as one example of a concrete application of the concepts discussed here. The Commission has at this time not formed any views as to the merits of the approach described by the ACRS or any other single policy. The ACRS has characterized its proposal as intended to "serve as one focus for discussion." It is the only specific proposal that has so far been formally submitted to the Commission, and is detailed and accompanied by background information.

The scope of early policy development efforts has focused primarily on radiological accidents associated with power reactors. It is, however, intended to include considerations of sabotage and other external events and to seek adaptation of the safety goal to other facilities and operations where the need is evident.

C. Organization of the Statement

The articulation of a safety goal must not only stipulate a required degree of protection that is sound, but must also be formulated in a way that is useful in a practical, regulatory sense.

This statement begins by discussing alternative approaches to safety-goal formulation. The discussion includes types of safety goals, types of quantitative approach, approaches for dealing with uncertainty, and coments about some aspects of balancing of risks and of safety and other values.

Presented next are references to five specific safety-goal proposals in addition to the aforementioned volume by the Advisory Committee on Reactor Safeguards.

Finally, there is a short discussion of degree of safety, since all or most of the potential approaches can be adapted to establishing a degree of protection at any level over a wide range of possible levels. Selecting that level on a sound basis is, or course, the paramount objective of the effort to develop a safety goal.

II. Approaches to Safety Goal Formulation

In this section, discussions progress from a characterization of possible safety-goal forms, to an identification of types of quantitative approaches, to a brief account of means of dealing with uncertainty, and, finally, to comments about balancing disparate values.

A. Safety Goal Forms

Saftey-goal forms have been classified according to seven pairs of contrasting characteristics which are given below. (Based on Mattson et al., 1980. See NUREG–0764 for further discussion). The next steps in the goal development program should address these characteristics. The seven pairs of characteristics, with brief comments, are as follows:

1. *Single vs. Multiple Goals*—Advantageous combinations may be possible, consisting of an interrelated hierarchy of overall and lower-order goals.

2. *Quantitative vs. qualitative Goals*—Overall quantitative goals introduce severe verifiability problems with respect to low-probability high-consequence events. On the other hand, qualitative goals may defy assignment of clear, ascertainable meaning. Different specific aspects of safety-goal formulation may be better suited to one or the other of these alternatives, or may be expressible in forms combining qualitative and quantitative elements.

3. *Ends-Oriented vs. Process-Oriented Goals*—Ordinarily, goals are thought of principally as ends to which strategies and resources are directed. A process-oriented alternative focuses on processes that command confidence. For example, one of the basic reactor safety principles of the Naval Nuclear Propulsion program and our own is that if the means of providing for nuclear safety are pursued with the goal of excellence of performance, then acceptable safety will be attained.

4. *Absolute vs. Relative Goals*—Some comparative analysis must underlie relative goals, though comparisons may be fraught with considerable difficulties.

5. *Individual vs. Society-Oriented Goals*—In the NRC regulations (10 CFR Parts 20, 50/Appendix I, and 100), both individual and societal goal forms are used in complementary fashion for limiting radiation exposure.

6. *Site (or Region) Dependent vs. Site (or Region) Independent Goals*—Location may affect the probability of a serious accident, the probability of a failure of a reactor containment, and the radiation exposure of people in event of an accident.

7. *Time-Related vs. Atemporal Goals*—A time-related goal may call for achievement of some specified safety standard by a specified year and a more stringent safety standard by some later year. Also, a goal may be interim or settled (though even a "settled" goal may need to be changed, because of technological progress, new information, or new perceptions). An interim goal may offer a trial period.

B. Types of Quantitative Approach

Recent efforts towards development of proposed safety goals have had a predominantly quantitative emphasis, notwithstanding evident problems of verification of compliance with any quantitative goals. The Advisory Committee on Reactor Safeguards (ACRS), as background for its own development of a quantitative approach, accepted a survey of some proposals previously presented in the United States and abroad, according to which such approaches can be roughly categorized into three groups: those that set limits on individual risk of death only; those that consider frequency of accidents and magnitude of the consequences; and those that imbed the criteria in risk management frameworks that, at least in part, consider risks from alternatives or other societal endeavors (NUREG–0739, Part 1).

C. Approaches to Dealing with Uncertainty

Verifiability of whether a nuclear plant meets an overall quantitative safety goal is subject to considerable uncertainties surrounding probabilities and consequences of severe but low-probability accidents. Various

approaches can be considered for mitigating the impact of these uncertainties. We describe five approaches: arbitration, modeling, restrained use of quantitative criteria, conservatism, and non-quantitative approaches. Combinations of approaches are, of course, possible and may well have merit.

1. *Arbitration*—The decisions about whether a goal is met can be entrusted to a group of specially empowered experts.

2. *Modeling*—Verification could be tied to a prescribed mode of calculation.

3. *Restrained Use of Quantitative Criteria*—Use of the top-level probability target can be limited to decisions concerning the clearly prohibitive and the clearly trivial outliers. Another mode of restraint is to use an overall plant target only loosely and to provide some general guidance for setting quantitative targets at the level of systems and equipment for which failures can be tolerated with a frequency sufficient for possible verification.

4. *Conservatism*—Conservatism can be embedded in the calculations or explicitly applied to risk estimate results. In the "embedded" approach, estimates of actual risk are based on conservative assumptions, in order to increase assurance that decisions concerning the issue at hand will be on the safe side.

As an alternative, one can require calculations to be realistic—the best one can do. Margins of due prudence would be introduced into administrative decisions. Sensitivity analyses may help discern the consequences of alternative judgments and thus help to set an appropriate margin.

5. *Nonquantitative Approaches*—Nonquantitative approaches available to reduce vulnerability due to uncertainties include independent lines of defense; use of requirements known to be beneficial, though not quantitatively; extra circumspection when abandoning known, established practices for promising innovations; and professional judgment, with emphasis on the qualifications and experience of decision makers and advisors.

D. Approaches to Balancing of Values

As the work of safety-goal development progresses, we plan to seek a sound balancing of the values relevant to goal setting. At this time we limit our discussion to noting in a preliminary way two specific topics: (1) individual and social risks and (2) safety and economic values.

1. *Individual and Social Risks*—A safety goal may focus on the risk of death or illness to which any one individual may be exposed, including permissible differences among individuals in different circumstances, such as workers, nearby residents who may receive some benefit as compensation for incremental risk, and the general population. The goal may also include consideration of the numbers of people exposed to a risk.

Social risk considerations also include such issues as equities of distribution of risks and benefits, possible transfer of risk to future generations (through long-lived radioactive materials), distinctions between prompt and delayed fatalities, and whether and how property damage risks (which may indirectly entail other health-and-safety risks) should be taken into account.

A special aspect of the social risk issue is involved in the concept of risk management, that is, whether and how to consider the risks of alternatives in setting a nuclear-plant safety goal.

2. *Safety and Economic Values*—Safety and economic values are not necessarily or invariably in conflict. Safety may protect plant investment and property of others as well as save medical and other costs of illness. In this positive respect, the issue is the extent to which economic incentives for safety should be reflected in safety-goal formulation. However, in many questions about safety, safety and economic values conflict or appear to conflict; the issue then involves, first, whether under the circumstances at hand economic impacts can be taken into account in a safety decision and, second, what amount of resources may be devoted (or what benefits foregone) to achieve a particular safety goal.

Decisions concerning possible retroactive applications of new requirements, including the safety goal itself, may involve special safety-cost trade-offs since the costs of specific safety improvements for plants already being built or operating may be substantially higher than for plants yet to be built.

III. Some Safety-Goal Proposals

NUREG–0764 describes six safety-goal proposals, all urging a quantitative formulation of safety goals and suggesting specific numerical values for the parameters that they propose. The diverse frameworks can, however, be employed in conjunction with numerical values that differ from those suggested in the specific proposals. The intellectual task of devising a sound framework and the policy task of setting appropriate levels are distinct, though they must in due course merge. Both tasks are essential, as is their proper merging.

All six of the proposals are based on the use of probabilistic risk assessment. They depend for their effectiveness on the potentialities of that technique and are subject to its limitations—gaps and uncertainties in data bases and difficulties of constructing adequate sets of underlying assumptions and of accounting for human factors in safety. Some of the approaches proposed include provision for accomodating or mitigating the effects of uncertainties.

With all the approaches, consideration would have to be given to (a) the appropriate role for other methods where probabilistic risk assessment cannot dependably resolve an issue and (b) problems of transition from current practices, including decisions with respect to possible retroactive application of new requirements, as well as (c) the development of sufficiently wide availability of an adequate level of expertise in the new probabilistic methods.

The proposals described in NUREG–0764 include one submitted to the Commission on October 31, 1980, by the Advisory Committee on Reactor Safeguards and described by the ACRS as "a preliminary proposal for a possible approach to quantitative safety goals * * * intended to serve as one focus for discussion on the subject * * * and * * * expected to be * * * a first step in an iterative process." (NUREG–0739, "An Approach to Quantitative Safety Goals for Nuclear Power Plants," ACRS, 1980.)

The ACRS proposal is the only safety-goal proposal that has been formally presented to the Commission for consideration or discussion. However, we are aware of other proposals relating to development of a safety goal for use in the United States that have been elaborated in varying degree and have been published or widely communicated. Five such proposals are discussed briefly in NUREG–0764. Their sources are the Atomic Industrial Forum; Dr. Chauncey Starr, of the Electric Power Research Institute; Dr. Vojin Joksimovic, of General Atomic; Dr. Edwin Zebroski, of the Nuclear Safety Analysis Center; and Mr. Robert Bernero, of the NRC Office of Nuclear Regulatory Research.

IV. Degree of Safety

The essence of a safety goal is the degree of safety that it establishes. The generic discussion of approaches to safety-goal formulation and of the criteria by which approaches may be

judged has as its purpose the creation of a vehicle for specifying the degree of safety sought in a way that would make it meaningful and useful.

The assignment of specific proposed degrees of safety in the specific proposals summarized above illustrates the use of the proponents' frameworks and the degrees of safety suggested by the proponents as appropriate.

The Commission reserves judgment about any specific degree of safety, pending further progress in its safety-goal development efforts.

Additional Questions

The Commission solicits comments and suggestions concerning the entire subject matter of the preliminary statement of policy considerations and the supporting discussion paper or any parts of that subject matter. In addition, comments are solicited concerning the following specific questions:

1. (a) Among the criteria for selection of an approach to safety-goal formulation that are presented, which are particularly important? Unimportant? Illustrative criteria are that the goal be comprehensive, logical, verifiable, practical, and publicly acceptable.

(b) Should additional or different criteria be considered? What criteria and with how much emphasis?

2. Which of the following are particularly important to include in a safety goal:

(a) Some general approach to risk acceptability?
(b) Quantitative safety goals?
(c) Qualitative—even subjective—standards?
(d) Approach to safety-cost trade-offs?
(e) Goals for future safety improvements?
(f) Standards for determining when new requirements should be applied retroactively?

3. (a) Among the approaches to safety goal formulation that are discussed, what approach or combination of approaches is particularly appropriate? Inappropriate? Why?

(b) Should any other approach be considered? What approach?

4. (a) Among the approaches to dealing with uncertainty that are discussed, what approach or combination of approaches is particularly appropriate? Inappropriate?

(b) Should any other approach be considered? What approach?

5. What should be some of the characteristics of safety requirements:

(a) What should be the role of safety-cost trade-offs?

(b) To what extent should benefits of nuclear power, absolute and relative to alternatives, enter safety-requirements decisions?

(c) To what extent is it appropriate for requirements for new and previously approved plants to differ?

(d) Should a safety goal be applied directly to cases in order to attain a similar degree of safety from case to case (even though that may result in specific design and operation requirements differing according to circumstances)? Or should the goal be applied generically and have requirements, rather than estimated degree-of-safety results, be uniform?

(e) To what extent should the goal reflect protection of individuals regardless of numbers of persons affected, and to what extent should it reflect total, integrated population or societal effects?

(f) To what extent should equities of distribution of benefits and adverse impacts influence requirements?

(g) Should the safety goal reflect increased aversion to risk of high consequences even at low probability?

(h) What is the proper balance between stability of requirements and flexibility for modification as knowledge develops and insights change.

6. (a) How should the stringency of nuclear-power-plant safety requirements compare with current practice?

(b) How should stringency of the safety goal compare with risks accepted from other (non-nuclear) electrical energy sources and with risks arising in various other contexts?

7. The Commission invites comments on the ACRS proposal and on the other specific proposals described in the paper, and would welcome any alternative proposals or suggestions.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

March 23, 1981.

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requiremnts, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Federal Reports Act (44 USC, Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibility under the Act also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The agency clearance officer can tell you the nature of any particular revision you are interested in. Each entry contains the following information:

The name and telephone number of the agency clearance officer (from whom a copy of the form and supporting documents is available);

The office of the agency issuing this form;

The title of the form;

The agency form number, if applicable;

How often the form must be filled out;

Who will be required or asked to report;

The Standard Industrial Classification (SIC) codes, referring to specific respondent groups that are affected;

Whether small businesses or organizations are affected;

A description of the Federal budget functional category that covers the information collection;

An estimate of the number of responses;

An estimate of the total number of hours needed to fill out the form;

An estimate of the cost to the Federal Government;

The number of forms in the request for approval;

The name and telephone number of the person or office responsible for OMB review; and

An abstract describing the need for and uses of the information collection.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. Our usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. The agency clearance officer will send you a copy of the proposed form, the request for

clearance (SF83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review. If you experience difficulty in obtaining the information you need in reasonable time, please advise the OMB reviewer to whom the report is assigned. Comments and questions about the items on this list should be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Jim J. Tozzi, Assistant Director for Regulatory and Information Policy, Office of Management and Budget, 726 Jackson Place, Northwest, Washington, D.C. 20503.

DEPARTMENT OF AGRICULTURE

Agency Clearance Officer—Richard J. Schrimper—202–447–6201.

DEPARTMENT OF STATE

Office of the Secretary

[Public Notice 748]

List of Gifts to Federal Employees From Foreign Governments Reported to Employing Agencies in Calendar Year 1980

The Department of State submits the following comprehensive listing of the statements which, as required by law, Federal employees filed with their employing agencies during calendar year 1980 concerning gifts received from foreign government sources. The compilation includes reports of both tangible gifts and gifts of travel or travel expenses of more than minimal value, as defined by statute.

Publication of this listing in the Federal Register is required by Section 7342(f) of Title 5, United States Code, as added by Section 515(a)(1) of the Foreign Relations Authorization Act, Fiscal Year 1978 (Pub. L. 95-105, August 17, 1977, 91 Stat. 865).

Dated: March 19, 1981.

Richard T. Kennedy,

Under Secretary for Management.

Report of Tangible Gifts

Name and title of recipient	Gift, date of acceptance, estimated value and current disposition or location	Identity of foreign donor and government	Circumstances justifying acceptance
AGENCY: WHITE HOUSE—PRESIDENT AND MRS. CARTER AND OTHER FIRST FAMILY MEMBERS

Henry E. Pichocki, Office of Security, Philadelphia Field Office.	Red and blue rug, approx. 10'x6'. Recd August 28, 1980. Est. Value—$150. Retained for official use in Office of Protocol.	Mr. Abdeslam Jaidi, Consul General of Morocco at New York.	Gift delivered to Donee's residence two months after security detail.
Rozanne L. Ridgway, U.S. Ambassador to Finland.	Painting—scene of old Turku. Recd February 14, 1980. Est. Value—Over $100. Approved for official use at American Embassy, Helsinki.	Mr. Väinö Leino, Mayor, City of Turku, Finland.	Presented to donee at farewell reception.
Mabel M. Smythe, U.S. Ambassador to Cameroon.	Carved elephant tusk, approximately 30" long. Recd February 17, 1980. Est. Value—$600. Approved for official display at Embassy.	Ahmadou Ahidjo, President of Cameroon	Presented as farewell gift upon departure of donee from post.
Mabel M. Smythe, U.S. Ambassador to Cameroon.	Pendant, bracelet and ring in gold filigree setting. Recd February 21, 1980. Est. Value—$500. Reported to GSA and stored in office of Protocol pending disposition by GSA.	Same as above	Non-acceptance would have caused offense to donor and to U.S. Government.
James Thorn, Special Agent, Office of Security.	Rug, approx. 10'x6', geometric red and blue design. Recd September 10, 1980. Est. Value—$300. Transferred for official use in office of Under Secretary of State for Management.	Abdeslam Jaidi, Consul General of Morocco at New York.	Delivered to residence of donee over 2 months following security detail.
Abelardo L. Valdez, Chief of Protocol.	Two large bean bags, multicolor green, red and gray suede with Presidential seal of donor. Recd October 9, 1980. Est. Value—$200. Reported to GSA and stored in Office of Protocol pending disposition by GSA.	President Sahgari, Nigeria	Non-acceptance would have caused embarrassement to donor and to U.S. Government.

Report of Tangible Gifts—Continued

AGENCY: Office of Science and Technology Policy

Dr. Frank Press, Director	Sculpture—crackle glazed porcelain. Recd January 22, 1980 Est. Value—$250. Designated as U.S. Government property and offered for use by office.	Fang Yi, Vice Premier Minister in Charge of State Science and Technology Commission, People's Republic of China.	Non-acceptance would have caused embarrassment to donor.

Report of Travel or Expenses of Travel

Name and title of recipient	Brief description of travel or travel expenses occurring entirely outside United States	Identity of foreign donor and government	Circumstances justifying acceptance
AGENCY: Department of Transportation			
Jeffrey N. Shane, Assistant General Counsel for International Law	Air travel from Shanghai to Hangzhou; Hangzhou to Guangzhou; Guangzhou to Hong Kong. Accommodations in Shanghai, Hangzhou and Guangzhou (April 24–27, 1980).	Civil Aviation Administration of China, People's Republic of China.	Travel offered by government following round of aviation negotiations; refusal would likely cause offense and embarrassment.
Jeffrey N. Shane, Assistant General Counsel for International Law	Round trip rail transportation between Shanghai and Suzhou; accommodations in Shanghai and Suzhou (September 13–14, 1980).	Civil Aviation Administration of China, People's Republic of China.	Travel offered by government following round of aviation negotiations; refusal would likely cause offense and embarrassment.

Report of Tangible Gifts

Name and title of recipient	Gift, date of acceptance, est. value and current disposition or location	Identity of foreign donor and government	Circumstances justifying acceptance
AGENCY: Department of the Treasury			
G. William Miller, Secretary of the Treasury.	Silver box, engraved & chased, w/oval green stone centermounted on lid, approx. 6" x 10" x 2" high. Recd October 1, 1980. Est. Value—$1,500. In storage pending disposition by GSA.	Finance Minister, Abalkhail, Kingdom of Saudi Arabia.	Delivered to Secretary's office at conclusion of official visit to U.S. Refusal or return would have appeared discourteous or caused embarrassment to donor.
G. William Miller, Secretary of the Treasury.	Leather briefcase by Marsachi, with combination lock clasp. Recd December 1980. Est. Value—$115. In storage pending disposition by GSA.	President Cassa di Risparmio di Torino	Delivered to Secretary's office by messenger. Refusal or return would have appeared discourteous or caused embarrassment to donor.

BILLING CODE 4710-26-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. PE-81-6]

Petitions for Exemption; Summary of Petitions Received and Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemptions received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I) and of dispositions of certain petitions previously received. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and must be received on or before: April 15, 1981.

ADDRESSES: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket No. , 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: The Petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-204), Room 916, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW, Washington, D.C. 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on March 18, 1981.

Edward P. Faberman,

Assistant Chief Counsel, Regulations and Enforcement Division.

Petitions for Exemptions

Docket No.	Petitioner	Regulations affected	Description of relief sought
21352	Bohman Airways No. 2, Inc	14 CFR § 135.243(b)(3)	To permit petitioner's pilots in command to operate an airplane under Part 135 without holding an instrument rating or an airline transport pilot certificate with an airplane category rating.
21293	Clay Lacy Aviation, Inc	14 CFR § 135.243(a)	To permit petitioner to obtain an airline transport pilot certificate prior to his 23rd birthday. The certificate is required in order to comply with the pilot-in-command requirements.
15194	Compania Mexicana de Aviacion, S.A. (CMA)	14 CFR Various §§ of Parts 21, 61, and 63	To amend Exemption No. 2195K which permits the operation of four U.S.-registered B-727-2J7 aircraft with petitioner's airman, and the maintenance of those aircraft in accordance with a B-727 master minimum equipment list. The amendment would extend the termination date for two of the aircraft, N552NA and N553NA, to coincide with the expiration date of the current lease.

Petitions for Exemptions—Continued

Docket No.	Petitioner	Regulations affected	Description of relief sought
21308	Balloon Federation of America	14 CFR §§61.3 and 91.27	To permit foreign airmen and foreign-registered balloons to compete in the Fifth World Hot Air Balloon Championship without complying with the pilot certification and airworthiness requirements of those sections.
21289	National Soaring Foundation & Hobbs Soaring Society.	14 CFR §§61.69 and 91.27	To allow foreign glider pilots and foreign-built gliders to participate in the 12th National Standard Class Soaring Championships without complying with the airmen and airworthiness certification requirements.
19926	Lonestar Helicopters, Inc	14 CFR § 135.261(b)	To permit petitioner and its pilots to provide emergency helicopter operative service without complying with the 10-hour pilot crew-rest requirements but subject to certain conditions.
21409	V.A. Dowden Airways	14 CFR § 135.89(b)(1)	To allow relief from the supplemental oxygen mask use requirements.
21361	Tennessee Airways	14 CFR § 135.297	To allow 10 pilots in command to conduct Part 135 operations without satisfactorily demonstrating a non-directional beacon (NDB) approach during the sixth-calendar month instrument proficiency check.
20781	World Airways, Inc	14 CFR § 121.291	To permit petitioner to introduce its B-747-200C airplane into passenger-carrying operations with a 595-passenger seat configuration without first conducting a full-seating capacity emergency evacuation demonstration.
21378	AeroVironment, Inc	14 CFR §91.32	To allow operation of a Solar Challenger aircraft without supplemental oxygen for: (1) that part of the flight above 12,500 feet and up to and including 14,000 feet cabin pressure altitude for that part of the flight at those altitudes that is of more than 30 minutes duration; and (2) the entire part of the flight above 14,000 feet cabin pressure altitude.

Dispositions of Petitions for Exemptions

Docket No.	Petitioner	Regulations affected	Description of relief sought—disposition
20774	JETFLIGHT	14 CFR § 135.89(b)(2)	To permit operation of petitioner's Learjet Model 250 aircraft up to and including FL 410 without requiring one pilot to wear and use an oxygen mask at all times above FL 350. *Granted 3/10/81.*
13416	Sierra Academy of Aeronautics	14 CFR § 63.39(b)(2)	To permit flight engineer applicants to take the practical test required in an appropriate simulator. *Granted 3/9/81.*
20252	Air Hauli, S.A.	14 CFR portion of Parts 21 and 91	To amend Exemption No. 2663 to add B-707 aircraft N6786TW and to extend the exemption for a 12-month period. The present exemption allows the petitioner to operate leased U.S.-registered B-707-331C freighter aircraft N16711 using the FAA-approved master minimum equipment list and to maintain the aircraft under Trans World Airlines' continuous airworthiness maintenance program. *Granted 3/11/81.*
21088	Golden Gate Airlines	14 CFR § 21.197	To allow issuance of a continuing ferry authorization for maintenance purposes. *Granted 3/11/81.*
21256	Mr. Gordon D. Lingle	14 CFR §65.81(d)(1) and (2)	To allow the petitioner to become eligible for an Inspection Authorization without fully complying with the specified requirements. *Denied 3/11/81.*
20495	Midwest Piper Flight	14 CFR § 135.261(b)	To allow Midwest Piper pilots, conducting helicopter emergency flights in conjunction with Wesley Medical Center, to have two rest periods of 4 hours duration instead of 10 hours in 24 consecutive hours. *An exemption was granted 3/12/81 which requires that 8 consecutive hours of rest be provided.*
21083	Denver Jet, Inc	14 CFR § 135.243(a)	To allow Mr. Leesing to serve as pilot in command for Denver Jet without holding an airline transport pilot certificate. Mr. Leesing has not reached his 23rd birthday. *Denied 3/12/81.*
21374	Wien Air Alaska, Inc	14 CFR § 121.291(a)(1)	To allow introduction of Boeing 737-200 aircraft into passenger/cargo service using one-two-pallet/74-passenger, three-pallet/56-passenger, four-pallet/34-passenger, five-pallet/28-passenger, and six-pallet/8-passenger, configuration without first conducting a full-seating capacity emergency evacuation demonstration. *Granted 3/12/81.*
21070	Mr. Charles Brian Meller	14 CFR §61.129(c)(3)(ii)	To allow petitioner to obtain a commercial pilot's certificate without complying with the cross-country flight requirements. *Withdrawn 3/16/81.*

BILLING CODE 4910-13-M

Effective Period of Temporary Airmen Certificates

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of extension of the effective period of temporary airman certificates.

SUMMARY: This notice announces the extension of the effective period from 120 to 180 days for temporary airman certificates. These certificates are issued to applicants for certificates and ratings pending FAA review of their applications and supplementary documents, and the issue of the certificate and rating applied for. This extension is necessary because administrative workload has temporarily prevented the timely issuance of some permanent certificates. It is intended to relieve applicants of the burden of possibly having to obtain a second temporary certificate.

DATE: This extension is effective immediately.

FOR FURTHER INFORMATION CONTACT: Joseph Brennan, Aeronautical Center Counsel (AAC-7), Federal Aviation Administration, Aeronautical Center, Oklahoma City, Oklahoma 73125, Telephone: (405) 686-2296.

SUPPLEMENTARY INFORMATION: Sections 61.17, 63.13, and 65.13 of the Federal Aviation Regulations state that a temporary airman certificate or rating, effective for a period of not more than 120 days, is issued to a qualified applicant pending a review of his or her application and the issuance of a permanent certificate or rating.

Due to a workload situation in the Airmen Certification Branch, Airmen and Aircraft Registry, the permanent certificates cannot be issued within 120 days of the issuance of the temporary airman certificates in all cases. Consequently, a substantial number of the holders of temporary certificates come in to the appropriate Flight Standards Office and obtain a new temporary certificate. This is an undue burden on the concerned airmen.

It is anticipated that with the acquisition in April 1981 of direct access from terminals in the Airmen

Certification Branch to the computers printing the permanent certificates, the present backlog can be reduced and the 120-day deadline met later in the calendar year 1981. In the meantime, to relieve the burden on those receiving temporary airman certificates the FAA is extending the effective period of these temporary certificates to 180 days. Instructions are being issued to all persons authorized to issue temporary airman certificates, directing them to amend all temporary certificates issued between the date of this notice and June 30, 1981, by a pen and ink change, so that the effective period of the certificate is 180 days.

Issued in Washington, D.C., on March 18, 1981.

Bernard A. Geier,

Chief, General Aviation and Commercial Division, Office of Flight Operations.

BILLING CODE 4910-13-M

National Aviation Standard; Proposed Standard for the Very High Frequency Omnidirectional Radio Range (VOR), Distance Measuring Equipment (DME) and Tactical Air Navigation (TACAN)

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed National Standard.

SUMMARY: This proposed National Standard is an update/modification of the existing National Standard Advisory Circular (AC)-00-31, dated 6/10/70, entitled: "U.S. National Aviation Standard for the VORTAC System." This proposed National Standard describes the technical aspects of the Very High Frequency Omnidirectional Radio Range (VOR), Distance Measuring Equipment (DME), and Tactical Air Navigation (TACAN) systems used for navigation within the U.S. borders in regard to their operational capabilities. These systems are the primary en route navigational aids of the National Airspace System. This proposed National Standard does not describe the maintenance of these facilities but only describes what signals and coverage can be expected from the VOR/DME/TACAN system, the expected signals and coverage figures have been changed from the existing Advisory Circular but only in the context of upgrading this proposed National Standard to describe the VOR/DME/TACAN systems as operating presently. No change in performance should be expected by current users of these systems.

DATE: Comments must be received on or before May 29, 1981.

ADDRESSES: Send comments on the proposed National Standard in duplicate to:

Director, Systems Research and Development Service, ARD-1, Federal Aviation Administration, Department of Transportation, 400 7th Street, SW, Washington, D.C. 20591

OR deliver comments in duplicate to:

Director, Systems Research and Development Service, Room 7208, 400 7th Street, SW, Washington, D.C. 20591

All comments submitted will be made available for examination thru: ard-10, Room 7210, 400 7th Street, SW, Washington, D.C. weekdays, except Federal holidays, between 7:30 am and 4 pm.

FOR FURTHER INFORMATION CONTACT: Frank Bassett, ARD-310, Navigation and Landing Division, Navigation Systems Branch, Room 7305, Federal Aviation Administration, 400 7th Street, SW, Washington, D.C. 20591; telephone (202) 426-8596.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to submit such written data and comments of the proposed U.S. National Aviation Standard as they may desire. Communications should identify the notice.

History

The "Proposed United States (U.S.) National Aviation Standard for the Very High Frequency Omnidirectional Radio Range (VOR)/Distance Measuring Equipment (DME)/Tactical Air Navigation (TACAN)" is a revision of the previously issued Advisory Circular, AC-00-31, dated 6/10/70, and the Federal Aviation Administration (FAA) Order, 1010.55, dated 6/1/70. This proposed standard contains changes which fall into three major areas:

1. Formats. This standard has been changed to conform with current Department of Transportation (DOT)/Federal Aviation Administration standards of Advisory Circulars and Orders.

2. Conformance with existing/future equipment. This standard has been revised to reflect present operational characteristics of the VOR/DME/TACAN systems and the expected performance of the Second Generation VORTAC and solid state equipment procurements.

3. Editorial. Several Appendices have been added to help clarify areas which were confusing in the previous publications.

Definition of U.S. National Standard

U.S. National Aviation Standards are system standards embodying descriptions of system characteristics. They are issued by the Administrator of the Federal Aviation Administration in accordance with Section 312(c) of the Federal Aviation Act (49 U.S.C. 1353(c)). They describe the performance characteristics (the technical parameters, tolerances and techniques) of major elements of the system to the extent necessary to assure proper operation and interface compatibility among elements of the National Airspace System (NAS). U.S. National Aviation Standards generally are limited to cooperative air-to-ground subsystems involving government owned ground equipment and private airborne equipment. They are not equipment specifications or standards pertaining to planning, programming, siting, installation, availability, reliability, or maintainability.

Relationship of U.S. National Aviation Standards to Federal Aviation Regulations

U.S. National Aviation Standards issued by the Administrator in agency orders are binding only on FAA organizational elements. They establish the technical basis and description of the NAS and component subsystems. A National Aviation Standard is not a standard of general or particular applicability designed to implement or prescribe law or policy. It does not fall within the definition of "rule" contained in the Administrative Procedures Act (5 U.S.C. 551). There is no requirement that a National Aviation Standard be published as a notice of proposed rule making in the **Federal Register.** However, U.S. National Aviation Standards may serve as the basis for subsequent rule making actions. Accordingly, because of the relationship between the Standards and possible subsequent regulatory actions, FAA publishes such Standards in the **Federal Register** and solicits public comment prior to their approval by the Administrator.

The Proposed Standard

Accordingly, the Federal Aviation Administration proposes to adopt the following VOR/DME/TACAN Standard.

Issued in Washington, D.C. on March 18, 1981.

Robert W. Wedan,

Director, Systems Research and Development Service, Office of Engineering and Development, Federal Aviation Administration, Department of Transportation.

United States (U.S.) National Aviation Standard for the Very High Frequency Omnidirectional Radio Range (VOR)/ Distance Measuring Equipment (DME)/ Tactical Air Navigation (TACAN) Systems

Foreward

Very High Frequency Omnidirectional Radio Range (VOR)/Distance Measuring Equipment (DME)/Tactical Air Navigation (TACAN) is the primary short distance navigational aid used in the National Airspace System (NAS) of air navigation and traffic control. Achievement of navigation system performance requires the definition of system functional and performance characteristics. The purpose of publishing a National Standard is to describe how the system is operated and how the different elements fit together. It should be noted that although the terms of measurement reference have been changed from Order 1010.55 dated 6/1/70 to allow standardization, the effect on component and system performance is minimal.

It should be recognized that the frequency band used by the systems described in this standard have been exclusively allocated for aviation navigation. Due to the limited availability of frequencies, these bands will be increasingly utilized by common equipment and other systems. For this reason, designers, manufacturers and operators of VOR/DME/TACAN equipment should be especially conscious of those paragraphs in the standard which impact on spectrum utilization. This is necessary to avoid present and future electromagnetic interference not only between common equipment but with other systems as well.

Table of Contents

Chapter 1 General

Section 1. Introduction.
1. Purpose.
2. Distribution.
3. Cancellation.
4. Implementation Criteria.
5. Directed Action.

Section 2. Overview.
6. General.
7. The VOR/DME/TACAN System Characteristics.
8. Revisions.
9. Reliability Required of the VOR/DME/TACAN System.
10–19. Reserved.

Chapter 2. VOR/DME/Tacan System

20. VOR/DME/TACAN System Description.
21. Ground Components.
22. Station Type Designations.
23. Service Volumes.
24. Associated Components.
25. Co-location Limits for Associated Components.
26. Radio Frequency Allocations.
27. Radio Frequency Assignments.
28. Radio Frequency Channel Pairing.
29. Frequency Interference Protection.
30. Component Identification Signals.
31. Independent Components.
32. Identification of Associated Components.
33. Precedence of VOR Voice Communications.
34. VOR Voice Communications Signals.
35. Airborne Components.
36. System Traffic Handling Capacity.
37. VOR/DME/TACAN System Azimuth Accuracy.
38. System Distance Accuracy.
39. High Accuracy Certification.
40–49. Reserved.

Chapter 3. VOR System

Section 1. Operational Characteristics for VOR Ground Components.
50. Introduction.
51. Polarization.
52. Radio Frequency Accuracy.
53. Signal Strength In Space.
54. Azimuth Signal Characteristics.
55. 30 Hz Amplitude Modulation.
56. Amplitude Modulation Frequency and Accuracy.
57. Depth of Reference and Variable Phase Modulations.
58. Phase Relationship of Reference and Variable Phase Signals.
59. Code Identification Signal Characteristics.
60. Voice Identification and Communications Signal Characteristics.
61. Monitoring.
62–79. Reserved.

Section 2. Operational Characteristics for VOR Airborne Components.
80. Introduction.
81. Receiver Stability.
82. Receiver Sensitivity.
83. Rejection of Undesired Signals.
84. Mistuning Protection.
85. Facility Identification and Voice Signals.
86. Bearing and Course Deviation Information.
87. Course Deviation Display.
88. Warning Function.
89. Accuracy of Bearing and Course Deviation Information.
90. Radiation.
91–109. Reserved.

Chapter 4. DME and TACAN Systems

Section 1. Operational Characteristics for DME and TACAN Ground Components.
110. Introduction.
111. Polarization.
112. Transponder Response to Interrogation Signals.
113. Interrogation Radio Frequency.
114. Sensitivity to Interrogation Signals.
115. On-channel Sensitivity.
116. Sensitivity at other Pulse Spacings.
117. Variation of Sensitivity with Interrogation Loading.
118. Sensitivity to Adjacent Channel Interrogations.
119. Transponder Dead Time.
120. Echo Suppression Dead Time.
121. Transponder Characteristics.
122. Frequency Stability.
123. Signal Strength in Space.
124. Radio Spectrum.
125. Spurious Radiation.
126. Pulse Shape.
127. Pulse Coding.
128. Pulse Power Variation.
129. Distance Reply Signals.
130. Reply Efficiency.
131. Reply Delay Time.
132. Random Pulse Pair Signals.
133. DME Components.
134. TACAN Components.
135. Pulse Pair Rate.
136. Ground Component Range Accuracy.
137. Code Identification Signal Characteristics.
138. TACAN Azimuth Signal Characteristics.
139. Bearing Reference Signals.
140. Variable Bearing Signals.
141. Relationships of Reference and Variable Bearing Signals.
142. Precedence of Pule Transmissions.
143. Rejection of Undersired Signals.
144. Receiver Decoder.
145. Echo Suppression.
146. Decoder Discrimination.
147. Receiver Recovery Time.
148. Desensitization By CW.
149. Monitoring.
150–169. Reserved.

Section 2. Operational Characteristics for DME and TACAN Airborne Components.
170. Introduction.
171. Interrogator Signal Characteristics.
172. Interrogation Radio Frequencies and Accuracy.
173. Pulse Characteristics.
174. Pulse Power Variation.
175. Pulse Coding.
176. Interrogation Signal Repetition Rate.
177. Variation of Repetition Rate.
178. Signal Strength in Space.
179. Radio Spectrum.
180. Radiation.
181. Component Functional Capabilities and Performance.
182. Receiver Stability.
183. Receiver Sensitivity.
184. Rejection of Undesired Signals.
185. Distance Information.
186. Warning Function, Distance.
187. Accuracy of Distance Information.
188. Memory Functions.
189 TACAN Bearing and Course Deviation Information.
190. Course Deviation Displays.
191. Warning Function, Bearing.
192. Accuracy of Bearing and Course Deviation Information.
193–209. Reserved.

Appendix 4. Definitions

Chapter 1. General

Section 1. Introduction

1. *Purpose.* This order establishes the Very High Frequency Omnidirectional Radio Range (VOR)/Distance Measuring Equipment (DME)/Tactical Air Navigation (TACAN) standard defining the performance required of the system and its components.

2. *Distribution.* This order is distributed to branch level in the organizations of Flight Standards, Airway Facilities, Air Traffic and Systems Research and Development in Washington headquarters, regions and centers.

3. *Cancellation.* Order 1010.55, Selection Order: U.S. National Aviation Standard for the VORTAC System, dated 6/1/70 is cancelled.

4. *Implementation Criteria.* The National Standard applies to all VOR, DME and TACAN ground and airborne equipments used in the National Airspace System (NAS).

5. *Directed Action.* Subject to applicable rulemaking, programming and budgetary procedures, actions shall be taken by the FAA elements concerned to implement this standard.

Section 2. Overview

6. *General.* Under Public Law 85-726, the Federal Aviation Administration (FAA) is charged with providing for the regulation and promotion of civil aviation in order to best foster its development and safety, and to provide for the safe and efficient use of the airspace by both civil and military aircraft. Explicitly, the Administrator shall develop, modify, test, and evaluate systems, procedures, facilities, and devices, defining their performance characteristics as needed. This effort is directed toward meeting the need for safe and efficient navigation and traffic control of all civil and military aviation operating in a common Civil/Military System.

7. *The VOR/DME/TACAN System Characteristics.*

a. This Standard defines the application and performance characteristics of VOR, DME, and TACAN systems in the United States (U.S.). For ground and airborne components, the material identifies signal, functional, and performance characteristics required to meet operational requirements and to provide compatibility between components of the system.

b. The respective airborne component characteristics for VOR, DME, and TACAN apply in entirety to those components used in aircraft operations performed under Instrument Flight Rules (IFR). However, for other aircraft operations the applicability is limited to requirements identified in chapter 3, section 2 and chapter 4, section 2 as essential to prevent impairment of services to other NAS users.

c. In all cases, where a parameter and associated tolerance is identified herein, ground stations shall be maintained within these limits of quality assurance methods including either monitoring, periodic ground or flight inspections or a combination of these methods.

d. Operators of airborne systems designed, installed, and operated in accordance with the standard can expect to achieve the system performance which the standard is intended to provide.

e. It is recognized that certain existing components do not comply with all requirements of this standard. Specific characteristics that are known to deviate from the requirements of this standard will be corrected or replaced as practical.

8. *Revisions.* This standard will be revised as the needs of the National Airspace System warrant.

9. *Reliability Required of the VOR/DME/TACAN System.* Due to the critical nature of the Radionavigation Service, it is essential that the VOR/DME/TACAN system provide high reliability. Both signal strength and frequency protection are provided on a basis of 99 percent time availability at the worst case points of the service volume. At other than worst case points, time availability substantially exceeds 99 percent. (See Appendix 1, paragraph 6.)

10-19. *Reserved.*

Chapter 2. VOR/DME/TACAN System

20. *VOR/DME/TACAN System Description.* The VOR/DME/TACAN system is a short distance air navigation system. The ground components provide properly equipped aircraft with bearing, identification, and distance information referenced to the selected ground component. When the airborne equipment includes a suitable area navigation (RNAV) device operating from data derived from the system, both radial and non-radial routes are afforded. The system provides navigation signals to all civil and military aviation for the safe and efficient conduct of aircraft operations, exercise of air traffic control, and use of airspace.

21. *Ground Components.* The principal ground components are VOR, DME, and TACAN. VOR and DME are the International Civil Aviation Organization (ICAO) standard navigational aids. VOR provides azimuth information and ground-to-air communications for the common NAS. DME provides distance information to all users of the NAS. TACAN provides azimuth information primarily to military users and distance information to all users of the NAS.

22. *Station Type Designations.* Ground components are identified in the Airman's Information Manual (AIM) by type designations which indicate the service provided. VOR type designations are prefixed by the letter "B" when the component provides scheduled voice broadcasts. The letter "W" is used when the component does not provide voice transmissions.

Designation	Type of facility
VOR	VHF navigation facility, omni-directional azimuth only.
DME	UHF navigation facility, distance only.
TACAN	UHF navigational facility, omni-directional, azimuth and distance.

Designation	Type of facility
VOR/DME	Associated VOR and DME navigational facilities.
VORTAC	Associated VOR and TACAN navigational facilities.

23. *Service Volumes.* Maximum usable range is influenced by a large number of variables. These include factors such as antenna patterns, propagation variation, ground terrain, ground and avionics equipment performance, ground and avionics equipment installation and maintenance, traffic loading and traffic distribution. It should be noted that the aviation community has many years of operational experience with the VOR/DME/TACAN system. Service volumes are predicated on both experience and empirical measurements. Sufficient safety margin has been incorporated to assure highly reliable system operation. Under worst case conditions, it is recognized that some combinations of avionics and older ground equipments may not provide service with a time availability of 95 percent. Based on operational experience and user feedback, no substantial evidence indicating an adverse operational impact, has been shown. In addition, all service volumes are flights inspected prior to commissioning for operational use. Nonetheless, ground and airborne equipment should be brought into full compliance with this National Standard as soon as it is practical.

a. *Standard Service Volumes (SSV).*

(1) Ground stations are classified according to their intended use. These stations are available for use within their service volume. Outside the service volume, reliable service may not be available. For standard use, the airspace boundaries are called standard service volumes. They are defined, in the table below, for the three station classes.

SSV Class

Designator	Altitude and range boundaries
T (Terminal)	From 1,000 feet (305 m) AGL up to and including 12,000 feet (3,658 m) AGL at radial distances out to 25 nmi (46 km). See Figures 2–3 and 2–4.
L (Low Altitude)	From 1,000 feet (305 m) AGL up to and including 18,000 feet (5,486 m) AGL at radial distances out to 40 nmi (74 km). See Figures 2–2 and 2–5.
H (High Altitude)	From 1,000 feet (305 m) AGL up to and including 14,500 feet (4,420 m) AGL at radial distances out to 40 nmi (74 km). See Figures 2–1 and 2–5. From 14,500 feet (4,420 m) AGL up to and including 60,000 feet (18,288 m) at radial distances out to 100 nmi (185 km). See Figures 2–1 and 2–5. From 18,000 feet (5,486 m) AGL up to and including 46,000 feet (13,716 m) at radial distances out to 130 nmi (241 km). See Figures 2–1 and 2–5.

(2) These SSV's are graphically shown in Figures 2–1 through 2–5. The SSV of a station is indicated by using the class designator as a prefix to the station type designation. (Examples: TVOR, LDME, and HVORTAC.)

(3) Within 25 mi nmi (46 km), the bottom of the T Service is defined by the curve in Figure 2–4. Within 40 nmi (74 km), the bottoms of the L and H service volumes are defined by the curve in Figure 2–5. In some cases, local conditions (terrain, buildings, trees, etc.) may require that the standard service volume be restricted. The public shall be informed of any such restriction by a Notice of Airman (NOTAM).

Note.—Metric measurements are given for convenience and are approximations.

b. *Expanded Service Volumes.* When operational needs require facilities to be used beyond their standard service volumes, the same signal standards/tolerances and ground/flight check certification procedures will be met. Expanded service volumes (ESVs) will only be authorized when conditions permit (reference Figures 2 through 13 of Appendix 1.).

c. *Operational Service Volume.* The airspace available for operational use includes:

BILLING CODE 4910-13-M

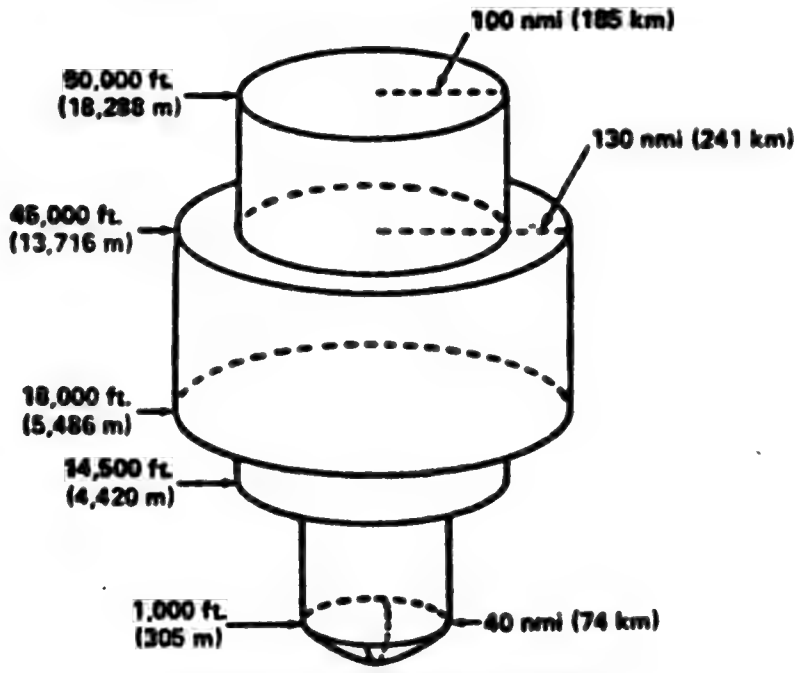

FIGURE 2-1. STANDARD HIGH ALTITUDE SERVICE VOLUME
(refer to FIGURE 5 for altitudes below 1000 feet (305 m)

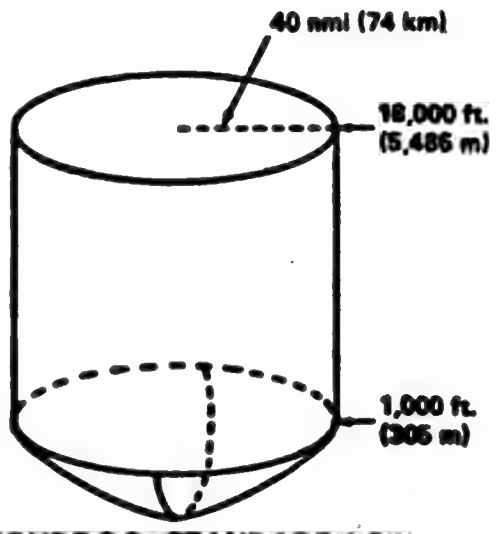

FIGURE 2-2. STANDARD LOW ALTITUDE SERVICE VOLUME
(refer to FIGURE 5 for altitudes below 1000 feet (305 m)

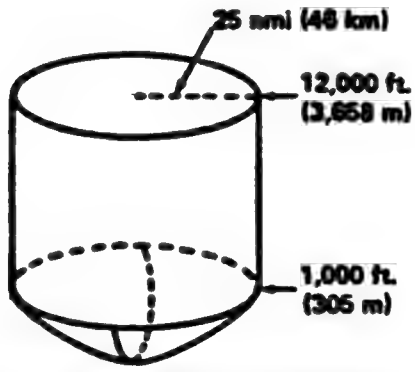

FIGURE 2-3. STANDARD TERMINAL SERVICE VOLUME
(refer to FIGURE 4 for altitudes below 1000 feet (305 m)

NOTE: All elevations shown are with respect to the station's site elevation (AGL). Metric Measurements are given for convenience and are approximations.

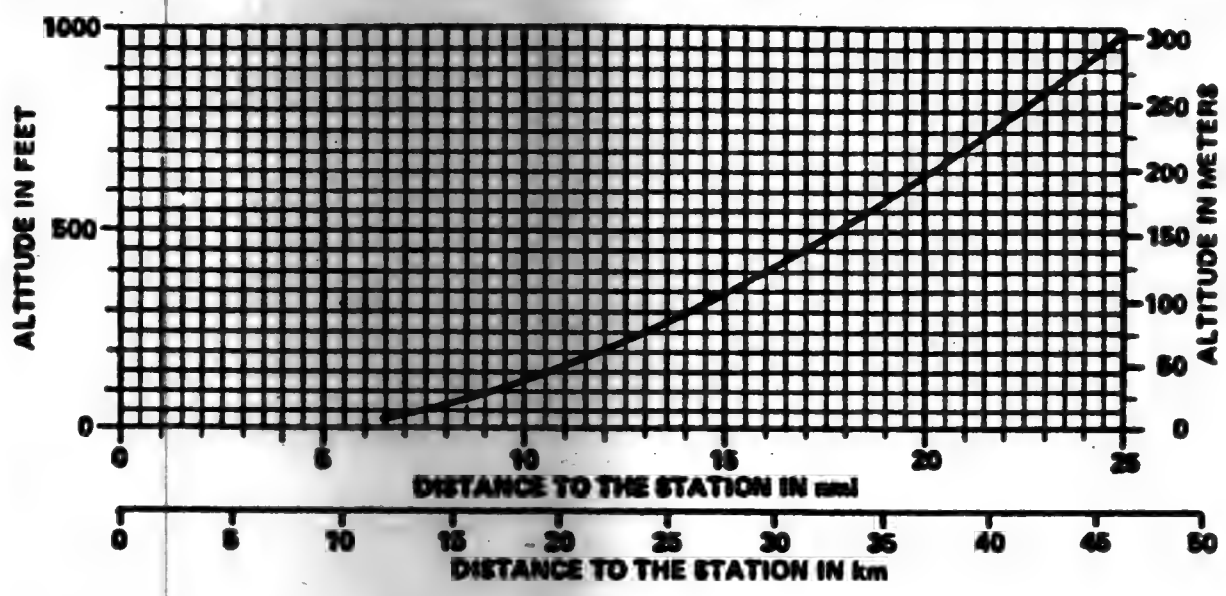

FIGURE 2-4. Definition of the Lower Edge of the Standard T (Terminal) Service Volume

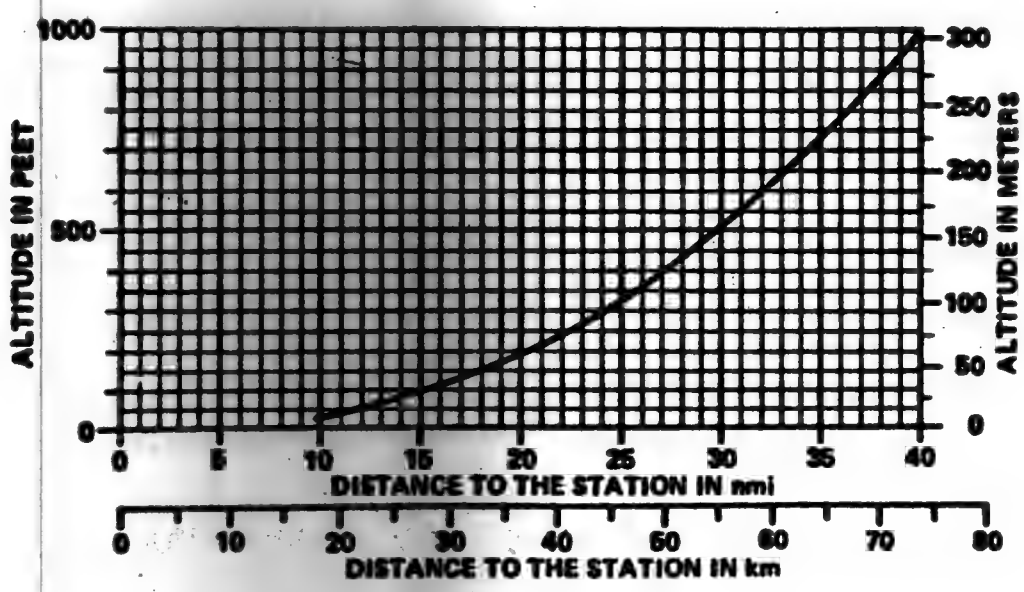

FIGURE 2-5. Definition of the Lower Edge of the Standard H (High) and L (Low) Service Volumes

BILLING CODE 4910-13-C

(1) The SSV excluding any portion of the SSV which has been restricted, and

(2) expanded service volumes (ESVs).

d. *Vertical Angle Coverage Limitations.* Within the operational service volume of each station, azimuth signal information permitting satisfactory performance of airborne components is normally provided from the radio horizon up to an elevation angle of approximately 60 degrees for VOR components and approximately 40 degrees for TACAN components. At higher elevation angles the azimuth signal information may not be usable. Distance information provided by DME and TACAN will permit satisfactory performance of airborne components from the radio horizon to an elevation angle of not less than 60 degrees.

24. *Associated Components.* A VOR and either a DME or TACAN shall be considered as associated components only when:

a. operated on a standard frequency pairing as associated with paragraph 28,

b. co-located as defined in paragraph 25; and

c. complying with the identification provisions of paragraph 32.

25. *Co-Location Limits for Associated Components.* DME or TACAN components are frequency-paired with VOR. For the common system, these components shall be co-located in accordance with one of the following:

a. *Coaxial co-location.* The VOR and DME or TACAN antenna are located on the same vertical axis. This is the usual co-location configuration.

b. *Offset co-location.*

(1) For those facilities used in terminal areas for approach purposes or other procedures where the highest position fixing accuracy of system capability is required, the separation of the VOR and DME or TACAN antennas will not exceed 100 feet (30 m). However, at Doppler VOR sites the antennas may be separated by not more than 280 feet (80 m).

(2) For purposes other than those indicated in (1), the separation of the VOR and either the DME or TACAN antennas will not exceed 2000 feet (610 m).

26. *Radio Frequency Allocations.* Radio frequencies allocated for VOR, DME, and TACAN are those listed in Appendix 3.

27. *Radio Frequency Assignments.* Radio frequency assignments for the paired system components shall be selected from the frequency pairings listed in Appendix 3. Channels 1 through 16 and 60 through 69 for both X and Y modes of operation shall not be assigned to components of the common system.

28. *Radio Frequency Channel Pairing.* Appendix 3 shows the pairing of the VHF and UHF components of the VOR/DME/TACAN System. Components associated according to paragraph 24 shall be assigned on paired frequencies in accordance with this table. Non-associated VOR, DME and TACAN components shall not be assigned on paired frequencies unless the separation between the respective components is sufficient to satisfy paragraph 29. This latter separation shall be determined as if each station was in effect an associated frequency pair.

29. *Frequency Interference Protection.* Frequency assignments must not result in interference between stations. Within a station's operational service volume, the ratio of the desired signal to any undesired signal must not fall below the selection/rejection capability of the airborne equipment. Paragraphs 29.a through 29.c discuss interference protection needed. The usable distance and altitude of aeronautical navigation aids are often limited by the frequency protection provided from other ground stations. The operational service volume shall not extend beyond the frequency protected service volume.

a. *Interference Protection of VHF NAVAIDS (ILS and VOR).* The following interference signal protection ratios shall be provided within the operational service volume of all ILS and VOR stations with a 95 percent time availability. This is done by controlling the station separation in certain situations.

(1) The desired to undesired (D/U) signal ratio between co-channel stations shall not be less than +20 dB.

(2) The D/U ratio between VHF NAVAIDS with a nominal 50 kHz frequency separation shall be −34 dB or greater. (−34 dB or −30 dB are permissible; −40 dB is not.) Frequency assignments made under this criteria (called the "Final" criteria) insure protection to narrow bandwidth (i.e., 50 kHz) receivers considering both ground and airborne frequency tolerances. A minimum D/U ratio of −7 dB is required to insure protection to wideband (i.e., 100 kHz) receivers using 100 kHz (i.e., even multiples of 50 kHz) ground stations. This value is called the "Interim" criteria. In highly congested parts of the country, the "Interim" criteria may not allow frequency assignments to any new systems. New assignments in these areas would have to be made under the final criteria (−34 dB). As a safeguard when this is done, flight publications will indicate any nearby 100 kHz ground stations which cannot be used without the narrow bandpass characteristics associated with a 50 kHz receiver. This is required due to the insufficient rejection, in the 100 kHz receivers, to signals 50 kHz removed.

(3) The D/U ratio between VHF NAVAIDS with 100 kHz frequency separation shall not be less than −46 dB. In those parts of the country where 50 kHz assignments are made, the D/U ratio between stations with 100 kHz frequency separation shall be not less than −50 dB.

(4) The D/U ratio between VHF NAVAIDS with more than 100 kHz frequency separation, shall not be less than −50 dB.

(5) Some peak power deterioration is allowed before the system is shutdown. In order to account for this decrease in power, the actual D/U values used for station separation calculations are 3 dB more protective, e.g. +23 dB vice +20 dB, −31 dB, vice −34 dB, etc.

b. *Interference Protection of DME/TACAN.* The following interference signal protection ratios shall be provided within the operational service volume of all DME/TACAN stations with a 95 percent time availability. This is done by controlling the station separation in certain cases.

(1) The D/U signal ratio between co-channel DME/TACAN stations shall not be less than +8 dB.

(2) The D/U signal ratio between adjacent channel DME/TACAN stations shall be as follows. The various D/U ratios have been established recognizing the spectrum control characteristics reflected in paragraph 124 and the spectrum differences between DME and TACAN.

(a) When the undesired station is a TACAN, the D/U ratio shall not be less than −42 dB.

(b) When the undesired station is an LDME (1000 W transmitter), the D/U ratio shall not be less than −39 dB.

(c) When the undesired station is a TDME (100 W transmitter), the D/U ratio shall not be less than −29dB.

(3) The D/U ratio between DME/TACAN stations with more than 1 MHz frequency separation shall not be less than − dB.

(4) Some peak power deterioration is allowed before the system is shutdown. In order to account for this decrease in power, the actual D/U values used for station separation calculations are 3 dB more protective, e.g., +11 dB vice +8 dB, −39 dB vice −42 dB, etc.

c. *Protection of Service Volumes Which Extend Beyond National Borders.* Stations near the border are normally not frequency-protected for

that airspace which lies beyond the national border. Standard service volume and expanded service volume protection may be provided upon proper coordination with Canada or Mexico. This must be done whenever specific airways, routes, or procedures beyond the border are based on ground stations in the U.S.A.

30. *Component Identification Signals.* Each ground component shall transmit an identification signal consisting of three letters in International Morse Code. It shall be transmitted at a rate of approximately 7 words per minute. In addition, voice identification in accordance with paragraphs 31 through 33 may be provided by a VOR.

a. *Identification Code Characteristics.* The identification code characteristics shall conform to the following.

(1) The dots shall be a time duration of 0.1 second to 0.125 second and the dashes three times the dot duration.

(2) The duration between dots and dashes of a code letter shall be equal to that of one dot plus or minus 10 percent.

(3) The time duration between consecutive letters of the identification code group shall not be less than three dots; and

(4) The total period of transmission of an identification code group shall not exceed 5 seconds.

b. *Identification Cycle and Synchronization.* The repetition and synchronization of component identification signals shall conform to paragraphs 31 through 33.

31. *Independent Components.* Whenever a facility is operated as a VOR, a DME, or a TACAN only, its identification signal shall be transmitted as follows.

a. For VOR providing only code identification signals, each 30 second interval is divided into either four or five equal periods. The code identification shall be transmitted during each period.

b. For VOR providing code and voice identification signals, each 30 second interval is divided into four equal periods. The code identification signal shall be transmitted during alternate periods or during three of four periods. Subject to paragraph 33, voice identification signals will occur during the remaining period(s).

c. When voice communication signals are being transmitted by a VOR, the VOR code identification signals shall not be suppressed.

d. For DME and TACAN the International Morse Code identification signal shall be repeated at intervals of 30 seconds.

32. *Identification of Associated Components.* When a VOR and either a DME or TACAN are operated as co-located components (see paragraphs 24 and 25), the identification signals shall conform to the respective requirements of paragraph 31 except that:

a. The identification code shall be the same for each component;

b. For VOR of paragraphs 31.a and 31.b, the DME or TACAN identification signal shall be transmitted during one of the periods allocated for VOR code identification. The VOR code shall not be transmitted during that period;

c. The International Morse Code identification signals of VOR, DME, and TACAN shall be synchronized and interlocked such that simultaneous identification transmissions of VOR/DME or VOR/TACAN or ILS/DME do not occur; and

d. When voice communications are being transmitted on the VOR, the code identification signals of DME and TACAN shall not be suppressed.

e. Whenever one component is temporarily out of service, the component still operating shall transmit facility identification signals in accordance with paragraph 32 without regard to the facility type designation.

33. *Precedence of VOR Voice Communications.* VOR voice identification signals shall not be suppressed for the duration of voice communications or broadcasts.

34. *VOR Voice Communications Signals.* If required, a VOR may provide ground-to-air voice communications.

35. *Airborne Components.* Airborne components of the system consist of VOR components conforming to chapter 3, section 2 and DME and TACAN components conforming to the applicable requirements of chapter 4, section 2 of this Standard.

36. *System Traffic Handling Capacity.* Each VOR and TACAN ground component of the system provides azimuth and facility identification information to an unlimited number of airborne components. DME and TACAN ground components can provide slant range adequate for a peak traffic load of 3375 interrogations per second.

Note.—As the traffic density increases beyond full load, the system replies at a rate reduced proportionately to the number of additional interrogators. The ground component could be capable of servicing higher density traffic only if the airborne component could maintain satisfactory operations with reduced reply efficiency (see paragraph 130). The apparent change in numbers from Order 1010.55 dated 6/1/70 does not represent a change in beacon radiated power (for example, see Appendix 1). Therefore, increases in receiver sensitivities of existing airborne equipments are not required to achieve the same ranges that users have experienced in the past. Future designs should not be restricted by this fact.

37. *VOR/TACAN/VORTAC System Azimuth Accuracy.* System azimuth accuracy, expressed in terms of error, is a function of the error factors associated with the ground and airborne components. The total system azimuth accuracy is ±4.5 degrees. (See Appendix 2).

38. *System Distance Accuracy.* System distance accuracy is a function of the ground and airborne component accuracies. The component values in this standard provide a system distance accuracy of ±0.5 nmi (926 m) of 3 percent of the slant range distance, whichever is greater (95 percent probability), when the error values are combined by the root-sum-square method.

39. *High Accuracy Certification.* Some system accuracy requirements exceed those specified in paragraphs 37 and 38. Some area navigation routes are an example. In order to support prescribed operations, flight inspections will validate the signal and certify its adequacy.

40.–49. *Reserved.*

Chapter 3. VOR Systems

Section 1. Operational Characteristics for VOR Ground Components

50. *Introduction.* This section identifies standard signal characteristics and tolerances for the VOR portion of the system. These characteristics represent performance which shall be provided throughout the operational service volume as defined in paragraph 23.c.

51. *Polarization.* The ground component antenna shall radiate horizontally polarized signals. Any vertically polarized signal components shall be at least 26 dB weaker than the horizontally polarized component.

52. *Radio Frequency Accuracy.* The radio frequency carrier shall be within ± 0.002 percent of the assigned frequency.

53. *Signal Strength in Space.* The ground station shall provide a minimum signal power density of −120 dBW/m² (95 percent time availability) throughout the operational service volume as defined in paragraph 23.c. At the nearest aircraft position expected during operations, the maximum signal power density expected at an aircraft will be on the order of −34 dBW/m².

Note.—At 118 MHz, the value −120 dBW/m² corresponds to −123 dBW at the output of a lossless isotropic receiving antenna. The apparent change in numbers from Order 1010.55, dated 6/1/70, does not represent a

change in radiated power (for example, see Appendix 1). Therefore, increases in receiver sensitivities of existing airborne equipments are not required to achieve the same service ranges that users have experienced in the past. Future designs should not be restricted by this fact.

54. *Azimuth Signal Characteristics.* The VOR shall radiate a radio frequency carrier with two associated 30 Hz modulations. The phase of one of these modulations shall be independent of the azimuth of the point of observation (reference phase). The other modulation (variable phase) shall differ from that of the reference phase by an angle equal to the magnetic bearing of the point of observation with respect to the VOR.

a. The radio frequency carrier shall be amplitude modulated by two signals in accordance with the following.

(1) *Subcarrier Frequency Modulation.* One signal component shall be a subcarrier of 9,960 Hz of constant amplitude. It shall be frequency modulated at 30 Hz having a deviation ratio of 16±1 (i.e., 15 to 17) as follows.

(a) for the conventional VOR, the phase of the 30 Hz component of the FM subcarrier is fixed without respect to azimuth. It is termed the "reference phase."

(b) for the Doppler VOR, the phase of the 30 Hz component of the FM subcarrier varies with azimuth. It is termed the "variable phase."

(2) *Subcarrier Frequency and Accuracy.* The subcarrier modulation mid-frequency shall be 9,960 Hz within ±1.0 percent.

(3) *Subcarrier Modulation Frequency and Accuracy.* The modulation frequency shall be 30 Hz within ±1.0 percent.

(4) *Subcarrier Amplitude Modulation.* Amplitude modulation of the subcarrier shall conform to the following.

(a) for the conventional VOR, the percentage of amplitude modulation of the 9,960 Hz subcarrier shall not exceed 5 percent.

(b) For the Single Sideband Doppler VOR, the percentage of amplitude modulation of the 9,960 Hz subcarrier shall not exceed 40 percent when measured at a point at least 1000 feet from the VOR. When Double Sideband Doppler VOR is installed, this modulation, for each sideband, shall not exceed 50 percent.

(5) *Sideband Level Subcarrier Harmonics.* When 50 kHz channel assignments are made, the sideband level of the harmonics of the 9,960 Hz component in the radiated signal shall not exceed the following levels referenced to the level of the 9,960 Hz sideband.

Subcarrier	Level
9,960 Hz	0 dB reference.
2d harmonic	−30 dB.
3d harmonic	−50 dB.
4th harmonic and subsequent harmonics.	−60 db.

55. *30 Hz Amplitude Modulation.* The other signal component shall be 30 Hz amplitude modulation as follows.

a. For the conventional VOR, this component results from a rotating field pattern, the phase of which varies with azimuth. It is termed the "variable phase" and is of constant amplitude.

b. For the Doppler VOR, this component, of constant phase with relation to azimuth is radiated omnidirectionally. It is termed the "reference phase" and is of constant amplitude.

56. *Amplitude Modulation Frequency and Accuracy.* The modulation frequency shall be 30 Hz within ±1.0 percent.

57. *Depth of Reference and Variable Phase Modulations.* the depth of modulation of the radio frequency carrier due to the 30 Hz or 9,960 Hz signals shall be within the following limits for each signal.

a. 28 to 32 percent at all elevation angles from 0 to 5 degrees above the horizon; and

b. 25 to 35 percent at all elevation angles between 5 and 60 degrees above the horizon.

58. *Phase Relationships of Reference and Variable Phase Signals.* The reference and variable phase modulations shall be in phase along the radial corresponding to magnetic north.

Note.—The reference and variable phase modulations are in phase when the maximum value of the same of the radio frequency carrier and the sideband energy due to the amplitude modulation signal occurs at the same time as the highest frequency of the frequency modulation signal.

59. *Code Identification Signal Characteristics.* The characteristics of the code identification signal shall conform to the following:

a. *Tone Modulation Frequency and Accuracy.* The modulation frequency shall be 1,020±50 Hz.

b. *Depth of Modulation.* The depth to which the radio frequency carrier is modulated by the code identification signal shall be:

(1) 5.0±1 percent where voice services are provided.

(2) 4 to 10 percent at components where voice services are not provided.

60. *Voice Identification and Communications Signal Characteristics.* The characteristics of voice identification and voice communications signals, when provided, shall conform to the following:

a. *Voice Channel Frequency Response.* Throughout the frequency range from 300 to 2,200 Hz, the frequency response characteristics for the voice channel shall be within 3 dB of the response at 1,000 Hz.

b. *Depth of Modulation.* The depth to which the radio frequency carrier is modulated by voice signals shall not be greater than 30±2 percent.

61. *Monitoring.* The radiated signal shall be monitored and removed from service upon recognition of unsafe operation.

62.–79. *Reserved.*

Section 2. Operational Characteristics for VOR Airborne Components

80. *Introduction.* This section specifies functional capability and performance characteristics required of VOR airborne components. The term "component" describes the complete aircraft installation. This includes the antenna and its transmission line, the receiver, electrical power source(s), identification and voice communications signal reproduction devices, and selector and display instrumentation devices for bearing and course indication. Airborne components used in the performance of aircraft operations under IFR must meet all requirements. For other aircraft operations the requirements are limited to those of paragraphs 80 and 90. Components should be capable of performing as specified throughout the operational service volume of ground stations. The applicable performance requirements should be met when the ground stations are operating in accordance with this standard.

81. *Receiver Stability.* For each channel in use, the receiver's center frequency shall be in accordance with Appendix 3. The receiver stability shall be ±0.005 percent or better.

82. *Receiver Sensitivity.* Based on the signal power density of paragraph 53, the airborne component shall provide the sensitivity necessary to display navigation information to the accuracy specified. Clear and distinct reproduction of communications and identification signals shall be provided. (See also Appendix 1.)

83. *Rejection of Undesired Signals.* The airborne component shall provide undesired signal rejection characteristics adequate to assure the specified performance. For co-channel and adjacent-channel ILS and VOR signals, the D/U ratios of paragraph 29.a shall apply.

84. *Mistuning Protection.* Mistuning by 50 kHz may result in erroneous information not readily apparent to the user. Provision shall be made to protect against mistuning an airborne receiver by operational, mechanical or electronic means.

85. *Facility Identification and Voice Signals.* The airborne component shall provide the pilot with positive identification of the ground component.

86. *Bearing and Course Deviation Information.* The airborne component shall provide devices for unambiguous determination of the aircraft magnetic bearing with respect to the selected ground component. This display shall show the aircraft deviation from the selected course.

87. *Course Deviation Displays.* The response, readability and resolution of course deviation displays shall enable the pilot to determine the direction and extent of the aircraft deviation from the selected course.

88. *Warning Function.* The airborne component shall provide a warning indication whenever the azimuth signals necessary for the prescribed performance are not present. This warning shall be clearly evident to the pilot.

89. *Accuracy of Bearing and Course Deviation Information.* The total airborne component error, in bearing and course deviation information as displayed to the pilot, shall not exceed ±3.0 degrees (95 percent probability) at any bearing.

90. *Radiation.* Radiation from airborne components shall not result in derogation of operational use to other system users or in the derogation of other aeronautical services.

91.–109. *Reserved.*

Chapter 4. DME and TACAN Systems

Section 1. Operational Characteristics for DME and TACAN Ground Components

110. *Introduction.* This section identifies standard signal and performance characteristics for DME and TACAN ground components. These characteristics represent the performance which shall be provided throughout the operational service volumes defined in paragraph 23.c. Requirements apply to both DME and TACAN components, unless noted otherwise.

111. *Polarization.* The ground component antenna shall radiate and receive a vertically polarized signal. Any horizontally polarized signal components shall be at least 26 dB weaker than the vertically polarized component.

112. *Transponder Response to Interrogation Signals.* The response of the transponder to interrogation signals shall conform to paragraphs 113 through 120.

Note.—At the ground component antenna, the presence of CW signals within ±3.0 MHz of the nominal value of the interrogation frequency at a signal power density of −113 dBW/m² or more, will normally derogate the performance of the system. Steps should be taken to avoid this situation.

113. *Interrogation Radio Frequency.* For each channel in use, the center frequency of the transponder's interrogation and reply frequencies shall be in accordance with Appendix 3.

114. *Sensitivity to Interrogation Signals.* Transponder sensitivity is specified as that minimum value of peak pulse power density (prior to intercept by the ground component antenna) which will result in a transponder reply efficiency of 70 percent. (See Appendix 1)

Note.—Ground components may not respond to interrogations as specified if the difference in level of the constituent pulses of interrogation pulse pairs is greater than 1 dB.

115. *On-Channel Sensitivity.* For interrogation signals within ±100 kHz of the assigned frequency, having a repetition rate no greater than 200 pulse pairs per second and pulse pair spacing of exactly 12.0 microseconds (36.0 microseconds for Y channel), DME sensitivity shall be not less than −101.5 dBW/m². Under the same conditions, the TACAN sensitivity shall be not less than −104.5 dBW/m².

Note.—At 1150 MHz, the value −101.5 dBW/m² corresponds to −124.0 dBW at the output of a lossless isotropic receiving antenna. Similarly, the value −104.5 dBW/m² corresponds to −127.0 dBW. (See Appendix 1)

116. *Sensitivity at Other Pulse Spacings.* When the spacing of the constituent pulses of interrogation pulse pairs differs from the design center value (12.0 microseconds for X channel; 36.0 microseconds for Y channel) by ±0.5 microseconds or less, the sensitivity of paragraph 115 shall not be reduced by more than 1 db. When the spacing differs by ±3 microseconds and more from nominal, the reduction in sensitivity shall be at least 70 dB with respect to the level of paragraph 115.

117. *Variation of Sensitivity With Interrogation Loading.* When the beacon is loaded with 3175 additional pulse pairs per second at a level of −65 dBm, (referenced at the input to the transponder receiver with the transponder's echo suppression circuits disabled), the sensitivity of the receiver shall not be reduced by more than 1 dB from the value measured in paragraph 115.

118. *Sensitivity to Adjacent Channel Interrogations.* Interrogation signals removed 900 kHz or more from the assigned channel interrogation frequency and having an amplitude up to 80 dB above the on-channel sensitivity of the component shall not elicit a reply from that component.

119. *Transponder Dead Time.* Dead time is the time immediately following an accepted interrogation decode for reply processing, during which succeeding interrogations receive no reply. The transponder dead time shall normally be 60 microseconds for X channels (72 microseconds for Y channel).

120. *Echo Suppression Dead Time.* The retriggerable blanking gate (RTBG) (see paragraph 145.b.) is typically set such that the effective deadtime is a nominal 150 microseconds. When required for a particular site, the effective deadtime may be increased up to a nominal 250 microseconds.

121. *Transponder Characteristics.* The transponder shall conform to paragraphs 122 through 150.

122. *Frequency Stability.* For each channel in use, the center frequencies of the ground station's transmitter and receiver shall be in accordance with Appendix 3. Frequency stability shall be ±0.001 percent or better for equipments purchased after July 1980. The stability of older ground stations shall be ±0.002 percent or better.

Note.—Stabilities of older equipment need not be increased to ±0.001 percent.

123. *Signal Strength in Space.* Within that part of the operational service volume that is above 18,000 feet (5,486 m) AGL, a minimum signal power density of −91.5 dBW/m² (95 percent time availability) shall be provided. Within that part of the operational service volume that is below 18,000 feet (5,486 m) AGL, a minimum signal power density of −86.0 dBW/m² shall be provided. Signal power shall be determined by the average over one second of the equivalent peak pulse voltage waveform. At the nearest aircraft position expected during operations, the maximum signal power density expected during flight will be on the order of −17.0 dBW/m².

Note.—At 1213 MHZ, the value −91.5 dBW/m² corresponds to −114.5 dBW at the output of a lossless isotropic receiving antenna. Similarly, −86.0 dBW/m² corresponds to −109.0 dBW. The apparent change in numbers from the old standard does not represent a change in beacon radiated power (for example, see Appendix 1). Therefore, increases in receiver

sensitivities of existing airborne equipments are not required to achieve the same service ranges that users have experienced in the past. Future designs should not be restricted by this fact.

124. *Radio Spectrum.* The spectrum of the pulse modulated signal shall be as follows.

a. The equivalent isotropic radiated power (EIRP) contained in a 0.5 MHz band centered on a frequency either 0.8 MHz above or 0.8 MHz below the nominal channel frequency shall (in both instances) not exceed 200 milliwatts. (Except that the power ratio relative to center frequency shall not exceed −50 dB.)

b. The EIRP contained in a 0.5 MHz band centered on a frequency either 2.0 MHz below the nominal channel frequency shall (in both instances) not exceed 2 milliwatts. (Except that the power ratio relative to center frequency shall not exceed −70 dB.)

c. Each lobe of the spectrum will be generally of lesser amplitude than the adjacent lobe nearer the nominal channel frequency.

125 *Spurious Radiation.* The RF output level, during the interval between occurrence of the desired pulse pairs, shall not exceed a level which is 80 db below the maximum power level during a pulse. In addition, between the pulses of each pair there shall be an interval for 1.0 microsecond or greater in length during which the RF output level does not exceed a level which is 50 db below the maximum power level of the weaker pulse of the pair.

126. *Pulse Shape.* The following, as limited by the requirements of paragraphs 124 and 125, shall apply to all radiated pulses.

a. *Pulse Rise Time.* The time required for the pulse to rise from 10 to 90 percent of its maximum voltage amplitude shall not be less than 0.1 microsecond nor more than 3.0 microseconds.

b. *Pulse Top.* Between the points on the leading and trailing edges which are 95 percent of the maximum voltage amplitude, the instantaneous amplitude of the pulse shall not fall below a value which is 95 percent of the maximum voltage amplitude of the pulse.

c. *Pulse Duration.* The pluse duration, as measured at the 50 percent maximum voltage amplitude points, shall be 3.5 ± 0.5 microseconds.

d. *Pulse Decay Time.* The pulse decay time, from the 90 percent point to the 10 percent point of the maximum voltage amplitude, shall be such that the remaining requirements of this standard shall be satisfied.

127. *Pulse Coding.* Transponder output signals shall consist of paired pulses. The spacing of the pulses is measured between the 50 percent maximum voltage amplitude points on the leading edge of each RF pulse. The pulse spacing shall be:

a. 12.0 ± 0.25 microseconds for X channels; or

b. 30.0 ± 0.25 microseconds for Y channels.

128. *Pulse Power Variation.* The peak power of the constituent pulses of any pair shall not differ by more than 1 dB.

129. *Distance Reply Signals.* Distance reply signals, consisting of pulse pairs, are transmitted in response to interrogations.

130. *Reply Efficiency.* Reply efficiency is defined as the percentage of interrogations from a specific interrogator to which the transponder replies within a given time interval when the transponder is under specified load conditions. The reply efficiency for interrogation signals at and above the minimum sensitivity levels of paragraph 114 shall be at least 70 percent for all interrogation loading up to the maximum for which transponder is designed (3375 interrogations per second).

Note.—To provide service under adverse echo conditions or to handle increased traffic, it may be necessary to reduce the reply efficiency during traffic overload conditions. To be able to receive the same service during traffic overload conditions, airborne receivers should be capable of operating properly with reply efficiencies at least as low as 50 percent.

131. *Reply Delay Time.* Reply delay time is defined as the time of all delay introduced by the ground component in replying to interrogations. When airborne components are to indicate distance with respect to the transponder site, the zero-distance reply delay time shall be 50.0 microseconds ± 0.25 microseconds for X channels (56.0 microseconds ± 0.25 microseconds for Y channels). This represents the time between the 50 percent voltage point on the leading edge of the first pulse of the interrogation pulse pair and the corresponding point on the first pulse of the reply pulse pair.

Note.—In older facilities, the reply delay time is referenced to the second pulse of interrogation and reply pulse pairs. The nominal value of reply delay time in these instances is 50 microseconds for both X and Y channels.

132. *Random Pulse Pair Signals.* In addition to distance reply pairs, the ground component shall radiate random pulse pairs, defined as squitter, in order to maintain a total pulse pair rate in accordance with paragraphs 133 and 134.

133. *DME Components.* For DME ground components, the total pulse rate, exclusive of identification pulses, shall be within the range of 700 up to 2850 pulse pairs per second, in the absence of high traffic density.

134. *TACAN Components.* For TACAN ground components, the total pulse pair rate, exclusive of Code identification signal and reference burst pulses, shall be 2700±90 pulse pairs per second, in the absence of high traffic density. For a transponder dead time of 60 microseconds, the distribution of random pulse pairs shall conform to Figure 4–6.

135. *Pulse Pair Rate.* To provide greater traffic handling capacity (than the total output pulse pair rates of paragraph 133 and 134), the equipment shall have the capability to increase to as high as 5000±150 pulse pairs per second as a function of actual traffic loading. Under this condition it will be impossible to maintain the output pulse pair spacing distribution of Figure 6. Accordingly, new TACAN airborne equipment design should avoid the use of circuits in which azimuth indication is sensitive to transponder output pulse count and spacing distribution. (See paragraph 130.)

136. *Ground Component Range Accuracy.* The ground component shall not contribute more than 0.1 nmi (185 m) to overall system error.

137. *Code Identification Signal Characteristics.* Subject to the provisions of paragraph 137.a, code identification signals shall consist of group. The groups of two pulse pairs transmitted for the duration of dots and dashes in accordance with paragraph 30.a. The spacing between the first and second pulse pairs constituting each pulse group, as measured between the 50 percent voltage amplitude points on the leading edge of the first pulse of each pair, shall be 100±10 microseconds. The repetition rate shall conform to the following.

a. *DME Components.* For ground components providing DME service only, the identification signal may consist of either one or two pulse pairs in a group repetition rate shall be 1350±10 groups per second.

b. *TACAN Components.* For TACAN ground components, the repetition rate shall be 1350 groups per second (±0.23 percent) which are phase-locked within ±50.0 microseconds of the tenth harmonic of the 135 Hz bearing reference signal. The first pulse of each identification signal pulse group shall occur 740±50 microseconds after the first pulse of any 40 degree sector reference signals.

BILLING CODE 4910-13-M

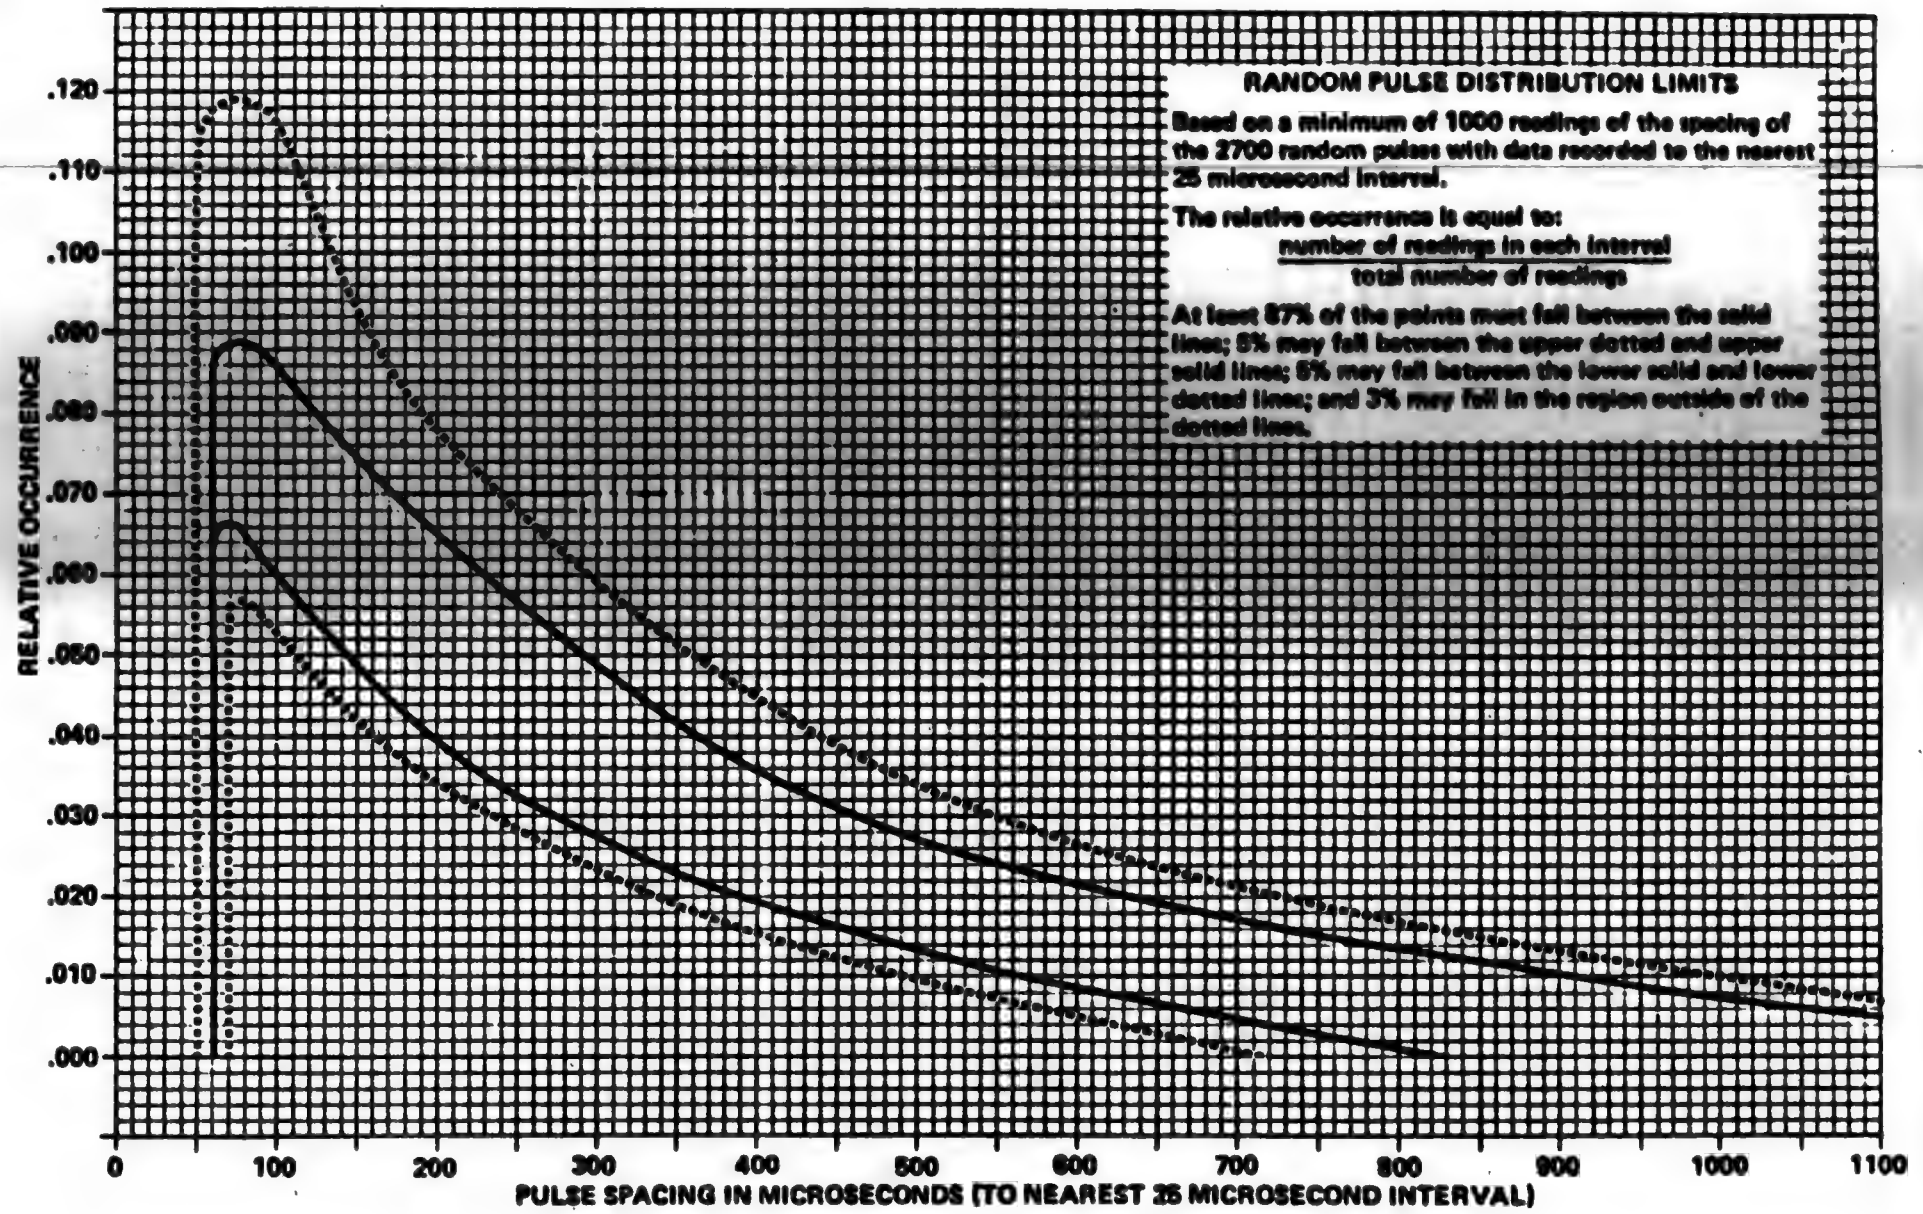

FIGURE 4-1. Random Pulse Distribution Limits

BILLING CODE 4910-13-C

138. *TACAN Azimuth Signal Characteristics.* TACAN azimuth signals consists of North (main or coarse) and 40 degree sector (auxiliary or fine) bearing reference signals and 15 Hz (coarse) and 135 Hz (fine) amplitude modulation variable bearing signals. The azimuth signals radiated by the antenna shall conform to the following.

139. *Bearing Reference Signals.* Transmission of the North and 40 degree sector bearing reference signals shall occur synchronously with antenna pattern rotation. For each rotation of the antenna pattern, one North reference signal shall be transmitted. Following the North reference signal at each of eight consecutive angular increments of 40 degrees, the 40 degree sector reference signal shall be transmitted. A ninth 40 degree sector reference signal, which otherwise would coincide in time with the North reference signal, shall not be transmitted. The characteristics of reference signals shall be as follows:

a. *North Reference Signal.*

(1) For X channels, the North reference signal shall consist of a group of 12 pulse pairs. Spacing between the two pulses of a pair shall be 12±0.25 microseconds. Spacing between the first pulses of each pulse pair shall be 30.0±0.3 microseconds. Spacings are measured at the 50 percent voltage amplitude points on the leading edges of the pulses.

(2) For Y channels, the North reference signal shall consist of a group of a 13 single pulses. Spacing between the pulses shall be 30.0±0.3 microseconds. Spacings are measured at the 50 percent voltage amplitude points on the leading edges of the pulses,

b. *40 Degree Sector Reference Signals.*

(1) For X channels, the 40 degree sector reference signal shall consist of a group of 6 pulse pairs. Spacing between the two pulses of a pair shall be 12±0.25 microseconds. Spacing between the first pulse of each pulse pair shall be 24.0±0.25 microseconds. Spacings are measured at the 50 percent voltage amplitude points on the leading edges of the pulses.

(2) For Y channels the 40 degree sector reference signal shall consist of a group of 13 single pulses having a spacing of 15.0±0.25 microseconds. Spacing are measured at the 50 percent of the voltage amplitude points on the leading edges of the pulses.

140. *Variable Bearing Signals.* The variable bearing signals shall be produced by a rotating directional antenna pattern which results in a composite amplitude modulation of the transponder radio frequency pulse signals at 15 and 135 Hz. The characteristics of the variable bearing signals shall be as follows.

a. *Amplitude Modulation Frequencies and Accuracy.* The amplitude modulation frequencies shall nominally be 15.0 and 135.0 Hz. Each frequency shall vary from the nominal values in exact synchronism with an antenna pattern rotation rate of 900 (±0.23 percent) rotations per minute.

b. *Depth of Modulation.* At all elevation angles from −2 to +40 degrees relative to the horizon, the individual modulation components shall be 21 ±9 percent. At all elevation angles from −2 to 50 degrees, the sum of the 15 and 135 Hz modulation components including the harmonics shall not exceed 55 percent. Further, within the angles from −2 to +2 degrees relative to the horizon, the maximum variation in depth of modulation for the 15 and 135 Hz components shall not, for each frequency, vary more than ±4 percent from the respective median values within the angles specified.

141. *Relationships of Reference and Variable Bearing Signals.* On the magnetic North radial from the antenna, the relationships of the reference and variable signals shall conform to the following.

a. *Coarse Bearing Signal.* The inflection point on the negative slope of the 15 Hz amplitude modulation component shall coincide within ±2.0 azimuth degrees of the 50 percent amplitude points on the leading edge of:

(1) The tenth pulse of the North reference signals for X channels; or

(2) The sixth pulse of the North reference signal for Y channels.

(b) *Fine Bearing Signals.* The inflection point on the negative slope of the 135 Hz amplitude modulation component shall coincide within ±0.33 degrees azimuth of the average position of the 50 percent amplitude point on the leading edge of:

(1) The twelfth pulse of the 40 degree sector reference signal for X channels; or

(2) The eleventh pulse of the 40 degree sector reference signal for Y channels.

142. *Precedence of Pulse Transmissions.* The order of precedence for transmission of transponder pulse signals shall be in accordance with the following.

a. *DME Components.* For ground components providing DME service only, the precedence shall be:

(1) International Morse Code Identification Signals.

(2) Distance Reply Signals.

(3) Random Pulse Pair Signals.

Neither distance reply nor random pulse pair signals shall be transmitted during the "key-down" interval of International Morse Code Identification Signal transmission.

b. *TACAN Components.* For TACAN components, the precedence shall be;

(1) Bearing Reference Signals.

(2) International Morse Code Identification Signals.

(3) Distance Reply Signals.

(4) Random Pulse Signals.

Neither code indentification, distance reply, nor random pulse pair signals shall be transmitted during the interval required for transmission of all pulses in each bearing reference signal. Distance reply and random pulse pair signals shall not be transmitted during the "key-down" interval of Code Identification Signal transmissions.

143. *Rejection of Undesired Signals.* The ground component shall provide undesired signal rejection characteristics adequate to assure the specified performance. This includes co-channel and adjacent-channel DME/TACAN signals.

144. *Receiver Decorder.* The decorder shall decode and produce an output pulse from interrogation signal pulse pairs occurring at spacings within the range of:

a. 12±0.5 microseconds for X-channels, or

b. 36±0.5 microseconds for Y-channels.

145. *Echo Suppression.* Echo suppressions shall be provided in accordance with the following subparagraphs.

a. *Short Distance Echoes.* Synchronous pulse signals occurring between the constituent pulses of a direct path interrogation pulse pair and which are also superimposed on the leading or trailing edge of the second pulse of the direct path pulse pair, shall not affect the time of decoding of the direct pulse pair by an amount in excess of 0.15 microseconds. Neither shall the reply efficiency be reduced by more than 10 percentage points from that measured in the absence of the echo pulse. These requirements shall be met when the RF input signal level of the direct path pulse pair has any level from 10 db above threshold triggering level to an absolute level of −10 dBm and the echo pulse has any level up to the level of the direct pulse pair and for all direct pulse pair spacings of paragraph 175.

b. *Long Distance Echoes.* A separate echo suppression (Retriggerable Blanking Gate (RTBG)) circuit shall be provided in order to prevent the generation of multiple replies to aircraft interrogations having echoes which are delayed with respect to the direct path signal in excess of receiver dead time setting. The echo suppression circuit

shall be triggered by the decoding of the direct signal pulse pair only when the level of the pulses exceeds a pre-established level. Such triggering shall result in the generation of a receiver desensitizing pulse starting at the time of pulse decoding, nominally adjusted to 150±10.0 microseconds with an upper limit of 300 microseconds. The degree of receiver desensitization shall be to a level of 3.0 dB above the level of the direct path signal and shall hold over the entire duration of the echo suppression pulse, unless retriggered by a signal stronger by 0 to 6 dB than the direct path signal, and over a range of input signals from 10 dB above threshold triggering level to −15 dBm. The echo suppression circuit preestablished level will nominally be −70 dBm.

146. *Decoder Discrimination.* The decoder shall provided a minumum of 70 dB rejection to:

a. paired pulses whose spacing differs by 3.0 microseconds or more from the nominal value given in paragraph 144,

b. paired pulses with spacings within the range of paragraph 144 where either pulse has a width of 0.8 microsecond or less, and

c. single pulses of any width including widths within the range of pulse spacings of paragraph 144.

147. *Receiver Recovery Time.* The recovery time of the receiver and its associated video circuitry shall be such that the sensitivity to desired interrogations is not reduced by more than 1 dB when desired interrogations occur 6.0 microseconds and more after the reception of undesired pulses of any width having levels up to 60 dB above the sensitivity of the receiver in the absence of such undesired pulses. The desired interrogations shall be RF pulse pairs conforming to the characteristics specified in paragraphs 173 through 179. Undesired pulses shall conform to the same requirements except that the pulse spacing shall be outside the limits of paragraph 175.

148. *Desensitization By CW.* The presence of CW interference signals on the assigned channel frequency or elsewhere within the receiver pass-band shall not reduce the on-channel sensitivity by more than 2 dB from the value measured in the absence of CW interference provided that the level of the interference is no higher than 10 dB below the level of the desired on-channel signal. Additionally, the reply efficiency to a single aircraft interrogation shall not be reduced by more than 10% when the level of the interrogation signal is 6 dB and more above the level of the interfering CW signal. The CW sensing circuit shall not reduce the receiver gain by more than 1 dB when pulses 8.0 Microseconds wide or wider are received at a rate of 37,000 per second at a level 10 dB below receiver sensitivity. (This is to preclude premature receiver desensitization if the receiver is exposed to a high PRF pulse multiplexed signal.)

149. *Monitoring.* The radiated signals shall be monitored and removed from service upon recognition of unsafe operation.

150.–169. *Reserved.*

Section 2. Operational Characteristics for DME and TACAN Airborne Components

170. *Introduction.* This section specifies functional capability and performance characteristics required of DME and TACAN airborne components. The term "component" as used in this order, includes the complete aircraft installation. This includes such items as the antenna and its transmission line, the interrogator, the electrical power source(s), identification signal reproduction or display devices, and the distance indicator; when applicable, it also includes select and display instrumentation devices for bearing and course indication. Airborne components used in the performance of aircraft operations under IFR must meet all requirements. For other aircraft operations the requirements are limited to paragraphs 170, 175, 176, 178 and 179. Requirements apply to both DME and TACAN components unless otherwise noted. Components should be capable of performing as specified throughout the operational service volume of ground stations. The applicable performance requirements should be met when the ground stations are operating in accordance with this standard.

171. *Interrogator Signal Characteristics.* Paragraphs 172 through 180 identify interrogation signal characteristics and tolerances applicable to the radiated signal.

172. *Interrogation Radio Frequencies and Accuracy.* The interrogator shall transmit on the appropriate frequency in accordance with Appendix 3. The center frequency of the interrogation shall be within ±100 kHz of the channel frequency.

173. *Pulse Characteristics.* The radio frequency pulse envelope shall have characteristics as follows.

a. *Pulse Rise Time.* The time required for the pulse to rise from 10 to 90 percent of its maximum voltage amplitude shall nominally be 2.5 microseconds. It shall not exceed 3.0 microseconds. The minimum rise time is governed by the spectrum requirements of paragraph 179.

b. *Pulse Top.* Between the points on the leading and trailing edges which are 95 percent of the maximum voltage amplitude, the instantaneous amplitude of the pulse shall not fall below a value which is 95 percent of the maximum voltage amplitude of the pulse.

c. *Pulse Duration.* The pulse duration, as measured at the 50 percent maximum voltage amplitude points, shall be 3.5 ±0.5 microseconds.

d. *Pulse Decay Time.* The time required for the pulse to fall from 90 to 10 percent of the maximum voltage amplitude shall nominally be 2.5 microseconds. It shall not exceed 3.5 microseconds. The minimum decay time is governed by the spectrum requirements of paragraph 179.

174. *Pulse Power Variation.* The peak power of the constituent pulses of any pair shall not differ by more than 1 dB.

Note.—If the difference in level of the constituent pulses of interrogation pulse pairs is greater than 1.0 dB, ground components may not respond to interrogations.

175. *Pulse Coding.* Interrogation signals shall consist of paired pulses. Spacings are measured at the 50 percent voltage amplitude points on the pulse rise time of each pulse. The pulse spacing shall be:

a. 12.0±0.5 microseconds for X channels; or

b. 36.0±0.5 microseconds for Y channels.

176. *Interrogation Signal Repetition Rate.* The average interrogator pulse pair repetition rate shall not exceed 30 pairs of pulses per second. This assumes that interrogators are tracking at least 95 percent of the time. The repetition rate may be increased during search, but it shall not exceed 150 pulse pairs per second.

177. *Variation of Repetition Rate.* The variation in time between successive interrogations shall be sufficient to preclude mistaking distance reply pulses intended for another airborne component tuned to the same ground facility. It shall also preclude capture of the interrogations of one interrogator within the ground component dead time caused by the interrogations of other avionics.

178. *Signal Strength in Space.* a. When referenced to a point in space prior to the ground station antenna intercept, the airborne component of aircraft operating above 18,000 feet (5,486 m) AGL shall provide a minimum signal power density of −102.5 dBW/m² (95 percent time availability). For aircraft operating below 18,000 (5,486 m) AGL, the minimum signal power density shall be −99.0 dBW/m².

b. These specified power densities will assure a minimum reply efficiency of 70 percent when:

(1) the pulse frequency is within ±100 kHz of the assigned center frequency;

(2) the pulse spacing is within ±0.5 microseconds of nominal design center; and

(3) the beacon loading is 3375 pulse pairs per second with the echo suppression circuits disabled.

c. For the various operational service volumes currently employed in the ATC environment, the interrogator's EIRP shall be a minimum of +29.0 dBW for those aircraft operating above 18,000 feet (5,486 m) AGL and +19.0 dBW for those operating below 18,000 feet (5,486 m) AGL. These EIRP's will provide to the ground beacon the power densities necessary for satisfactory performance. Since EIRP levels greater than +33.0 dBW may impair system performance, the interrogator's EIRP shall not exceed this value. (See Appendix 1)

179. *Radio Spectrum.* The spectrum of the RF interrogation signal shall be such that at least 90 percent of the energy, including FM components in each pulse shall be within a 0.5 MHz band centered on the nominal channel frequency.

180. *Radiation.* Radiation from airborne components shall not result in derogation of the operational use of this system by other users or in the derogation of other aeronautical services. Neither shall other users derogate the operational use of this system by valid DME or TACAN users. At all frequencies between 960 and 1215 MHz, the level of radiated CW signals, as referenced to an isotropic radiator, shall not exceed −60 dBW.

181. *Component Functional Capabilities and Performance.* These subparagraphs identify functional and operational performance requirements applicable to the airborne component.

182. *Receiver Stability.* For each channel in use, the receiver's center frequency shall be in accordance with Appendix 3. The frequency stability shall be ±0.005 percent or better.

183. *Receiver Sensitivity.* Based on the signal power density of paragraph 123, the airborne components shall provide the sensitivity necessary to acquire and display navigation information to the accuracy specified. Clear and distinct reproduction of identification signals shall be provided. (See Appendix 1).

184. *Rejection of Undesired Signals.* The airborne component shall provide undesired signal rejection characteristics adequate to assure the specified performance. For co-channel and adjacent channel DME and TACAN signals, this requirement shall be met when the respective signals provide desired to undesired (D/U) signal ratios up to the maximum values stated in paragraph 29.b. At these D/U ratios, a positive identification signal shall be provided to identify the ground component.

185. *Distance Information.* The airborne component shall measure and display the slant range distance (in nautical miles) between the aircraft and the selected ground component.

Note.—The airborne component should not be capable of displaying excessive distances. Distances should be considered excessive for a given receiver if that receiver cannot reasonably be expected to operate at that distance.

186. *Warning Function, Distance.* The airborne component shall provide a warning indication whenever the airborne component is neither tracking a distance reply signal nor operating from memory (See paragraph 188). This warning shall be clearly evident to the pilot.

187. *Accuracy of Distance Information.* When the airborne component error is combined by root-sum-square with a ground component error of 0.1 nmi (185 m), the total error in slant range distance information, as displayed to the pilot, shall not (except during memory per paragraph 188) exceed 0.5 nmi (926 m) or 3 percent of the actual distance, whichever is greater (95 percent probability).

188. *Memory Functions.* The airborne component shall provide a memory function which, upon loss of a suitable reply signal while tracking, will cause the display of distance information to continue for a period not to exceed 15 seconds. The minimum distance memory shall be sufficient to cover the loss of distance reply signals during transmission of the ground component identification signal. The distance displayed during memory shall be within ±1.0 nmi (1852 m) of the indication upon resumption of the tracking function.

189. *TACAN Bearing and Course Deviation Information.* The airborne component shall provide devices for unambiguous determination of the aircraft magnetic bearing with respect to each selected ground component and for display of the aircraft deviation from the selected course.

190. *Course Deviation Displays.* The response, readability, and resolution of course deviation displays shall permit the pilot to determine the direction and extent of the aircraft deviation from the selected course.

191. *Warning Function, Bearing.* The airborne component shall provide a warning indication whenever the azimuth signals are not present and when the component is not operating in memory. This warning shall be clearly evident to the pilot.

192. *Accuracy of Bearing and Course Deviation Information.* At any bearing, the total airborne component error in bearing and course deviation information shall not exceed ±3.0 degrees (95 percent probability) as displayed to the pilot.

193.–209. *Reserved.*

Appendix 1. Coverage

1. *Radio Propagation.* Propagation losses vary as a function of time. For a given EIRP, the power density at a point in space will fluctuate. In addition, propagation loss will vary from site to site. This variation is a function of several factors including atmospheric refractivity, surface reflectivity, wave polarization, etc. Since the VOR/DME/TACAN system is a safety service, signals must be highly reliable. With this in mind, conservative assumptions have been made for the inputs to the propagation model. Figures 2 through 13 show standard VOR, DME, and TACAN signal strengths (95 percent time availability) at various points in space. A time availability of 95 percent means that, at a given point in space, the instantaneous signal strength will be greater than or equal to the value shown 95 percent of the time. Although propagation losses will differ from site to site, the signal strength curves of this appendix are recommended for purposes of standardization. It is important to remember that for the distance function of DME and TACAN both the ground-to-air and air-to-ground transmissions must be considered.

2. *Ground Station.* The EIRP's and resultant signal strength in space curves given in figures 2 through 13 are nominal. Allowances should be made for different EIRP's and for other variations in station characteristics. Some ground stations may have higher cable losses (e.g., mountain top installations sometimes require longer cable runs). In addition, intervening terrain may increase the transmission path loss. Should this occur, it may be necessary to reduce the service volume accordingly.

3. *VOR Coverage.* a. The power density specified in paragraph 53 (−120 dBW/m^2) is equivalent to −123 dBW power available at the output of a lossless isotropic antenna (at 118 MHz). Allowance must be made for the airborne antenna and for cable and insertion losses. Users will balance their

airborne power budgets in different ways. Two examples are shown below.

	Example 1	Example 2
Power Available (dBW)	123	−123
Airborne Antenna Gain [1] (dBi)	+2.2	−1
Airborne Losses (dB)	−2.2	−4
Receiver Sensitivity (dBW)	−120	−128

[1] Does not consider variations due to antenna locations or other factors which influence antenna gain due to shielding.

b. Many other examples could be given. It is the user's responsibility to insure that the airborne installation will allow proper operation at the minimum signal strength of paragraph 53. In considering airborne antenna gain, antenna pattern variation should not be neglected.

4. *DME/TACAN (uplink) Coverage.* a. The power densities specified in paragraph 123 are referenced to the powers available at a point in space. Allowance must be made for the airborne antenna and for cable and insertion losses. Users will balance their airborne power budgets indifferent ways. Two examples of how users might balance their airborne power budgets for the DME and TACAN are shown as follows:

	Example 1		Example 2	
	DME (100W)	TACAN	DME (100W)	TACAN
Power available	−109.0	[2] −114.5	−109.0	[2] −114.5
Airborne antenna gain [1]	+2.0	[3] +2.0	+0.5	[3] +0.5
Airborne losses	3.0	[4] −3.0	−1.5	−1.5
Rx sensitivity	−110.0	[2] −115.5	−110.0	[2] −115.5

[1] Does not consider variations due to antenna location or other factors which influence antenna gain due to shielding.
[2] dBW.
[3] dBi.
[4] dB.

b. Many other examples could be given. It is the user's responsibility to insure that the airborne installation will allow proper operation at the minimum signal strengths of paragraph 123. An airborne DME installation with 1 db of loss (antenna pattern, cable and insertion losses, signal splitters, etc.) would require a sensitivy of −110.0 dBw. An airborne TACAN installation with 1 dB of loss would require a sensitivity of −115.5 dBW. When the total loss is different than 1 dB, a corresponding adjustment must be made to determine the required sensitivity. In considering airborne antenna gain, antenna pattern variation should not be neglected.

5. *DME/TACAN (downlink) coverage.* a. the minimum power density specified in paragraph 178 for the input to the ground station antenna is −99.0 dBW/m² for DME and −102.5 dBW/m² for TACAN. These power density values are necessary to generate a reply efficiency of 70 percent from the transponder during periods when the transponder is under heavy load and when the interrogation signal is within ±100 kHz of the nominal channel frequency and its pulse pair spacing is with ±0.5 microseconds of the nominal system value. the association of interrogator signal strength and transponder sensitivity is as follows.

	DME	TACAN
Transponder sensitivity per paragraph 115	−94.0	−97.0 dBm
Net coupling to receiver per:	+6.7	+3.0 dB
(1) +6.2 dB DME antenna gain on horizon		
−1.5 dB Net losses (cable and insertion)		
(2) +4.5 dBi TACAN antenna gain on horizon		
−1.5 dB Net losses (cable and insertion)		
Receiver input for 70 percent efficiency per paragraph 115	−87.3	−94.0 dBm
Sensitivity reduction per paragraphs 116 and 117	+2.0	+2.0 dB
Receiver input for 70 percent efficiency	−85.3	−92.0 dBm

b. It is the user's responsibility to provide that signal strength to insure proper operation for those conditions stated in paragraph 178. For the requirement of 70 percent reply efficiency:

	DME	TACAN
Reciever input per conditions of paragraph 178	−85.0	−92.0 dBm
Net coupling per antenna	−6.7	−3.0 dB
Signal strength at the antenna input	−91.7	−95.0 dBm
Power density at the antenna input	−99.2	−102.5 dBW/m²
Value used in paragraph 178	−99.2	−102.5 dBW/m²

6. *Time Availability.* At a point in space, signal strength will vary with time even when the ground transmitter's EIRP remains constant. A similar statement could be made for D/U signal ratios. This variation is largely due to propagation effects under different environmental conditions. Examples include atmospheric refractivity, seasonal changes in ground cover, and surface reflectivity. Numerous other factors are also involved. Although it is difficult to accurately describe all the variables involved, the situation can be adequately covered by statistical treatment. A helpful concept, in a statistical discussion of reliability, is time availability. It is that percentage of time that a given signal strength or D/U Ratio is met or exceeded. Figure 1 shows an example of signal strength as a function of time availability. For a time availability of 95 percent, the signal strength is −120dBW/m². This means that a signal strength of −120 DBW/m² or greater is present 95 percent of the time. For a time availability of 50 percent, the signal strength is −117dBW/² at the same point in space assuming the same constant ground station characteristics. In a similar manner, the signal strength present for any given percentage of the time can be read from the graph. This graph does not, however, take transmitter down time into account.

Appendix 2. System Accuracy

1. *System Accuracy.* The accuracies described and quantified below represent the normal error budget for a VOR/DME/TACAN system that includes basic avionics with analog indicators, a typical ground station and an environment that does not include errors caused by excessive multipath. Margin for pilot induced flight technical error is also included. The error terms [1] are defined as follows.

2. *Bearing Error Component Definition.*

a. *Radial Signal Error (Eg).* Radial signal error is the difference between the nominal magnetic bearing to a point of measurement from the ground component and the bearing indicated by the ground component signal at the same point. The radial signal error is associated with the ground component and nominal signal path errors but excludes other error factors. It is made up of the following.

(1) certain constant elements such as course displacement errors and most site and terrain effect errors which may be considered as fixed for long periods of time.

(2) certain random variable errors which can be expected to vary about the essentially constant value.

b. *Airborne Component Error (Ea).* Airborne component error is that error attributable to the inability of the airborne equipment to translate correctly the bearing information contained in the radial signal. This element embraces all factors in the airborne component which introduce errors in the information presented to the pilot. (Errors resulting from the use of compass information in some VOR and TACAN displays are not included.)

c. *Instrumentation Error (Ei).* This component consists of the limitation of the omni-bearing selector (OBS) units due to the resolution of the device and the inherent error of translating the pilot input to the avionic comparator. This comparator derives the difference between the actual radial computed and the selected radial which the pilot requires. This difference is normally displayed on a course deviation indicator (CDI) whose errors are considered a part of (Ea).

d. *Flight Technical Error (Ef).* Flight technical error refers to the accuracy with which the pilot controls the aircraft as measured by his success in causing the indicated aircraft position to match the indicated command for desired position. It does not include procedural blunders.

[1] Quantitative values assume 95 percentile distribution.

e. *Aggregate Error (Es).* Aggregate error is the difference between the magnetic bearing to a point of measurement from the ground component and the bearing indicated by airborne components. This is the error in the information presented to the pilot (exclusive of any errors resulting from use of compass information). It takes into account not only the ground component and propagation path errors but also the error contributed by the airborne component and its instrumentation. The entire radial signal error, both fixed and variable is used.

3. *Error Combination.* Since the errors above, when considered on a total system basis (not any individual radials or components) are independent variables, they may be combined by the root-sum-square (RSS) method to calculate aggregate system error (Es) when the same probability is given to each element. For purposes of this standard, each element is considered to have 95 percent probability.

a. *Radial Signal Error (Eg).* In practice, based on a significant number of accumulated data points, the radial signal error value (Eg) has been found to be ±1.4 degrees (95 percent probability).

b. *Airborne Component Error (Ea).* This component is strictly limited to those errors attributable to the avionics. In other words, this value excludes that which is due to the auto-couple of navigation deviation signals to aircraft controls and other output devices such as the omni-bearing selector (OBS), either in the manual or auto-couple mode. This value (Ea) has been estimated to be approximately ±3.0 degrees and may vary as to the quality of the avionics. This distribution is considered normal both from a capability standpoint between manufacturers and a quality standpoint by any one manufacturer. Recent avionics have shown the capability to reduce this error.

c. *Instrumentation Error (Ei).* This represents the remainder of the avionics error that is excluded from paragraph 3.b of this Appendix. This error is approximately ±2.0 degrees when a manual analog OBS is utilized. Digital OBS devices and auto-couple would decrease this error significantly. This latter configuration is not addressed in this analysis, but could represent a considerable improvement to the total error budget, if implemented.

d. *Flight Technical Error (Ef).* As defined in paragraph 2.d of this Appendix, the value which is attributable to this error component is ±2.3 degrees. Although this error may not be completely independent of other errors, independence is assumed in this analysis. Empirical data indicates that this value may be pessimistic.

e. *Aggregate Error (Es).* Airways, routes, and terminal area procedures in the United States are designed on the basis of a system use accuracy of ±4.5 degrees (95 percent probability). The aggregate system error value is derived as follows:

Radial Signal Error (Eg): ±1.4 degrees (95% probability)
Airborne Component Error (Ea): ±3.0 degrees (95% probability)
Instrumentation Setting Error (Ei): +2.0 degrees (95% probability)
Flight Technical Error (Ef): 2.3 degrees (95% probability)
Aggregate System Error (Es)
$= Eg^2+Ea^2+Ei^2+Ef^2$
$= 1.4^2+3.0^2+2.0^2+2.3^2$
$= 1.96+9.00+4.00+5.29$
$= 20.25$
Rounded = ±4.5 degrees (95% probability)

Distance Error. Refer to paragraph 187 of this standard.

BILLING CODE 4910-13-M

Legal Opinion as to Whether the Lessee of an Aircraft Conveyed Under a Finance Lease is the Owner of the Aircraft for Purposes of United States Aircraft Registration

American Airlines has requested the legal opinion of the Federal Aviation Administration (FAA) as to whether the lessee of an aircraft conveyed under a finance lease is the "owner" of the aircraft under Section 501 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1401) for purposes of obtaining U.S. registration of the leased aircraft. Because of the extensive interest among finance institutions and other United States airlines in the specific legal issue raised by American Airlines, the FAA has concluded that the information contained in the legal opinion provided to American Airlines should receive broad dissemination.

Accordingly, the FAA publishes its response to American Airlines concerning the status of a lessee of an aircraft conveyed under a finance lease.

FOR FURTHER INFORMATION CONTACT:
Mr. John T. Stewart, Jr., Assistant Chief Counsel, International Affairs and Legal Policy Staff, Office of the Chief Counsel, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Telephone (202) 426-3515.

Issued in Washington, D.C. on March 23, 1981.

Albert S. Randall,
Acting Chief Counsel.

March 19, 1981.
Richard A. Lempert, Esquire
Vice President and General Counsel, American Airlines, Box 61616, Dallas/Forth Worth, Texas

Dear Mr. Lempert: This is in response to your recent inquires to the Federal Aviation Administration (FAA) as to whether the lessee of an aircraft which is the subject of a lease, wherein all the risks and rewards of ownership, except legal title, pass to the lessee (hereinafter referred to as a finance lease) is the owner of the aircraft under Section 501 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1401) (Act). It is my considered opinion that an aircraft conveyed under a finance lease which conforms to the characteristics described herein may be registered by the lessee as owner.

"Owner", not defined in the Act, has been defined in Part 47 of the Federal Aviation Regulations (FAR) as follows:

". . . 'owner' includes the buyer in possession, a bailee, or a lessee of an aircraft under a contract of conditional sale, and the assignee of that person." 14 CFR § 47.5(d).

This definition is designed to make explicit that the buyer, lessee or bailee under a contract of conditional sale, as defined in Section 101(19) of the Act, is considered to be the owner of the aircraft for purposes of Part 47 of the FAR. The definition is not exclusive. For example, the buyer of an aircraft pursuant to a contract which transfers all rights, including title, in the aircraft is not specifically included in Section 47.5(d). Section 47.5(d) implicity recognizes that other forms of ownership may exist under the law and that, in the absence of any countervailing Federal interest, the FAA may recognize those forms of ownership. Therefore, the FAA's determination of the owner of an aircraft, for purposes of aircraft registration, must necessarily be based upon the reasons for aircraft registration.

The fundamental purpose of aircraft registration is identification of the aircraft with the country that is responsible for it. By virtue of the Convention on International Civil Aviation (Chicago Convention), the United States has certain international aviation safety responsibilities for aircraft of U.S. nationality. Under the Chicago Convention, the means of affixing nationality is aircraft registration. Aircraft registration in the majority of contracting States is contingent upon the owner or operator of an aircraft having some chosen connection to the State of registry. Under the Act, an aircraft is eligible for registration in the United States, only if it is owned by U.S. Citizens, resident aliens, or noncitizen U.S. corporations which base and primarily use the aircraft in the United States.

The Act limits U.S. aircraft registration to a class of persons over which the United States has some degree of jurisdiction. "Ownership" is necessary to provide a reliable and easily ascertainable legal link between a member of that class and the aircraft. These requirements jointly are a means of insuring that international and domestic laws and policies with regard to an aircraft of United States registry will be carried out.

Accordingly, the interest of the FAA in ascertaining the owner of an aircraft is limited and particularized. Section 501(f) of the Act provides that:

" 'a certificate of registration' shall be conclusive evidence of nationality for international purposes, but not in any proceeding under the laws of the United States. Registration shall not be evidence of ownership of aircraft in any proceeding in which such ownership by a particular person is, or may be, in issue."

This section implies that the FAA's determination of the "owner" may not necessarily coincide with a determination of ownership in another forum, for other purposes. As explained in 1938 by Fred D. Fagg, Director of Air Commerce, Department of Commerce, ". . . we are interested only from the standpoint of nationality of the owner rather than whether he actually possesses legal title."

Until 1938, the proper owner of an aircraft for purposes of U.S. registration was deemed to be the person with all rights, including legal title, in the aircraft. In *In the Matter of Charles P. O'Connor for Registration of Aircraft*, 1 CAA 5 (1938), the Civil Aeronautics Authority, the predecessor agency to the FAA, recognized the buyer of an aircraft under a contract of conditional sale as the "owner" of the aircraft under Section 501 of the Civil Aeronautics Act of 1938 (52 Stat. 1005 (1938)). After an acknowledgement that more than one kind of ownership exists under common law, the CAA adopted the theory that as between the seller, who "holds legal title, in effect, as security for its debt," and the purchaser, who had "complete control over the aircraft to do with as he will even as against the seller so long as payments are duly made," the latter was the proper person to be considered "owner".

Under the Uniform Commercial Code (UCC), the rights, obligations and remedies of a conditional vendee are identical to those of a buyer or lessee in any transaction which is intended to create a security interest in personal property. The *O'Connor* case focused on the realities of commercial law in deciding to acknowledge ownership in the conditional vendee. An analysis of modern commercial law reveals that no distinction remains, in the forty-nine states that have enacted the UCC, between a conditional sale and leases intended as security. Consequently, if the finance leases in question are leases intended as security, the rationale of the *O'Connor* case may be applicable.

While there is not an abundance of court decisions analyzing the proper nature of a lease intended as security wherein title does not pass, examination of the existing court decisions and UCC authorities persuades me that finance leases are leases intended as security. For a lease without an option to purchase to be a lease intended as security, the lessee must have acquired almost all of the incidents of ownership. In order to determine whether the lessee has, in effect, become the owner, a lease must contain certain objective criteria. A lease with all the following characteristics will be considered a lease intended for security:

(1) All the risks and burdens of ownership (e.g. insurance, maintenance, taxes, fees) are transferred to the lessee;

(2) The lessee has an unrestricted right to sublease the aircraft;

(3) A full payout of the lease is required, which is equivalent to the purchase price of the aircraft plus interest;

(4) The term of the lease, with or without options to renew the lease for a nominal sum, is of a duration equal to the useful life of the equipment;

(5) The options to renew are nominal when compared to the lease payments during the base lease term;

(6) The aircraft may be sold at the end of the base lease term, at the option of the lessee and the lessee is entitled to substantially all (i.e. 90%–100%) of the proceeds of the sale.

In accordance with the rationale of the *O'Connor* case, it may be said of a finance lease with these characteristics that, as between the lessor who has retained legal title as security for a debt and the lessee who has absolute dominion over the aircraft "to do with as he will even as against the [lessor] so long as payments are made," that the latter is the owner for aircraft registration purposes. In other words, the tangible differences between the conditional vendee and the finance lessee are insignificant. Accordingly, it is my opinion that the lessee of an aircraft conveyed under a finance lease which meets the requirements discussed herein is the owner of the aircraft under Section 501 of the Act.

An opinion on the eligibility for U.S. aircraft registration of aircraft conveyed under a particular finance lease must await FAA review of the documentation relevant to the transaction finally agreed upon. This documentation must include or be accompanied by representations by the applicant for aircraft registration of (1) the purchase price of the aircraft plus interest and (2) the estimated useful life of the aircraft. The FAA, if requested, will keep this information confidential.

I also understand that as an airline subject to the reporting requirements of the Securities and Exchange Commission (SEC) you will file any appropriate reports with the SEC concerning the acquisition of aircraft under a finance lease.

Sincerely,

Albert B. Randall,

Acting Chief Counsel.

National Highway Traffic Safety Administration

National Highway Safety Advisory Committee Site Visits

The National Highway Safety Advisory Committee's Task Force on Procession of Traffic Violations is planning site visits to Salem, Oregon, on April 13 and 14; and Olympia, Washington, on April 15 and 16. The Task Force plans to explore methods for improving the existing system of processing traffic cases without causing a significant increase in funding. Specifically, the members are interested in several areas: (1) administrative adjudication techniques; (2) uniform traffic tickets; (3) traffic court management information systems; and (4) nonresident violators compact. The information received from these site visits will be compiled into a interim report with recommendations and presented at the full Committee meeting June 15–17, 1981.

Arrangements for the site visits are being made by the appropriate NHTSA Regional Office and the States Governors' Highway Safety Representatives. These site visits are subject to the approval of the appropriate DOT officials. Attendance is open to the public, but limited to the space available. Members of the public may present a written statement to the Committee at any time.

Additional information may be obtained from the NHTSA Executive Secretary, Room 5221, 400 Seventh Street, SW., Washington, D.C. 20590, telephone 202–426–2872.

Issued in Washington, D.C. on March 23, 1981.

Robert E. Doherty,

Assistant Executive Secretary.

2

FEDERAL HOME LOAN BANK BOARD (Billing No. 6720-01).

TIME AND DATE: Wednesday, April 1, 1981, 10:00 a.m.

PLACE: 1700 G St. N.W., Board Room, 6th Floor, Washington, D.C.

STATUS: Open meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Marshall (202-377-6679).

MATTERS TO BE CONSIDERED:

Application for Bank Membership—Emigrant Savings Bank, New York, New York.
Service Corporation Activity—Libertyville Federal Savings and Loan Association, Libertyville, Illinois.
Branch Office Application—First Piedmont Federal Savings and Loan Association, Gaffney, South Carolina.
Bank Membership and Insurance of Accounts—Secure Savings and Loan Association, Fontana, California.
Modification of Board Condition—Alberic Girod, *et al.*, Catano, Puerto Rico.
Application filed by Beneficial Corporation, Wilmington, Delaware on Behalf of First Texas Financial Corporation of Delaware, Wilmington, Delaware To Acquire Control of First Texas Savings Association, Dallas, Texas By Merging First Texas Financial Corporation INTO First Texas Financial Corporation of Delaware.

484, March 24, 1981.

Announcement is being made at the earliest practicable time.

NATIONAL MEDIATION BOARD.

TIME AND DATE: 2:00 p.m., Wednesday, April 1, 1981.

PLACE: Board Hearing Room, 8th Floor, 1425 K. Street, NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED:

(1) Ratification of Board actions taken by notation voting during the month of March, 1981.

(2) Other priority matters which may come before the Board for which notice will be given at the earliest practicable time.

SUPPLEMENTARY INFORMATION: Copies of the monthly report of the Board's notation voting actions will be available from the Executive Secretary's office following the meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Rowland K. Quinn, Jr., Executive Secretary, Tel: (202) 523-5920.

DATE OF NOTICE: March 23, 1981.

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of March 30, 1981, in Room 825, 500 North Capitol Street, Washington, D.C.

Closed meetings will be held on Wednesday, April 1, 1981 at 10:00 a.m., and on Thursday, April 2, 1981, following the 2:30 p.m. open meeting. An open meeting will be held on Thursday, April 2, 1981, at 2:30 p.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(8)(9)(A) and (10) and 17 CFR 200.402(a)(4)(8)(9)(i) and (10).

Commissioner Evans, as duty officer, determined to hold the aforesaid meetings in closed session.

The subject matter of the closed meeting scheduled for Wednesday, April 1, 1981, at 10:00 a.m., will be:

Opinions.

Access to investigative files by Federal, state or self-regulatory authories.

Litigation matters.

Formal orders of investigation.

Freedom of Information Act appeals.

Settlement of administrative proceedings of an enforcement nature.

Settlement of injunctive actions.

Institution of administrative proceeding of an enforcement nature.

Institution of injunctive actions.

Regulatory matter regarding financial institution.

The subject matter of the closed meeting scheduled for Thursday, April 2, 1981, following the 2:30 P.M. open meeting, will be:

Regulatory matter bearing enforcement implications.

The subject matter of the open meeting scheduled for Thursday, April 2, 1981, at 2:30 p.m., will be:

1. Consideration of whether to grant an application by Daniel G. Gunter to become associated with Foundation Plan, Inc., a proposed broker-dealer, in a proprietary capacity with certain limitations. For further information, please contact Adele Geffen at (202) 272-2947.

2. Consideration of whether to grant an application by Robert R. Chandler to become associated with Securities Corporation of Iowa, a registered broker-dealer, in a supervisory capacity. For further information, please contact Adele Geffen at (202) 272-2947.

3. Consideration of whether to approve an application by Vickie L. and Charles W. Davis for an exemption from the broker-dealer registration requirement of Section 15(a) of the Securities Exchange Act of 1934. For further information, please contact H. Steven Holtzman at (202) 272-2842.

4. Consideration of whether to grant a request of Joel Seligman, Associate Professor of Law at Northeastern University School of Law in Boston, for access to certain staff materials for the period 1969-1973. For further information, please contact Theodore S. Bloch at (202) 252-2454.

5. Consideration of a Freedom of Information Act appeal of L. Walton Bader (No. 81-102) from a decision of the Commission's FOIA Officer denying access to the investigatory file concerning OKC Corporation and its chief executive officer, Cloyce K. Box. For further information, please contact Andrew W. Sidman at (202) 272-2454.

6. Consideration of a Freedom of Information Act appeal of Carl D. Liggio from a decision of the Commission's FOIA Officer denying access to certain documents concerning an interview of Commission staff members by private counsel. For further information, please contact Richard A. Kirby at (202) 272-3088.

7. Consideration of whether to issue an interpretative release dealing with whether questions of accountants' independence should be raised solely because a foreign office of or a foreign firm associated with the domestic accounting firm performs limited, routine bookkeeping service for a foreign division, subsidiary or investee of a domestic registrant which is a client of that firm. Additionally, Staff Accounting Bulletin No. 30 which also deals with this subject would be rescinded if the Commission decides to issue an interpretative release. For further information, please contact Rita Gunter at (202) 272-2133.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Paul Lownstein at (202) 272-2092.

March 24, 1981.

DEPARTMENT OF JUSTICE

Office of Juvenile Justice and Delinquency Prevention

Supplemental Funds for Insular Areas of the U.S.

AGENCY: Office of Juvenile Justice and Delinquency Prevention.

SUBJECT: Announcement of availability of supplemental financial assistance for problems of juvenile delinquency in selected insular areas of the U.S.

This announcement does not constitute a "major" rule, as defined by Executive Order 12291, because it does not result in: (a) an effect on the economy of $100 million or more, (b) a major increase in any costs or prices, (c) adverse effects on competition, employment, investment, productivity, or innovation among American enterprises.

Pursuant to the 1980 Amendments to the Juvenile Justice and Delinquency Prevention Act, the Office of Juvenile Justice and Delinquency Prevention is making 5 percent of its special emphasis funds available for grants and contracts designed to address the special needs and problems of juvenile delinquency in the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

Actual awards will be determined in accordance with the following criteria:

(1) The relative cost and effectiveness of the proposed program in effectuating the purpose of the Act;

(2) The extent to which the proposed program will incorporate new or innovative techniques;

(3) The extent of which the proposed program meets the objectives and priorities of the State plan when a State plan has been approved by the Administrator under section 223(c) and when the location and scope of the program makes such consideration appropriate;

(4) The increase in capacity of the public and private agency, institution, or individual to provide services to delinquents and other youth to help prevent delinquency;

(5) The extent to which the proposed project serves communities which have high rates of youth unemployment, school dropout, and delinquency;

(6) The extent to which the proposed program facilitates the implementation of the recommendations for the Advisory Committee as set forth pursuant to section 247; and

(7) Assurance that in accord with section 224(c) at least 30 percent of the award will be awarded to non-profit organizations.

The appropriate agencies authorized to receive and distribute Office of Juvenile Justice and Delinquency Prevention (OJJDP) formula grant funds in the affected Islands and Territories will be notified immediately by letter of the application procedures and deadlines.

Inquiries regarding this notice should be directed to the OJJDP Formula Grants and Technical Assistance Division, 633 Indiana Avenue, NW, Washington, D.C. 20531, (202) 724-5914.

Charles A. Lauer,

Acting Administrator, Office of Juvenile Justice and Delinquency Prevention.

Part III

Department of Transportation

Federal Aviation Administration

U.S. National Aviation Standard; Automatic Traffic Advisory and Resolution Service (ATARS)

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

U.S. National Aviation Standard; Automatic Traffic Advisory and Resolution Service (ATARS)

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Invitation for public comment on the Draft U.S. National Aviation Standard for the Automatic Traffic Advisory and Resolution Service (ATARS).

SUMMARY: This action presents a Draft U.S. National Aviation Standard for the Automatic Traffic Advisory and Resolution Service (ATARS). The Standard would define the system and the data link formats. It is intended to satisfy overall operational needs and assure compatibility with elements of the National Airspace System (NAS). While not regulatory the Standard may provide the basis for later rule making affecting airborne equipment.

STATUS: The FAA is continuing the development and evaluation of ATARS. To date, the performance of ATARS has not been fully validated. The purpose in publishing this draft national aviation standard is to promulgate ATARS design information, solicit public and industry comment, and to provide the widest possible exchange of information on the design of ATARS. It is anticipated that this exchange of information will materially enhance continuing development activities.

FOR FURTHER INFORMATION CONTACT: John Scardina, Aircraft Separation Assurance Branch, ARD-241, Communications and Surveillance Division, Systems Research and Development Service, Federal Aviation Administration, Department of Transportation, 400 7th Street SW, Washington, DC 20590, telephone 202-755-4995. Additional copies of this notice may be obtained from the same address.

Invitation of Public Comment

Interested persons are invited to submit written data and comments on this U.S. National Aviation Standard as they may desire. Communications should identify the notice number and be submitted in duplicate to: Director, Systems Research and Development Service, Attn: ARD-10, Federal Aviation Administration, Department of Transportation, 400 7th Street S.W., Washington, D.C. 20590, on or before May 18, 1981. Copies of comments received will be made available through ARD-10 for examination before and after the closing date for comments.

Description

The Automatic Traffic Advisory and Resolution Service is a ground-based collision avoidance system which has evolved form the earlier concept of Intermittent Positive Control (IPC) which was described by and recommended for development by the Air Traffic Control Advisory Committee in 1969. It utilizes surveillance data from the Discrete Address Beacon System (DABS) (See "U.S. National Aviation Standard for the Discrete Address Beacon System (DABS)," Appendix 1 to DOT/FAA Order 6365.1, December 8, 1980), computes traffic advisories and collision warnings using a ground computer independent of the Air Traffic Control (ATC) computer system and delivers these messages to aircraft via the DABS data link. ATARS is expected to provide both a traffic advisory and a resolution (collision avoidance) service to aircraft equipped with a DABS transponder, an altitude encoder (Mode C) and an output device for communicating ATARS advisories to the pilot.

History

This is the first time the Automatic Traffic Advisory and Resolution Service documentation in the format of a U.S. National Aviation Standard has been published for public comment.

Definition of U.S. National Standard

U.S. National Aviation Standards are system standards embodying descriptions of system characteristics. They are issued by the Administrator of the Federal Aviation Administration in accordance with Section 312(c) of the Federal Aviation Act (49 USC 1353(c)). They describe the performance characteristics (the technical parameters, tolerances and techniques) of major elements of the system to the extent necessary to assure proper operation and interface compatibility among elements of the National Airspace System (NAS). U.S. National Aviation Standards generally are limited to cooperative air-to-ground subsystems involving government owned ground equipment and private airborne equipment. They are not equipment specifications or standards pertaining to planning, programming, siting, installation, availability, reliability or maintainability.

Relationship of U.S. National Aviation Standards to Federal Aviation Regulations

U.S. National Aviation Standards issued by the Administrator in agency orders are binding only on FAA organizational elements. They establish the technical basis and description of the NAS and component subsystems. A National Aviation Standard is not a standard of general or particular applicability designed to implement or prescribe law or policy. It does not fall within the definition of "rule" contained in the Administrative Procedures Act (5 USC 551). There is no requirement that a National Aviation Standard be published as a notice of proposed rule making in the Federal Register. However, U.S. National Aviation Standards may serve as the basis for subsequent rule making actions. Accordingly, because of the relationship between the Standards and possible subsequent regulator actions, FAA publishes such Standards in the Federal Register and solicits public comment prior to their approval by the Administrator.

Issued in Washington, D.C., on March 19, 1981.

Robert W. Wedan,

Director, Systems Research and Development Service, Engineering and Development, Federal Aviation Administration, Department of Transportation.

5.3.1.3 Update RAR with ATARS Advisories
5.3.2 Composite Resolution Advisory

Appendix A Comprehensive Index of Fields
Appendix B Summary Of Principal DABS Control Fields Used by ASA Systems

1. General

1.1 System Features

1.1.1 The function of ATARS

ATARS is an automatic traffic advisory and resolution service which uses the surveillance and the data link capability of the Discrete Address Beacon System (DABS) to provide aircraft with advisories generated by an automated ground computer system. The primary objective of ATARS is to provide separation assurance back-up to the conventional air traffic control system in order to reduce the potential for midair collisions and near-miss encounters. This objective is achieved by providing pilots with traffic advisory information on the relative location of proximate and potentially threatening aircraft and by issuing resolution advisories when a near-miss or collision is predicted. In addition, ATARS provides certain auxiliary services to enhance flight safety. These are altitude echo advisories, terrain advisories, obstruction advisories and restricted airspace advisories. All services are provided on a full time basis to equipped users within the ATARS service volume.

ATARS can provide separation assurance and auxiliary services to a potential of eight user classes. This standard defines three

ATARS user classes: Classes 0, 1 and 2. Each user class is provided all services; however, the quantity of information provided for each service differs among the classes. This permits ATARS to support a wide selection of display implementations without

transmitting a large amount of unneeded information to aircraft with limited display capabilities.

1.1.2 Rationale for the ATARS National Aviation Standard

1.1.2.1 Legal Rationale.

Under Section 312(c) of the Federal Aviation Act as amended (49 U.S.C. 1353(c)), the Department of Transportation has the responsibility for the development and operation of a common system of air traffic control and navigation of both military and civil aircraft. Explicitly, the act requires the Secretary to develop, modify, test and evaluate systems, procedures, facilities, and devices, as well as define the performance characteristics thereof, to meet the needs for safe and efficient navigation and traffic control of all civil and military aviation except for those needs of military agencies which are peculiar to air warfare and primarily of military concern. The promulgation of a national aviation standard for ATARS is in keeping with this directive, as it will permit uniformity among aircraft collision avoidance systems and promote greater efficiency and safety in aviation.

1.1.2.2 Technical Rational.

Systems selected for implementation as a result of these developments, modifications, test and evaluation efforts are described in U.S. National Aviation Standards. These are system standards embodying descriptions of system standards embodying descriptions of system characteristics. They describe technical parameters and tolerances that ensure proper operation and compatibility between elements of the National Airspace System.

1.2 Coordination of ATARS With Other Elements of the National Airspace System

ATARS is compatible with all other existing and proposed elements of the National Airspace System. The operation of ATARS will be automatically coordinated with the appropriate elements of the air traffic control system.

1.2.1 Coordination With Ground Air Traffic Control

Provisions are included in the ATARS ground equipment for automatically coordinating ATARS advisories with the air traffic control facilities responsible for the airspace in which ATARS service is being provided.

1.2.2 Coordination of ATARS With Active BCAS

Provisions are included in the ATARS airborne and ground equipment for coordination with Active BCAS. In particular, the ATARS airborne equipment must receive and reply to certain interrogations generated by Active BCAS units in other aircraft. This document provides a description of the required ATARS formats and protocols as implemented in an ATARS-only aircraft (i.e., an aircraft which is equipped for ATARS but not for BCAS service). For those airborne installations that include both ATARS and Aotive BCAS (i.e., all Active BCAS aircraft), the coordination of ATARS and Active BCAS is described in the Active BCAS National Aviation Standard (ref. B).

1.2.3 Coordination of ATARS With DABS

ATARS is a user of the BABS data link and is designed for full operational compatibility with DABS.

1.2.3.1 ATARS Avionics Interface with DABS Transponder.

An aircraft receiving ATARS service must carry a DABS transponder and an encoding altimeter. The DABS transponder, in addition to its surveillance function, receives data from ground ATARS equipment and other airborne BCAS units, and delivers it to the ATARS avionics. Also, airborne ATARS equipments deliver to the DABS transponder certain information resident in the ATARS avionics for transmission to ground ATARS equipment and airborne BCAS units according to protocols specified in Section 4.

1.2.3.2 Ground ATARS Equipmnt Interface with DABS Sensor.

The ground protion of ATARS consists of a DABS sensor and a computer subsystem located at the DABS sensor site. Ground DABS equipment provides ground ATARS equipment with surveillance information, with a communication link to the aircraft in the form of the DABS data link, with communication links via land lines to other DABS sensors and to the air traffic control facilities serving the airspace covered by the DABS sensor.

1.2.4 Coordination With Adjacent ATARS Sites

Provisions are included in the ATARS airborne and ground equipments for coordination of ATARS resolution advisories among adjacent ground ATARS equipment sites.

1.2.5 Compatibility With Full Capability BCAS

Full-capability BCAS (Full BCAS) is an enhanced Beacon Collision Avoidance System. It provides pilot resolution advisories both in the horizontal and vertical planes as well as proximity data through the use of modes of operation not available in Active BCAS avionic units. ATARS is designed for operational compatibility with Full BCAS.

1.3 Scope of This Standard

This document describes and standardizes those characteristics of ATARS which must be controlled to provide compatibility among components of the system and to prevent impairment of services to other users of the airspace. Specifically, it defines the data link messages, formats, and protocols to be used in transmissions among ground ATARS equipment, airborne ATARS equipment and airborne BCAS equipments. All applications of ATARS messages are standardized and no experimental or ad hoc applications should be implemented without prior approval of the Federal Aviation Administration.

1.3.1 Relationship to Other U.S. National Aviation Standards

Since ATARS interacts with other systems and subsystems which are also part of the National Airspace System, the standards governing pertinent other systems are referenced herein (1.6).

1.3.1.1 Relationship Between ATARS and DABS National Aviation Standards

ATARS adheres to all of the provisions of the DABS National Aviation Standard (ref. A). In the event of conflict between the DABS Standard and the ATARS Standard, the ATARS Standard takes lower precedence.

1.3.1.2 Relationship Between ATARS and Active BCAS National Aviation Standards

In the event of conflict between the Active BCAS National Aviation Standard (ref. B) and the ATARS Standard, the ATARS Standard takes lower precedence.

1.3.2 Items Not Covered

This Standard does not prescribe the detailed technical features and capabilities of either ground or airborne ATARS equipment nor does it prescribe the minimum performance standards which must be met for operation in the National Airspace System. Other documentation will prescribe such minimum performance standards for airborne equipment. This Standard does not prescribe the details of the ground computer logic used in the generation of ATARS advisories nor does it in any way define or constrain the media, devices or formats for cockpit display of ATARS advisories.

1.4 Overall System Capability

The ATARS system consists of both ground equipment and airborne equipment. The functions of these equipments are described below.

1.4.1 Functions of Ground ATARS Equipment

The functions of the ground ATARS equipment are:

(a) Process surveillance reports on all aircraft tracked by the collocated ground DABS equipment.

(b) Maintain tracks on all targets within the ATARS service volume.

(c) Examine these tracks to detect all pairs involving at least one ATARS-equipped aircraft which require traffic or resolution advisories and detect all pairs of aircraft which require controller alerts. For aircraft pairs involving a controlled aircraft the criteria used for generation of controller alerts and threat advisories emulates the conflict alert logic resident in the terminal ATC computer system.

(d) Examine all tracks to detect ATARS-equipped aircraft which, according to the criteria of the ATARS algorithm, require terrain advisories, obstruction advisories, restricted airspace advisories or altitude echo advisories.

(e) Determine the information content of each required advisory. For resolution advisories this involves selection of the most appropriate positive, negative, or vertical speed limit resolution advisory which is consistent with previously issued resolution advisories and with resolution advisories

issued by adjacent ground ATARS equipment sites or by BCAS.

(f) Exchange data with adjacent ground ATARS sites in order to coordinate resolution advisories.

(g) Forward an appropriate set of ATARS messages to the collocated ground DABS equipment for delivery to the aircraft.

(h) Provide ATARS controller alerts to the appropriate air traffic control facilities.

1.4.2 Functions of Airborne ATARS Equipment

The functions of the airborne ATARS equipment are:

(a) Process and store ATARS information contained in the ATARS messages received via the DABS transponder.

(b) Test the compatibility of received resolution advisories with resolution advisories previously accepted from other ATARS sites or from BCAS and stored in the resolution advisory register (RAR). Accept new advisories if compatibility exists.

(c) Provide the DABS transponder with certain data inputs based upon data resident in the ATARS avionics.

(d) Generate a composite resolution advisory based upon all accepted resolution advisories.

(e) Communicate to the pilot the composite resolution advisory and selected information contained in the ATARS advisory messages.

1.5 Acronyms and Abbreviations

1.5.1 Acronyms

ASA: Aircraft Separation Assurance
ATARS: Automatic Traffic Advisory and Resolution Service
ATC: Air Traffic Control
ATCRBS: Air Traffic Control Radar Beacon System
BCAS: Beacon Collision Avoidance System
DABS: Discrete Address Beacon System
FAA: Federal Aviation Administration
RAR: Resolution Advisory Register

1.5.2 Abbreviations

FPM: feet per minute
.GE.: is greater than or equal to
.GT.: is greater than
.LE.: is less than or equal to
LSB: least significant bit
.LT.: is less than
MSB: most significant bit
NM: nautical mile

Reference A: "U.S. National Aviation Standard for the Discrete Address Beacon System (DABS)", Appendix 1 to DOT/ FAA Order 6365.1, December 8, 1980.

Reference B: "U.S. National Aviation Standard: Active BCAS Collision Avoidance System", Department of Transportation, Federal Aviation Administration. Federal Register, October 27, 1980.

Note.—In referring to references, paragraph numbers are usually specified. For example, a reference to paragraph 4.1 of reference B would be shown herein as ref. B:4.1.

2. Signals in Space

2.1 RF Characteristics

The radio frequency characteristics of all signals employed by ATARS conform to the U.S. National Aviation Standard for DABS (ref. A).

3. Signal Content

Note.—The DABS National Aviation Standard (ref. A) describes the message format structures and coding which must be used in all DABS transmissions. This section further defines the DABS formats and information coding used for the transmission of ATARS/BCAS messages.

3.1 Data Blocks

The interrogation and reply data blocks can cotain either 56 or 112 bits.

3.2 Format Structure

DABS transmission formats consists of 56 or 112 bits of which 24 bits are used as the address while the rest are used for information transfer. The interrogation and reply formats which can contain ATARS/ BCAS information are presented in Figures 3.2–1 and 3.2–2 respectively.

3.2.1 Bit Numbering and Sequence

In the description of the advisory subfields, bits are numbered consecutively with bit 1 being the first bit in the advisory subfield. In the description of other subfields of the description of mission fields (3.2.2.2), bits are numbered consecutively with bit 1 being the first bit transmitted in the DABS interrogation or reply. Numerical values encoded by groups of bits are encoded with the MSB transmitted first. Bits designated as "not assigned" are transmitted as all zero, and are reserved for assignment in future National Aviation Standards.

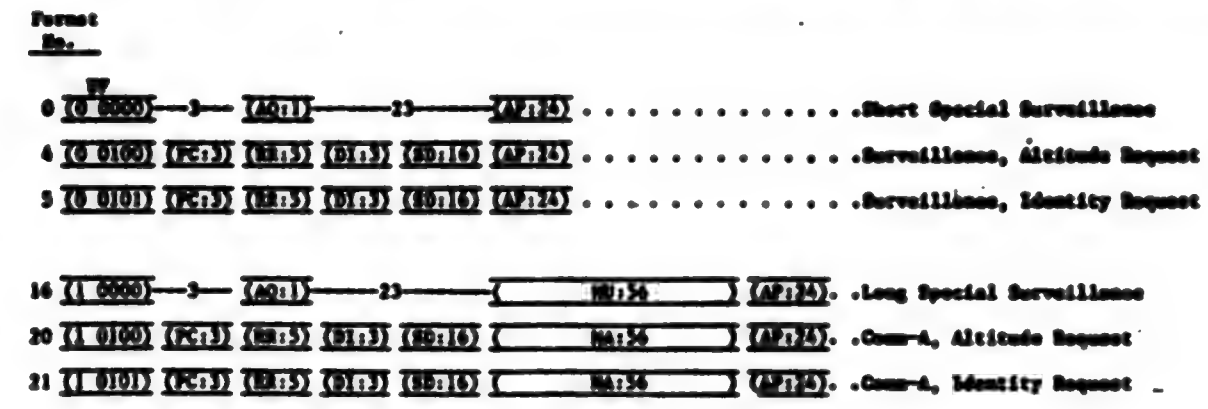
3.2.2 Fields

Information is coded in fields which consist of one or more bits. In this document the decemal equivalent of the binary code formed by the bit sequence within a field is used as the designator of the field function.

Note.—An an example, the 5-bit UF field is used to designate the uplink format type. A surveillance interrogation with identity has in its UF field position the bit sequence 00101. Since $00101_2 = 5_{10}$, this format is designated as UF=5.

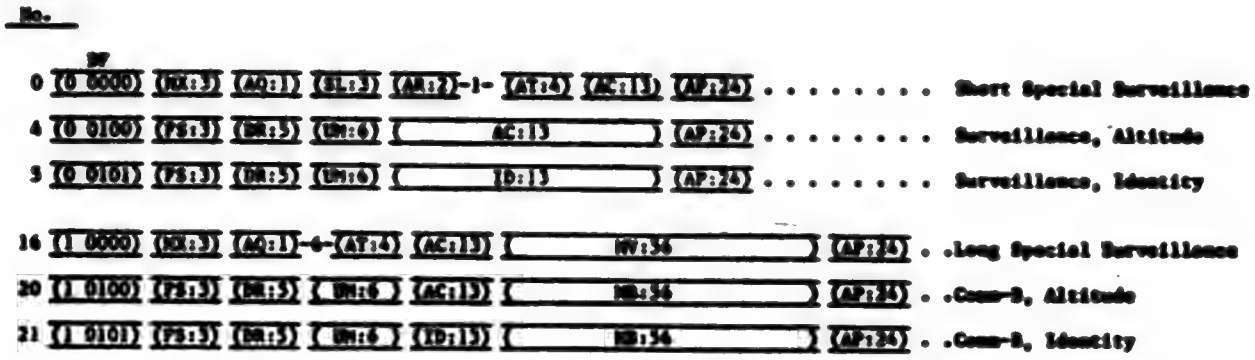
Codes designated as "not assigned" are reserved for assignment in future National Aviation Standards. Fields containing numeric data are encoded as positive integer quantities unless otherwise noted. The LSB value and the allowed range of values are included for all numeric quantities. Unless otherwise noted, when the value of a numeric quantity is outside the indicated range of values, it will be encoded as equal to the nearest end point of the range. Unless otherwise noted, the coded value of a numeric quantity is the quantized value nearest the actual value of the quantity (i.e., the value is rounded off rather than truncated).

BILLING CODE 4910-13-M



Note: (1) (XX:N) denotes a field designated "XX" which is assigned N bits.
(2) ---N--- denotes unassigned coding space, N bits; must be set to all zeroes.
(3) The format number in the above uplink formats (UF) corresponds to the binary code in the first 5 bits of the interrogation.
(4) UF=0 and 16 are air-air interrogation formats used by BCAS. The other UF formats herein are used by ground ATARS equipment.

Fig. 3.2-1. BABS Interrogation or Uplink Formats Used for ATARS/BCAS Messages.



Note: (1) (XX:N) denotes a field designated "XX" which is assigned N bits.
(2) ---N--- denotes unassigned coding space, N bits; must be set to all zeroes.
(3) The format number in the above downlink formats (DF) corresponds to the binary code in the first 5 bits of the reply.
(4) DF=0 and 16 are reply formats to BCAS interrogations. The other DF formats herein are replies to ground ATARS interrogations.

Fig. 3.2-2. BABS Reply or Downlink Formats Used for ATARS/BCAS Messages.

BILLING CODE 4910-13-C

3.2.2.1 Essential Fields.

Each DABS transmission contains two essential fields. The first essential field is a 5 bit format descriptor which occurs at the beginning of the transmission. This field is designated UF Uplink Format) for interrogations and DF (Downlink Format) for replies. The UF and DF codes pertinent to this Standard are given in Figs. 3.2–1 and 3.2–2 respectively. The second essential field is a 24 bit field which contains a DABS address and carries parity information according to ref. a: 4.1. This field is designated AP (Address/Parity) and is located at the end of the transmission.

3.2.2.2 Mission Fields.

Coding space outside the essential fields is used to transmit the mission fields. For specific missions, a specific set of fields is prescribed.

Note.—Mission fields have two-letter designators within this Standard.

3.2.2.3 Subfields.

Subfields may appear within mission fields. Subfields used in ATARS advisories may be used as constituent elements of more than one larger subfield. The name, length (number of bits) and coding of a defined subfield are the same wherever it appears; however, the location and protocol for use may vary.

Note.—Subfields of mission fields are labeled with three-character alphanumerica designators within this Standard. Subfields of three-character designator subfields are labeled with four-character alphanumeric designators within this Standard.

3.3 Field Descriptions

For all mission fields and subfields which are processed by the ATARS avionics, the relevant characteristics (location and coding) are described in this section. In some cases this description duplicates the description found in other National Aviation Standards; in other cases it introduces new information that is not found elsewhere. Mission fields and subfields defined by the DABS National Aviation Standard (ref. A) are described in 3.3.1. All othermission fields and subfields are described in 3.3.2. Table 3.3–1 provides an index of all described mission fields and the three-character designator subfield groups (if any) within them. Appendix A provides an alphabetically ordered index of all essential fields, mission fields, three-character designator subfields and four-character designator subfields described in this Standard.

Note.—Duplicate mission field and subfield descriptions aid in identifying those areas in which the various National Aviation Standards must be cordinated with respect to future modifications or additions.

3.3.1 Fields and Subfields Defined by DABS National Aviation Standard

Location and coding of mission fields and subfields required for transmission of ATARS information which are specified by the DABS National Aviation Standard (ref. A), are described in alphabetical order in the following paragraphs.

Note.—Certain coding reserved for ASA services in the DABS National Aviation Standard is further described in this section.

*Note 1: Subfields 12 bits in length which are denoted by *** contain one of the following subfields: TPA (3.3.2.2.21), TEA (3.3.2.2.18), OBA (3.3.2.2.6), or RAA (3.3.2.2.9), or a null advisory (3.3.2.2.6).*

*Note 2: Subfields 18 bits in length which are denoted by *** contain one of the following subfields: TPE (3.3.2.2.22), AEE (3.3.2.2.2), TAE (3.3.2.2.17), OAE (3.3.2.2.4), RAE (3.3.2.2.10), or a null advisory (3.3.2.2.4).*

BILLING CODE 4910-13-C

3.3.1.1 DI Designator, Identification.

Uplink, 3 bits, 14 through 16. Appears in uplink surveillance and Comm-A formats, UF=4,5,20,21. Contains identification of coding in the SD field. Coding:

0=SD not used
1=SD contains multisite information (ref. A: 4.13.1.1)
2=SD contains ATARS information (ref. B: 3.3.2.10.1)
3–6=Not assigned
7=SD contains extended reply request (ref. A: 4.11:1.1.1)

Airborne ATARS equipments examine the content of the SD field whenever DI=7 appears with RR=19 in uplink surveillance and Comm-A formats, UF=4,5,20, and 21.

3.3.1.2 DR Downlink Request.

Downlink, 5 bits, 9 through 13. Appears in surveillance and Comm-B replies, DF=4,5,20,21.

Coding

0=No downlink request
1=B bit set
2=RAR bit set
3=RAR bit set and B bit set
4–15=Not assigned
16–310=see Comm-D protocol, ref. A:4.12.2.1

When the RAR bit is set, i.e., RAR is non-empty, airborne ATARS equipment cause DR=2 or 3 to be set, as appropriate.

Note 1.—Requests associated with codes 1–15 take priority over requests associated with codes 16–31.

Note 2.—The B bit is explained in ref. A:4.11.2.

3.3.1.3 MA Message, Comm-A.

Uplink, 56 bits, 33 through 88. Appears in Comm-A interrogations, UF=20 and 21. The MA field is used to transmit ATARS resolution advisory, traffic advisory and auxiliary advisory information to airborne ATARS equipments. Contains 8-bit ADS (Comm-A Definition) subfield.

Note.—MA message content and codes not related to ATARS are not included in this Standard.

3.3.1.3.1 Subfield in MA: ADS, A-Definition Subfield.

Uplink, 8 bits, 33 through 40, subfield in MA. Defines the data contained in the remainder of MA. For convenience in coding, ADS is expressed in two groups of 4 bits each, ADS1, 33 through 36, and ADS2, 37 through 40. ADS1 defines a specific A-sink (Comm-A destination) and ADS2 defines the specific message type for that A-sink. Ground ATARS messages use ADS1=1 and 3.

3.3.1.4 MB Message, Comm-B.

Downlink, 56 bits, 33 through 88. Appears in Comm-B replies, DF=20 and 21. The MB field is used by airborne ATARS equipments to transmit RAR information, Extended Capability Report and ATARS Extended Data (3.3.2.3.3) to the ground. Contains 8-bit BDS (Comm-B Definition) subfield.

3.3.1.4.1 Subfield in MB: BDS, B-Definition Subfield.

Downlink, 8 bits, 33 through 40, subfield in MB. Defines the data contained in MB. For convenience in coding, BDS is expressed in two groups of 4 bits each, BDS1, 33 through 36, and BDS2, 37 through 40. BDS1 defines a specific B-source (Comm-B source) and BDS2 defines the specific message type from that source. Comm-B messages originating from airborne ATARS equipments use BDS1=3.

3.3.1.4.2 Subfields in MB for Extended Capability Report.

The following subfields defined by the DABS National Aviation Standard appear in MB for an Extended Capability Report and are ATARS-related.

ACS: A-Capability, 16 bits, 45 through 60. Contains the identity (ADS1 values) of all on board operative A-sinks (Comm-A destinations).

Coding

To report the presence of the A-sink with ADS1=x, bit 45 + x is set to '1'.

Note.—The ATARS avionics is the destination for Comm-A messages containing the ADS1=1 and 3 codes in MA. Hence, operative ATARS avionics sets bits 46 and 48 in ACS to '1'.

BCS: Extended Capability, 16 bits, 71 through 86. Contains the identity (BDS1 values) of all on board operative B-sources (Comm-B sources).

Coding

To report the presence of the B-source with BDS1=x, bit 71 + x is set to '1'.

Note.—The ATARS avionics is a source for Comm-B messages containing the BDS1=3 code in MB. Hence, operative ATARS avionics sets bit 74 in BCS to '1'.

Note.—The following table provides a complete summary of the currently defined structure of MB for an Extended Capability Report.

Structure of MB for an Extended Capability Report

Position	Number of bits	Subfield	Remarks
33–36	4	BDS1	=1.
37–40	4	BDS2	=0.
41	1	CBS	
42–43	2		Not assigned.
44	1	FDS	
45–60	16	ACS	
61–65	5		Not assigned.
66–68	3	ATA	
69–70	2	ARC	
71–86	16	ECS	
87–88	2	EDS	

The BDS1, BDS2, CBS, FDS AND EDS subfields are defined in ref. A: 4.6.3.1 and are not ATARS-related. The ATA and ARC subfields are defined by this Standard in 3.3.2.3.4.

3.3.1.5 MU Message, Special Interrogation.

Uplink, 56 bits, 33 through 88. Appears in long special surveillance interrogation, UF=16. BCAS uses the MU field of a long special surveillance interrogation, UF=16, to transmit both an RAR Request Message and a BCAS Resolution Message to ATARS-equipped aircraft.

3.3.1.6 MV Message, Special Reply.

Downlink, 56 bits, 33 through 88. Appears in long special surveillance reply, DF=16. ATARS-equipped aircraft use the MV field of a long special surveillance reply, DF=16, to transmit an RAR Reply Message to BCAS and an RAR Busy Message to BCAS.

3.3.1.7 RR Reply Request.

Uplink, 5 bits, 9 through 13. Appears in surveillance and Comm-A interrogations, UF=4,5,20,21. Contains length and content of requested reply. The RR codes to which ATARS airborne equipments respond are 17 and 19, both of which elicit Comm-B replies. For these RR codes the contents of UM may be specified by coding in the SD field of the interrogation. If no UM content is specified, a voluntary message may be provided (ref. A: 4.7)

Coding

RR code	Requested MB content
17	Extended Capability Report (3.3.1.4.2, 3.3.2.3.4).
19	RAR Reply Message to ATARS (3.3.2.3.1) or RAR Busy Message to ATARS (3.3.2.3.2) or ATARS Extended Data (3.3.2.3.3).

Note.—If bit 1 of the RR code is a one, the last four bits of the 5-bit RR code, if transformed into their decimal equivalent, designate the assigned address, BDS1 value, of the requested source.

3.3.1.8 SD Special Designator.

Uplink, 16 bits, 17 through 32. Appears in surveillance and Comm-A interrogations, UF=4,5,20,21. Coding depends on the content of the DI fields.

Airborne ATARS equipments examine the contents of SD when DI=7 and RR=19 in the associated surveillance or Comm-A interrogation for Extended Data Readout information.

3.3.1.8.1 Subfield in SD for Extended Data Readout

The following subfield appears in SD if DI=7:

RRS: Reply Request, 4 bits, 17 through 20.

Coding

Corresponds to the BDS2 code (3.3.1.4.1) of the particular message type requested from the B-source identified by the accompanying RR code (3.3.1.7).

Note.—*Structure of SD for Extended Data Readout*

Position	Number of bits	Subfield	Remarks
17–20	4	RRS	
21–32	12		Not assigned.

3.3.1.9 UM Utility Message

Downlink, 6 bits, 14 through 19. Appears in surveillance and Comm-B replies, DF=4, 5, 20, 21. Contains requested or volunteered data (see ref. A: 4.7).

The presence of a pilot request for an altitude echo advisory is communicated by the airborne ATARS equipments to ground ATARS equipments using the UM field for ATARS.

Note.—The following table provides a complete summary of the currently defined structure of UM for ATARS.

Structure of UM for ATARS

Position	Number of bits	Subfield	Remarks
14	1	AER	
15	1		Not assigned.
16-19	4	ATS	

The AER subfield is defined by this Standard in 3.3.2.7.1. ATS is a subfield defined in ref. A: 4.18.2.2.

3.3.2 ATARS Fields and Subfields.

The following paragraphs describe the location and coding of those mission fields and subfields which are required for the transmission of ATARS information and which are not defined in the DABS National Aviation Standard. Certain mission fields and subfields are also defined by the Active BCAS National Aviation Standard and have been coordinated with that Standard to provide for compatibility.

3.3.2.1 AR ASA Resolution Capability Report.

Downlink. 2 bits. 13 through 14. Appears in special surveillance reply format. DF = 0. Contains ASA resolution capability of aircraft.

Coding

0 = No ASA resolution capability
1 = ATARS only
2 = Active BCAS
3 = Not assigned

Airborne ATARS equipments cause AR = 1 to be set.

Note.—AR is also defined in ref. B: 3.3.2.1.

3.3.2.2 MA Message. Comm-A.

Ground ATARS equipment uses the MA field of Comm-A interrogations (3.3.1.3) to transmit all ATARS advisory (resolution, auxiliary and traffic) messages. Table 3.3–2 summarizes these ATARS advisory messages, their associated MA subfield structure, and the class of ATARS users which can utilize them. The ATARS advisory subfields appearing in Table 3.3–2 are described in alphabetical order in the following sections.

Note.—A summary of the structure of each ATARS advisory subfield is contained at the end of the paragraph which describes its contents.

3.3.2.2.1 AEC: Altitude Echo Advisory Subfield.

The Altitude Echo Advisory Subfield (AEC) provides the ATARS aircraft with own altitude as determined from the encoded altitude reports of own aircraft. When an aircraft is below the lowest usable flight level (see note), the echoed altitude is the reported altitude adjusted for barometric pressure from the DABS/ATARS site. The following subfields appear in AEC.

Note.—When the pressure altitude of an aircraft as corrected for reported ground altimeter setting is below 18,000 feet, air traffic control assigns altitudes according to corrected altitudes. Otherwise altitudes are assigned according to pressure altitudes (altitudes referenced to 29.92 inches of mercury) known as *flight levels*. The altitude echo will adhere to the same procedures in order to provide agreement between echoed altitude and cockpit altimeter readings.

BILLING CODE 4910-13-M

TABLE 3.3-2 - MA SUBFIELD STRUCTURE OF ATARS MESSAGES

ATARS Message Name	Class of ATARS Service	Subfield Structure of MA		
		Bit 33 ← → Bit 40		Bit 41 ← → Bit 88
		(ADS:4)	(ADS:4)	
ATARS Resolution	0,1,2	=1	=0	(ODS:24) (TRA:19) (***:12) (SIT:1)
Not Assigned	-	=1	=1-15	-
Six Advisories	0	=2	=0	(***:12) (***:12) (SIA:6) (SIA:6) (SIA:6) (SIA:6)
Three Advisories	0	=2	=1	(***:18) (***:18) (***:12)
Not Assigned	-	=2	=2	-
ATCRBS Track Block	0,1,2	=2	=3	Note: Defined in ref. B: 3.3.2.3.2 and is sent only to BCAS equipped aircraft.
Not Assigned	-	=2	=4-6	-
Auxiliary Advisories	1,2	=2	=7	When RST=0: (TER:8) (OBT:13) (RST:1) (OBT:13) (OBT:13) When RST=1: (TER:8) (OBT:13) (RST:1) (RTD:26)
Own Plus Altitude Echo	2	=2	=8	(ODS:24) (AEC:24)
Own Plus Proximity	2	=2	=9	(ODS:24) (PDT:24)
Start/End Encounter	2	=2	=10	(PDT:24) (SED:24)
Dual Proximity	1,2	=2	=11	(PDT:24) (PDT:24)
Proximity Plus Altitude Echo	1,2	=2	=12	(PDT:24) (AEC:24)
Start Threat	2	=2	=13	(ODS:24) (STD:24)
Threat	1,2	=2	=14	(PDT:24) (TMD:24)
Not Assigned	-	=2	=15	-

(***:12) can be either (TPA:12), (TEA:12), (OBA:12), OR (RAA:12), or a Null Advisory (3.3.2.2.5).

(***:18) can be either (TPE:18), (AEE:18), (TAE:18), (OAE:18), OR (RAE:18), or a Null Advisory (3.3.2.2.4).

Note: (XXX:Y) denotes a subfield designated "XXX" which is assigned Y bits.

BILLING CODE 4910-13-C

AEAL: Altitude Echo, 10 bits, 3 through 12. This is own aircraft's reported altitude as echoed by the ground ATARS equipment.

Coding

LSB = 100 feet. The minimum and maximum values are −1000 feet and +101,200 feet respectively. When no altitude is available, AECC = 1 and AEAL = 1023. The value of the altitude echo in feet is 100 * AEAL − 1000.

AECA: Adjusted Altitude Bit, 1 bit, 1.

Coding

0 = AEAL altitude has not been corrected for ground altimeter setting
1 = AEAL altitude has been corrected for ground altimeter setting

AECC: Reported Altitude Confidence Level, 1 bit, 2.

Coding

0 = Reported altitude is available
1 = Reported altitude is unavailable (either not reported or of low confidence)

Note.—*Structure of AEC Subfield*

Position	Number of bits	Subfield	Remarks
1	1	AECA	
2	1	AECC	
3-12	10	AEAL	
13-24	12		Not assigned.

3.3.2.2.2 AEE: 18 Bit Altitude Echo Advisory Subfield.

The 18 Bit Altitude Echo Advisory Subfield (AEE) is a subfield which can provide an altitude echo advisory as defined in 3.3.2.2.1. The following subfields appear in AEE.

AEAL: Altitude Echo, 10 bits, 7 through 16. This subfield is as defined in 3.3.2.2.1.
AECA: Adjusted Altitude Bit, 1 bit, 6. This subfield is as defined in 3.3.2.2.1.
AECC: Confidence Level for Reported Altitude, 1 bit, 6. This subfield is as defined in 3.3.2.2.1.
SUBN: Subfield Indicator, 4 bits, 1 through 4. Defines the advisory subfield type contained in an 18 bit advisory subfield of an ATARS Three Advisories Message.

Coding

0 = AEE, 18 Bit Altitude Echo Advisory (3.3.2.2.2)
1-12 = TPE, 18 Bit Threat/Proximity Advisory (3.3.2.2.22). In this case SUBN provides clock bearing to the encounter aircraft. LSB = 1 clock sector of 30 degrees. The minimum and maximum values are 1 o'clock and 12 o'clock respectively.
13 = TAE, 18 Bit Terrain Advisory Subfield (3.3.2.2.17)
14 = OAE, 18 Bit Obstruction Advisory Subfield (3.3.2.2.4)
15 = RAE, 18 Bit Restricted Airspace Advisory Subfield (3.3.2.2.10)

If no advisory has been generated which requires use of an 18 bit advisory subfield, then an OAE Subfield, SUBN = 14, with CLBR = 0 (Null Advisory for an 18 bit advisory subfield) is inserted in that subfield.

Note.—*Structure of AES Subfield*

Position	Number of bits	Subfield	Remarks
1-4	4	SUBN	= 0
5	1	AECA	
6	1	AECC	
7-16	10	AEAL	
17-18	2		Not assigned.

3.3.2.2.3 COL: ATARS Resolution Advisory Column Subfield.

The ATARS Resolution Advisory Column Subfield (COL) contains an image of the RAR column associated with the ground ATARS site from which the advisory orginates and indicates the resolution advisories to be active and inactive for that column.

Coding

Each bit in the COL subfield is a dedicated bit representing a specific ATARS resolution advisory.

The bits in COL have the following meaning:

Bit	ATARS resolution advisory
1	Climb.
2	Don't descend.
3	Don't descend faster than 500 FPM.
4	Don't descend faster than 1000 FPM
5	Don't descend faster than 2000 FPM
6	Descend.
7	Don't climb.
8	Don't climb faster than 500 FPM.
9	Don't climb faster than 1000 FPM.
10	Don't climb faster than 2000 FPM.
11	Turn left.
12	Turn right.
13	Don't turn left.
14	Don't turn right.

A bit set to '1' indicates that ATARS intends the associated resolution advisory to be active (associated RAR bit set to '1'). A bit set to '0' indicates that ATARS intends the associated resolution advisory to be inactive (associated RAR bit set to '0').

3.3.2.2.4 OAE: 18 Bit Obstruction Advisory Subfield.

The 18 Bit Obstruction Advisory Subfield (OAE) contains information describing the proximity of own aircraft to an obstruction. The following subfields appear in OAE.

ARTO: Altitude Relative to Obstruction, 3 bits, 5 through 7. Represents the current altitude clearance between own aircraft and the obstruction.

Coding

The Altitude Relative to Obstruction is coded in two's complement notation with LSB = 200 feet. The minimum and maximum values are −800 feet and 600 feet respectively.

CLBR: Clock Bearing, 4 bits, 8 through 11. Values from 1 to 12 indicate the bearing from own aircraft to the object (obstruction or aircraft) causing the advisory. Bearing is expressed as a clock position with 12 o'clock in the same direction as own ground track course.

Coding

LSB = 1 clock sector of 30 degrees. The minimum and maximum values are 1 o'clock and 12 o'clock respectively. A value of 0 indicates that no advisory information is present in this advisory subfield. Values of 13, 14, and 15 are not assigned in this subfield.

FTAT: First Time Advisory Transmitted, 1 bit, 12.

Coding

0 = An advisory for this object (obstruction or aircraft) was uplinked to own aircraft on the previous DABS cycle.
1 = An advisory for this object (obstruction or aircraft) was not uplinked to own aircraft on the previous DABS cycle

Note.—If desired, the ATARS avionics can use FTAT to provide an audible alarm for annunication of an advisory when it is first uplinked.

SUBN: Subfield Indicator, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.2.
Note 1.—Structure of OAE Suffield.

Structure of OAE Subfield

Position	Number of bits	Subfield	Remarks
1-4	4	SUBN	= 14.
5-7	3	ARTO	
8-11	4	CLBR	
12	1	FTAT	
13-18	6		Not assigned.

Note 2.—The OAE Subfield with CLBR = 0 serves as the 18 bit advisory subfield Null Advisory.

3.3.2.2.5 OBA: 12 Bit Obstruction Advisory Subfield.

Except for CZSI, as defined below, the 12 Bit Obstruction Advisory Subfield contains the same information as the first 12 bits in OAE (3.3.2.2.4). The following subfields appear in OBA.

ARTO: Altitude Relative to Obstruction, 3 bits, 5 through 7. This subfield is as defined in 3.3.2.2.4.
CLBR: Clock Bearing, 4 bits, 8 through 11. This subfield is as defined in 3.3.2.2.4.
CZSI: Class Zero Subfield Indicator, 4 bits, 1 through 4. Defines the advisory subfield type contained in a 12 bit advisory subfield of an ATARS Resolution Message and Three Advisories Message.

Coding

0 = Not assigned
1-12 = TPA, 12 Bit Threat/Proximity Advisory
13 = TEA, 12 Bit Terrain Advisory
14 = OBA, 12 Bit Obstruction Advisory
15 = RAA, 12 Bit Restricted Airspace Advisory

Note.—When CZSI = 1 through 12, CZSI is interpreted identically to CLBR as defined in 3.3.2.2.4.

If no advisory has been generated which requires use of a 12 bit advisory subfield, then an OBA Subfield with CZSI = 14 and CLBR = 0 (Null Advisory for a 12 bit advisory subfield) is inserted in that subfield.

FTAT: First Time Transmitted, 1 bit, 12. This subfield is as defined in 3.3.2.2.4.

Note.—*Structure of OBA Subfield*

Position	Number of bits	Subfield	Remarks
1–4	4	CZSI	=14
5–7	3	ARTO	
8–11	4	CLBR	
12	1	FTAT	

3.3.2.2.6 OBT: 13 Bit Obstruction Advisory Subfield.

The 13 Bit Obstruction Advisory Subfield (OBT) provides an obstruction advisory for Class 1 and Class 2 users. It differs from the obstruction advisory used for Class 0 Service (OBA and OAE) in that it includes the range to the obstruction. The following subfields appear in OBT.

ARTO: Altitude Relative to Obstruction, 3 bits, 5 through 7. This subfield is as defined in 3.3.2.2.4.

CLBR: Clock Bearing, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.4.

FTAT: First Time Advisory Transmitted, 1 bit, 13. This subfield is as defined in 3.3.2.2.4.

RNGO: Range to obstruction, 5 bits, 8 through 12. Contains the range to the obstacle.

Coding

LSB=0.2 NM. The minimum and maximum values are 0 NM and 6.2 NM respectively.

Note.—*Structure of OBT Subfield*

Position	Number of bits	Subfield	Remarks
1–4	4	CLBR	
5–7	3	ARTO	
8–12	5	RNGO	
13	1	FTAT	

3.3.2.2.7 ODS: Own Data Subfield.

The Own Data Subfield (ODS) contains parameters of the aircraft to which the message is addressed. The aircraft parameters are those used by the ground ATARS computer. The following subfields appear in ODS.

OACL: Own ATARS Class, 3 bits 19 through 21. Defines the class of service which the ground is providing to the aircraft.

Coding

0=ATARS Class 0
1=ATARS Class 1
2=ATARS Class 2
3–7=Not assigned

Note.—The class of ATARS service to be assigned to the aircraft is downlinked by the aircraft in the Extended Capability field (3.3.1.4.2). The value of OACL is based upon this downlinked information.

OGTC: Own Ground Track Course, 7 bits, 1 through 7. Contains the ground track course of own aircraft referenced to magnetic north at the DABS sensor.

Coding

Own Ground Track Course is transmitted in two's complement notation with an LSB=2.8125 degrees. The minimum and maximum values are −180 degrees and +177.1875 degrees respectively.

OSPD: Own Groundspeed, 7 Bits, 8 through 14. Contains the groundspeed of own aircraft used by the ATARS ground equipment.

Coding

For OSPD.LE.60, LSB=10 knots and own groundspeed is OSPD*10 knots. For OSPD.GE.61, LSB=30 knots and own groundspeed is 600 knots + (OSPD−60)* 30 knots. The minimum and maximum values of own groundspeed are 0 knots and 2810 knots respectively.

OTNR: Own Ground Track Turn Rate, 4 Bits, 15 through 18. Contains the ground track turn rate of own aircraft.

Coding

The turn rate is transmitted in two's complement notation with a LSB=1 degree per second. Positive values indicate turns to the right and negative values indicate turns to the left. The minimum and maximum values are −8 degrees per second and +7 degrees per second respectively.

SNIN: Sensor Intitation Bit, 1 bit, 22.

Coding

0=Sensor uplinking this data is not initiating primary ATARS service
1=Sensor uplinking this data is initiating primary ATARS service

Note.—This notifies any on board logic to expect track assignment discontinuities.

Note.—*Structure of ODS Subfield*

Position	Number of bits	Subfield	Remarks
1–7	7	OGTC	
8–14	7	OSPD	
15–18	4	OTNR	
19–21	3	OACL	
22	1	SNIN	
23–24	2		Not assigned.

3.3.2.2.8 PDT: Position Data Subfield.

The Position Data Subfield (PDT) contains basic position information on a proximate or threat aircraft. The following subfields appear in PDT.

AEQP: ATARS Equipped, 1 bit, 23.

Coding

0=Encounter aircraft is not equipped for or is not currently receiving ATARS service.
1=Encounter aircraft is equipped for and is currently receiving ATARS service.

ALRL: Fine Relative Altitude, 3 bits, 10 through 12. Provides more precise information on the relative altitude of the encounter aircraft. Interpretation depends on coding of Altitude Zone, ALZN (see ALZN below).

Coding

Relative altitude zone ALZN	Fine relative altitude ALRL	LSB	Magnitude of relative altitude
0 or 2	0 to 6	200 feet	(200*ALRL) +600 feet.
0 or 2	7		If not part of Threat Message, 7=2600 feet. Otherwise use Relative Altitude Extension (3.3.2.2.10).
1 or 3	0 to 5	100 feet	100*ALRL feet.
1	6 or 7		Not assigned.
3	6		Altitude unknown.
3	7		Not assigned.

ALZN: Relative Altitude Zone, 2 bits, 8 and 9. Indicates the relative altitude zone of the encounter aircraft. The relative altitude is defined as the traffic altitude less own altitude.

Coding

0=Relative altitude .LT.−500 feet
1=Relative altitude .GE.−500 feet and relative altitude .LT. 0
2=Relative altitude .GT.−500 feet
3=(Relative altitude .GE. 0 and relative altitude .LE. 500 feet) *or* (altitude unknown)

ATCC: ATC Control, 1 bit, 22.

Coding

1=ATARS has not been notified that this aircraft is in communication with an air traffic controller
0=ATARS has been notified that this aircraft is in communication with an air traffic controller

CLBR: Clock Bearing, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.4.

CRSE: Compass Course, 3 bits, 19 through 21. Contains the compass course of the encounter aircraft as referenced to magnetic north at the DABS sensor.

Coding

0=North
1=Northeast
2=East
3=Southeast
4=South
5=Southwest
6=West
7=Northwest

FNBR: Fine Bearing, 3 bits, 5 through 7. Contains more resolution on the bearing of the encounter aircraft. The more precise bearing is obtained by adding the fine bearing to the corresponding clock bearing (CLBR).

Coding

The fine bearing is transmitted in two's complement notation with an LSB=3.75 degrees. The minimum and maximum values are −15 degrees and 11.25 degrees respectively.

FTAT: First Time Advisory Transmitted, 1 bit, 24. This subfield is as defined in 3.3.2.2.4.

RNG1: Range, 6 bits, 13 through 18. Contains the range to the encounter aircraft.

Coding

LSB = 0.3 NM. The minimum and maximum values are 0 NM and 18.9 NM respectively.

Note.—Structure of PDT Subfield

Position	Number of bits	Subfield	Remarks
1–4	4	CLBR	
5–7	3	FNBR	
8–9	2	ALZN	
10–12	3	ALRL	
13–18	6	RNG1	
19–21	3	CRSE	
22	1	ATCC	
23	1	AECP	
24	1	FTAT	

3.3.2.2.9 RAA: 12 Bit Restricted Airspace Advisory Subfield.

The 12 Bit Restricted Airspace Advisory Subfield (RAA) contains information indicating that own aircraft has entered restricted airspace or a terminal control area. The RAA is not uplinked for entry into a terminal control area if ATARS has been notified that the aircraft is controlled. The following subfields appear in RAA.

ASPT: Airspace Type, 4 bits, 5 through 8. Indicates the type of airspace penetration which has prompted the alert.

Coding

0 = Unspecified Airspace Type
1 = Restricted Area
2 = Terminal Control Area
3 = Prohibited Area
4–15 = Not assigned

CZSI: Class Zero Subfield Indicator, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.5.

FTAT: First Time Advisory Transmitted, 1 bit, 9. This subfield is defined in 3.3.2.2.4.

Note.—Structure of RAA Subfield

Position	Number of bits	Subfield	Remarks
1–4	4	CZSI	= 15.
5–8	4	ASPT	
9	1	FTAT	
10–12	3		Not assigned.

3.3.2.2.10 RAE: 18 Bit restricted Airspace Advisory Subfield.

Except for SUBN as defined below, the first 12 bits of an 18 Bit Restricted Airspace Advisory Subfield (RAE) are the same as the 12 Bits in RAA (3.3.2.2.9). The following subfields appear in RAE.

ASPT: Airspace Type, 4 bits, 5 through 8. This subfield is as defined in 3.3.2.2.9.

FTAT: First time Advisory Transmitted, 1 bit, 9. This subfield is as defined in 3.3.2.2.4.

SUBN: Subfield Indication, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.2.

Note.—Structure of RAE Subfield

Position	Number of bits	Subfield	Remarks
1–4	4	SUBN	= 15.
5–8	4	ASPT	
9	1	FTAT	
10–18	9		Not assigned.

3.3.2.2.11 RST: 1 Bit Restricted Airspace Status Subfield.

The 1 Bit Restricted Airspace Status Subfield (RST) indicates the information content in the last 26 bits of the MA field of an ATARS Auxiliary Advisories Message.

Coding

0 = Last 26 bits of MA field contain two 13 bit Obstruction Advisory Subfields (OBT)
1 = Last 26 bits of MA field contains a 26 bit restricted Airspace Advisory Subfield (RTD)

3.3.2.2.12 RTD: 26 Bit Restricted Airspace Advisory Subfield.

The 26 bit Restricted Airspace Advisory Subfield (RTD) provides a restricted airspace advisory for Class 1 and Class 2 users. The following subfields appear in RTD.

ASID: Restricted Airspace Identifier, 19 bits, 5 through 23. This subfield is meaningful only when the airspace type is a restricted area (ASPT = 1).

Coding

Bits 5 through 18 contain a binary coded integer. Bits 19 through 23 contain a letter suffix identified by alphabetic position, i.e., 1 = A, 2 = B, . . . 26 = Z.

ASPT: Airspace Type, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.9.

FTAT: First Time Advisory Transmitted, 1 bit, 24. This subfield is as defined in 3.3.2.2.4.

Note.—Structure of RTD Subfield

Position	Number of bits	Subfield	Remarks
1–4	4	ASPT	
5–23	19	ASID	
24	1	FTAT	
25–26	2		Not assigned.

3.3.2.2.13 SED: Start/End Data Subfield.

The Start/End Data Subfield (SED) contains information useful for initiating a proximate on-board track or ending a proximate or threat track on an encounter aircraft. The following subfields appear in SED.

ACAB: Aircraft Abbreviated Data, 9 bits, 16 through 24. This data subfield is reserved for descriptive information on the encounter aircraft.

ACLM: Aircraft Climb Performance Capability, 4 bits, 12 through 15.

Note.—This subfield indicates the climb capabilities of an aircraft in order to assist the ground ATARS equipment in selecting vertical resolution advisories.

The value of ACLM is fixed for a particular aircraft type. Assignments are not specified in this Standard.

GSPD: Groundspeed, 7 bits 2 through 8. Contains the groundspeed of the encounter aircraft.

Coding

For GSPD.LE.60, LSB = 10 knots and groundspeed is GSPD * 10 knots. For GSPD.GE.61, LSB = 30 knots and groundspeed is 600 knots + (GSPD–60) * 30 knots. The minimum and maximum values of groundspeed are 0 knots and 2610 knots respectively.

SEIN: Start/End Indicator, 1 bit, 1.

Coding

0 = First uplink of information about the encounter
1 = Encounter has ended

TRKN: Track Number, 3 bits, 9 through 11. This subfield contains the ATARS assigned track number for this aircraft. Range of values is from 0 to 7.

Note.—Structure of SED Subfield

Position	Number of bits	Subfield	Remarks
1	1	SEIN	
2–8	7	GSPD	
9–11	3	TRKN	
12–15	4	ACLM	
16–24	9	ACAB	

3.3.2.2.14 SIT: ATARS Site ID Subfield.

The ATARS Site ID Subfield (SIT) is uplinked as a subfield in an ATARS Resolution Message. It contains the ID of the ground ATARS site from which the ATARS Resolution Message originated.

Coding

0 = Not assigned
1 = ATARS Site A
2 = ATARS Site B
3 = ATARS Site C
4 = ATARS Site D
5–7 = Not assigned

3.3.2.2.15 SIX: 6 Bit Advisory Subfield.

The 6 Bit Advisory Subfield (SIX) contains one ATARS traffic advisory describing an encounter aircraft. This advisory can be either a proximity or a threat advisory. The following subfields appear in SIX.

ALZZ: Relative Altitude Zone for Class Zero, 2 bits, 5 and 6.

Coding

0 = altitude unknown
1 = relative altitude .LT. −500 feet
2 = relative altitude .GE. −500 feet *and* relative altitude .LE. +500 feet
3 = relative altitude .GT. +500 feet

CLBR: Block Bearing, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.4.

Note.—*Structure of SIX Subfield*

Position	Number of bits	Subfield	Remarks
1–4	4	CLBR	
5–6	2	ALZZ	

3.3.2.2.16 STD: Start Threat Data Subfield.

The Start Threat Data Subfield (STD) contains information useful to the ATARS avionics in initiating a track on a threat aircraft. The following subfields appear in STD.

ACAB: Aircraft Abbreviated Data, 9 bits, 16 through 24. This subfield is as defined in 3.3.2.2.13.

ACLM: Aircraft Climb Performance Capability, 4 bits, 12 through 15. This subfield is as defined in 3.3.2.2.13.

CONT: Continuation, 1 bit, 1.

Coding

0 = This is the first uplink of information about the encounter aircraft

1 = This threat encounter is a continuation of a proximate encounter that has transitioned to a threat encounter

GSPD: Groundspeed, 7 bits, 2 through 8. This subfield is as defined in 3.3.2.2.13.

TRKN: Track Number, 3 bits, 9 through 11. This subfield is defined in 3.3.2.2.13.

Note.—*Structure of STD Subfield*

Position	Number of bits	Subfield	Remarks
1	1	CONT	
2–8	7	GSPD	
9–11	3	TRKN	
12–15	4	ALCM	
16–24	9	ACAB	

3.3.2.2.17 TAE: 18 Bit Terrain Advisory Subfield.

The 18 Bit Terrain Advisory Subfield (TAE) contains information describing the proximity of own aircraft to terrain. The following subfields appear in TAE.

ARHT: Altitude Relative to Highest Terrain, bits, 5 through 10. Represents own aircraft altitude minus the altitude of the highest terrain found in the ATARS terrain map for the projected path of own aircraft. Hence, positive values indicate the estimated clearance of own aircraft's projected path from the highest terrain feature along the path.

Coding

The altitude relative to highest terrain is transmitted in two's complement notation with an LSB = 100 feet. The minimum and maximum values are −3200 feet and +3100 feet respectively.

FTAT: First Time Advisory Transmitted, 1 bit, 11. This subfield is defined in 3.3.2.2.4.

SUBN: Subfield Indicator, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.2.

Note.—*Structure of TAE Subfield*

Position	Number of bits	Subfield	Remarks
1–4	4	SUBN	= 13
5–10	6	ARHT	
11	1	FTAT	

3.3.2.2.18 TEA: 12 Bit Terrain Advisory Subfield.

Except for CZSI as defined below the 12 Bit Terrain Advisory Subfield (TEA) is the same as the first 12 bits in TAE (3.3.2.2.17). The following subfields appear in TEA.

ARHT: Altitude Relative to Highest Terrain, 6 bits, 5 through 10. This subfield is as defined in 3.3.2.2.17.

CZSI: Class Zero Subfield Indicator, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.5.

FTAT: First Time Advisory Transmitted, 1 bit, 11. This subfield is defined in 3.3.2.2.4.

Note.—*Structure of TEA Subfield*

Position	Number of bits	Subfield	Remarks
1–4	4	CZSI	= 13.
5–10	6	ARHT	
11	1	FTAT	
12	1		Not assigned.

3.3.2.2.19 TER: 8 Bit Terrain Advisory Subfield

The 8 bit Terrain Advisoiry Subfield (TER) provides a terrain advisory for Class 1 and Class 2 users. The following subfields appear in TER.

TERS: Terrain Advisory Status, 2 bits, 1 and 2. Indicates the status of the terrain advisory information in this subfield.

Coding

0 = No terrain advisory exists

1 = Terrain advisory exists and is being transmitted for first time

2 = Terrain advisory exists and is being refreshed

3 = Not assigned

ARHT: Altitude Relative to Highest Terrain, 6 bits, 3 through 8. This subfield is as defined in 3.3.2.2.17. The data contained in ARHT is meaningful only when a terrain advisory exists (i.e., TERS = 1 or 2).

Note.—*Structure of TER Subfield*

Position	Number of bits	Subfield	Remarks
1–2	2	TERS	
3–8	6	ARHT	

3.3.2.2.20 THD: Threat Data Subfield

The Threat Data Subfield (THD) contains information which, together with the Position Data Subfield (PDT), is used to describe a threat aircraft. The following subfields appear in THD.

AEXT: Relative Altitude Extension, 3 bits, 11 through 13. Indicates the magnitude of the relative altitude of the threat aircraft when the magnitude of the threat aircraft's relative altitude is greater than or equal to 2000 feet. Relative Altitude Extension is used only when the magnitude of the relative altitude of the associated Position Data Subfield equals 2000 feet (ALZN = 0 or 2 and ALRL = 7).

Coding

LSB = 500 feet. The magnitude of the relative altitude is 2000 feet + (500 * AEXT) feet. The minimum and maximum values of AEXT are 2000 feet and 5500 feet respectively.

FNHD: Fine Heading, 4 bits, 14 through 17. Provides more resolution on the course of encounter aircraft then is contained in the Position Data Subfield. The more precise course of the aircraft is obtained by adding the fine heading to the corresponding compass course (CRSE) in the Position Data Subfield.

Coding

The fine heading is transmitted in two's complement notation (with clockwise being positive) with an LSB = 2.8125 degrees. The minimum and maximum values are −22.5 degrees and 19.6875 degrees respectively.

PHMD: Predicted Horizontal Miss Distance, 4 bits, 1 through 4. Contains the predicted horizontal miss distance between own aircraft and the threat aircraft, as determined by a non-turning projection of the instantaneous relative aircraft motion. If the sign of PHMD is positive, then the line between the aircraft positions is projected to rotate clockwise as seen from above the aircraft. If the sign is negative then the line is projected to rotate counter-clockwise. Its magnitude is the projected horizontal miss distance at closest approach.

Coding

The predicted horizontal miss distance is transmitted in two's complement notation with an LSB = 0.2 NM. The minimum and maximum values are −1.6 NM and 1.4 NM respectively.

RESL: Resolution Advisory Bit, 1 bit, 23.

Coding

0 = Threat aircraft described in this message is not causing own aircraft to receive an ATARS Resolution Message

1 = Threat aircraft described in this message is causing own aircraft to receive an ATARS Resolution Message

TNTY: Turn Type of Encounter Aircraft, 2 bits, 18 and 19. Indicates the turn status of the encounter aircraft.

Coding

0 = Not assigned

1 = Straight

2 = Turning left

3 = Turning right

TRKN: Track Number, 3 bits, 20 through 22. This subfield is as defined in 3.3.2.2.13.

VSPD: Vertical Speed of Encounter Aircraft, 6 bits, 5 through 10. Contains the vertical speed of the encounter aircraft.

Coding

The vertical speed of encounter aircraft is transmitted in two's complement notation with an LSB=200 FPM. The minimum and maximum values are −6400 FPM and +6200 FPM respectively.

Note.—Structure of THD Subfield

Position	Number of bits	Subfield	Remarks
1–4	4	THMD	
5–10	6	VSPD	
11–13	3	AEXT	
14–17	4	RNHD	
18–19	2	TNTY	
20–22	3	TRGN	
23	1	RESL	
24	1		Not assigned.

3.3.2.2.21 TPA: 12 Bit Threat/proximity Advisory Subfield.

The 12 Bit Threat/Proximity Advisory Subfield (TPA) contains 12 bits of information describing an encounter aircraft. The following subfields appear in TPA.

ALUN: Altitude Unknown Indicator, 1 bit, 7. This bit indicates when the altitude of the traffic is unknown to ATARS.

Coding

0=Altitude unknown
1=Altitude known

ALZN: Relative Altitude Zone, 2 bits, 5 and 6. This subfield is as defined in 3.3.2.2.6.

CRSE: Compass Course, 3 bits, 8 through 10. This subfield is as defined in 3.3.2.2.6.

CZSI: Class Zero Subfield Indication, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.5.

Note.—A 12 Bit Threat/Proximity Advisory Subfield is identified by CZSI=1 through 12. In this case, CZSI also indicates clock bearing and the coding for CZSI is the same as that for CLBR in 3.3.2.2.4.

FTAT: First Time Advisory Transmitted, 1 bit, 11. This subfield is as defined in 3.3.2.2.4.

TPIN: Threat/Proximity Indicator, 1 bit, 12.

Coding

0=This advisory is a proximity advisory
1=This advisory is a threat advisory

Note.—Structure of TPA Subfield

Position	Number of bits	Subfield	Remarks
1–4	4	CZSI	
5–6	2	ALZN	
7	1	ALUN	
8–10	3	CRSE	
11	1	FTAT	
12	1	TPIN	

3.3.2.2.22 TPE Bit Threat/Proximity Advisory Subfield.

The 18 Bit Threat/Proximity Subfield (TPE) contains information describing the encounter aircraft that has been designated as either a threat or proximate aircraft relative to own aircraft. The following subfields appear in TPE.

ALRZ: Fine Relative Altitude for Class 0, 3 bits, 7 through 9. Provides more precise information on the relative altitude of the encounter aircraft. Interpretation depends upon coding of Altitude Zone, ALZN (3.3.2.2.6).

Coding

Relative altitude zone ALZN	Fine relative altitude for class 0, ALRZ	LSB	Magnitude of relative altitude
0 or 1	0 to 7	400 feet	(400*ALRZ) + 800 feet.
1 or 2	0 to 6	100 feet	100*ALRZ feet.
1	6 or 7		Not assigned.
2	6		
3	7		Not assigned.

ALZN: Altitude Zone, 2 bits, 5 and 6. This subfield is as defined in 3.3.2.2.6.

CRSE: Compass Course, 3 bits, 14 through 16. This subfield is as defined in 3.3.2.2.6.

FTAT: First Time Advisory Transmitted, 1 bit, 17. This subfield is as defined in 3.3.2.2.4.

RNGE: Range, 4 bits 10 through 13. Contains the range to the encounter aircraft.

Coding

LSB=0.3 NM. The minimum and maximum values are 0 NM and 4.5 NM respectively.

SUBN: Subfield Indicator, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.2.

Note.—An 18 Bit Threat/Proximity Advisory Subfield is identified by SUBN=1 through 12. In this case, SUBN also indicates clock bearing.

TPIN: Threat/Proximity Indicator, 1 bit, 18. This subfield is as defined in 3.3.2.2.21.

Note.—Structure of TPE Subfield

Position	Number of bits	Subfield	Remarks
1–4	4	SUBN	
5–6	2	ALZN	
7–9	3	ALRZ	
10–13	4	RNGE	
14–16	3	CRSE	
17	1	FTAT	
18	1	TPIN	

3.3.2.2.23 TRA: Threat/Proximity with Resolution Advisory Subfield.

The Threat/Proximity with Resolution Advisory Subfield (TRA) contains information describing the most critical encounter. The TRA Subfield is contained only within an ATARS Resolution Message. If there is an active resolution advisory contained in the ATARS Resolution Message, i.e. if COL ±0, then any advisory information contained in TRA refers to the most critical encounter which is causing a bit or bits to be set in COL. If there is no active resolution advisory contained in the ATARS Resolution Message, i.e. COL=0, the TRA refers to the most critical encounter.

The following subfields appear in TRA.

ABQP: ATARS Equipped, 1 bit, 18. This subfield is as defined in 3.3.2.2.6.

ALRZ: Fine Relative Altitude for Class 0, 3 bits, 7 through 9. This subfield is as defined in 3.3.2.2.22.

ALZN: Altitude Zone, 2 bits, 5 and 6. This subfield is as defined in 3.3.2.2.6.

ATCC: ATC Control, 1 bit, 17. This subfield is as defined in 3.3.2.2.6.

CLBR: Clock Bearing, 4 bits, 1 through 4. This subfield is as defined in 3.3.2.2.4.

CRSE: Compass Course, 3 bits, 14 through 16. This subfield is as defined in 3.3.2.2.6.

RNGE: Range, 4 bits, 10 through 13. This subfield is as defined in 3.3.2.2.22.

TPIN: Threat/Proximity Indicator, 1 bit, 19. This subfield is as defined in 3.3.2.2.21.

Note.—Structure of TRA Subfield

Position	Number of bits	Subfield	Remarks
1–4	4	CLBR	
5–6	2	ALZN	
7–9	3	ALRZ	
10–13	4	RNGE	
14–16	3	CRSE	
17	1	ATCC	
18	1	ABQP	
19	1	TPIN	

3.3.2.3. MB Message, Comm–B.

Airborne ATARS equipments use the MB field of Comm–B replies (3.3.1.4) to transmit to ground ATARS equipment the RAR Reply Message to ATARS, the RAR Busy Message to ATARS, ATARS Extended Data, and Extended Capability Report information.

3.3.2.3.1 Subfields in MB for an RAR Reply Message to ATARS.

The technique for encoding the RAR Reply Message to ATARS is described in 4.3.2.1.

BDS: B-Definition Subfield, 8 bits, 33 through 40 (3.3.1.4.1). An RAR reply message is identified by BDS1=3 and BDS2=0, the combination of which is equivalent to BDS=48.

H01: RAR Column 1 Horizontal Advisories, 3 bits, 41 through 43. Contains the horizontal resolution advisories entry in column 1 (ATARS site A column) of the RAR.

Coding

0=No horizontal resolution advisories
1=Not assigned
2=Turn left
3=Turn right
4=Don't turn left
5=Don't turn right
6=Not assigned
7=Don't turn left and don't turn right

H02: RAR Column 2 Horizontal Advisories, 3 bits, 49 through 51. Contains the horizontal resolution advisories entry in column 2 (ATARS site B column) of the RAR.

Coding

As specified for H01.

H03: RAR Column 3 Horizontal Advisories, 3 bits, 57 through 59. Contains the horizontal resolution advisories entry in column 3 (ATARS site C column) of the RAR.

Coding

As specified for H01.

H04: RAR Column 4 Horizontal Advisories, 3 bits, 65 through 67. Contains the horizontal resolution advisories entry in column 4 (ATARS site D column) of the RAR.

Coding

As specified for H01.

H05: RAR Column 5 Horizontal Advisories, 3 bits, 73 through 75. Contains the horizontal resolution advisories entry in column 5 (Own BCAS column). This subfield is always zero for an ATARS-only aircraft.

H06: RAR Column 6 Horizontal Advisories, 3 bits, 81 through 83. Contains the horizontal resolution advisories entry in column 6 (All Other BCAS column) of the RAR.

Coding

As specified for H01.

VE1: RAR Column 1 Vertical Advisories, 5 bits, 44 through 48. Contains the vertical resolution advisories entry in column 1 (ATARS site A column) of the RAR.

Coding

0 = No vertical resolution advisories
1–3 = Not assigned
4 = Don't descend
5 = Don't descend faster than 500 FPM
6 = Don't descend faster than 1000 FPM
7 = Don't descend faster than 2000 FPM
8 = Don't climb
9 = Don't climb faster than 500 FPM
10 = Don't climb faster than 1000 FPM
11 = Don't climb faster than 2000 FPM
12 = Not assigned
13 = Climb
14 = Not assigned
15 = Descend
16 = Don't descend and don't climb
17 = Don't descend and don't climb faster than 500 FPM
18 = Don't descend and don't climb faster than 1000 FPM
19 = Don't descend and don't climb faster than 2000 FPM
20 = Don't descend faster than 500 FPM and don't climb
21 = Don't descend faster than 500 FPM and don't climb faster than 500 FPM
22 = Don't descend faster than 500 FPM and don't climb faster than 1000 FPM
23 = Don't descend faster than 500 FPM and don't climb faster than 2000 FPM
24 = Don't descend faster than 1000 FPM and don't climb
25 = Don't descend faster than 1000 FPM and don't climb faster than 500 FPM
26 = Don't descend faster than 1000 FPM and don't climb faster than 1000 FPM
27 = Don't descend faster than 1000 FPM and don't climb faster than 2000 FPM
28 = Don't descend faster than 2000 FPM and don't climb
29 = Don't descend faster than 2000 FPM and don't climb faster than 500 FPM
30 = Don't descend faster than 2000 FPM and don't climb faster than 1000 FPM
31 = Don't descend faster than 2000 FPM and don't climb faster than 2000 FPM

VE2: RAR Column 2 Vertical Advisories, 5 bits, 52 through 56. Contains the vertical resolution advisories entry in column 2 (ATARS site B column) of the RAR.

Coding

As specified for VE1.

VE3: RAR Column 3 Vertical Advisories, 5 bits, 60 through 64. Contains the vertical resolution advisories entry in column 3 (ATARS site C column) of the RAR.

Coding

As specified for VE1.

VE4: RAR Column 4 Vertical Advisories, 5 bits, 68 through 72. Contains the vertical resolution advisories entry in column 4 (ATARS site D column) of the RAR.

Coding

As specified for VE1.

VE5: RAR Column 5 Vertical Advisories, 5 bits, 76 through 80. Contains the vertical resolution advisories entry in column 5 (Own BCAS column). This subfield is always zero for an ATARS-only aircraft.

VE6: RAR Column 6 Vertical Advisories, 5 bits, 84 through 88. Contains the vertical resolution advisories entry in column 6 (All Other BCAS column) of the RAR.

Coding

As specified for VE1.

Note 1.—Structure of MB for an RAR reply message to ATARS.

84–88	5	VE6	

Note 2.—An RAR reply message with all H0x and VEx subfields containing zeroes indicates an empty RAR.

3.3.2.3.2 Subfields in MB for an RAR Busy Message to ATARS

BDS: B-Definition Subfield, 8 bits, 33 through 40 (3.3.1.4.1). An RAR Busy Message to ATARS is identified by BDS1 = 3 and BDS2 = 1, the combination of which is equivalent to BDS = 49.

Note.—*Structure of MB for RAR Busy Message to ATARS*

Position	Number of bits	Subfield	Remarks
33–36	4	BDS1	=3
37–40	4	BDS2	=1
41–88	48		Not assigned.

3.3.2.3.3. Subfields in MB for an ATARS Extended Data Message.

ATARS Extended Data is downlinked in the MB field in order to provide specified information which is used by the ground ATARS equipment in providing ATARS service. This field is downlinked upon ground-initiated request as specified in ref. A: 4.11.1.1.

BDS: B-Definition Subfield, 8 bits, 33 through 40 (3.3.1.4.1). An ATARS Extended Data Message is identified by BDS1 = 3 and BDS2 = 2, the combination of which is equivalent to BDS = 50.

CLM: Aircraft Climb Performance Capability, 4 bits, 41 through 44.

Note.—This subfield indicates the climb capabilities of own aircraft in order to assist the ground in selecting vertical resolution advisories.

The value of CLM is fixed for a particular aircraft type. Assignments are not specified in this Standard.

Note.—*Structure of MB for ATARS Extended Data Message*

Position	Number of bits	Subfield	Remarks
33–36	4	BDS1	=3.
37–40	4	BDS2	=2.
41–44	4	CLM	
45–88	44		Not assigned.

3.3.2.2.4. Subfields in MB for an Extended Capability Report

The following subfields appear in MB for an Extended Capability Report.

Note.—A summary of the complete MB subfield structure for an Extended Capability Report is given in 3.3.1.4.2.

ARC: ASA Resolution Capability, 2 bits, 69 through 70. Contains ASA resolution capability of aircraft.

Coding

0 = No ASA resolution capability
1 = ATARS only
2 = Active BCAS
3 = Not assigned

ATA: ATARS Service Class, 3 bits, 66 through 68. Contains class of ATARS service which aircraft is requesting.

Coding

0 = ATARS Class 0
1 = ATARS Class 1
2 = ATARS Class 2
3–7 = Not assigned

Note.—The class of service assigned to each ATARS airborne installation will be the lowest class that allows full functioning of all capabilities of the installed avionics.

3.3.2.4 MU Message, Special Interrogation.

BCAS uses the MU field (3.3.1.5) of a long special surveillance interrogation to transmit both an RAR Request Message and a BCAS Resolution Message to ATARS/BCAS and ATARS-only aircraft for air-air coordination.

3.3.2.4.1 Subfields in MU for an RAR Request Message and BCAS Resolution Message

An RAR Request Message and a BCAS Resolution Message share a common MU message format and are distinguished by the setting of the LCK subfield (see ref. B: 3.3.2.7.1). The following subfields appear in MU for an RAR Request Message and a BCAS Resolution Message and are ATARS-related.

AR1: Add Vertical Resolution Advisory, 4 bits, 47 through 50. This field is used by BCAS airborne equipment to post vertical maneuver restrictions in the RAR of ATARS-equipped aircraft. These restrictions are entered in the "All Other BCAS" column of the RAR. These restrictions are used subsequently by the ground ATARS equipment in selecting ATARS resolution advisories.

Coding

0=No complement to be added
1=Not assigned
2=Don't descend
3-6=Not assigned
7=Don't climb
8-15=Not assigned

AR2: Add Horizontal Resolution Message, 4 bits, 55 through 58. This field is used by BCAS airborne equipment to post horizontal maneuver restrictions in the RAR of ATARS-equipped aircraft. These restrictions are entered in the "All Other BCAS" column of the RAR. These restrictions are used subsequently by the ground ATARS equipment in selecting ATARS resolution advisories.

Coding

0=No complement to be added
1-12=Not assigned
13=Don't turn left
14=Don't turn right
15=Not assigned

Note.—In RAR Request Messages and BCAS Resolution Messages transmitted by Active BCAS, horizontal resolution is not used and AR2 is set to all zeroes. This field is defined to provide for future versions of BCAS which may use horizontal resolution (e.g., Full BCAS).

DR1: Delete Vertical Resolution Advisory, 4 bits, 43 through 46. This field is used by BCAS airborne equipment to post horizontal maneuver restrictions in the RAR of ATARS-equipped aircraft. These restrictions are deleted from the "All Other BCAS" column of the RAR.

Coding

0=No complement to be deleted
1=Not assigned
2=Don't descend
3-6=Not assigned
7=Don't climb
8-15=Not assigned

DR2: Delete Horizontal Resolution Advisory, 4 bits, 51 through 54. This field is used by a BCAS airborne equipment to delete horizontal maneuver restrictions in the RAR of ATARS-equipped aircraft. These restrictions are deleted from the "All Other BCAS" column of the RAR.

Coding

0=No complement to be deleted
1-12=Not assigned
13=Don't turn left
14=Don't turn right
15=Not assigned

Note.—In RAR Request Messages and BCAS Resolution Messages transmitted by Active BCAS, horizontal resolution is not used and DR2 is set to all zeroes. This field is defined to provide for future versions of BCAS which may use horizontal resolution (e.g., Full BCAS).

UDS: U-Definition Subfield, 8 bits, 33 through 40. Defines the data content and coding in the remainder of MU. For convenience in coding, UDS is expressed in two groups of 4 bits each, UDS1, 33 through 36, and UDS2, 37 through 40. UDS1 defines the destination of the MU message and UDS2 defines the specific message type. The ATARS avionics is the destination for long special surveillance interrogation MU Messages containing the UDS1=3 code in MU.

RAR Request Messages and BCAS Resolution Message are identified by UDS=3 and UDS1=1, the combination of which is equivalent to UDS=49.

Note.—*Structure of MU for an RAR Request Message and BCAS Resolution Message*

Position	Number of bits	Subfield	Remarks
33-36	4	UDS1	=3.
37-40	4	UDS2	=1.
41	1	LCK	
42	1	MTB	
43-46	4	DR1	
47-50	4	AR1	
51-54	4	DR2	
55-58	4	AR2	
59-84	6		Not assigned.
85-88	24	DID	

The LCK, MTB, and DID subfields are defined in ref. B: 3.3.2.7.1 and are not ATARS-related.

3.3.2.5 MV Message, Special Reply.

ATARS-equipped aircraft use the MV field (3.3.1.6) of a long special surveillance reply to transmit an RAR Reply Message to BCAS and an RAR Busy Message to BCAS.

3.3.2.5.1 Subfields in MV for an RAR Reply Message to BCAS.

The technique for encoding the RAR Reply Message to BCAS is described in 4.3.1. The following subfields appear in MV for an RAR Reply Message to BCAS and are ATARS-related.

Note.—The structure and content of the RAR Reply Message to BCAS parallels that of the RAR Reply Message to ATARS (3.3.2.3.1).

HO1: RAR Column 1 Horizontal Advisories, 3 bits, 41 through 43. This subfield is as defined in 3.3.2.3.1.
HO2: RAR Column 2 Horizontal Advisories, 3 bits, 49 through 51. This subfield is as defined in 3.3.2.3.1.
HO3: RAR Column 3 Horizontal Advisories, 3 bits, 57 through 59. This subfield is as defined in 3.3.2.3.1.
HO4: RAR Column 4 Horizontal Advisories, 3 bits, 65 through 67. This subfield is as defined in 3.3.2.3.1.
HO5: RAR Column 5 (Own BCAS Column) Horizontal Advisories, 3 bits, 73 through 75. This subfield is as defined in 3.3.2.3.1.
HO6: RAR Column 6 Horizontal Advisories, 3 bits, 81 through 83. This subfield is as defined in 3.3.2.3.1.
VDS: V-Definition Subfield, 8 bits, 33 through 40. Defines the data content and coding in the remainder of MV. For convenience in coding, VDS is expressed in two groups of 4 bits each, VDS1, 33 through 36, and VDS2, 37 through 40. VDS1 defines the source of the MV message and VDS2 defines the specific message type from that source. The ATARS avionics is a source of long special surveillance reply MV messages containing the VDS1=3 code in MV.

An RAR Reply Message to BCAS is identified by VDS1=3 and VDS2=0, the combination of which is equivalent to VDS=48.

VE1: RAR Column 1 Vertical Advisories, 5 bits, 44 through 48. This subfield is as defined in 3.3.2.3.1.
VE2: RAR Column 2 Vertical Advisories, 5 bits, 52 through 56. This subfield is as defined in 3.3.2.3.1.
VE3: RAR Column 3 Vertical Advisories, 5 bits, 60 through 64. This subfield is as defined in 3.3.2.3.1.
VE4: RAR Column 4 Vertical Advisories, 5 bits, 68 through 72. This subfield is as defined in 3.3.2.3.1.
VE5: RAR Column 5 (Own BCAS Column) Vertical Advisories, 5 bits, 76 through 80. This subfield is as defined in 3.3.2.3.1.
VE6: RAR Column 6 Vertical Advisories, 5 bits, 84 through 88. This subfield is as defined in 3.3.2.3.1.

Note 1.—Structure of MV for an RAR reply message to BCAS.

Structure of MV for an RAR Reply Message to BCAS

Position	Number of bits	Subfield	Remarks
33-36	4	VDS1	=3.
37-40	4	VDS2	=0.
41-43	3	HO1	
44-48	5	VE1	
49-51	3	HO2	
52-56	5	VE2	
57-59	3	HO3	
60-64	5	VE3	
65-67	3	HO4	
68-72	5	VE4	
73-75	3	HO5	
76-80	5	VE5	
81-83	3	HO6	
84-88	5	VE6	

Note 2.—An RAR Reply Message to BCAS with all HOx and VEx subfields containing all zeroes indicates an empty RAR.

3.3.2.5.2 Subfields in MV for an RAR Busy Message to BCAS

VDS: V-Definition Subfield, 8 bits, 33 through 40 (3.3.2.4.1). An RAR Busy Message to BCAS is identified by VDS1=3 and VDS2=1, the combination of which is equivalent to VDS=49.

Note.—*Structure of MV for RAR Busy Message to BCAS*

Position	Number of bits	Subfields	Remarks
33-36	4	VDS1	=3.
37-40	4	VDS2	=1.
41-88	48		=Not assigned.

The structure of the MV field for an RAR Busy Message to BCAS is identical to the

structure of the MB field for an RAR Busy Message to ATARS (3.3.2.3.2).

3.3.2.6 SL BCAS Sensitivity Level Report.

Downlink, 3 bits, 10 through 12. Appears in short special surveillance reply, DF=0. This field is always set to all zeroes by ATARS-only aircraft.

3.3.2.7 UM Utility Message

Airborne ATARS equipment use the UM field (3.3.1.9) to transmit to ground ATARS equipment a pilot request for an altitude echo advisory.

3.3.2.7.1 Subfield in UM for ATARS.

The following subfield appears in UM for ATARS.

AER: Altitude Echo Request Bit, 1 bit, 14.

Coding

0=No pilot request for an altitude echo advisory
1=Pilot request for an altitude echo advisory

Note.—A summary of the complete subfield structure for UM for ATARS is given in 3.3.1.9.

4. Protocol

4.1 Protocol for ATARS Class O Service

This section describes the protocols under which ATARS advisories for Class O users are uplinked and the relevant rules for structuring the ATARS messages for this class using the subfields described in Section 3. In addition, the protocol governing the downlinking at ATARS Extended Data from Class O users is described.

4.1.1 Packet Structure for Class O Service

The set of all ATARS messages generated by a single ATARS site for an aircraft on a given complete update is call a *packet*. For Class O service a packet consists of 1 or 2 Comm-A uplink messages using the Class O formats as listed in Table 3.3–2.

Note.—BCAS-equipped aircraft may receive ATCRBS Track Block Messages (ref. B: 4.4.1) in addition to the above messages.

If a resolution advisory is contained in the packet, then the first message is the ATARS Resolution Message. Otherwise, the first message is the Three Advisories Message. In either case, if the number of ATARS advisories to be transmitted in the packet exceeds the capacity of the first message, then the remaining advisories will be formatted into the Six Advisories Message.

For Class O service, a packet is complete after either 1) a Six Advisories Message is received, 2) 0.1 seconds has elapsed since receipt of the first message of the packet, or 3) an ATARS message containing a null advisory is received. The ATARS output device is to be updated with the packet within 1.0 second of the time the packet is complete.

4.1.1.1 Priority Ordering.

All advisories within an ATARS message are priority ordered by the ground ATARS equipment with the advisory inserted into the first data subfield to be transmitted having the highest priority and each subsequent advisory lesser priority.

ATARS messages within a single packet are ordered in terms of priority by ATARS and are forwarded to the DABS sensor for delivery in order of ATARS priority.

Note.—This results in messages being transmitted in order of ATARS priority. Failure to receive a technical acknowledgement from the intended recipient aircraft will result in re-transmission of the unacknowledged message prior to transmission of next (lower priority) message. Thus, if for any reason the DABS sensor is able to deliver only a portion of the complete packet, the messages with higher priorities will have been delivered.

4.1.1.2 Limitation on Number of Advisories in each Packet.

If the ground ATARS logic generates more ATARS advisories than can be inserted into one packet, the lower priority advisories will not be uplinked.

Note.—This means that for Class O, a maximum of 9 ATARS advisories can be uplinked. When there is a resolution advisory, a maximum of 8 ATARS traffic and auxiliary advisories can be uplinked (in addition to the resolution advisory). Future classes of ATARS are not necessarily constrained by these limits.

4.1.2 Protocol for Uplinking ATARS Advisories

4.1.2.1 ATARS Sites at which Advisories May Originate.

Resolution advisories originate at any ground ATARS site that has assumed responsibility for the particular conflict. ATARS traffic advisories and ATARS auxiliary advisories originate only at the ground ATARS site that has been designated as primary for the aircraft.

4.1.2.2 Resolution Advisory Protocols.

Each message packet contains at most one ATARS Resolution Message which specifies the ATARS resoultion resulting from all the conflicts for which the sensor is responsible. Resolution advisories are uplinked to ATARS equipped aircraft by the responsible DABS/ATARS site(s) on each update cycle in which ground ATARS logic determines that criteria for resolution have been satisfied.

4.1.2.2.1 Protocol for Clearing Commands.

After each period of time in which commands form a site are active (i.e., COL=O), that site will generate an ATARS Resolution Message with COL=O to delete all command from the site. When COL=O, any traffic advisory contained in the TRA subfield is no longer associated with resolution advisorties, and can be determined to be proximity or threat advisory using the TPIN subfield.

4.1.2.3 Traffic Advisory Protocols.

The primary DABS/ATARS site uplinks a traffic advisory to an ATARS equipped aircraft on each update cycle in which ground ATARS equipment determines the incounter aircraft to have satisfied criteria for advisory issuance. The traffic advisory is formatted as either a proximity advisory or threat advisory in accordance with criteria established by ground ATARS equipment. When an ATARS Resolution Message is generated by the primary sensor, the associated TRA subfield contains a traffic advisory for the most critical threat which is causing the resolution advisory. If the ATARS Resolution Message is generated by a DABS/ATARS site which is not primary, then the associated TRA and TPA subfields will not contain any advisories.

4.1.2.4 Altitude Echo Advisory Protocols.

An altitude echo advisory is uplinked by the primary DABS/ATARS site:
(1) upon initiation of ATARS service,
(2) when requested by the pilot, and
(3) periodically while the aircraft is within the ATARS service volume.

A pilot request for an altitude echo advisory is indicated by setting AER=1 in the UM field for ATARS. The protocol for downlinking this field is described in ref. A: 4.18.2.2. The altitude echo advisory is formatted into an 18 bit AEZ Subfield.

4.1.2.5 Terrain Advisory Protocols.

A terrain advisory is uplinked by the primary DABS/ATARS site on each update cycle in which ATARS determines the aircraft to be in potential conflict with the terrain. A terrain advisory is formatted into an 18 bit TAE Subfield or a 12 bit TEA Subfield.

4.1.2.6 Obstruction Advisory Protocols.

An obstruction advisory is uplinked by the primary DABS/ATARS site on each update cycle in which ATARS determines the aircraft to be in potential conflict with an obstruction. An obstruction advisory is formatted into the 18 bit OAE Subfield or a 12 bit OBA Subfield.

4.1.2.7 Restricted Airspace Advisory Protocols.

A restricted airspace advisory is uplinked by the primary DABS/ATARS site on each update cycle in which ATARS determines that the aircraft is within a region of airspace not known by ATARS to be authorized for that aircraft. A restricted airspace advisory is formatted into an 18 bit RAE Subfield or a 12 bit RAA Subfield.

4.1.3 Protocol for Downlinking ATARS Extended Data

The ATARS Extended Data Subfield is requested by the ground ATARS equipment when ATARS service is first initiated. This request is communicated to the airborne ATARS equipments using the extended data readout protocol specified in ref. A: 4.11.1; 4.11.1.1. Specifically, upon receipt of a surveillance or Comm-A interrogation, UF=4, 5, 20, or 21, with RR=18, DI=7, and RRS=2 in the associated SD field, the airborne ATARS equipment responds with an ATARS Extended Data Message in the corresponding Comm-B reply.

4.2 Protocol for ATARS Class 1 and 2 Services

This section describes the protocols under which ATARS advisories for Class 1 and 2 users are to be uplinked and the relevant rules for structuring the ATARS messages for these classes using the subfields described in Section 3. In addition, the protocol governing the downlinking of ATARS Extended Data from Class 1 and 2 users is described.

4.2.1 Packet Structure for Classes 1 and 2 Service

The set of all ATARS messages generated by a single ATARS site for a given aircraft on a complete update is called a *packet*. For Class 1 and 2 service, a packet consists of one or more Comm-A uplink messages using the Class 1 and 2 formats as listed in Table 3.3–2.

Note.—BCAS-equipped aircraft may receive ATCRBS Track Block Messages (ref. B: 4.4.1) in addition to the above messages.

For Class 1 and 2 service, a packet is complete when 0.1 seconds has elasped since receipt of the first message in a packet. The ATARS output device is to be updated with the packet within 1.0 seconds of the time the packet is complete.

4.2.1.1 Priority Ordering.

For Class 1 and 2 service, all advisory subfields within a single packet are ordered in terms of ATARS priority by the ground ATARS equipment with the advisory inserted into the first transmitted subfield having the highest priority and each subsequent advisory lesser priority. For Class 1 and 2 the TRA and TPA subfields in the ATARS Resolution Message are formatted according to protocols for ATARS Class 0. The information in these subfields is largely redundant with more complete information in the PDT subfields which will be transmitted later in the same packet. This use of the TRA and TPA subfields does not affect the number or ordering of the 24 bit subfields.

All messages within a single packet are ordered in terms of ATARS priority as determined by the ground ATARS equipment and are then forwarded to the DABS ground equipment for delivery in order of ATARS priority.

Note.—This results in messages being transmitted in order of ATARS priority. Failure to receive a technical acknowledgement from the intended recipient aircraft will result in re-transmission of the message prior to transmission of the next (lower priority) message. Thus, if for any reason the DABS ground equipment is able to deliver only a portion of the complete packet, the messages with higher priority will have been delivered. The first advisory received by the aircraft is the most critical.

4.2.1.2 Limitation on Number of Traffic Advisories in Each Packet.

In a given packet, traffic advisory information is limited to only those encounter aircraft associated with the active track numbers.

Note.—This limits the maximum number of encounter aircraft associated with the packet to eight for Classes 1 and 2. Track assignments for future classes of ATARS are not constrained by these assignments.

4.2.1.2.1 Track Number Assignment.

Once a track is activated, the track number utilized by a sensor will remain associated with the same encounter aircraft until that aircraft is dropped from the packet.

4.2.1.2.2 Track Handoff.

The handoff procedures for transferring ATARS responsibility from one sensor to another will provide for continuity in track assignments only for threat encounters that have a conflict table stored in the ground ATARS computer (i.e., encounters identified as requiring resolution advisories). Continuity in track assignments during handoff is not provided for other encounters.

4.2.2 Protocol for Uplinking ATARS Advisories

The criteria for the issuance of traffic advisories, resolution advisories and auxiliary advisories to Class 1 and 2 users by ground ATARS equipment are the same as for Class 0 users. This section describes the protocol associated with uplinking each of the data subfields which are used in providing Class 1 and 2 services by the primary ATARS site. The locations of the data subfields within the ATARS uplink messages are presented in Table 3.3–2.

4.2.2.1 Protocol for ODS, Own Data Subfield.

The Own Data Subfield (ODS) is not uplinked for Class 1 service. For Class 2 service, the Own Data Subfield is scheduled 1) upon initiation of ATARS service and 2) whenever an active track exists and the previous own data is obsolete according to error tolerances established in the ground ATARS equipment.

4.2.2.2 Protocol for PDT, Position Data Subfield.

For Class 1 and 2 service, each packet contains one Position Data Subfield (PDT) for each active track.

4.2.2.3 Protocol for SED, Start/End Data Subfield.

The Start/End Data Subfield (SED) is not uplinked for Class 1 service. For Class 2 service a Start/End Data Subfield is scheduled whenever a track is initiated for a proximate aircraft. This subfield is also uplinked whenever a track, either proximate or threat, is terminated. However, if all eight track numbers are in use and another encounter aircraft is detected, the ground sensor will reassign the track number of the lowest ranking encounter to the new higher ranking encounter aircraft without sending s Start/End Data Subfield to terminate the lower ranking encounter track. The Start/End Subfield uplinked to initiate the new track will then serve to terminate the old track with the same track number.

4.2.2.4 Protocol for STD, Start Threat Data Subfield.

The Start Threat Data Subfield (STD) is not uplinked for Class 1 service. For Class 2 service one Start Threat Data Subfield is scheduled whenever a threat track is initiated, and either no Start/End Data Subfield was previously transmitted to start the track or the information contained in the Start/End Data Subfield previously transmitted is obsolete.

4.2.2.5 Protocol for THD, Threat Data Subfield.

For Class 1 and 2 service, one Threat Data Subfield (THD) is scheduled in each packet for each active track with a threat status. The Position Data Subfield (PDT) of the Threat Message is associated with the aircraft described by the THD subfield in the same message.

4.2.2.6 Protocol for AEC, Altitude Echo Advisory Subfield

The Altitude Echo Advisory Subfield (AEC) is scheduled for uplink

(a) upon initiation of ATARS service

(2) when requested by the pilot

(3) periodically while the aircraft is within the ATARS service volume.

A pilot request for an altitude echo advisory is indicated by setting AER=1 in the UM field for ATARS. The protocol for downlinking this field is described in ref. A: 4.18.2.2.

4.2.2.7 Protocol for TER, Terrain Advisory Subfield

For Class 1 and 2 service, the Terrain Advisory Subfield (TER) is uplinked by the primary DABS/ATARS site on each update cycle in which ground ATARS equipment determines the aircraft to be in potential conflict with the terrain.

4.2.2.8 Protocol for OBT, Obstruction Advisory Subfield

For Class 1 and 2 service, Obstruction Advisories Subfields (OBT) are scheduled only by the primary DABS/ATARS site. One OBT is scheduled for each obstruction on each update cycle in which ground ATARS equipment determines that a potential conflict with that obstruction exists. A maximum of three obstruction advisories can be uplinked in the Auxiliary Advisories Message with RST=0. One obstruction advisory can be uplinked in the Auxiliary Advisories Message with RST=1.

4.2.2.9 Protocol for RTD, Restricted Airspace Advisory Subfield

For Class 1 and 2 service, the Restricted Airspace Advisory Subfield (RTD) is uplinked by the primary DABS/ATARS site on each update cycle in which ATARS determines the aircraft to be within a region of restricted airspace not known by ATARS to be authorized for own aircraft. RTD is contained in the Auxiliary Advisories Message with RST=1.

4.2.3 Protocol for Downlinking ATARS Extended DATA

For Class 1 and 2 service, this protocol is the same as that defined in 4.1.3 for Class 0 service.

4.3 RAR Protocol

4.3.1 Coordination With BCAS

If an ATARS-equipped aircraft receives an RAR Request Message or a BCAS Resolution Message and its RAR is not locked, the aircraft locks its RAR, replies with an RAR Reply Message to BCAS, updates its RAR (5.3.1.2) and then unlocks its RAR. Otherwise, an RAR Busy Message to BCAS is transmitted.

The RAR Reply Message to BCAS contains an encoded image of each column of own RAR. The horizontal advisories of a column are encoded by scanning the "Left Component" list of Table 4.3–1 and selecting the first active (bit=1) advisory contained in the column, and then scanning the "Right Component" list of Table 4.3–1 and selecting

the first active advisory contained in the column. The two horizontal components thus selected are then encoded in accordance with 3.3.2.5.1. The vertical advisories of a column are encoded using the same technique employed for encoding horizontal advisories except that the "Up Component" and "Down Component" lists of Table 4.3–1 are scanned.

4.3.2 Coordination With Ground ATARS Equipment

4.3.2.1 Ground-Initiated Coordination

If the ATARS aircraft receives an interrogation, UF = 4,5, 20 or 21, containing RR = 19 and if the interrogation is not an ATARS Resolution Message, and if the RAR is not locked, then the aircraft transmits an RAR Reply Message to ATARS. If the RAR is locked, the RAR Busy Message to ATARS is transmitted.

If an ATARS-equipped aircraft receives an ATARS Resolution Message with its associated RAR downlink request (i.e., RR = 19), and the RAR is not locked, the aircraft locks its RAR to deny access to all other users, transmits an RAR Reply Message to ATARS, updates the RAR (5.3.1.3), and unlocks the RAR. Otherwise, an RAR Busy Message to ATARS is transmitted.

The RAR Reply Message to ATARS contains an encoded image of each column of own RAR. The horizontal and vertical advisories of each column are encoded using the technique employed for the RAR Reply Message to BCAS (4.3.1).

4.3.2.2 Air-Initiated Coordination

The ATARS avionics provides an indication whenever its RAR is not empty, i.e., whenever one or more bits in the RAR are set to '1'. When a non-empty RAR exists, the DR field is set to 2 or 3 in a surveillance or Comm B reply, DF = 4, 5, 20, or 21. DR = 2 is used when the B bit (3.3.1.2) is not set. DR = 3 is used when the B bit is also set.

4.4 Extended Capability Report

The presence of operating ATARS equipments on board an aircraft causes the CA = 2 code (extended capability) to be set in all DABS All-Call replies, DF = 11, to the ground sensor (ref. A: 3.3.6). The ground sensor learns of the specific extended capabilities on board the aircraft by using the Extended Capability Report protocol specified in ref. A: 4.6.3. Airborne ATARS equipments cause the following codes to be set in the MB subfields of an Extended Capability Report Message.

Table 4.3–1.—*Hierarchy of Resolution Advisories*

Left component	Right component
Turn left	Turn right.
Don't turn right	Don't turn left.

Up component	Down component
Climb	Descend.
Don't Descend	Don't climb.
Don't descend faster than 500 fpm.	Don't climb faster than 500 fpm.
Don't descend faster than 1000 fpm.	Don't climb faster than 1000 fpm.
Don't descend faster than 2000 fpm.	Don't climb faster than 2000 fpm.

(1) ACS: bit 40 = 1 (ASA avionics); bit 48 = 1 (ASA avionics)

(2) ARC = 1 (ATARS only)

(3) ATA is set to the appropriate code (0 through 7) to indicate class of ATARS service which aircraft is requesting.

(4) ECS: bit 74 = 1 (ASA avionics)

4.5 Reply Protocol to BCAS Surveillance Interrogations

When an ATARS-equipped aircraft receives a short special surveillance interrogation, UF = 0, from an airborne BCAS unit, the airborne ATARS equipment sets the following AR (ASA resolution Capability Report field) and SL (BCAS Sensitivity Level Report field) codes in the corresponding short special surveillance reply, DF = 0.

(1) AR = 1 (ATARS only)

(2) SL = 0 (No BCAS sensitivity level reported).

Note.—Airborne BCAS units periodically transmit BCAS surveillance interrogations, UF = 0, to all DABS-equipped aircraft in which BCAS determines that criteria for active surveillance have been satisfied.

5. Characteristics of Airborne ATARS Equipment

Note.—The functions of the airborne ATARS equipment were outlined in 1.4.2. This section defines specific characteristics which the airborne equipment must posses in order to perform those functions.

5.1 Elements of the Airborne ATARS Installation

The principal elements of the airborne ATARS installation are a DABS transponder, an altitude encoder, an ATARS avionics unit, and an output device for communicating ATARS advisories to the pilot.

Note.—This section describes these elements as separate functional entities, but in an actual ATARS installation, one or more of these elements may be integrated into a common avionics package.

5.2 DABS Transponder in the Airborne ATARS Installation

An ATARS airborne installation must include a DABS transponder with altitude encoding capability, the capability to handle DABS 112-bit uplink and downlink messages, and a real-time interface with the ATARS avionics unit.

5.3 Coordination of Resolution Advisories

A procedure is specified for coordination between adjacent ATARS sites to ensure that an ATARS-equipped aircraft does not receive conflicting resolution advisories from two ATARS sites, or that an ATARS site does not issue a resolution advisory contrary to a posted BCAS escape maneuver. This coordination procedure utilizes the RAR information downlinked (via an RAR Reply Message to ATARS) to each ground ATARS site.

5.3.1 Resolution Advisory Register (RAR)

The RAR is the interface for coordinating resolution advisories among ATARS-equipped aircraft, BCAS-equipped threats and ground ATARS equipments. The RAR contents are illustrated in Figure 5.3–1. The RAR stores all current resolution advisories by source using a single bit to indicate which advisory components have been established by which source.

5.3.1.1 RAR Access.

Access to the RAR is limited to one user at a time. This user may be a threat BCAS or ground ATARS equipment. To ensure that the RAR is not accessed while it is in the process of being updated, the RAR locks out all other users for the duration of the update.

BILLING CODE 4910-13-C

5.3.1.2 Update RAR with Other BCAS Advisories.

The advisory complements received from BCAS aircraft in BCAS Resolution Messages are posted in the "All Other BCAS" column of the RAR (Fig. 5.3–1). If there is a complement to delete, a '0' is entered in the appropriate row of the RAR. If there is a complement to be added, a '1' is entered in the appropriate row of the RAR (if the bit is already set to '1' then the add operation refreshes it). If no bit in the "All Other BCAS" column has been refreshed and no bit has been added for an interval of 6 seconds, then all bits in the column are set to '0'.

5.3.1.3 Update RAR with ATARS Advisories.

The first step in updating the RAR with an ATARS Resolution Message received from ground ATARS equipment is to write all zeroes received in the COL Subfield directly into the appropriate rows of the RAR column associated with that ground ATARS equipment. Then, all advisory components set to '1' are tested against the contents of the RAR (all columns) for compatibility (Fig. 5.3–2). Any advisory component that is incompatible is not accepted. Any advisory component accepted is entered into the RAR as a '1' in the appropriate row. If the contents of any RAR ATARS column are not updated within 10 seconds, all bits in the column are set to '0'.

Note.—The ground ATARS equipment verifies acceptance of resolution advisories by performing a compatibility test upon the downlinked RAR contents.

5.3.2 Composite Resolution Advisory

To develop the composite resolution advisory for communication to the pilot, the ATARS avionics uses the resolution advisories stored in the first four columns of the RAR. A composite resolution advisory with up to four components is synthesized by selecting one or fewer advisories from each of the four lists in Table 4.3–1. An advisory, if any, is selected from each list by starting at the top of the list and selecting only the highest ranking advisory that appears in any one of the ATARS columns.

Note 1.—An example of a four-component resolution advisory is "Don't Climb, Don't Descend, Don't Turn Right, Don't Turn Left."

Note 2.—As described in ref. B, BCAS-equipped aircraft use resolution advisories stored in the first *five* columns of the RAR in developing the composite resolution advisory.

Note 3.—The "All Other BCAS" column (sixth column) is not used in synthesizing the composite resolution advisory.

Appendix A.—*Comprehensive Index of Fields*

This index lists in alphabetical order all essential fields, mission fields, three-character designator subfields and four-character designator subfields for which coding is given in this Standard. The "Location" column indicates the mission field or three-character designator subfield in which the three-character or four-character designator subfield listed under the "Designator" column appears. Content of all four-character designator subfields can be found by referring to the three-character designator subfield in which they appear. If a four-character designator subfield appears in more than one three-character designator subfield then its content can be found by referring to the italized three-character designator subfield.

Research and Special Programs Administration

City of Boston Rules Governing Transportation of Certain Hazardous Materials by Highway Within the City

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

[Inconsistency Ruling, IR-3]

City of Boston Rules Governing Transportation of Certain Hazardous Materials by Highway Within the City

APPLICANT: Hazardous Materials Advisory Council and Massachusetts Motor Truck Association, Inc., American Trucking Associations, Inc.

CITY LAW AFFECTED: City of Boston "Ordinance Regulating the Transportation of Hazardous Materials", and "Regulations Controlling the Transportation of Hazardous Materials", dated December 15, 1980, issued by the Fire Commissioner and the Commissioner of Health and Hospitals, which regulate the transportation of certain hazardous materials on City streets. The Regulations are reprinted as an appendix to this ruling.

APPLICABLE FEDERAL REQUIREMENTS: Hazardous Materials Transportation Act (49 U.S.C. 1801 and following) (HMTA), §§ 102–107, and 109; and Parts 171–173, 177–178 of the Hazardous Materials Regulations (49 CFR Parts 177–179).

MODE AFFECTED: Highway.

ISSUE DATE: Ordinance: January 3, 1980; implementing regulations: December 15, 1980.

RULING: Ordinance: no conclusion is expressed regarding the Ordinance.

Regulations: Found inconsistent are the implementing regulations generally, and in particular §§ 5.0–5.02 and 5.04–5.05, to the extent they prevent otherwise lawful transportation within the City, or effectively direct vehicles into other jurisdictions; § 7.1.6 to the extent it requires identification numbers to be displayed in circumstances wherein such display is not required under the HMTA; § 7.1.7 to the extent that it requires a display that modifies the basic hazard warnings required under the HMTA; and §§ 9.0–9.1 to the extent that they require written incident reports to be submitted to the City.

Found not inconsistent are §§ 1.0, 2.0, 3.0, 7.0–7.1.5, and 12.0. No conclusion is expressed regarding §§ 4.0–4.02, 5.03, 6.0, 6.1, 8.0–8.1.8, 10.0, 11.0, 13.0, and 14.0.

SUMMARY: This inconsistency ruling is the opinion of the Materials Transportation Bureau (MTB) concerning whether the City of Boston's regulations implementing the "Ordinance Regulating the Transportation of Hazardous Materials" are inconsistent with the HMTA or regulations issued thereunder and thus preempted as set forth in § 112(a) of the HMTA. This ruling was applied for and is issued pursuant to procedures at 49 CFR 107.201–.209.

FOR FURTHER INFORMATION CONTACT: D. A. Crockett, Office of the Chief Counsel, Research and Special Programs Administration, Department of Transportation, Washington, D.C. 20590 (telephone (202) 755–4972).

I. Background.

A. Chronology

On February 5, 1980, the Hazardous Materials Advisory Council (HMAC) and the Massachusetts Motor Truck Association, Inc. (MMTA) jointly filed an application for a ruling on whether the city of Boston's "Ordinance Regulating the Transportation of Hazardous materials" ("Ordinance") is inconsistent with the Hazardous Materials Transportation Act (HMTA) and regulations issued thereunder. On February 20, 1980, the American Trucking Associations, Inc. filed a similar application, and HMAC and MMTA filed a supplement. On March 24, 1980, the Materials Transportation Bureau (MTB) published a notice and invitation to comment (45 FR 19110). The Ordinance and applications are summarized therein. The City of Boston Responded in a letter dated May 8, 1980.

On September 16, 1980, the City of Boston held a public hearing on implementing regulations developed and issued by the Fire Commissioner and the Commissioner of Health. ATA, on September 16, 1980, filed a supplement.

On March 2, 1980, ATA and MMTA instituted suit in the District Court for the District of Massachusetts, seeking and obtaining a temporary restraining order against enforcement of the implementing regulations, and seeking injunctive and declaratory relief (Docket No. 81–628–M–A). ATA and MMTA argue, among other things, that the Ordinance and implementing regulations are preempted by § 112(a) of the HMTA. Their request for a preliminary injunction has not yet been considered.

B. Comments on the MTB's Notice

In its May 8, 1980, comment, Boston provided a draft of the implementing regulations developed under the Ordinance. It stated that the regulations use terms common to regulations issued under the HMTA where possible and practical. It further stated that population in the downtown area of the City fluctuates between 53,903 and 265,787 persons depending on time of day. It stated the intent of the regulation to be to protect the health and safety of residents of Boston by diverting nonlocal traffic carrying hazardous materials around the City which it said would necessitate no additional stops and often only minor increases in distances traveled.

Generally summarized, the applicants HMAC, MMTA and ATA assert that the definitions used in the Ordinance must be essentially identical in scope with DOT definitions to avoid confusion; that the extensive permit requirements coupled with the ban and time-of-day curfew on hazardous materials vehicles would result in delays and increased operating costs, and that requirements for placards, vehicle markings and written reports would be confusing, duplicative and disruptive of similar DOT requirements. The applicants also asserted that the Ordinance was not consistent with a policy of national uniformity expressed by Congress in the HMTA and should be considered in context with the possible imposition of such ordinances in other local jurisdictions.

Other similar comments were received from members and representatives of the transportation and chemical industries supportive of the applicants' views.

C. General Authority and Preemption Under the HMTA

The HMTA itself imposes obligations to act only on the Secretary of Transportation. Obligations are imposed on members of the public only by the substantive regulations issued under the HMTA. Known as the Hazardous Materials Regulations (HMR), they are codified at 49 CFR Parts 170–179 and mostly predate the HMTA. The HMR previously were authorized by the Explosives and Other Dangerous Articles Act (18 U.S.C. §§ 831–835), which was repealed in 1979 (Pub. L. 96–129, Nov. 30, 1979). The HMTA was enacted on January 3, 1975, and the HMR were reissued under its authority, effective January 3, 1977 (41 FR 39175, Sept. 9, 1976). Subsequent amendments to the HMR have been issued under the authority of the HMTA and with the preemptive effect granted by that Act (under special limits in the case of the Federal Motor Carrier Safety Regulations, discussed below).

With regard to highway transportation of hazardous materials, the HMR apply to persons who offer these materials for transportation (shippers), those who transport the materials (carriers) and those who manufacture and retest the packagings and other containers intended for use with the materials. The scope of transportation activity affected includes

the packaging of shipments of hazardous materials, package marking (to show contents) and labeling (to show hazard), vehicle placarding (to show hazard), handling procedures such as loading and unloading requirements, care of vehicle and lading during transportation, and the preparation and use of shipping papers to show the identity, hazard and amount of each hazardous material being shipped. The HMR also require carriers to report in writing to DOT any unintentional release of a hazardous material during transportation. In some cases, an immediate report must be made in addition to the subsequent written report.

A discussion of the preemptive effects of the HMTA appears in a previous inconsistency ruling, IR–2, "State of Rhode Island Rules and Regulations Governing the Transportation of Liquefied Natural Gas and Liquefied Propane Gas" (44 FR 75566), which is extracted and summarized here.

The HMTA at § 112(a) (49 U.S.C. 1811(a)) preempts "any requirement, of a State or political subdivision thereof, which is inconsistent with any requirement set forth in [the HMTA] or regulations issued under [the HMTA]." This express preemption provision makes it evident that Congress did not intend the HMTA and its regulations to completely occupy the field of hazardous materials transportation so as to preclude any State or local action. The HMTA preempts only those State and local requirements that are "inconsistent". The legislative history of this provision indicates that Congress intended it "to preclude a multiplicity of State and local regulations and the potential for varying as well as conflicting regulations in the area of hazardous materials transportation." (S. Rep. No. 1192, 93d Cong., 2d Sess. 37 (1974).)

In 49 CFR Part 107, Subpart C, the MTB has published procedures that implement the preemption language of the HMTA by providing for the issuance of inconsistency rulings. At the time these procedures were published, the MTB observed that "[t]he determination as to whether a State or local requirement is consistent or inconsistent with the Federal statute or Federal regulations is traditionally judicial in nature." (41 FR 38167, Sept. 9, 1976.) There are two principal reasons for providing an administrative forum for such a determination. An inconsistency ruling provides an alternative to litigation for a determination of the relationship of Federal and State or local requirements. If a State or political subdivision requirement is found to be inconsistent, such a finding provides the basis for an application for a determination by the Secretary of Transportation as to whether preemption will be waived (49 U.S.C. 1811(b); 49 CFR 107.215–.225.)

Since the proceeding here is conducted pursuant to the HMTA, the MTB will consider only the question of statutory preemption. A Federal court may find a state requirement not statutorily preempted, but nonetheless preempted by the Commerce Clause of the U.S. Constitution because of an undue burden on interstate commerce. However, the Department does not make such determinations. Also, under earlier legislative authority, the applicability of the Hazardous Materials Regulations was statutorily limited to carriers in interstate and foreign commerce and their shippers and did not apply to carriers in wholly intrastate commerce and their shippers. Although the HMTA at § 103(1) (49 U.S.C. 1802(1)) authorizes application of its regulations to intrastate commerce that affects interstate commerce, the MTB has not yet exercised this expanded jurisdiction except on a limited case-by-case basis. Any preemptive effect attributed to the HMTA in an inconsistency ruling is limited to preemption of State or local requirements as they apply to persons currently subject to the Hazardous Materials Regulations.

Given the judicial character of the inconsistency ruling proceeding, the MTB has incorporated case law criteria for determining the existence of conflicts into the preemptions procedures at 49 CFR 107.209(c):

(1) Whether compliance with both the [State or local] requirement and the Act or the regulations issued under the Act is possible; and

(2) The extent to which the [State or local] requirement is an obstacle to the accomplishment and execution of the Act and the regulations issued under the Act.

The first criterion is the dual compliance or direct conflict test and concerns those State or local requirements that are incongruous with Federal requirements; that is, compliance with the State requirement causes the Federal requirement to be violated or vice versa. The second criterion in a sense subsumes the first and concerns those State or local laws that, regardless of conflict with a Federal requirement, stand as "an obstacle to the accomplishment and execution of the [HMTA] and the regulations issued under the [HMTA]." In determining whether a State or local requirement presents such an obstacle, it is necessary to look at the full purposes and objectives of Congress in enacting the HMTA and the manner and extent to which those purposes and objectives have been carried out through the MTB's regulatory program.

In enacting the HMTA, Congress recognized that the Department of Transportation's effort in hazardous materials transportation regulation lacked coordination by being divided among the various transportation modes, and lacked completeness because of gaps in DOT's authority, most notably in the area of manufacturing and preparation of packagings used to transport these materials. In order to "protect the Nation adequately against the risks to life and property which are inherent in the transportation of hazardous materials in commerce" (49 U.S.C. 1802), Congress consolidated and expanded the Department's regulatory and enforcement authority.

The preemptive effect of the HMTA is more limited as regards the Federal Motor Carrier Safety Regulations (FMCSR) contained in 49 CFR Parts 390–397. These regulations establish vehicle, equipment and driver requirements for motor carriers subject to the Interstate Commerce Act. On February 6, 1978, the MTB incorporated the FMCSR (except 49 CFR §§ 397.3 and 397.9) into the HMR at 49 CFR 177.804, noting that it did not intend to preempt State or local law not preempted by the FMCSR before incorporation (HM–157, 43 FR 4858, Feb. 6, 1978).

Concerning the preemptive effects of the FMCSR, 49 CFR 309.30 sets this standard:

> Except as otherwise specifically indicated, Parts 390–397 of this subchapter are not intended to preclude States or subdivisions thereof from establishing or enforcing State or local laws relating to safety, the compliance with which would not prevent full compliance with these regulations by the persons subject thereto.

This standard is essentially indentical to the first test used to determine preemption under the HMTA, i.e., the direct conflict test. Unless a different criteria is specifically set forth in the FMCSR, a State or local requirement will be found preempted by the FMCSR during proceedings on an inconsistency ruling only if it directly conflicts with a provision of the FMCSR.

II. Ruling

In many cases, Boston's "Ordinance Regulating the Transportation of Hazardous Materials" provides wide authority that could be implemented in a variety of ways. This opinion will consider only the implementing regulations. Although the MTB's Federal

Register notice and solicitation of comment (45 FR 19110, March 24, 1980) concerned the Ordinance, comments received are generally applicable to the implementing regulations. The implementing regulations will be considered in the order in which they were issued.

Section 1.0 Authority

A general reliance on State law to regulate activities affecting public health and safety is not inconsistent with the HMTA. Both the HMTA and HMR presume some State and local regulation, particularly in the areas of traffic control and emergency response, since both functions are necessarily local in nature.

Section 2.0 Adoption of State regulations.

The laws of the Commonwealth of Massachusetts governing hazardous materials transportation were not considered in this proceeding. However, it appears that CMR Title 720 Section 8 is an adoption by the Commonwealth of those parts of the HMR that concern highway transportation. Based on these common standards with the HMR, the Commonwealth also has entered into a cooperative enforcement agreement with the Federal Highway Administration under 49 CFR Part 388, as have a large number of other States. We understand the effect of Boston's incorporation of State regulations to be that the same standards applied to highway transportation by the HMR are applied by §2.0. While the MTB has not examined and does not offer an opinion on consistency of CMR Title 720 Section 8 with the HMTA, reliance by local jurisdictions on common State and Federal requirements is not inconsistent with the HMTA.

Section 3.0 Adoption of certain Federal Motor Carrier Safety Regulations.

The implementing regulations adopt four rules of the FMCSR "as referred to and as modified" therein. Section 2.0 may already impose these requirements by way of their incorporation under the HMTA in 49 CFR 177.804. These four provisions concern the following subjects (49 CFR Part 397 applies only to vehicles required by the HMR to be placarded):

49 CFR 397.5 Attendance and surveillance of motor vehicles, particularly those containing Class A or Class B explosives

49 CFR 397.7 Rules for parking motor vehicles, particularly those containing Class A or Class B explosives

49 CFR 397.9 Avoidance of heavily populated areas by motor vehicles containing hazardous materials unless no other practicable route is available; written route plan for motor vehicles containing Class A or Class B explosives

49 CFR 397.21 Marking of motor vehicles operated by a private carrier

Later in the implementing regulations, 49 CFR 397.9 is mentioned at § 5.0, and made expressly mandatory in local pickup and delivery operations at § 7.1.4; 49 CFR 397.5 and 397.7 are made expressly mandatory at § 7.1.3. There is no further reference in the implementing regulations to 49 CFR 397.21. We construe § 3.0 as intending to make mandatory in Boston the four referenced FMCSR sections, with modifications as necessitated by subsequent sections. In addition, not mentioned in § 3.0, 49 CFR 177.823, concerning DOT-required placarding, is made locally mandatory at § 7.1.6. Section 3.0, in adopting provisions from the FMCSR, is consistent with the HMTA.

Section 4.0 Hazardous materials subject to additional regulations.

This introductory section states the application of the regulations to hazardous materials falling within specified hazard classes, and to certain named hazardous materials. In view of § 2.0, we construe the implementing regulations as adopting DOT definitions which §§ 4.0–4.02 modify for the limited purposes of applying the additional restrictions in §§ 5.0–14.0.

The definitions following § 4.0 comprise a subset of the materials regulated under the HMTA. Commenters have argued that references in the implementing regulations to DOT definitions are incomplete and that any variance from DOT definitions is inconsistent with the HMTA. However, the definitions are intended for use by carriers rather than shippers and consequently should not result in the introduction into transportation of materials improperly packaged or described under the HMR. The consistency of the implementing regulations with the HMTA, in this case, depends not on the materials definitions but on the substantive provisions that attach to the definitions. We reached no conclusion regarding consistency of §§ 4.0 through 4.02 with the HMTA. The discussion below, however, is presented for context.

Section 4.01 Definitions of hazardous materials subject to additional restrictions.

This section defines groups of materials by reference to DOT hazard classes, and certain specific materials by reference to DOT shipping names. Section 4.01 adopts the HMR definitions of the following classes of materials:

(1) *Explosives, Classes A (49 CFR 173.53) and B (49 CFR 173.88)* are classes of materials defined in the HMR by specific tests. Generally, Class A explosives are capable of detonation while Class B explosives function instead by rapid combustion. Certain small quantities of explosives otherwise classes as A or B may be shipped as Class C explosives when the quantity and manner of packaging sufficiently reduce the risk to permit compliance with a reduced level of regulation. A package shipped as a Class C explosive, or as a Blasting agent (49 CFR 173.114(a)), appears to be excluded from the § 4.01 definition. The HMR require a motor vehcile carrying any quantity of Class A or B explosives to be placarded.

(2) *Poison A* is a class of materials (49 CFR 173.326) comprised of liquids or gases that are life threatening when mixed in small amounts with air. When transported by highway, they are required by the HMR to be placarded POISON GAS (hence the reference in § 4.01 the implementing regulations). Poison A materials may not be transported in a cargo tank (49 CFR 177.841(b)). There are no regulatory exceptions in the HMR for small amounts of Poison A materials.

(3) *Flammable solid* is a class of materials (49 CFR 173.150) that, excluding explosives and blasting agents, may cause fires under normal conditions of transportation as a result of friction or retained heat, or which can be readily ignited and burn vigorously and persistently. For certain small amounts of some materials in this class, regulatory exceptions in the HMR apply. The reference to the Dangerous When Wet label in the § 4.01 definition limits its application to flammable solids that are water reactive. A motor vehicle carrying any quantity of a water reactive flammable solid is required by the HMR to be placarded Flammable Solid W.

(3) *Radioactive material* is a class of materials that emit a defined level of ionizing radiation. Required package labels indicate certain characteristics of the packaged material that must be known for appropriate package handling and stowage. Those various labels are commonly referred to as White I, Yellow II and Yellow III (in increasing order of hazard). Package radiation emission levels, fissionability, and total package radioactivity determine label use (49 CFR 172.403(d)). Any motor vehicle carrying a package bearing a Yellow III label is required by the HMR to be placarded.

The excepting reference in the § 4.01 definition to "DOT–7A Type A Radioactive material" includes Type A materials in a DOT–7A packaging (49 CFR 178.350). Type A is one of four subcategories of radioactive material that more accurately reflect the level of hazard of the various radioactive materials than do package labels: Limited quantity, Type A, Type B, and Large quantity (in order of increasing hazard). Limited quantity radioactive materials may include consumer goods and electron tubes. The HMR permit exceptions for these materials because of the very low hazard levels involved. Type A may include radiopharmaceuticals as well as partially refined ores. Type B may include radiopharmaceuticals as well as medical diagnostic, therapeutic, and industrial radiation sources used in radiography. Large quantity materials may include higher level materials, such as spent reactor fuel. Most common packages shipped contain Limited quantity and Type A materials. The category of a given material generally determines the degree of reliability required by the HMR for the package in which the material must be transported.

Section 4.01 also defines specific materials: (1) *Liquefied petroleum gas* is the proper shipping name of a specific material regulated by the HMR in the class Flammable gas. It is commonly shipped under pressure in a liquid state in commerce by rail tank cars and highway tank trucks that considerably exceed the 2,500 pound threshhold capacity established in the implementing regulations. This material is also shipped in cylinders, the total capacity of which on a given vehicle may exceed 2,500 pounds. In amounts over 1,000 pounds, a motor vehicle transporting this material is required by the HMR to be placarded.

(2) *Methane (Liquefied)* generally means liquefied natural gas (LNG), and its proper shipping name under the HMR is Methane, a Flammable gas. It is a cryogenic liquid shipped in commerce under minimal pressure. LNG is shipped only by highway in specially designed tank trucks. The HMR do not, at present, permit LNG to be transported except under the authority of an exemption. The MTB issues such exemptions through a public process only after a sufficient level of safety is demonstrated based on the containment system and operational safeguards. All cargo tanks containing LNG are required to be marked and placarded.

(3) *Liquefied Hydrogen* is a cryogenic liquid classed and shipped by highway under the HMR shipping name Hydrogen under requirements similar to those for LNG.

Section 4.02 Flammable liquids.

Flammable liquid is a hazard class into which many common industrial solvents and fuels, like gasoline, fall. The reference in the implementing regulations to a 73° F. flashpoint echoes regulatory exceptions in the HMR for some flammable liquids that are less easily ignited than others in the same hazard class. Most tank trucks transporting bulk flammable liquids in commerce have a capactly many times greater than the 1,000 gallon threshold established in this section. Lesser amounts of some flammable liquids (110 down to one gallon or less) may be shipped under additional HMR exceptions. Alcoholic beverages, including distilled spirits, are not regulated by the HMR when shipped in one gallon or smaller containers, regardless of the total number of such containers on a motor vehicle. A motor vehicle carrying 1,000 pounds or more of a flammable liquid, and a cargo tank carrying any quantity, is required by the HMR to be placarded.

Section 5.0 Restrictions on use of city streets for hazardous materials transportation.

This section suggests that its purpose is to implement 49 CFR 397.9(a), a provision of the FMCSR not adopted under the HMTA:

§ 397.9 Routes.

(a) Unless there is no practicable alternative, a motor vehicle which contains hazardous materials must be operated over routes which do not go through or near heavily populated areas, places where crowds are assembled, tunnels, narrow streets, or alleys. Operating convenience is not a basis for determining whether it is practicable to operate a motor vehicle in accordance with this paragraph. [Due to recent rulemaking discussed later in this opinion, the applicability of Section 397.9(a) to radioactive materials will cease on February 1, 1982.]

As a practical matter, States and localities that adopt specific provisions of the FMCSR or the HMR are not likely to encounter inconsistency with either, since both bodies of regulations are mutually reliant and coevolved in the Interstate Commerce Commission prior to the establishment of DOT. However, in this case there are significant differences between the effects of the implementing regulations and 49 CFR 397.9(a). The DOT General Counsel previously considered the relationship of § 397.9(a) to local restrictions that ban the movement of hazardous materials, concluding that such restrictions "cannot be said to effectuate the policy of that section" (General Counsel letter of May 12, 1976, to General Counsel, Nuclear Regulatory Commission). Although the MTB, in its first inconsistency ruling under the HMTA (which did not extensively discuss § 397.9(a)), concluded that a New York City ordinance banning the movement of most radioactive materials in that jurisdiction was not inconsistent with the HMTA (IR–1, 43 FR 16954, April 20, 1978), that conclusion should not extend to the circumstances of the Boston implementing regulations. The conclusion in IR–1 was based on considerations peculiar to the facts of that case, including the geography of New York City and special concerns, such as security, associated with radioactive materials transportation.

Last year, MTB issued its second inconsistency ruling, IR–2, which concerned a Rhode Island regulation that limited times of highway transit into and through the State for gases such as liquefied petroleum gas and liquefied natural gas. A principal concern in that ruling (44 FR 75566, December 20, 1979) was the individual and cumulative effect of State requirements which have a potential for causing delays at and after commencement of transportation, and for causing significant or unusual rerouting of hazardous materials traffic away from customary commercial routes. Both effects may contribute to unsafe conditions. Much of the discussion contained in IR–2 will be applied here.

Highway carriers are obliged by the HMR to see that "[a]ll shipments of hazardous materials [are] transported without unnecessary delay, from and including the time of commencement of the loading of the cargo until its final discharge at destination." (49 CFR 177.853) It follows that a truck containing hazardous materials should not be stopped or delayed unnecessarily, and that local rules which may have that effect are not consistent with the HMTA. The mere threat of delay may redirect commercial hazardous materials traffic into other jurisdictions that may not be aware of or prepared for a sudden, possibly permanent, change in traffic patterns. Road conditions also may be inadequate, particularly where the rerouted hazardous materials traffic is diverted to routes that other similar commercial traffic normally does not use.

Section 397.9(a), while not incorporated under the HMTA, gives some definition to what is a "necessary delay" as a result of its common genesis

with the HMR. A circuitous route which a carrier follows to comply with that section usually will entail delay in the form of additional mileage judged necessary by the carrier under § 397.9(a). We view § 397.9(a) as not intended to direct highway carriers over circuitous routes if use of those routes will result in a significant reduction, overall, in public safety. That is, a route is not a "practicable alternative" if the likelihood of injury or damage associated with its use is demonstrably greater than on the route to which it is compared.

The Boston implementing regulations and 49 CFR 397.9(a) require this comparison to be made in different ways. Under § 397.9(a), the carrier must exercise judgment based on his knowledge and anticipated use of alternate routes that may pass through a number of different jurisdictions and over a variety of roads. We have no record in our proceedings from which to conclude that either the Boston City Council or the Fire Commissioner has examined in any detail the safety impacts which will result from enforcing the implementing regulations.

In varying degrees of sophistication, techniques are availabe for such safety comparisons between routes. One example of a relatively sophisticated comparative safety analysis dealing with routing in the Boston area was prepared for MTB last year on the subject of liquefied natural gas. The analysis ("Assessment of Risks and Risk Control Options Associated With Liquefied Natural Gas Trucking Operations From Distrigas Terminal, Everett, Massachusetts," June 1979) suggests that there may be at least some routing options which avoid Boston and which produce net safety benefits.

A more easily applied technique for comparing the relative levels of safety offered by alternative highway routes for hazardous materials generally (excluding radioactive materials) was recently developed by the Federal Highway Administration ("Guidelines for Applying Criteria to Designate Routes for Transporting Hazardous Materials," FHWA–IP–80–20, September 1980, to be published soon). This technique permits ready consideration of the comparative effects of such things as accident rates and population densities associated with the routes being examined.

Moreover, the implementing regulations direct traffic into jurisdictions outside Boston, as opposed to choosing among routes available within the City, even though the Fire Commissioner has authority and has stated his intention of granting permits to allow transit when no other practicable route outside the City is available.

A local jurisdiction can command cooperation from its own institutions and citizens affected by highway transportation to ensure that essentially all the safety considerations that affect selection of local routes are examined. We believe this process sufficient for choices of that scope to produce an acceptable local routing solution. Political accountability significantly contributes to the process. A local jurisdiction that directs transiting traffic through its neighbors will be considerably less responsive to conditions beyond its jurisdiction.

Routing effects in adjacent jurisdictions could be addressed in rules jointly issued by all affected local jurisdictions, as through a regional council of governments for example. A preferable and more practical process is regulatory action at the State level, short of a State-wide ban, which we believe could be consistent with the HMTA. We think it possible that use of routes which avoid Boston may be appropriate. For consistency with the HMTA, however, Boston must act through a process that adequately weighs the full consequences of its routing choices and ensures the safety of citizens in other jurisdictions that will be affected by its rules. We do not believe that Boston possesses institutions or has used analytical methods that can adequately and reliably accomplish this. Consequently, we have concluded that to the extent they prevent motor vehicles from tranporting hazardous materials into or through that jurisdiction, the Boston implementing regulations may cause delay or a diversion of traffic through other jurisdictions and in this respect are inconsistent with the HMTA.

MTB has forcefully expressed confidence in this latter view in HM–164, Highway Routing of Radioactive Materials (46 FR 5298, January 19, 1981), which becomes effective February 1, 1982. In HM–164 (which concerned only radioactive materials), MTB has specified that State-wide regulations are the only appropriate tools consistent with the HMTA for imposition of routing controls on highway carriers of radioactive materials.

In view of this conclusion, my comments on the balance of the implementing regulations (with an exception noted for § 5.02) will be made from an assumption that Boston may not through its regulations exclude motor vehicles transporting hazardous materials from use of its streets, to the extent that use is in compliance with the HMTA.

Section 5.01 Restrictions on use of City streets.

This section bars use of City streets for tranportation of hazardous materials previously identified in § 4.01 unless an origin or destination point lies therein. The reference to § 4.01 effectively excepts materials classed as Flammable liquid. We understand that the term "City street" excludes Interstate routes, but that the use of Interstate 93 through Boston requires a detour on City streets to avoid a tunnel (State and local restrictions on urban vehicular tunnels used for mass transportation are recognized in the HMR, (49 CFR 177.810)). Although a permit system established by the implementing regulations will examine carrier applications for transit based on the lack of practicable alternatives, compelling need, and public interest, the process available to Boston is inadequate to ensure that routes will be adequately compared. Moreover, the necessity of a permit may result in a redirection of hazardous materials into other jurisdictions. A City-wide prohibition on hazardous materials traffic in Boston is not consistent with the HMTA.

Section 5.02 6 a.m. to 6 a.m. restriction.

This section restricts vehicles carrying hazardous materials from the downtown area from 6 a.m. to 6 p.m. Time-of-day restrictions are a subset of routing restrictions generally. Although limited to certain hours in the downtown area, § 5.02 may effectively route motor vehicles into other jurisdictions. The use of Interstate routes in downtown Boston necessitates a detour by hazardous materials carriers for several blocks on City streets which would be controlled by § 5.02. If the Interstates are blocked by this section, hazardous materials vehicles may be routed through other jurisdictions during the time the prohibition applies. As previously discussed, local jurisdictions lack a process for adequate evaluation and comparison of routes beyond their boundaries. The application of § 5.02 to pickup and delivery operations, however, is less likely to have such results, and also appears to us to be justifiable as ancillary to regulatory authority that the City Council may exercise over land use and local activities in Boston. For example, delivery of explosives to a construction site in the city might be prohibited during certain times of day. Except as it concerns transportation service to points of origin or destination within

Boston, § 5.02 is inconsistent with the HMTA.

Section 5.03 "Downtown" defined.

This section defines the boundaries of the downtown area to which § 5.02 applies.

Sections 5.04 and 5.05 Exceptions.

These sections authorize the Fire Commissioner to grant exceptions to the prohibition against use of City streets (§ 5.01) and time-of-day restrictions (§ 5.02) by issuing a permit under § 8. "Compelling need" and "public interest" are the joint criteria that must be met before a permit will issue. (It is not clear how these criteria relate to the lack of an available practicable route suggested as an exception under § 5.01.) So far as it affects routing, we believe the permit process can operate only on time-of-day restrictions on pickup and delivery. It is inconsistent with the HMTA except to that extent.

Sections 6.0 and 6.1 Permits for transportation outside the downtown area.

These provisions allow the Fire Commissioner to define and impose permit requirements on transportation outside the defined downtown area, which is otherwise authorized by the implementing regulations, when he determines that special precautions are necessary. A permit systemmust beevaluated for consistency with the HMTA based on the restrictions actually imposed. We have previously stated that a bare requirement for a permit is not necessarily inconsistent with the HMTA (IR–2, 44 FR at 75570). This provision may legitimately assist the Fire Commissioner in dealing with unusual local conditions and emergencies. Because permit conditions and scope are not defined in § 6.1, the consistency of the sections with the HMTA is indeterminate.

Sections 7.0 through 7.1.1 Operation of vehicles of City streets.

These provisions concern the actual operation of motor vehicles transporting hazardous materials on City streets. Section 7.1.1 makes traffic infractions subject to penalty action under the implementing regulations, thereby increasing the penalties available. Local regulation of traffic is recognized in the FMCSR at 49 CFR 397.3. Although that provision was not incorporated under the HMTA, the HMR contain nothing that would suggest inconsistency. While it is possible that a particular provision aimed at the regulation of traffic might be inconsistent, "rules of the road" are assumed by MTB to be a proper form of State and local regulatory control applied to motor vehicles carrying hazardous materials which is consistent with the HMTA.

Section 7.1.2 Separation distances.

Neither the HMR nor the FMCSR specify separation distances between moving or parked motor vehicles carrying hazardous materials. Section 7.1.2 specifies a 300 ft. separation distance in both cases, when traffic conditions allow. Although the kinds and amounts of hazardous materials defined in §§ 4.01 and 4.02 are required to be placarded under the HMR, the placards on a motor vehicle may not be recognizable from 300 feet or more during hours of darkness since § 392.32 of the FMCSR require lower headlight beams to be used within 500 feet of other traffic. Moreover, we question the advisability of encouraging a driver to constantly direct his attention away from the proximity of his vehicle which is implied by § 7.1.2. However, while we question the safety benefit to be gained through imposition of § 7.1.2, and recognize that the qualifying words "Except when overtaking . . . 'and' . . . except where conditions of traffic make it impractible to do so . . ." cause the section to have very limited enforceability, we find no basis for concluding that § 7.1.2 is inconsistent with the HMTA.

Section 7.1.3 Attendence and parking of explosives and other vehicles.

This section requires compliance by carriers with 49 CFR §§ 397.5 and 397.7, rules in the FMCSR concerning attendance and parking of motor vehicles containing Class A or B explosives, as well as other materials. Both FMCSR sections are incorporated under the HMTA. Local adoption and enforcement of Federal requirements is consistent with the HMTA, as it encourages national uniformity in transportation safety regulations.

Section 7.1.4 Use of major thoroughfares.

Except as necessary for pickup and delivery, this section requires hazardous materials carriers to use major City thoroughfares, and applies 49 CFR 397.9(a) where the carrier must depart from a major thoroughfare. We have no information indicating this requirement affects route selection outside the City. We therefore conclude that § 7.1.4 is not inconsistent with the HMTA.

Section 7.1.5 Use of headlights.

This section requires vehicles carrying hazardous materials to use headlights at all times when operating on City streets. After a review in IR–2 of both the HMTA and the FMCSR, a similar Rhode Island requirement that headlights be used at all times was found not inconsistent. That conclusion applies here.

Section 7.1.6 Marking of motor vehicles to identify product.

This section requires that motor vehicles bear, in addition to placards required by 49 CFR 177.823, identification of the products carried. For the method of product identification, § 7.1.6 references DOT P5800.2, the "Emergency Response Guidebook".

In the past, MTB has strenuously objected to any local variations in the extensive Federal systems that provide emergency information. In IR–2, a State requirement that certain motor vehicles display a rear bumper sign warning following vehicles to keep a 500-foot separation distance was found inconsistent:

> There are . . . certain areas where the need for national uniformity is so crucial and the scope of Federal regulation is so pervasive that it is difficult to envision any situation where State or local regulation would not present an obstacle to the accomplishment and execution of the HMTA and the Hazardous Materials Regulations. . . . Hazard warning systems are [an] area where MTB perceives the Federal role to be exclusive. The MTB has thoroughly considered this subject and has issued regulations on marking and labeling of packages and placarding of vehicles in order to communicate the hazards of the materials contained therein. The effectiveness of these systems depends to a large degree on educating the public, especially emergency response personnel. . . . Additional, different requirements imposed by States or localities detract from the DOT systems and may confuse those to whom the DOT systems are meant to impart information [44 FR 75568]

The DOT system of identification numbers around which the "Guidebook" is built is essentially the same system adopted for worldwide use by the United Nations Committee of Experts on the Transport of Dangerous Goods. MTB adopted the system in 1980 (HM–126A, 45 FR 34560, May 22, 1980; 45 FR 74840, November 10, 1980). As adopted, it generally requires a hazardous material identification number to be displayed on packages and tank vehicles which can be converted, by use of the "Guidebook", to a product name and information on immediate response in the event the material is released during transportation. As applied to highway transportation, identification numbers must be marked on packages of less than 110 gallons capacity beginning July

1, 1983 (49 CFR 172.301(c)(2)). Cargo tanks must be similarly marked beginning November 1, 1981 (49 CFR §§ 172.328, 172.336(c)(8)) (45 FR 34698–9, 74666–8). Generally, other motor vehicles carrying hazardous materials are not required, but are permitted, to be so marked (49 CFR 172.336(a), 45 FR 74667).

Identification numbers usually may be displayed on a motor vehicle by inscribing it on the required placard, or by affixing an orange-colored panel directly to the vehicle. Display of identification numbers has been permitted on a voluntary basis since July 1, 1980, except for placard display, which is not permitted before April 1, 1981 (45 FR 34560, 74640). These voluntary compliance dates, as well as the mandatory dates, were chosen to permit the preparation and training necessary for widespread compliance and recognition. Detailed exceptions and varations are specified by the HMR for special situations, such as multi-unit cargo tanks (49 CFR 172.336(c)(1), 45 FR 74668).

Section 7.1.6 requires identification numbers to be displayed on vehicles where they are not required by the HMR, and contradicts the exceptions and variations provided therein. Section 7.1.6 also requires display of identification numbers before the HMR require it. In both aspects the section is inconsistent with the HMTA.

Section 7.1.7 Sign to show residual material.

This section requires display of a sign approved by the Fire Commissioner on all vehicles that are "carrying residual quantities of hazardous materials (5% or less of rated capacity) but by marking or other identification could be mistaken for carrying hazardous materials." It is not clear whether the sign will be approved for individual shipments, or on a more general basis, or precisely what the sign will say. While the HMR recognize exceptions for some empty containers that still may contain residual materials or fumes, generally any such container that has been neither cleaned and purged nor reloaded with a material that is not hazardous must be shipped in the same manner as when it was full. The hazard presented by residues and fumes in "empty" containers are sufficient generally to justify their handling with as much caution as full ones. Also, the preceding discussion under § 7.1.6 concerning vehicle marking is applicable here. The area of hazard warnings is essentially an area of exclusive HMTA domain. Section 7.1.7 specifies a form of vehicle marking or placarding that modifies the basic hazard warnings required by DOT and is therefore inconsistent with the HMTA.

Section 8 generally. Permit process and requirements.

From the previous discussion, we construe § 8 to have a valid application only to the extent that it provides relief from those provisions of the implementing regulations that are not inconsistent with the HMTA. Obviously, a permit issued by a State or local jurisdiction cannot waive compliance with a Federal regulation, but can waive a State or local requirement that is identical to a Federal requirement.

Section 8.1.4 specifies that permit conditions may include routes and other restrictions. Any such route restrictions imposed may have significant impacts on other jurisdictions and should be imposed at the State level, or through joint action among all affected jurisdictions. Consistency with the HMTA of any "special precautions" which the Fire Commissioner issues under these provisions will depend on the facts of the individual case.

To the extent a valid permit is issued, a requirement to carry the permit in the cab of the motor vehicle, and display of a decal, are reasonable aids to local enforcement to which we do not take exception. Because permit conditions are not defined in § 8, consistency with the HMTA is indeterminate.

Section 9 generally. Reporting requirements.

Section 9 parallels two reporting requirements of the HMR. Immediate notice of a hazardous materials incident required from carriers in certain cases by DOT (49 CFR 171.15) is required by the City of Boston, and written reports required by DOT within fifteen days of every unintentional hazardous materials release (49 CFR 171.16) also is required by the City.

In IR–2, a similar State requirement for immediate and subsequent written accident reports was reviewed:

> [A] requirement for immediate notification in certain situations furthers the State's activity in protecting persons and property through emergency response measures. . . .
>
> Such an emergency response function is not served by the written notice required to be given within 24 hours to the two State agencies. The written notice required to be supplied to MTB . . . . precludes the States from requiring additional written notice *directed to hazardous materials carriers*. It is common for States to require any motor vehicles involved in accidents within their borders to file certain accident reports and such a requirement can clearly be applied to a motor vehicle transporting hazardous materials. In light of the Federal written notice requirement, however, it is inappropriate for a State to impose an additional written notice requirement to apply solely to carriers already subject to the Hazardous Materials Regulations. [44 FR 75872.]

The basis for the conclusion reached in IR–2 was expressed earlier in that ruling:

> The legislative history of [Section 112(a)] indicates that Congress intended it "to preclude a multiplicity of State and local regulations and the potential for varying as well as conflicting regulations in the area of hazardous materials transportation" [citing S. Rep. No. 1192, 93d. Cong., 2d Sess. 37 (1974)]. [44FR 75867.]
>
> . . . Congress indicated a desire for uniform national standards in the field of hazardous materials transportation and with the HMTA gave the Department of Transportation the authority to promulgate those standards [footnote omitted]. Although the HMTA has not totally precluded State or local action in this area, it is the MTB's opinion that to the extent possible Congress intended to make such State or local action unnecessary. [44 FR 75868.]
>
> . . . Redundancy does not further transportation safety and represents the type of multiplicity that the HMTA intended to make unnecessary. [44 FR 75871.]

Any immediate reporting requirement, applied differentially to carriers of hazardous materials, that is necessary to support an emergency response effort is not inconsistent with the HMTA. Thus, § 9.1, in requiring immediate reports for incidents that must immediately be reported to DOT under 49 CFR 171.15 is not inconsistent with the HMTA. Subsequent written reports required within 15 days by DOT are not necessary to local emergency response. The reports themselves are publicly available, and MTB is prepared to routinely send copies of written reports to a designated State agency on request. Copies of written reports required by DOT under 49 CFR 171.15 may not be required by § 9.1. Section 9.1, therefore, is inconsistent with the HMTA to that extent.

Section 10.0 Suspension of motor vehicle operations.

The consistency of this section with the HMTA is indeterminate, since it is dependent on the circumstances supporting the suspension. Emergency weather or roadway conditions, civil disorders or extraordinary traffic conditions may justify temporary local restrictions of the movements of vehicles carrying hazardous materials.

Section 11.0 Authority to suspend the implementing regulations.

We have no comment on this section, other than to note that the Fire

Commissioner cannot suspend Federal requirements.

Section 12.0 Penalties.

Penalties associated with valid local regulations are not likely to be inconsistent with the HMTA, unless they are so extreme, or applied so arbitrarily, that they effectively reroute or otherwise unnecessarily delay vehicles carrying hazardous materials. We have no indication that this section, as applied to those parts of the implementing regulations that are not inconsistent with the HMTA, will itself be inconsistent. Beyond this, we know of no reason why a mere difference in penalty provisions between a State or local requirement and the HMTA would be a basis for finding inconsistency.

Sections 13.0 and 14.0 Severability and effective date.

We have no comments on these sections.

Any appeal to this ruling must be filed within 30 days of service in accordance with 49 CFR 107.211.

(49 U.S.C. 1811(a), 49 CFR 107.209)

Issued in Washington, D.C. on March 19, 1981.

Leon D. Santman,

Director, Materials Transportation Bureau.

Appendix—Regulations Controlling the Transportation of Hazardous Materials Issued by the Fire Commissioner and Commissioner of Health and Hospitals, City of Boston, on 15 December, 1980 (Excluding map)

Regulations for Controlling the Transportation of Hazardous Materials

Section 1.0 Authority.

These regulations are issued by the Fire Commissioner and the Commissioner of Health and Hospitals in compliance with Chapter 39 of the Ordinances of 1979 and under the authority granted by Massachusetts General Laws Chapters 111 and 148 and other applicable laws.

Section 2.0 Adoption and Incorporation of State Regulations.

The requirements of the Massachusetts Department of Public Works governing the transportation of hazardous materials in commerce on state highways as contained in CMR Title 720 Section 8, Hazardous Materials Regulations are hereby adopted by the City of Boston to ensure the application of those requirements to the City's streets.

Section 3.0 Adoption and Incorporation of the Federal Motor Carrier Safety Regulations.

The requirements of the Federal Motor Carrier Safety Regulations 49 CFR Sections 397.5, 397.7, 397.9, and 397.21 are adopted as referred to and as modified herein.

Section 4.0 Hazardous Materials Subject to Additional Regulations.

Transportation in commerce on City streets of the materials identified in sections 4.01 and 4.02 below in quantities greater than those indicated shall be subject to the regulations set forth in Sections 5.0 through 15.0 herein in addition to those regulations adopted in Sections 2.0 and 3.0 above.

4.01 Material and Quantity in Bulk

Class A Explosives (173.53)[1]; any quantity
Class B Explosives (173.88); any quantity
Poisonous Gases: Poison A (173.326); any quantity
Flammable Solids (173.150) which require the Dangerous When Wet Label (172.423) as specified in (172.101); 2,500 pounds or more
Radioactive Materials with Radioactive Yellow III Label (172.403); any quantity
Excluding radioactive materials that are packaged in USA DOT-7A Type A containers and are intended for use in, or incident to, research or medical diagnosis, or treatment.
Liquefied Petroleum Gas (172.101); 2,500 pounds or more
Methand (Liquefied) (172.101); 2,500 pounds or more
Liquefied Hydrogen (173.316); 400 pounds or more

4.02 *Flammable Liquids* transported in bulk quantities of 1,000 gallons or more with flash points of 73°F or less as determined by tests listed in 49 CFR 173.115(d) with the exception of distilled spirits of 140 proof or less (173.115 (a)(2)).

Section 5.0 Restrictions on the Use of City Streets for the Transportation of Hazardous Materials.

For the purpose of applying Section 397.9(a) of the regulations adopted in Section 3.0 herein to the City of Boston, the following restrictions are adopted.

5.01 Use of City streets for the transportation of the materials specified in Section 4.01 is prohibited where there is neither a point of origin nor destination (delivery point) within the City. Where no alternative route outside the City is considered practicable, as defined in 49 CFR 397.9(a), a permit to use City streets, will be requested pursuant to Section 8 herein.

5.02 Use of City streets in the Downtown Area as defined in Section 5.03 herein for the transportation of the materials specified in Sections 4.01 and 4.02 above is prohibited during the hours between 6 a.m. and 8 p.m. daily except Saturdays, Sundays and holidays.

5.03 The Downtown Area is defined as the area bounded by and including Massachusetts Avenue at the Mass. Ave. Entrance Ramp to the Southeast Expressway, the Southeast Expressway to the Kneeland Street Ramp, along Kneeland Street to Atlantic Avenue then along a line following the waterfront to the Charles river, along the Charles River to Massachusetts Avenue and along Massachusetts Avenue to the Mass. Ave. entrance Ramp to the Southeast Expressway all as shown on the map attached and incorporated as Exhibit A herein.

5.04 Exceptions to the above restrictions may be granted by the Fire Commissioner where compelling need is shown and where transporting hazardous materials is in the public interest.

5.05 Exceptions to the restrictions in this Section 5 will be made by permit issued on application to the Fire Commissioner in accordance with the procedures of Section 8 herein.

Section 6.0 Authority to Require Permits for Transportation of Hazardous Materials Outside the Downtown Area

6.1 The Fire Commissoner may require permits for the transportation of hazardous materials in areas of the City outside of the Downtown Area (as defined in Section 5.03) where, due to the nature of the particular hazardous material, the routes of travel and parts of the City involved, special precautions may be required.

Section 7.0 Regulations Concerning the Operation of Motor Vehicles Carrying Hazardous Material on City Streets

The following regulations shall apply to the transportation on City streets of the materials specified in Sections 4.01 and 4.02 herein:

7.1.1 Traffic violations by transporters of hazardous materials shall be treated as violations of these regulations and shall be subject to the penalties of Section 12.0 herein.

7.1.2 Except when overtaking or passing in opposite directions of travel, all vehicles transporting hazardous materials shall maintain a minimum distance of at least 300 feet from other vehicles carrying hazardous materials except where the conditions of traffic make is impractical to do so. This requirement shall apply whether such vehicles are moving or parked except when at a destination or point of origin.

7.1.3 Transporters of hazardous materials shall comply with applicable rules of 49 CFR 397.5 and 397.7 while operating within the City.

7.1.4 Transporters of hazardous materials shall use only Major Thoroughfares as designated on the City of Boston Major Throughfare System map to reach their destinations. Where a destination is not on a major thoroughfare, said transporters will use major thoroughfares to a point as close as possible to the destination before using non-major thoroughfare routes. In selecting non-major thoroughfare routes said transporters shall comply with the provisions of 40 CFR 397.9.

7.1.5 All vehicles transporting hazardous materials shall have head lights on at all times while operating on City streets.

7.1.6 In addition to the placard required by 49 CFR 177.823, all vehicles transporting hazardous materials shall identify the product carried using the Identification Number (I.D. No.) provided in DOT p5800.2. Said identification to be displayed on placards or on orange panels on tanks as specified in DOT p5800.2.

7.1.7 All vehicles shall display a sign approved by the Fire Commissioner when carrying residual quantities of hazardous materials (5% or less of rated capacity) but by

[1] Numbers in parenthesis refer to Title 49 of the Code of Federal Regulations.

marking or other identification could be mistaken for carrying hazardous materials.

Section 8.0 Permits

8.1 The following procedures shall apply to the granting of permits to operate in exception to the regulations set forth herein:

8.1.1 Application for a permit shall be made to the Fire Commissioner on the form provided and accompanied by the fee required herein. All applications shall be acted on within 30 days of submission to the Fire Commissioner and timely notice of approval or denial shall be given to the applicant. A single permit shall be granted to a transporter (carrier, trucking company, etc) for each class of hazardous material identified in Section 4.01 and 4.02. Each vehicle operating under said permit shall be identified on the permit application.

8.1.2 Permits denied by the Fire Commissioner shall be subject to review by a hearing before the Traffic and Parking Commission on appeal by the applicant made to the Fire Commissioner within 30 days of the receipt of notice of denial.

8.1.3 Permits will be granted only where the following criteria are met as determined by the Fire Commissioner:

a. compelling need is shown;
b. transportation the hazardous materialsis in the public interest;

8.1.4 Permits issued shall set forth conditions such as routes and other special precautions as determined by the Fire Commissioner;

8.1.5 Permits shall be granted for a period of one year and be automatically renewed upon application unless revoked for cause after a hearing before the Traffic and Parking Commission.

8.1.6 Permits shall be revokable and non-transferable.

8.1.7 Permits shall be carried in the vehicle cab at all times and a decal provided with the permit shall be displayed as required to be readily visible from outside the vehicle.

8.1.8 The fee for a permit issued under this regulation shall be $100.00 for the first year and $25.00 for annual renewals. An additional charge to be determined will be required for each vehicle decal.

Section 9.0 Reporting Requirements

9.1 Incidents occurring in the City and required to be reported by 49 CFR 171.15 shall be reported to the Fire Department by telephone using the Fire Alarm Office number (536–1500) or emergency number 911, and by copy of the written report required by 49 CFR 171.16 mailed to the Fire Commissioner at 115 Southamption St., Boston, Mass. 02118 within the time allowed for filing the 49 CFR 171.16 report.

Section 10.0 Suspension of Operations.

The Fire Commissioner may temporarily suspend the operation of some or all vehicles carrying hazardous materials within the City, without notice whenever road, weather, traffic or other special circumstances warrant that action.

Section 11.0 Authority to Suspend Regulations.

The Commissioner shall have the authority to suspend the Regulation in whole or in part, when extenuating circumstances severely limit transit.

Section 12.0 Violations.

Any person who violates any provision of these regulations shall be punished by a fine of not more than one thousand dollars or by imprisonment for not more than one year or both pursuant to MGL c 148 § 15 or other applicable law. Each violation shall be treated separately. When a violation is a continuing one, each day of the violation constitutes a separate offense.

Section 13.0 Severability.

If any provision or clause of these regulations or application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications of these regulations which can be given effect without the invalid provision or application and to this end the provisions of these regulations are declared to be severable.

Section 14.0 Effective Date.

These regulations shall be effective on December 15, 1980 for permit application purposes. Full compliance will be required by March 2, 1981.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/FSQS		DOT/FAA	USDA/FSQS
DOT/FHWA	USDA/REA		DOT/FHWA	USDA/REA
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/NHTSA	LABOR		DOT/NHTSA	LABOR
DOT/RSPA	HHS/FDA		DOT/RSPA	HHS/FDA
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.
Comments on this program are still invited.
Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last Listing March 18, 1981; last cumulative listing for the 96th Congress (1980), January 7, 1981.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.
WHO: The Office of the Federal Register.
WHAT: Free public briefings (approximately 2½ hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between Federal Register and the Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in Government actions. There will be no discussion of specific agency regulations.

WHEN: April 10 and 24, at 9 a.m. (identical sessions).
WHERE: Office of the Federal Register, Room 9409, 1100 L Street NW., Washington, D.C.
RESERVATIONS: Call King Banks, Workshop Coordinator, 202–523–5235.

Highlights

Briefings on How To Use the Federal Register—For details on briefings in Norfolk, Va., see announcement in the **Reader Aids** section at the end of this issue.

19118 Grant Programs LSC announces consideration of applications from various bar and legal assistance associations

18932 Housing Treasury/Comptroller issues rules for national banks making or purchasing adjustable-rate loans secured by liens on one-to-four family dwellings; effective 3–27–81

18976 Education-Financial Assistance for Children With Special Needs ED amends rules concerning financial assistance to local and state agencies to meet special educational needs of children

18975 Education-Financial Assistance for Handicapped Children ED proposes suspension of interpretation on assistance to states for education of handicapped children, and nondiscrimination on the basis of handicap in programs and activities receiving or benefiting from Federal financial assistance, comments by 4–27–81

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Highlights

18974 **Occupational Exposure To Lead** Labor/OSHA further defers effective date of new trigger levels for medical removal protection until 5–1–81, comments by 4–15–81

19110 **Labor-Aliens in Agriculture** Labor/ETA proposes withdrawal of rule establishing a new methodology for computing adverse effect wage rates for the temporary alien agricultural labor certification program, comments by 4–27–81

19004 **Government Procurement** Labor/FCCPO proposes to withdraw rule affecting contractor payments for employee memberships in private clubs and organizations which discriminate in membership policies, comments by 4–27–81

19000 **Potential Occupational Carcinogens** Labor/OSHA withdraws proposed amendments concerning identification, classification, and regulation; effective 3–27–81

18998 **Fair Labor Standards Act—Exemptions** Labor/ESA proposes to suspend indefinitely final rules concerning salary levels used to determine exemption of bona fide executive, administrative or professional employees from the Fair Labor Standards Act, comments by 4–27–81

19000 **Education Programs** ED issues notice of intent to review and amend certain regulations and interpretations that take effect 3–30–81; comments by 5–31–81

18999 **Labor-Walkaround Compensation** Labor/OSHA delays effective date until 5–30–81 for final rule requiring compensation for employee representatives participating in the walkaround and related portions of an OSHA enforcement inspection from March 30, 1981 to May 30, 1981, and proposes to revoke the regulation in its entirety

19002 **Veterans** VA proposes to amend its rules governing reduction of aid and attendance allowance to a veteran hospitalized by the Veterans Administration, comments by 4–27–81

19119 **Privacy Act Document** National Capital Planning Commission

19136 **Sunshine Act Meetings**

VOL 46 NO 59 MAR 27 1981

Rules and Regulations

Federal Register
Vol. 46, No. 59
Friday, March 27, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 213

Excepted Service; Department of Agriculture

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: This amendment clarifies appointment conditions and makes editorial changes to the Schedule A exception applicable to Members of State Committees with the Agricultural Stabilization and Conservation Service.

EFFECTIVE DATE: March 13, 1981.

FOR FURTHER INFORMATION CONTACT:
On position authority: William Bohling, Office of Personnel Management, 202–632–6000.
On position content: Phyllis Mowery, Department of Agriculture, 202–447–7131.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

Accordingly, 5 CFR 213.3113(d)(2) is revised to read as follows:

§ 213.3113 Department of Agriculture.

* * * * *

(d) *Agricultural Stabilization and Conservation Services.* * * *

(2) Members of State Committees: *Provided,* That employment under this authority shall be limited to temporary intermittent (WAE) positions whose principal duties involve administering farm programs within the State consistent with legislative and Departmental requirements and reviewing national procedures and policies for adaptation at State and local levels within established parameters. Individual appointments under this authority are for 1 year and may be extended only by the Secretary of Agriculture or his designee. Members of State Committees serve at the pleasure of the Secretary.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp. p. 218)

[FR Doc. 81-9189 Filed 3-26-81; 8:45 am]

BILLING CODE 6325-01-M

5 CFR Part 213

Excepted Service; Department of Agriculture

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: This amendment excepts from the competitive service under Schedule A temporary field positions in the Animal and Plant Health Inspection Service concerned with emergency plant diseases and emergency outbreaks of plant pests, because it is impracticable to examine for these positions. Prior to this amendment, only those temporary field positions treating emergency livestock diseases had Schedule A coverage.

EFFECTIVE DATE: February 10, 1981.

FOR FURTHER INFORMATION CONTACT:
On position authority: William Bohling, Office of Personnel Management, 202–632–6000.
On position content: Pat Killen, Department of Agriculture 202–447–5625.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

Accordingly 5 CFR 213.3113(k)(2) is revised to read as follows:

§ 213.3113 Department of Agriculture.

* * * * *

(k) Animal and Plant Health Inspection Service.* * *

(2) Temporary field positions concerned with the control, suppression, and eradication of emergency livestock and plant diseases and emergency outbreaks of animal and plant pests. Persons appointed under this authority may not be employed in these positions in the Animal and Plant Health Inspection Service for longer than 1 year under this authority, or under a combination of this and any other authorities for excepted appointment that may be appropriate, without prior approval of OPM. This authority shall be appropriate only in situations declared by the Secretary of Agriculture to be emergencies threatening the livestock and plant industries of the country.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp. p. 218)

[FR Doc. 81-9190 Filed 3-26-81; 8:45 am]

BILLING CODE 6325-01-M

5 CFR Part 213

Excepted Service; Department of the Air Force

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: Professional positions in Detachment 6, 2762 Logistics Squadron (Special), Norton Air Force Base, California, which will provide logistic support management to specialized research and development projects, are excepted under Schedule A because it is impracticable to hold an examination for them.

EFFECTIVE DATE: December 19, 1980.

FOR FURTHER INFORMATION CONTACT:
On position authority: William Bohling, Office of Personnel Management, 202–632–6000.
On position content: Joseph M. Young, Department of the Air Force, 202–694–2739.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

Accordingly, 5 CFR 213.3109 (c) is added as set out below:

§ 213.3109 Department of the Air Force.

* * * * *

(c) Not to exceed 14 professional positions, GS–11 through GS–15, in Detachment 6, 2762 Logistics Squadron (Special), Norton Air Force Base, California, which will provide logistic support management to specialized research and development projects. Employment under this authority may not exceed January 31, 1985.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp. p. 218)

[FR Doc. 81-9188 Filed 3-26-81; 8:45 am]

BILLING CODE 6325-01-M

5 CFR Part 213

Excepted Service; Department of Commerce

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: Schedule B authority for positions of Community Services Specialist in the Bureau of the Census is amended to reduce the number of positions from 50, to remove the limitation on service, and to remove the prohibition against new appointments. These changes reflect the level of community liaison needed for continuing census activities. Exception of the positions remains appropriate because it is still impracticable to hold competitive examinations for them.

EFFECTIVE DATE: February 17, 1981.

FOR FURTHER INFORMATION CONTACT:

On position authority: William Bohling, Office of Personnel Management, 202–632–6000.

On position content: Bettie Bryant, Bureau of the Census 301–763–7450.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

Accordingly, 5 CFR 213.3214(a)(2) is revised as follows:

§ 213.3214 Department of Commerce.

(a) *Bureau of the Census.* * * *

(2) Not to exceed 50 Community Services Specialist positions at the equivalent of GS–5 through GS–12.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp. p. 218)

[FR Doc. 81–9168 Filed 3–26–81; 8:45 am]

BILLING CODE 6325–01–M

5 CFR Part 213

Excepted Service; Entire Executive Civil Service

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Schedule A authority for appointment of readers for blind employees and interpreters for deaf employees is amended to include appointment of personal assistants for handicapped employees and to remove the restriction against performing work not directly related to reading or interpreting duties. These changes correspond to and implement changes to 5 U.S.C. 3102 made by Pub. L. 96–523. Exception of these positions remains appropriate because examination for them is still impracticable.

EFFECTIVE DATE: January 15, 1981.

FOR FURTHER INFORMATION CONTACT:

On position authority: William Bohling, Office of Personnel Management, 202–632–6000.

On position content: Anice V. Nelson, Office of Personnel Management, 202–632–5687.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

Accordingly, 5 CFR 213.3102 (ll) is revised as follows:

§ 213.3102 Entire Executive Civil Service.

* * * * *

(ll) Positions as needed of readers for blind employees, interpreters for deaf employees and personal assistants for handicapped employees, filled on a full-time, part-time, or intermittent basis.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp. p. 218)

[FR Doc. 81–9167 Filed 3–26–81; 8:45 am]

BILLING CODE 6325–01–M

5 CFR Part 213

Excepted Service; Department of Health and Human Services

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: Fifteen positions to be filled by Interns and Residents in Applied and Evaluative Research (Mental Health) at Saint Elizabeths Hospital, are excepted under Schedule A because it is impracticable to hold an examination for them.

EFFECTIVE DATE: February 26, 1981.

On position authority: William Bohling, Office of Personnel Management, 202–632–6000.

On position content: Donna D. Beecher, Department of Health and Human Services, 202–245–1943.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

Accordingly, 5 CFR 213.3116(a)(13) is added as follows:

§ 213.3116 Department of Health and Human Services.

(a) *Saint Elizabeths Hospital.* * * *

(13) Fifteen positions of Interns and Residents in Applied and Evaluative Research (Mental Health) Program. Employment under this authority may not exceed two years for any individual.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp. p. 218)

[FR Doc. 81–9161 Filed 3–26–81; 8:45 am]

BILLING CODE 6325–01–M

5 CFR Part 213

Excepted Service; Department of Health and Human Services

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: Ten professional positions to be filled under the Health Care Financing Administration Professional Exchange Program, are excepted under Schedule A because it is impracticable to hold an examination for them.

EFFECTIVE DATE: January 5, 1981.

On position authority: William Bohling, Office of Personnel Management, 202–632–6000.

On position content: Donna D. Beecher, Department of Health and Human Services, 202–245–1943.

Office of Personnel Management.

Beverly M. Jones,

Issuance System Manager.

Accordingly, 5 CFR 213.3116(j)(2) is added as set out below:

§ 213.3116 Department of Health and Human Services.

* * * * *

(j) *Health Care Financing Administration.* * * *

(2) Not to exceed 10 professional positions, GS–9 through GS–15, to be filled under the Health Care Financing Administration Professional Exchange Program. Appointments under this authority will not exceed 1 year.

(5 U.S.C. 3301, 3302; EO 10577; 3 CFR 1954–1958 Comp. p. 218)

[FR Doc. 9168 Filed 3–26–81; 8:45 am]

BILLING CODE 6325–01–M

5 CFR Part 213

Excepted Service; Department of Health and Human Services

AGENCY: Office of Personnel Management

ACTION: Final rule.

SUMMARY: This amendment removes the numerical limitation on positions, GS–15 and below, for an emergency staff to assist in the resettlement of the current wave of Cuban and Haitian entrants. This Schedule A exception is still appropriate because it continues to be

impracticable to examine for these positions.

EFFECTIVE DATE: January 13, 1981.

FOR FURTHER INFORMATION CONTACT:
On position authority: William Bohling, Office of Personnel Management, 202–632–6000.
On position content: David Mischel, Department of Health and Human Services, 202–245–1943.

Office of Personnel Management.
Beverly M. Jones,
Issuance System Manager.

Accordingly, 5 CFR 213.3116 (k)(1) is revised, as follows:

§ 213.3116 Department of Health and Human Services.

* * * * *

(k) *Office of the Secretary.*

(1) Staff positions, GS–15 and below, for an emergency staff to assist in the resettlement of the current wave of Cuban and Haitian entrants. Employment under this authority may not exceed September 30, 1982.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp. p. 218)

BILLING CODE 6325-01-M

---

5 CFR Part 213

Excepted Service: Department of the Treasury

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: Schedule A excepted service appointing authorities covering 10 positions at grades equivalent to GS–13 through 17 for employment up to 4 years on studies of international trade and energy policies and 10 positions at the same grades for employment up to 4 years on studies of international financial and economic policies in the Department of the Treasury are consolidated and moved from the Offices of the Assistant Secretary for International Affairs and Trade, Energy and Financial Resources Policy Coordination into the Office of the Secretary to reflect the Department's internal reorganization.

EFFECTIVE DATE: March 12, 1981.

FOR FURTHER INFORMATION CONTACT:
On position authority: William Bohling, Office of Personnel Management, 202–632–6000.
On position content: Patricia G. Sandberg, Department of the Treasury, 202–566–2707.

Office of Personnel Management.
Beverly M. Jones,
Issuance System Manager.

Accordingly, 5 CFR 213.3105(c)(1) and 213.3105(f)(1) are removed and 5 CFR 213.3105(a)(1) is added as follows:

§ 213.3105 Department of the Treasury.

(a) *Office of the Secretary.*

(1) Not to exceed 20 positions at the equivalent of GS–13 through GS–17 to supplement permanent staff in the study of complex problems relating to international financial, economic, trade and energy policies and programs of the Government, when filled by individuals with special qualifications for the particular study being undertaken. Employment under this authority may not exceed 4 years.

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Lemon Regulation 298]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period March 29–April 4, 1981. Such action is needed to provide for orderly marketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: March 29, 1981.

FOR FURTHER INFORMATION CONTACT:

William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* This rule has been reviewed under USDA procedures and Executive Order 12291 and has been classified "not significant", and not a major rule. This regulation is issued under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR part 910), regulating the handling of lemons grown in California and Arizona. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1980–81. The marketing policy was recommended by the committee following discussion at a public meeting on July 8, 1980. A regulatory impact analysis on the marketing policy is available from William J. Doyle, Acting Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

The committee met again publicly on March 24, 1981, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

Section 910.598 is added as follows:

§ 910.598 Lemon Regulation 298.

The quantity of lemons grown in California and Arizona which may be handled during the period March 29, 1981, through April 4, 1981, is established at 250,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 25, 1981.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division Agricultural Marketing Service.

BILLING CODE 3410-02-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 19

[Docket No. 81-11]

Rules of Practice and Procedure

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: It is stated in 12 CFR 19.4(a) that all written materials filed in connection with an administrative proceeding conducted under 12 CFR Part 19 "shall be filed with the Deputy

Comptroller for Administration or other person designated to receive papers for the agency in a proceeding." The Office of the Comptroller of the Currency has recently designated a Hearing Clerk to receive all filings and maintain the record in such proceedings. Accordingly, 12 CFR 19.4(a) is amended to state that all written materials "shall be filed with the Hearing Clerk or other person designated to receive papers for the agency in a proceeding."

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: William B. Glidden, Special Assistant to the Chief Counsel, Office of the Comptroller of the Currency, 490 L'Enfant Plaza, SW., Washington, D.C. 20219, (202) 447-1077.

SUPPLEMENTARY INFORMATION: The amendment of 12 CFR 19.4(a) to designate the Hearing Clerk in lieu of the Deputy Comptroller for Administration as the appropriate official to receive all filings in a 12 CFR Part 19 proceeding constitutes a rule of agency organization, management or personnel. The amendment therefore is not subject to Executive Order 12291, February 17, 1981 (*see* section 1(a)(3) exempting such regulations), or to the Regulatory Flexibility Act (since the regulation is not covered by the mandated rulemaking procedures of 5 USC 553). Since the designation of the Hearing Clerk to receive filings under 12 CFR 19.4(a) relates to agency organization, management or personnel, the proposed rulemaking and public procedures and delayed effective date contemplated by 5 USC 553 do not apply.

Accordingly, for the reasons set forth in this preamble, the first sentence in 12 CFR 19.4(a) is amended as follows:

1. The authority citation for Part 19 is as follows:

Authority: Secs. 8 and 10 of the Federal Deposit Insurance Act (12 USC 1818, 1820); secs. 12 (h) and (i), 15B(c), 21 and 23 of the Securities Exchange Act of 1934 (15 USC 78*l* (h) and (i), 78o-4(c), 78u, 78w); Administrative Procedure Act (5 USC 554-57); secs. 101, 103, 107, and 801 of the Financial Institutions Regulatory and Interest Rate Control Act of 1978 (Pub. L. 95-630); secs. 4 and 13(a) of the International Banking Act of 1978 (Pub. L. 95-369).

2. Section 19.4(a) is revised to read as follows:

§ 19.4 Filing and service.

(a) *Filing.* Any notice which commences proceedings, any response or answer thereto, any amended notice and answer thereto, any notice of hearing, every order or ruling except one which is entered during the course of a hearing and is part of the hearing transcript, every paper relating to discovery, every written motion, memorandum, notice, appearance, proof of service or similar paper, every stipulation of the parties, the hearing transcript together with all exhibits accepted into evidence, proposed findings and conclusions by the parties, the findings and conclusions and recommended decision of the presiding officer, parties' exceptions thereto, and the decision and final order of the Comptroller shall be filed with the Hearing Clerk or other person designated to receive papers for the agency in a proceeding.

Dated: March 24, 1981.

John G. Heimann,

Comptroller of the Currency.

[FR Doc. 81-9510 Filed 3-26-81; 8:45 am]

12 CFR Part 29

[Docket No. 81-10]

Adjustable-Rate Mortgages

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: This regulation establishes a framework within which all national banks may make and purchase residential mortgage loans which carry an interest rate subject to periodic adjustment. The authorization is intended to help ensure the availability of mortgage funds by facilitating the development of new instruments responsive to changing interest rates and bank deposit structures. The regulation provides for the protection of borrowers by requiring disclosures designed to facilitate their understanding and by moderating the frequency and magnitude of potential rate increases.

EFFECTIVE DATE: March 27, 1981. A 120-day transition period is provided for national banks with existing programs that do not comply with this regulation.

FOR FURTHER INFORMATION CONTACT: Jonathan L. Fiechter, Deputy Director, Banking Research and Economic Analysis Division, (202) 447-1914, or Andrew J. Levinson, Senior Attorney, Legal Advisory Services Division, (202) 447-1880, Office of the Comptroller of the Currency, Washington, D.C. 20219.

I. Rulemaking Proceeding

A. Background Information

On September 29, 1980, the Office of the Comptroller of the Currency (Office) published for comment a proposed regulation governing adjustable-rate mortgage lending by national banks (45 FR 64196). Rather than specifying a single mortgage instrument, the Office proposed that all national banks be authorized to design adjustable-rate mortgage loans that meet their needs and those of their customers. The proposal also solicited comment on the wide variety of issues associated with adjustable-rate mortgage lending. The public comment period was to expire on November 28, 1980.

On December 1, 1980, the Office published notice in the **Federal Register** extending the comment period through December 30, 1980, and announcing joint hearings on adjustable-rate mortgage instruments with the Federal Home

Loan Bank Board (45 FR 79620). The two agencies determined that joint hearing would encourage broad public participation in the rulemaking process and would assist efforts by the agencies to promote greater uniformity in the regulation of adjustable-rate mortgage lending by federally-chartered financial institutions. Hearings took place on December 2 in Washington, D.C.; December 3 in Chicago, Illinois; and December 9, in Los Angeles, California.

B. General Summary of Comments

In response to its proposed regulation, the Office received written comments from approximately 330 persons and oral testimony of over 80 witnesses commenting on behalf of national and state-chartered banks, thrift institutions, other mortgage lenders, members of Congress, federal and state officials, trade associations, law firms, community and consumer groups, and individuals.

Support for flexible adjustable-rate mortgage (ARM) lending authority was virtually unanimous among those commenting on the ARM proposal on behalf of national banks. However, some of them felt that the proposed limits on interest rate adjustments were too restrictive and thus might discourage ARM lending. Representatives of consumer groups and community groups expressed concern over the rising cost of homeownership and the impact that ARM lending might have on the availability of mortgage credit for low- to moderate-income borrowers and low- to moderate-income neighborhoods. Many consumer representatives were sympathetic to the difficulties mortgage lenders face in making fixed-rate loans in an inflationary environment. Nonetheless, they urged that the extension of ARM lending authority be limited and that such authority be granted only in combination with other federal government actions to assure the availability of affordable mortgage funds for low- and moderate-income borrowers.

A more detailed discussion of the comment letters and testimony is contained in the Section "Specific Provisions of the Final Rule".

C. Comments on Payment-Capped Mortgages

In the proposed regulation the Office also solicited comments on the merits of placing limits on payment changes in addition to or instead of limiting periodic interest rate adjustments. However, few respondents addressed those issues. Limiting, or capping, payment changes affects the rate of repayment of the loan and, moreover, introduces the potential for increases to the outstanding loan balance. Attention to the features of payment-capped mortgages is especially relevant now because some banks and thrift institutions have begun offering mortgage loans on which payment changes, but not interest rate changes, are limited.

D. Actions of the Comptroller of the Currency

The Office has decided to adopt a final rule governing the authority of national banks to make or purchase ARM loans with interest rate change limitations. This rule is effective immediately upon the date of publication in the Federal Register. National banks currently making ARMs with interest rate change limitations have 120 days to ensure that those mortgage programs comply with this rule.

Because experience with payment-capped mortgage loans is limited, and the advantages and disadvantages to lenders and borrowers are not yet well understood, the Office has decided to consider the issues raised by these loans further before attempting to design a regulatory framework for these instruments. The final rule contains provisions, intended as an interim rule, allowing lenders with existing payment-capped mortgage plans to continue to offer such loans subject to review and possible modification or termination of the plans by direction of this Office. Lenders wishing to initiate a payment-capped mortgage plan, but which have not made a payment-capped loan or a binding commitment to lend under such a program as of the publication date of this regulation must first provide this Office with a copy of all program loan documents before offering such loans. If the Office has not required the bank to modify or abandon the program within 60 days of submission of the loan documents, the bank may proceed with the program.

II. Outline of Final Rule

The final rule, which governs ARM lending by national banks to the exclusion of rules on the subject found in state law or regulation, requires that purchase-money adjustable-rate mortgage loans made or purchased by national banks on one- to four-family dwellings meet the following conditions:

- Adjustments to the interest rate on the loan must correspond with the changes in one of several specified national interest rate indexes (§ 29.4).
- Adjustments to the interest rate on the loan must occur at regular intervals not shorter than 6 months. However, the interval before the first rate adjustment may be longer than subsequent intervals (§ 29.5(a)).
- The maximum interest rate change may not exceed 1 percentage point for every 6-month period between rate adjustments. For instance, the interest rate on a mortgage loan subject to rate adjustment every 2 years could not be increased by more than 4 percentage points at any adjustment date, even if warranted by a larger increase in the index. In no event may a single interest rate adjustment exceed 5 percentage points. The bank may, however, decrease interest rates at any time without regard to changes in the index or any other limitations (§ 29.5(b)).
- Interest rate increases warranted by increases in the index may be imposed at the bank's option, but decreases called for by net decreases in the index are mandatory. A bank may, at its option, offer mortgage instruments with further limits. For example, it may limit changes (both increases and decreases) in the interest rate over the life of the mortgage loan to not more than a fixed number of percentage points. To avoid minor changes in the interest rate caused by small fluctuations in the index, a bank may set a minimum rate adjustment (which must be applicable to both increases and decreases) of, for example, one-eighth of one percentage point (§ 29.5(c)).
- Changes in the interest rate index that have not been translated into changes in the mortgage interest rate may be carried over to the next rate change date to the extent that the amount carried over has not been offset by a subsequent movement in the index of the opposite direction (§ 29.5(c)).
- Adjustments to the interest rate may be implemented through changes in the payment amount and/or the rate of amortization, but limitations are imposed on the maximum amount of negative amortization (§ 29.5(d)).
- Prepayment penalties may not be charged after the first scheduled rate-adjustment notification date. Banks are also prohibited from charging fees for rate adjustments (§29.6 and 29.5(c)).
- ARM loans may contain due-on-sale clauses or may be assumable at the discretion of the bank. Banks may include provisions in ARM loans permitting adjustment of the interest rate and other terms on such assumed loans (§ 29.7).
- No later than the time at which the ARM loan application is provided to the prospective borrower, a bank must disclose information on the index and on how a payment schedule for a similar loan would be affected by certain

changes in the index, as well as certain other information (§29.8).

• Banks may offer a program of ARM loans with limitations on payment changes instead of limitations on interest rate changes and without regard to the limitations on negative amortization, but such programs are subject to review and possible modification or termination by direction of the Office of the Comptroller of the Currency (§ 29.9).

• Banks currently making ARM loans that do not comply with all of the provisions of this regulation will have a 120-day grace period from the effective date of this regulation to bring their ARM program into conformity with these provisions (§ 29.10).

III. Policy Considerations

A. The Need for and Expected Benefits of Regulation

The objective of the Office in issuing an adjustable-rate mortgage regulation is to encourage national bank participation in the residential mortgage market by facilitating the development of new mortgage instruments that are responsive to changing interest rates, deposit and liability structures, and borrower needs. By providing national banks with the flexibility to design mortgage instruments that both accommodate the needs of their customers and yield a rate of return roughly commensurate with their payment of market interest rates on their deposits, mortgage lending will be encouraged.

It may be especially important over the next few years to encourage depository institutions to participate actively in the mortgage market. Many housing and mortgage market analysts predict that the 1980s will be a period of unprecedented demand for housing and, therefore, mortgage funds. It is, thus, crucial that the mortgage finance system permit mortgage instruments which accommodate the changing needs of mortgage lenders in our current economic environment.

The nation's depository system is gradually being transformed from a protected system of specialized lending institutions such as banks, thrift institutions, and credit unions into a highly competitive system of depository institutions that are increasingly competing side by side with nondepository financial intermediaries for deposits and lending opportunities. Moreover, individual savers have become increasingly sensitive to obtaining market rates of interest on their funds. Recognizing these developments, federally-imposed deposit rate ceilings, in place for decades, will be phased-out by March 31, 1986, as part of the implementation of the Depository Institutions Deregulation and Monetary Control Act of 1980. As a result, banks' average cost of funds will increasingly reflect changes in market rates of interest, making it extremely difficult for them to project their future cost of funds and to set appropriate interest rates on long-term fixed-rate assets. In such an environment, in which interest rates and the cost of funds are volatile, the Office does not believe it is realistic to expect depository institutions to lend substantial amounts of funds for long terms at fixed rates of interest.

Interest rates on the popular 6-month money market certificate of deposit have ranged from 6.66 percent in June of 1980 to 15.42 percent in December of 1980. At the end of 1980, 43 percent of commercial bank deposits were in rate-sensitive liabilities, including large negotiable certificates of deposit (with no interest-rate ceilings), money market certificates of deposit (with interest-rate ceilings tied to the rate on 6-month Treasury bills), and 2½ year small-saver certificates (with interest rate ceilings tied to the yield on Treasury securities maturing in 2½ years).

The market values of fixed-rate long-term mortgages made last September have already suffered a 10 percent decline due to higher interest rates. Financial institutions with large portfolios of low-coupon fixed-rate mortgages made in previous years have suffered an even more dramatic decline in the market value of their assets. As a consequence of these declines, it is becoming increasingly difficult for borrowers to obtain fixed-rate mortgage loans except from lenders with access to federally-sponsored agencies or private investors willing to purchase those loans. Clearly, depository institutions need mortgage instruments with rates of return that more closely follow changes in market interest rates.

It is equally clear, however, that not all individuals have incomes that are sufficiently flexible and responsive to changes in the rate of inflation to keep pace with the varying payment obligations of an ARM loan. While inflation and high interest rates have been widespread, individual consumers and communities have been affected differently. A review of nominal income trends on a regional basis and by occupation has shown wide variance in the ability of households to increase or even maintain their annual real incomes. Trends in housing prices have also varied substantially among regions and within regions in the United States.

Due to the varying needs of lenders and borrowers, the Office has determined that it would be unwise to issue a final rule that defined the specific contractual terms and loan documents of an ARM instrument. While such an approach would assure uniformity, simplify the supervisory problems of this Office, make consumer comparison shopping easier, and facilitate the early development of a secondary market for these instruments, it is not apparent that a single instrument can meet the varying needs of all borrowers, lenders, and investors.

The final rule, therefore, extends broad authority to all national banks to design ARM instruments. Within the limitations set forth in the regulation, national banks may tailor loans to the needs of their local markets.

B. Affordability Concerns and Monitoring Program

Representatives of local community organizations expressed the concern that widespread use of ARMs would tend to exacerbate the difficulties of low- and moderate-income households and of minorities and women in purchasing homes. These groups argued that the future incomes of such borrowers might not keep pace with required monthly payments, or that lenders might believe that these borrowers' incomes would not keep pace, thus making it more difficult for them to qualify for adjustable-rate loans than for fixed-rate loans. Conversely, these groups also fear the possibility that, once having qualified for an ARM, such borrowers would face greater risks of subsequent default.

A number of comments from consumer groups suggested that national banks be required to offer a fixed-rate mortgage option to each buyer. Another suggestion from these groups was that the Office suspend further consideration of the regulation until Congress can review the proposed instruments in the context of developing a national housing policy to address the affordability problems of moderate- and low-income families.

The Office shares the concerns of these groups about housing affordability but believes that neither of these recommendations would address them effectively. The source of the affordability problem is the underlying inflation in the economy. ARMs are not a cause of this inflation but rather a response to it. As stated previously, the regulation is intended expressly to encourage and facilitate the involvement

of national banks in mortgage lending. To the extent that banks are attracted into this market by the availability of a mortgage instrument suitable to an inflationary and volatile interest rate environment, the supply of mortgage credit will expand and interest rates will tend to be lower than they otherwise would be. In contrast, if banks do not have a viable mortgage instrument available to them, many will not make mortgage loans, or will build a substantial "inflation insurance premium" into the rate on fixed-rate instruments. Either way, the net effect of discouraging ARMs in such a market would be to drive up interest rates.

The housing affordability problem is more fundamental than the issue of fixed-rate versus adjustable-rate mortgages. The risks of making long-term fixed-rate mortgages in an inflationary environment have already led lenders to set interest rates on those instruments at levels that many moderate-income families cannot afford. That point was supported by the testimony and comments which repeatedly suggested that the borrowers who are the subject of special concern have already been priced out of the traditional fixed-rate mortgage market. Mandating the continued offering of fixed-rate mortgages is not, therefore, a solution to the housing affordability problem.

However, the Office believes that those concerned about housing affordability are correct in their perception that the nation has entered a period of significantly increased costs for housing and housing credit, and that those costs may threaten the expansion of homeownership which the nation has enjoyed in recent decades. While the Office believes it is appropriate for homebuyers to pay a competitive market interest rate, the Office is concerned that continued inflation may cause housing financing costs to rise more rapidly than family income. We concur with those comments which suggested that the affordability problem should be addressed directly through consideration of national policy alternatives. The hearings produced a number of such policy proposals, all of which were beyond the jurisdiction of this Office. Nevertheless, the Office will take every opportunity to contribute to efforts to fashion a national program that expands opportunities for homeownership.

The Office is concerned that individual banks offering ARMs might fail to satisfy their obligations, as expressed in the Community Reinvestment Act (CRA), to help meet the credit needs of their entire communities. Such national banks, based on unsubstantiated perceptions that prices of properties or incomes of residents in low- and moderate-income areas will not increase in line with increases in the general inflation rate, may be unwilling to make ARM loans in these areas. Similarly, the offering of ARMs could have ramifications for the implementation of the Equal Credit Opportunity Act and the Fair Housing Act. Lenders could use loan evaluation criteria, including unsubstantiated projections of future income growth, that have the illegal effect of discriminating against minorities, women, or other groups protected by these laws. The Office reiterates its intention, as expressed in the preamble to the proposed regulation, to monitor systematically the impact of ARMs on low- and moderate-income areas, and on women and minorities. This monitoring will be conducted in three ways.

First, the Office is in the process of making minor amendments to its existing Fair Housing Home Loan Data System to permit separate analysis of ARMs. This will permit analyses of credit decisions and loan terms offered by individual banks, to determine whether the type of mortgage offered varies according to the characteristics of the borrower or the property and, similarly, to determine whether credit standards and loan terms differ by type of mortgage. If differences exist, the Office will attempt to determine whether they are reasonable or discriminatory.

Second, the Office intends to use existing information collection systems to monitor the volume of ARM lending by national banks. This information will be collected in connection with periodic reports of condition that all federally-regulated banks are currently required to submit. Lending patterns in particular locations, such as individual states or Standard Metropolitan Statistical Areas, and comparisons of lending patterns by size of bank, urban versus rural location, and other factors will be analyzed.

Third, the Office will use the routine bank examination process to evaluate the record of each bank in complying with the fair credit laws and in responding to its CRA obligations.

It should be emphasized that all three of these monitoring efforts will be implemented through the use of existing systems with only minor amendments. The Office will not impose any significant new reporting requirements on banks for the purpose of monitoring adjustable-rate mortgage activity.

The Office will evaluate the information obtained through these monitoring efforts together with other relevant information, on a continuing basis, and will make a comprehensive review of the results two years following the effective date of this regulation. If the results of this evaluation indicate an adverse impact on the objectives of equal credit opportunity or community reinvestment the Office will consider using all available means, including amendments to the regulation, that would help to alleviate this impact. If the results of the evaluation suggest no adverse impact, or a positive impact, on those areas under consideration, the Office will consider elimination of the monitoring program and will also consider permitting additional flexibility in the adjustable-rate mortgages that national banks may offer.

IV. Specific Provisions of the Final Rule

A. Definition

The final rule defines an ARM as any loan made to finance or refinance the purchase of a one- to four-family dwelling, which permits the lender to adjust the interest rate periodically. The definition of an ARM loan in the proposed regulation included all loans that have an adjustable-rate feature and are secured by a one- to four-family dwelling.

In general, comments favored limiting the scope of the definition rather than expanding it. Comments on what types of loans should be included under this regulation covered a number of options. Some comments stated that all real estate loans should be covered, while others stated that construction loans, which in many areas are tied to the prime interest rate, should be exempted, and still others felt that business, commercial, or non-purchase-money loans secured by one- to four-family dwellings should not be included.

The intent of the regulation is to improve the availability of mortgage funds for purchasing residential property and to provide protections to home purchasers. The intent is not to regulate adjustable-rate loans made for other purposes. Therefore, the definition has been rewritten to make clear that the regulation applies only to purchase-money mortgages on one- to four-family homes.

B. Indexes

The proposed regulation provided national banks with the choice of one of four specified national interest rate indexes. These indexes were the Federal

Home Loan Bank Board's (FHLBB) average mortgage rate on previously occupied homes, the Federal National Mortgage Association's (FNMA) auction rate on mortgage purchase commitments, the 3-year rate on U.S. Treasury securities, and the 5-year rate on U.S. Treasury securities. Comment was specifically requested on whether lenders should be provided with a choice of indexes, the appropriateness of the proposed indexes, the appropriateness of any other indexes including the use of a lender's own lending rate as an index, regional indexes, and the use of averaging to smooth out interest rate peaks and valleys.

A significant number of respondents and witnesses at the hearings commented on these issues. A slight majority favored providing lenders with an array of indexes rather than a single index because of the difficulty of choosing one index that meets the diverse needs of all lenders and borrowers. Those indicating a preference for a single index argued that it would facilitate the sale of ARMs in the secondary market. The greater ease of comparison shopping by borrowers was also noted as a reason to choose a single index. However, there was little agreement among those preferring a single index as to which index should be chosen.

The Office believes that the flexibility provided by giving lenders a choice among several indexes is especially important at this stage in the development of ARMs. While secondary market considerations may eventually dictate the use of a single index for loans sold, the Office believes the choice of index for that purpose should be determined in the market. On the basis of comments, the Office has decided to authorize three indexes. They are short- and medium-term Treasury rates (6-month and 3-year) and the Federal Home Loan Bank Board series of contract mortgage rates. Each of the three authorized indexes reflects a nationwide average of interest rates on mortgage loans or securities traded in national markets, is easily verifiable, and is beyond the control of a single lender.

The Office has determined that the FNMA auction rate on FHA/VA mortgage purchase commitments, which was proposed as a possible index, is not an appropriate index for ARMs. Comments were received favoring authorization of a FNMA index with some indicating a preference for an index of the FNMA auction commitment rates on conventional rather than FHA/VA loans. Several comments, however, appeared to be based on the mistaken assumption that FNMA would purchase only ARMs using the FNMA index. This is not correct, and, in fact, FNMA recommended against the adoption of this index, pointing out that its rate is for optional commitments to deliver mortgage loans to FNMA within 120 days (recently reduced to 60 days). As a result, the rate reflects investors' rate expectations rather than current interest rates, and loans committed are delivered only if market conditions so warrant. Furthermore, FNMA pointed out that the rate is under the control of FNMA, and movements in the rate may, on occasion, reflect FNMA corporate objectives rather than market conditions. Similar considerations make the Federal Home Loan Mortgage Corporation's weekly auction yield, which was suggested as an additional index by some lenders, an inappropriate ARM index.

The Office has also dropped the 5-year Treasury rate from the list of authorized indexes. Very few comments indicated a preference for that rate. Because movements in the 3-year and 5-year Treasury rates are similar, elimination of the 5-year Treasury rate will not significantly limit the flexibility afforded borrowers and lenders.

A sizeable number of comments requested authorization of an index that would enable lenders to make mortgage loans with interest rates that reflect changes in their cost of funds. The bank's own marginal cost of funds, an in-house prime rate, and short-term Treasury bill rates were suggested as appropriate short-term indexes. In response to such requests, the Office has added the 6-month Treasury bill rate to the list of authorized indexes. This index should serve as a proxy for the cost to banks of short-term funds and has the advantage of being a national rate and therefore outside of the control of any single lender. The availability of a short-term index may encourage lenders who rely on short-term deposits for funding their mortgage portfolios to become more active in the mortgage market.

A number of comments expressed concern that the use of national indexes did not recognize regional differences in mortgage market conditions and, in particular, regional differences in mortgage rate levels. Some were concerned that national interest rate indexes might differ from local mortgage market rates. The Office emphasizes that the index value does not necessarily determine the level of the initial mortgage contract rate. The choice of the index affects only the magnitude of adjustments to the interest rate. The Office further believes that the flexibility inherent in the regulation, *e.g.*, considerable discretion with respect to interest rate adjustments and rate adjustment periods, should enable lenders to tailor instruments to their particular markets. Regional variances in interest rates can be reflected in the initial pricing of the mortgage loan. Therefore, the Office has not authorized the use of regional indexes.

C. Source of Index Values

National banks are required to use the most recent index value when setting the index base or notifying a borrower of an interest rate adjustment. The Federal Home Loan Bank Board calculates the monthly average mortgage rate on loans closed on previously occupied homes and makes this rate available on or about the 12th of the succeeding month. Treasury security rates for each month are published by the Federal Reserve Board (Federal Reserve's statistical release G.13 (415)) and are released during the first week of the succeeding month.

D. Averaging

Few comments were received on the question of basing interest rate changes on a moving average of the chosen index. However, most who did comment favored averaging, provided it was optional. The regulation provides national banks with the option of using a moving average of an authorized index to adjust ARM interest rates. However, if the 6-month Treasury bill rate is used as an index and the ARM interest rate is adjusted less frequently than once every six months, the bank must base interest rate changes on a moving average of the index values over a period as long as the interval between interest rate adjustments. The purpose of this averaging requirement is to avoid locking a loan into a rate for a period significantly longer than the maturity of the instrument on which that interest rate index is based.

E. Lender's Own Mortgage Rate as Cap

The proposed ARM regulation would have prohibited lenders from raising the rate on an ARM above their current offering rate on similar loans. Respondents who opposed this restriction noted that at any given time, a particular lender's offering rate may reflect policy decisions, such as the volume of mortgages it wants to originate, rather than more general market conditions. As a result, investors might find ARMs an unattractive investment if the loan's interest rate

flexibility were constrained by the originating bank's mortgage policy. In addition, secondary market investors using the group accounting system in pooling their mortgages require that all the loans in a pool change at the same time and by the same amount. The imposition of a lender's own mortgage rate cap which might fluctuate over the life of the ARM would limit the opportunities to pool these loans since loans offered by different banks might have different caps at any given time. For these reasons, the restriction has been deleted from the regulation.

F. Frequency of Rate Changes

The proposed regulation limited adjustments in the interest rate to no more fequently than semiannually. The final rule adopts this provision. The majority of comments favored the 6-month minumum adjustment period and those favoring a different minimum adjustment period were fairly evenly divided between a longer and a shorter period. Several lenders argued that, because their cost of funds may change daily, more frequent interest rate adjustments are more attractive. They noted that more frequent rate changes would benefit both lenders (when interest rates increase) and borrowers (when rates decrease). Lenders in favor of a longer adjustment period argued that it would increase the attractiveness of ARMs to borrowers by enabling them to make spending and saving plans. In addition, it was argued that long adjustment periods would tend to even out cyclical movements in interest rates. In establishing a minimum adjustment period of 6 months the Office is not suggesting that national banks design only ARMs with a 6-month adjustment period. The Office anticipates that national banks will design an array of ARMs with varying adjustment periods to serve different segments of the mortgage market.

The proposed regulation contained a provision intended to facilitate the sale of ARM loans to certain secondary mortgage market investors such as the Federal Home Loan Mortgage Corporation. These investors have indicated their intention to purchase only those ARM loans that have certain common characteristics. Two of these common characteristics—the same starting index value and same rate adjustment date—are necessary so that group accounting may be applied to all the loans in a pool; *i.e.*, they are necessary so that all of the loans will change by the same amount at the same time. To accommodate this need the proposed rule would have allowed loans originated within a six-month (or shorter) interval to be treated as if they had all been originated at the beginning of the interval for the purpose of setting the starting index value, and as if they had been originated at the end of the interval for the purpose of determining the rate adjustment dates.

This pooling provision has been dropped from the final rule because of the potential for inequities. For example, borrowers with loans closing late in a pooling interval will presumably borrow at an interest rate reflecting market conditions at that time. But if interest rates have been rising rapidly during the pooling interval, the starting index value applied to these loans will be quite a bit lower than the actual index value when the loans are closed, giving these borrowers built-in rate increases at the common adjustment date.

The Office recognizes the advantages to secondary market investors of creating pools of ARM loans that have common index values and common interest rate adjustment dates. Accordingly, the final rule contains a provision permitting extension of the first rate adjustment interval by any period in order to achieve common rate adjustment dates. Moreover, the final rule contains no overall interest rate cap and permits lenders to set broad periodic interest rate limitations. This flexibility should permit the ARM interest rate to adjust fully, under most economic scenarios, to any changes in the index as of the first rate adjustment date; in the absence of any carryover of index changes, the interest rates on the pooled ARM loans should thereafter change by the same amount in response to subsequent changes in the index.

G. Periodic Limits on Interest Rate Adjustments

The proposed periodic limit on interest rate adjustments of ½ of 1 percentage point per 6-month period generated a substantial number of comments. A slight majority indicated that the proposed cap would be acceptable, while a number of comments argued that the regulation should place no limit on rate adjustments contending that the limits would discourage national bank participation in the mortgage market.

A maximum limit on periodic interest rate changes of 1 percentage point per 6-month period is imposed in the final rule. The Office has increased the periodic cap over that in the proposed regulation to increase the flexibility of the ARM regulation. Authorization of a 1 percentage point periodic limit is not an endorsement by this Office of ARM instruments incorporating this limit. It is the maximum permitted periodic rate change. While the rule authorizes banks to design instruments which include the maximum permitted rate flexibility, such instruments are clearly not suited to all potential homebuyers. For example, at mortgage interest rate levels of 12 percent to 15 percent, a 2 percentage point annual interest rate cap permits an annual increase in monthly payments of as much as 15 percent. Therefore, if the interest rate on an ARM rose by 2 percentage points, a borrower would need a 15 percent increase in annual income to maintain a constant income-to-payment ratio. Such an increase in income exceeds the growth rate of median family incomes in the last several years. A variety of periodic interest rate caps were proposed in the comment letters and, therefore this Office anticipates that an array of ARM instruments with varying interest rate caps will appear on the market.

There were no significant objections in the comment letters to the provisions in the proposed regulation limiting single rate adjustments to no more than 5 percentage points at any one rate adjustment period and requiring national banks to reduce rates whenever warranted by decreases in the index. The provisions permitting national banks to establish minimums and maximums for mortgage rate increases and decreases and/or minimum increments for change also received favorable comment. All of these provisions are adopted in the final rule.

H. Carryover of Changes in the Index

Any change in the interest rate that is permitted, but which is not taken may, or must in the case of a decrease, be accumulated by the bank and taken at a later date. For example, if the index on an ARM subject to annual rate adjustments increases from 10 percent to 12½ percent during the first year, the bank may only raise the mortgage rate by a maximum of 2 percentage points on the 1-year anniversary of the loan. If the index is at 12½ percent on the second anniversary of the loan, the bank may raise the interest rate by an additional ½ of 1 percentage point. However, if the index declines to 12 percent on the second anniversary of the loan, the rate on the loan may not be increased.

I. Aggregate Limits on Interest Rate Adjustments

The Office requested comment on the imposition of aggregate limits on interest rate adjustments over the life of the mortgage loan and, in particular, on an overall cap of 5 percentage points, a cap of 50 percent of the initial contract rate, or no overall cap. The question of the

overall cap generated more comments than any other provision in the proposed regulation. Almost three quarters of the comments were opposed to having the regulation set an overall cap. While many banks supported the establishment of periodic interest rate limits so as to limit the rate of increase in monthly payments, they argued that overall rate limits were inconsistent with the concept behind the ARM which is to allow banks to avoid assuming the risk of a steady rise in interest rates. With the gradual removal of deposit rate ceilings over the next few years and the significant and unexpected rise in interest rates in recent years, many bankers argued that they needed the assurance that over time interest rates on ARMs would keep up with any changes in their cost of funds. The remaining comments generally favored some form of cap, although many felt that the proposed 5 percentage point and 50 percent of the initial contract rate limitations were too restrictive.

The Office has decided not to set an overall interest rate cap, but rather to permit overall caps, if any, to be established by the market through competition and projections of future rates of inflation. Limiting the ability of national banks to shift the risk of upward movements in interest rates to borrowers would force those banks to charge higher initial mortgage interest rates and might even discourage such banks from providing long-term mortgage financing. Periodic interest rate caps will protect borrowers from extraordinary increases in their monthly payments.

J. Negative Amortization

The proposed regulation provided that interest rate changes could be made through adjustments to the monthly payment level or to the rate of amortization of the loan (or a combination of these methods). This Office recognizes that keeping payments constant while the interest rate increases may alleviate some borrower budgeting difficulty that might arise if rate increases were immediately reflected in increased monthly cash outlays. At the same time, however, at today's interest rates, a rate increase as small as ¼ of 1 percentage point on a typical loan, without a corresponding payment increase, could reduce the rate of amortization to the level where the monthly payment amount covers only the interest cost of the loan but does not reduce the principal. Any larger rate increase would mean that the monthly payment would be insufficient to cover all of the accrued interest. The amount of interest not covered would be added to the outstanding loan balance. This condition is known as negative amortization; principal, instead of being paid down, is actually increasing.

The proposed regulation stated that certain limited amounts of negative amortization would be permitted to permit lenders that might prefer ARM loans with frequent interest rate changes that quickly reflect market fluctuations to accommodate borrowers who might prefer the budgeting certainty of less frequent payment changes. Specifically, loans would be viewed as conforming with the requirements of 12 U.S.C. 371(a)(1) if two conditions were met. First, payments had to be adjusted at least every 5 years to an amount sufficient to amortize the outstanding principal over the remaining term. Second, the additions to principal during any fixed-payment period due to negative amortization could not exceed ⅛ percent of the principal outstanding at the beginning of the fixed-payment period times the number of six-month intervals within the fixed-payment period. These limitations were viewed as consistent with recent legal interpretations by the Office's Law Department in connection with certain graduated-payment mortgage programs. For such programs temporary intervals of limited negative amortization are permissible if the lender is not subject to materially greater risk than it would be with a fixed-rate, level-payment real estate loan.

Only a fourth of all those commenting on the proposed regulation mentioned negative amortization at all, and just over half of those opposed any form or amount of negative amortization. Most of these respondents suggested that prudent banking practice demands that long-term real estate loans be amortizing at all times. Permitting negative amortization might lead to the situation where rising loan balances could outstrip house values, and banks might end up taking these losses. In addition, because ARM loans enable mortgage lenders to share with mortgage borrowers the costs of inflation and rising interest rates, some of those commenting asserted that their rapid introduction could have a dampening effect on inflation in housing prices. Thus the risk of losses would increase.

Just under half of those comments addressing the advisability of negative amortization favored permitting it to some degree. Most of them stated, based on considerations of safety and soundness, that only limited amounts of negative amortization, such as those suggested in the proposed regulation, should be allowed. Some said that negative amortization should be allowed at the bank's option, to be exercised only in hardship cases where borrowers could not afford increased payments. Several agreed that negative amortization should be used only in hardship or workout situations but felt that the option should be the borrower's, in accordance with the proposed regulation.

Persons commenting on behalf of a small number of financial institutions argued for removing all limits on negative amortization. Those lenders felt that the borrower's need for payment certainty could be reconciled with the lender's need to cover fluctuating cost of funds by keeping payments fixed for an extended interval while letting interest rates change frequently in response to movements in short-term market interest rates. Such loans could conceivably entail large amounts of negative amortization. But those lenders argued that even large amounts of negative amortization would generally be eliminated over the business cycle as a result of declines in interest rates. They also contended that safety and soundness arguments fail to recognize that the conditions that would give rise to sustained periods of substantial negative amortization would probably also lead to rapid increases in housing values.

In response to this diversity of opinion, this Office has decided to include a provision in the final rule which permits a somewhat greater amount of negative amortization than originally proposed. For periods during which the monthly payment is fixed, negative amortization is limited to 1 percent of the principal outstanding at the beginning of the fixed-payment period times the number of six-month intervals within the fixed-payment period. This increase is intended to enhance the ability of national banks to provide borrowers with payment certainty in conjunction with the greater rate flexibility authorized for ARM loans. Those banks that favor fully amortizing loans are not required to permit any negative amortization. However, those that see some utility in limited amounts of negative amortization, either in hardship cases or on a regular basis, may avail themselves of the provisions of the regulation. Those that want still greater flexibility may avail themselves of the special interim provisions of the final rule for payment-capped mortgages. (See discussion below on "Payment-Capped Mortgages.")

The negative amortization provision in the proposed regulation has been

further altered to require that any non-scheduled deviations from the contemplated amortization schedule be at the agreement of the borrower and the lender instead of solely at the borrower's option. This change is intended to provide balance between the occasional hardship needs of some borrowers and the administrative burdens and prudential concerns of the banks. The Office believes that in those situations where borrowers are truly unable, at least in the short run, to increase monthly payments to meet interest rate increases, the parties will agree to a mutually acceptable arrangement for deferring increases in the monthly payments stemming from rate increases. This system of requiring agreement of both parties to any modification of loan terms has long prevailed with respect to fixed-rate mortgages, and there is every reason to expect that banks will be as accommodating to ARM borrowers.

The proposed regulation expressly authorized negative amortization resulting from increasing interest rates during periods of constant payments, regardless of state-law prohibitions on charging compound interest. Some comments questioned the legality of charging interest on any additions to principal resulting from negative amortization in the many states that prohibit charging interest on interest. Moreover, several respondents, including two title insurance companies, suggested that the authority of the Office to issue regulations was ambiguous. Such title insurers suggested that they might not insure the validity, priority, or enforceability of liens to the extent that they cover increases to loan principal resulting from negative amortization.

With respect to those who questioned the Office's authority to preempt state law provisions prohibiting the charging of compound interest, it is the view of the Office that this authority is sufficiently clear. (See "Relation of General Rule to Other Laws" below.)

State laws prohibiting the charging of compound interest are often intended to prohibit compounding only if the effective simple rate of interest derived in this manner would exceed the state usury limit. Interpretive letters written by the Office's legal staff have long recognized that to the extent 12 U.S.C. 85 incorporates a state's usury ceiling, it also incorporates, generally, the state's method of calculating the effective rate of interest charged on the loan. Thus state law, as incorporated in 12 U.S.C. 85, can prohibit a national bank from charging a compound rate below the usury limit if the simple rate of interest thus charged would exceed the state limit. The preemption provisions of the final regulation are not intended to alter this situation. However, the alternative federal usury limit of 12 U.S.C. 85 and the federal usury preemption of Section 501 of the Depository Institutions Deregulation and Monetary Control Act of 1980 provide national banks with a method, in many cases, of avoiding state usury limits and restrictions on compounding as they relate to these state limits.

Many states prohibiting the charging of compound interest do so as an entirely separate protection for borrowers. While these prohibitions are often codified with or as part of the statutes establishing the usury limits, they are completely unrelated to the process of determining the maximum permissible rate of interest a lender may charge. It is only this type of state statutory provision, unrelated to the usury limit, that the final rule preempts.

K. Assumption

Lenders overwhelmingly expressed their support for the proposed assumption provision which authorizes national banks to include and exercise due-on-sale clauses, regardless of limitations found in state law. They also favored permitting national banks that allow assumption to reset the interest rate on the assumed loan. A few respondents stated that banks should be required to permit assumption since the interest rate risk of an ARM to the lender is significantly less than under a fixed-rate mortgage. While this is true, the lender's interest rate risk would be eliminated completely only if the ARM interest rate is kept current with market interest rates and is not subject to any limits on interest rate changes. Other respondents suggested that banks should be allowed to reset any periodic or aggregate interest rate limitations, as well as the interest rate, when they permit assumptions.

The Office believes that a due-on-sale provision is desirable to provide the lender with the ability to protect itself from additional market risks. In addition, because the Office has decided to limit interest rate changes and does not wish to discourage lenders from establishing more restrictive interest rate limitations, the Office has decided to adopt an expanded provision for banks choosing to permit assumption. The final regulation allows national banks to reset at assumption any loan terms, including the interest rate. The intent of the final provision is to permit banks to choose the extent to which they want to expose themselves to additional market risk when assumption is granted.

L. Prepayment Penalties

The Office proposed limiting the right of national banks to charge prepayment penalties to the period preceding the notification of the first permitted interest rate adjustment. Reaction to the proposed prepayment penalty provision was mixed. Most comments favored the proposal as written, though some favored greater flexibility for banks. Of those respondents advocating the prohibition of prepayment penalties, some argued that since many banks are not currently charging such fees they would not need to do so under an ARM. Others felt that prepayment penalties were not a major consideration given that over time the interest rate on an ARM should approximate market rates. Comments favoring prepayment penalties over a longer period than that proposed argued that the lender is entitled to some compensation when a borrower breaks a long-term contract and prepays. Consumer groups favored no prepayment fees whatsoever.

Because of the unfamiliarity of borrowers with the nature of ARMs, there is sound reason for allowing borrowers to repay the loans at any time without penalty. This Office recognizes, however, that prepayment penalties may act as important deterrents to prepayment for the purpose of refinancing when mortgage rates decline. As such, they may encourage banks to make long-term fixed-rate commitments. This Office has, therefore, decided to adopt the proposal to permit national banks to levy prepayment penalties up to 30 days prior to the first scheduled rate adjustment date. Thus, banks will be able to minimize the risk of prepayment during the period prior to the first rate change notification date and therefore will be encouraged to make ARMs with long initial grace periods or subject to less frequent rate adjustments. After the first rate change notification date borrowers may prepay without penalty.

M. Short-Term and Demand Loans

Many banks currently offer short-term and demand purchase-money mortgage loans. The Office proposed to continue to permit short-term and demand mortgage lending by national banks and to exempt such loans from the provisions of this regulation if a specified disclosure notice were provided describing the nature of, and the risks associated with such instruments. The Office felt that a required disclosure notice of this sort,

while not overly burdensome to the lender, would help ensure that the borrower is properly informed of a loan in which the maturity date is shorter than the amortization schedule and in which refinancing is not guaranteed.

While very few comments were received on short-term and demand mortgage lending by national banks, the majority of them favored the proposal. Since there is currently no evidence that further restrictions on such loans are necessary, the Office has decided to adopt the proposed provision. The Office emphasizes, however, that disclosure of the nature of these loans does not relieve the lender of the obligation to use them cautiously. Borrowers and lenders alike must be aware of the risk that borrowers may be forced to refinance their mortgages during periods of tight credit. If problems develop with such loans in the future the Office may impose restrictions beyond the required disclosure notice.

N. Disclosure

The proposed rule required banks to provide an initial disclosure as shopping information and a notification of upcoming interest rate changes. It also included model disclosure and notification forms.

Comments on the proposed disclosures were mostly positive. Most banks indicated that the requirements would not be seriously burdensome, particularly with the availability of the model forms. A number of banks urged that disclosure requirements for ARMs not duplicate disclosures required by other laws for real estate loans, and in particular those required by the Real Estate Settlement Procedures Act (RESPA) and the Truth-In-Lending Act and its implementing Regulation Z. In addition, some banks suggested that borrowers might be more confused than helped by a comprehensive and lengthy disclosure.

The issues of avoiding disclosure duplication and of providing borrowers with the optimal amount and type of information were extensively evaluated by the Office. In drafting this provision of the final rule the Office was guided by the belief that the fundamental interests of both borrowers and lenders are best served by permitting lenders to compete freely in designing and pricing ARMs that will efficiently meet borrower demands. However, the marketplace only operates efficiently if both buyers and sellers are well informed about the transaction and fully understand the contractual agreement. A wide variety of mortgage instruments, including ARMs, will present borrowers with complex and unfamiliar borrowing options which will be difficult to evaluate. Lacking adequate disclosure, many borrowers contemplating an ARM will find it difficult to make an informed decision, thus interfering with the efficient functioning of the market to the detriment of individual borrowers.

To address this concern the regulation has been designed to complement the flexibility of the permitted ARM instrument with the requirement for relatively comprehensive consumer disclosures. Disclosures serve the two-fold purpose of educating borrowers about the nature of ARMs and equipping them to shop for the appropriate ARM.

To meet these objectives, the Office is requiring that the initial shopping disclosure be provided when any written information regarding ARMs is provided by a national bank and no later than the time of loan application. This precedes the time at which RESPA and Regulation Z disclosures are to be provided. Although some credit shopping information is provided in disclosures required by RESPA and Regulation Z, the Office believes that these other disclosures are not made sufficiently early to serve the general educational purpose envisioned by the regulation.

Furthermore, most of the information required in the regulation does not duplicate the Regulation Z or RESPA disclosures. Those rules have different purposes. Regulation Z is focused on providing all consumer credit borrowers with the finance charge and annual percentage rate and making these items comparable from lender to lender. This information is helpful in comparing the terms of many types of loans, but does not satisfy the full educational and comparison shopping purpose this Office sees as necessary to help consumers evaluate the complexities and uncertainties presented by adjustable-rate mortgages. Accordingly, the final regulation does not defer to Regulation Z. It should be noted, however, that the Office has expressed the view to the Federal Reserve Board that Regulation Z could be amended to provide an exception for any substantially similar information previously disclosed pursuant to other federal regulatory requirements.

Similarly, this Office believes that the ARM disclosures in the final regulation serve a purpose distinct from those contained in RESPA. RESPA requires disclosure of a good faith estimate of most closing costs within 3 days after a loan application so that borrowers will be prepared for settlement charges and may shop for settlement services. In contrast, the proposed regulation required only a list of the categories of fees that will be assessed. The purpose of this proposed disclosure was to alert borrowers early in the process of shopping for a mortgage loan to the possibility that payments other than principal and interest may have to be made in connection with taking out and servicing a mortgage loan. The Office recognizes that the requirement in its proposed regulation, while not fully duplicative of the RESPA disclosures, does overlap with those disclosures to some extent. To avoid even this minimal duplication, while satisfying the Office's concern that borrowers be alerted early to the imposition of certain closing and other costs, the final regulation requires only a simple statement that the bank and/or other persons may charge certain fees in connection with an ARM loan.

The final rule requires both a comprehensive initial disclosure statement and notifications of periodic interest rate changes. To avoid confusing borrowers or overburdening lenders, an effort was made to avoid excessively long disclosure. Nevertheless, the Office disagrees with those who commented that a historical series of index values and a limited (5 percentage points in the proposal and 10 percentage points in the final regulation) worst-case disclosure are more likely to mislead borrowers than to help them. First, the model disclosure form contains cautionary language concerning the reliability of this information as a forecasting tool. Second, the information provides borrowers with necessary examples of interest rate and payment changes over several years. The regulation does not impose limitations on the number of different examples or additional information that may be provided. National banks are certainly encouraged to go beyond what is minimally acceptable in educating their borrowers, as long as this is not done in a misleading fashion. For those national banks that regard the comprehensive shopping disclosure as costly to provide the Office has appended model disclosure and notification forms to the rule that can be easily adapted and preprinted by individual institutions.

Because the regulation relies primarily on disclosure rather than restriction of ARM terms to provide for borrower protection, the Office will view failure to provide timely and substantively complete and correct disclosures as a serious violation of the regulation. The full range of the Office's available supervisory authority will be used to assure compliance with the disclosure provisions of the final rule.

O. Payment-Capped Mortgages

Starting in the fall of 1980, several commercial banks and thrift institutions began offering 30-year ARM instruments with limitations on payment changes but not on rate changes. The interest rate on these loans is adjusted frequently to stay at a fixed margin over some short-term security rate used as an index; the amount of the monthly payment is fixed for considerably longer periods. As a consequence, interest rate changes over the fixed-payment period are reflected in changes in the rate of amortization of principal rather than in changes in the monthly payment amount. At the end of each fixed-payment period the amount of the monthly payment is adjusted so as to amortize the loan fully over the remaining term to maturity, at the interest rate in effect at the time of the payment change (or at some average of rates over some prior period). To avoid sharp increases in monthly payment amounts, changes in monthly payments on these instruments have been tightly limited by lenders at each readjustment date for the first 20 or 25 years of the loan. However, during the remaining 5 or 10 years of the loan the limit is removed and the payment amount may be increased by whatever amount is necessary to assure full amortization of the loan by the end of 30 years. In some cases, the lender might agree to refinance any loan principal that remains unpaid at the end of 30 years.

While the interest rate of payment-capped mortgages is pegged at a fixed spread over the index rate, the initial monthly payment may be set on the basis of either the index rate, the lender's projection of future interest rate levels, or local mortgage rates. As a result, the initial monthly payment may be set at a level below that required to amortize the loan, and negative amortization may begin immediately. Another feature of such loans is that, to offset some of the potential for negative amortization, monthly payments are never decreased below the initial payment amount regardless of how much the interest rate may decrease.

Such payment-capped instruments may appeal to borrowers when compared to interest-rate capped mortgages with their potential for frequent changes in monthly payment amounts. The monthly payment amount is held constant for extended periods of time, and the potential increases in payment amounts are limited regardless of movements in the mortgage rate until the final months of the mortgage loan. The instruments may also be appealing from the lender's perspective; the frequent adjustment to the contract interest rate and the absence of any interest rate limitations enable the lender's interest rate margin to remain constant, assuming that the index is a good proxy for the bank's cost of funds.

However, payment-capped mortgage instruments without interest rate limitations do raise concerns with respect to negative amortization and, due to their complexity, borrower understanding. Significant amounts of negative amortization may accumulate when the monthly payments are at levels below that required to amortize the loan within 30 years. Consequently, the outstanding loan balance (principal and unpaid compound interest) increases, perhaps substantially. Under most interest rate scenarios with cyclical rate volatility, but without a steep upward trend in interest rates, payment-capped mortgage loans can be repaid in full within a 30-year period without the lender having to raise payments more than the agreed percentage even in the final years. However, under certain hypothetical interest rate and payment scenarios, the outstanding loan balance can rise substantially and continuously over much of the life of the loan through compounded unpaid interest. Full payment of the loan will then require either a sharp increase in monthly payments during the final years of the loan contract or a balloon payment at maturity. If an individual with a payment-capped mortgage sells a residential property prior to maturity, the possibility exists under certain economic conditions that the proceeds to the seller could be equal to, or even less than, the outstanding balance on the mortgage loan. For this reason, payment-capped mortgage loans may hold more risk for borrowers than interest-rate capped loans which provide for more frequent monthly payment adjustments and little or no negative amortization.

Because of the general complexity of and uncertainty associated with ARM loans that permit substantial negative amortization, it is especially important that potential borrowers understand the nature and risks of a payment-capped mortgage. In particular, borrowers must be made aware of how the interest rate is set on a payment-capped mortgage, the relationship between the level of monthly payments and the interest rate, and the negative amortization features. Borrowers should also be kept abreast of changes in the mortgage interest rate and changes in the outstanding loan balance. In the event of negative amortization, the monthly payment amount which would be required to amortize the loan fully should be disclosed to the borrower along with the amount of unpaid interest added to the outstanding loan balance each month. A reminder that the borrower may prepay all or part of the loan without penalty in order to avoid some or all of the increasing debt should also be given.

Payment-capped mortgages which permit significant amounts of negative amortization may also be risky for lenders. Associated with such instruments is an implicit assumption that housing prices will rise in tandem with rising interest rates, so that the loan amount as a percentage of the market value of the residential property will remain constant or decline. While the experience of recent years supports that assumption, housing prices in some regions of the country recently have shown some signs of softness and even modest decline. Also, some housing units lose market value over time due to physical deterioration. As a result, any general shift in housing financing from traditional amortizing loans to loans that may increase over time requires careful scrutiny. In particular, lenders must make reasonable provision to maintain loan-to-market-value ratios at prudent levels. Certain risks might also be present for lenders because of uncertainties in the legal and financial environment. Adding to loan balances through negative amortization raises questions pertaining to tax and accounting principles, questions of lien priority, and questions of the availability or sufficiency of title, private mortgage, credit life, and casualty insurance. In particular, banks could be generating substantial amounts of taxable income not reflected in positive cash flows. Negative amortization could similarly be viewed as the equivalent of new advances. Therefore it may not share the same federal usury preemption or lien priority as the original loan in the event of defaults where other liens have been applied to the property. Also, lenders relying on insurance must be careful that those insurance policies will provide appropriate coverage of additions to principal from negative amortization as well as the bank's original advance.

The final rule permits banks to continue to offer payment-capped ARMs, but these lending programs must be submitted to the Office for review. Plans that fail to protect borrowers against excessive payment volatility and excessive negative amortization will be required to be modified or terminated. To avoid unduly impeding those national banks which wish to begin

making payment-capped ARM loans, the regulation will allow national banks to begin lending under such programs 60 days after submitting the documents for review and possible modification by this Office.

The review process provided for in the regulation is viewed as an interim procedure until a comprehensive set of regulations can be formulated to govern payment-capped ARMs. The Office intends in the near future to publish for comment amendments to the ARM rule that will deal explicitly with payment-capped mortgages. These rules will address the Office's concerns over appropriate limitations on payment changes and negative amortization and acceptable disclosure of information concerning these complex mortgage loan instruments.

P. Effective Date of Implementation and Transition Rule

In the proposed regulation this Office requested comment on an appropriate implementation date for the final regulation. A majority of the respondents favored immediate implementation of the regulation; some respondents, however, favored deferring the implementation for 60 to 180 days after publication in the **Federal Register.** To enable national banks in states with restrictive regulations governing ARM lending to begin utilizing the flexible authority of this regulation immediately, this Office has decided not to defer its effective date. It is in the interest of both the banks and their borrowers that this authority be immediately available to facilitate participation by national banks in the mortgage market. Because the final regulation is in most respects the same or less restrictive than the proposed rule, the Office expects that some banks will be ready to begin using its authority virtually immediately. In accordance with the provisions of 5 U.S.C. 553(d), the Office finds that immediate effectiveness is appropriate because the regulation relieves restrictions and for other good cause as discussed above. Further, to avoid a temporary disruption to the mortgage lending activity of banks currently offering ARM instruments not conforming with this regulation, these banks are provided with a 120 day transition period from the date of publication to bring their ARM lending programs into conformity.

Q. Relation of General Rule to Other Laws

The proposed ARM regulation contained provisions to preempt state law in several areas. First, rules expressly prohibiting or constraining adjustable-rate mortgage lending were to be preempted. Beyond that, certain state laws of general applicability were to be preempted with respect to adjustable-rate mortgage loans by national banks. Those state laws prohibit the charging of interest on interest and prepayment fees and impair the enforceability of due-on-sale clauses.

A growing number of states have statutes or regulations intended to protect borrowers by restricting the rate-sensitivity of adjustable-rate mortgage loans. Some of these states also require that certain information be disclosed to prospective ARM borrowers. Many other states impose no limitations on ARM lending, either with respect to permissible rate and payment changes or the minimum level of disclosure to borrowers. The Office believes that a great deal of flexibility in designing mortgage instruments is necessary with respect to rate adjustments and protecting against market risk to induce banks to become active participants in the mortgage market. However, borrower protection, primarily in the form of required disclosures, is also needed at this early stage of development.

The authority to engage in ARM lending is consistent with the express powers of national banks and is currently viewed by many national banks as essential to their safe and sound participation in the residential mortgage market. At this stage of ARM development, some state-imposed restrictions appear likely to limit unduly the rate-sensitivity of ARM mortgage loans by national banks, forcing the banks to withdraw from or substantially curtail their participation in that market. Such state actions which, in effect, deprive national banks of one of their express powers—to engage in safe and sound residential real estate lending—are incompatible with the comprehensive federal supervision of those institutions and their intended role under federal law. Because of the diversity of state regulations and the potentially prohibitive effects of many of these regulations, the Office believes it is necessary to occupy the field of regulating ARM lending by national banks.

Few comments focused on the issue of preemption. Support for preemptive regulations came primarily from lenders operating in states with restrictive regimes governing ARM lending. Support for deferring to state law came from consumer advocates who believed the Office's proposed regulation did not provide the same protection for low- to moderate-income borrowers as do some existing state laws. Further opposition to preemption came from lenders who are located in states not currently imposing any restrictions and who currently offer or contemplate offering ARMs that would not comply with the proposed regulation. These lenders preferred to have the Office not issue any ARM regulation or to preempt only in states where the laws are more restrictive than the ARM regulation. Only a handful of those commenting doubted the Office's preemptive power.

The final regulation adopts the provisions of the proposed regulation. The Office is satisfied that sufficiently broad general and specific rulemaking authority is contained in 12 U.S.C. 93a and 12 U.S.C. 371(g), as well as in the basic structure of the National Bank Act and other federal banking laws, to permit it to promulgate an ARM regulation for national banks and to preempt the authority of states to interfere with the power of national banks to make ARM loans. The Office believes that preemption is important to give all national banks the flexibility to develop ARM instruments that will meet their own needs as well as those of their customers, their local markets, and national secondary market investors.

Section 711 of the Housing and Community Development Act of 1974 greatly liberalized the powers of national banks to make real estate loans to encourage them to participate significantly in the residential real estate finance market, consistent with concerns for safety and soundness of banking practices. Congress thus recognized the importance of having a federal scheme to regulate real estate lending by federally chartered banks.[1] State laws restricting national banks' ARM lending powers thwart these Congressional purposes and are thus properly preempted by the Office's regulation promulgated pursuant to that statute and to the general rulemaking powers of the Comptroller of the Currency.

---

[1] Recent federal court decisions involving regulations of the Federal Home Loan Bank Board have demonstrated the willingness of courts to recognize the propriety of establishing uniform standards for real estate lending by federally chartered financial institutions through preemptive regulations. These court decisions have upheld the preemptive effect of the Federal Home Loan Bank Board's regulations concerning discriminatory lending practices, *Conference of Federal Savings and Loan Associations* v. *Stein*, 604 F.2d 1256 (9th Cir. 1979), *aff'd*, 445 U.S. 921 (1980), and the use of due-on-sale clauses, *Glendale Federal Savings and Loan Association* v. *Fox*, 459 F.Supp. 909(C.D.Cal. 1978), *appeal pending*.

V. Final Regulation

Accordingly, 12 CFR Chapter I is amended by adding a new Part 29 to read as follows:

PART 29—ADJUSTABLE-RATE MORTGAGES

Sec.
29.1 Purpose.
29.2 Definition.
29.3 General rule.
29.4 Index.
29.5 Rate changes.
29.6 Prepayment fees.
29.7 Assumption.
29.8 Disclosure.
29.9 Certain payment-capped mortgages.
29.10 Transition rule.
Appendix to Part 29.

Authority: 12 U.S.C. 1 *et seq.*; Sec. 708, Pub. L. 96-221, 94 Stat. 168 (12 U.S.C. 93a); and sec. 711, Pub. L. 93-383, 88 Stat. 718 (12 U.S.C. 371(g)).

§ 29.1 Purpose.

This regulation is issued by the Office of the Comptroller of the Currency to establish rules for national banks making or purchasing adjustable-rate loans secured by liens on one- to four-family dwellings.

§ 29.2 Definition.

An adjustable-rate mortgage loan is any loan made to finance or refinance the purchase of and secured by a lien on a one- to four-family dwelling, including a condominium unit, cooperative housing unit, or a mobile home, where such loan is made pursuant to an agreement intended to enable the lender to adjust the rate of interest from time to time. Adjustable-rate mortgage loans include loan agreements where the note and/or other loan documents expressly provide for adjusting the rate at periodic intervals. They also include fixed-rate loan agreements that implicitly permit rate adjustment by having the note mature on demand or at the end of an interval shorter than the term of the amortization schedule unless the national bank has clearly made no promise to refinance the loan (when demand is made or at maturity) and has made the disclosure specified in § 29.8(c).

§ 29.3 General rule.

National banks may make or purchase adjustable-rate mortgage loans only if they conform to the conditions and limitations contained in this Part. National banks may make or purchase adjustable-rate mortgage loans pursuant to this Part without regard to any limitations that otherwise would be imposed on adjustable-rate mortgage lending by the laws of any State, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, or Guam, which limitations are hereby expressly preempted.

§ 29.4 Index.

Changes in the interest rate charged on an adjustable-rate mortgage loan must be linked to changes in an index specified in the loan documents, *i.e.*, a 1 basis point (1 basis point = .01 percentage point) change in the index must be translated into a 1 basis point change of the same direction in the contract interest rate, except as otherwise provided in § 29.5. The index values used for the purpose of determining changes shall be either (1) the most recently available values on the date of loan origination and on subsequent dates for notifying borrowers of impending rate changes or (2) the moving averages on such dates of all values of an index over the interval from the prior rate-change notification date to the current rate-change notification date, using as the starting index value the moving average of index values over an equivalent interval ending with the date of loan origination. The index must be one of the following:

(a) The monthly average contract interest rate charged by all lenders on mortgage loans for previously occupied homes, as published by the Federal Home Loan Bank Board in its *Journal* and made available by the Federal Home Loan Bank Board in news releases on about the twelfth day of each month.

(b) The monthly average yield on United States Treasury securities adjusted to a constant maturity of 3 years, as published in the *Federal Reserve Bulletin* and made available by the Federal Reserve Board in Statistical Release G.13(415) during the first week of each month.

(c) The monthly average of weekly average auction rates on United States Treasury bills with a maturity of 6 months, as published in the *Federal Reserve Bulletin* and made available by the Federal Reserve Board in Statistical Release G.13(415) during the first week of each month.

If the national bank uses the 6-month Treasury bill rate index and adjusts interest rates less frequently than once every 6 months, then the bank must use the moving average, as described above, of the index values to measure interest rate changes.

§ 29.5 Rate changes.

(a) *Frequency of Changes.* Interest rate changes on adjustable-rate mortgage loans may occur only at regular intervals of not less than 6 months, as specified in the loan documents. Notwithstanding the foregoing, a national bank may extend the length of the interval before the first potential interest rate change by any predetermined period.

(b) *Magnitude of Changes.* Interest rate adjustments to adjustable-rate mortgage loans may not exceed 100 basis points each 6 months. If the interval between interest rate changes exceeds 6 months, then the limitation on interest rate changes shall be 100 basis points multiplied by the number of whole consecutive 6-month periods in the interval between interest rate changes. In no event may any one interest rate change exceed 500 basis points. Notwithstanding the rules contained in this subsection, a national bank may decrease the contract rate of interest on an adjustable-rate mortgage loan at any time and by any amount beyond decreases required by the rules contained in this Part.

(c) *Required and Permitted Rate Changes.* Interest rate changes on adjustable-rate mortgage loans made or purchased by national banks shall be subject to the following additional restrictions:

(1) Interest rate increases permitted in accordance with the provisions of this Part shall be at the option of the bank.

(2) Interest rate decreases warranted by decreases in the index shall be mandatory except to the extent that rate increases fully reflecting increases in the index have not been implemented by the bank, either at its option or because of the limitation on increases specified in paragraph (b) of this section. If the bank agrees to impose a periodic or aggregate limitation on interest rate changes that is more restrictive than the limitation specified in paragraph (b) of this section, the same limitation shall apply to both increases and decreases.

(3) Banks offering adjustable-rate mortgage loans may establish in the loan documents any minimum interest rate change limitations and minimum increments of interest rate changes.

(4) Changes in the index not translated into changes in the interest rate because of the limitations contained in this Part or, consistent with this Part, at the discretion of the bank shall, to the extent not offset by subsequent movements of the index, be carried over and be available at succeeding rate-change dates.

(5) There shall be no charge by the national bank to the borrower, in the form of new closing cost, new processing fees, new finance charges, or similar fees, for any change in the interest rate on an adjustable-rate mortgage loan.

(d) *Method of Rate Changes.* (1) Interest rate changes to an adjustable-rate mortgage loan may be implemented through changes in the amount of the installment payment or the rate of amortization (*i.e.*, the amount, if any, of each installment payment allocated to repayment of principal) or any combination of these two methods, according to any schedule agreed upon by the borrower and the bank in the loan documents or as agreed upon by the parties at the time of any interest rate change. These methods are permissible regardless of any state-law prohibitions on the charging of interest on interest. Such prohibitions are expressly preempted, provided the interest rate charged by the national bank does not exceed the applicable usury limit, if any.

(2) Changing the rate of amortization, including utilization of a period or periods of negative amortization, is permissible only if (1) the payment is adjuted at least every 5 years to a level sufficient to amortize the outstanding principal at the interest rate then in effect over the remainder of the original loan term, which may not exceed 30 years; and (2) the amount of negative amortization, if any, permitted during any such period does not exceed 1.0 percent of the principal outstanding at the beginning of that period multiplied by the number of whole consecutive 6-month periods included in the interval between payment changes. In no event may the amount of negative amortization allowed under the preceding sentence exceed 10.0 percent of the principal outstanding at the beginning of the period.

§ 29.6 Prepayment fees.

National banks offering or purchasing adjustable-rate mortgage loans must allow the borrowers to prepay in whole or in part without penalty at any time beginning 30 days before the first scheduled interest rate adjustment date. National banks offering or purchasing adjustable-rate mortgage loans may impose penalties for prepayments made prior to the date specified in the preceding sentence of this paragraph regardless of any state-law prohibitions of such fees, which prohibitions are expressly preempted.

§ 29.7 Assumption.

National banks offering or purchasing adjustable-rate mortgage loans are not required to allow those loans to be assumed by new purchasers of the mortgaged property, or to allow new purchasers to take title to such property subject to the lien of an adjustable-rate mortgage loan made pursuant to this Part, regardless of any limitations on the validity or enforceability of due-on-sale clauses found in state law, which limitations are expressly preempted. If a national bank does allow such a loan to be assumed or a purchaser to take title to property subject to the lien of an adjustable-rate mortgage loan made pursuant to this Part, the interest rate and any other loan terms may be reset as of the date of assumption. In order for an adjustable-rate mortgage loan to qualify for the benefits of this section, the loan note must contain a clause stating that the loan is due on sale or must contain some other provision indicating that the loan may be assumed or the property purchased subject to the bank's mortgage lien only at the bank's discretion.

§ 29.8 Disclosure.

(a) National banks offering adjustable-rate mortgage loans shall disclose in writing to a prospective borrower on the earlier of the date on which the bank first provides written information concerning residential mortgage loans available from the bank or provides a loan application form to the prospective borrower, the following items:

(1) The fact that the interest rate may change and a brief description of the general nature of an adjustable-rate mortgage loan;

(2) The index used, including the name of at least one readily available source in which it is published;

(3) A 10-year series updated at least annually showing the values of the index on at least a semiannual basis, presented in tabular form;

(4) The frequency with which the interest rate and payment levels will be adjusted, including provision for any extended interval before the first interest rate adjustment;

(5) Any rules relating to changes in the interest rate and/or installment payment amount;

(6) A description of the method by which interest rate changes will be implemented, including an explanation of negative amortization if it may occur in connection with the loan;

(7) The rules or conditions relating to refinancing of short-term and demand mortgage loans, prepayment, and assumption;

(8) A statement, if appropriate, that other fees will be charged by the bank and/or any other persons in connection with the adjustable-rate mortgage loan, including fees due at loan closing; and

(9) A schedule of the dollar amounts of the installment payments (principal and interest) on a $10,000 loan at a commitment rate offered by the bank within the preceding 12-month period if the mortgage interest rate were to increase as rapidly as possible, consistent with the interest rate limitations of the loan, by 10 percentage points (or by such lower aggregate interest rate limit as the bank may impose on its adjustable-rate mortgage loans).

Use of the optional model disclosure form provided in the Appendix to this Part, amended where necessary to describe accurately permissible variations found in the bank's adjustable-rate mortgage loans, will constitute compliance with this subsection.

(b) At least 30 days and no more than 45 days before any interest rate change may take effect, the bank must notify the borrower in writing of the following items:

(1) The current and proposed new interest rate;

(2) The base and current index values;

(3) The extent to which the bank has forgone any increase in the mortgage interest rate;

(4) The new monthly payment and/or other contractual effects of the rate change;

(5) The amount of the monthly payment, if different from that given in response to item 4, that would be required to fully amortize the loan at the new interest rate over the remainder of the loan term; and

(6) The fact that the loan may be prepaid at any time without penalty.

Use of the optional notification form provided in the Appendix to this Part will constitute compliance with this subsection.

(c) A national bank making any loan to finance or refinance the purchase of, and secured by a lien on, a one- to four-family dwelling which is payable either on demand or at the end of a term which, including any terms for which the bank has promised to refinance the loan, is shorter than the term of the amortization schedule must include the following notice, displayed prominently and in capital letters, in or affixed to the loan application form and in or affixed to the loan note:

THIS LOAN IS PAYABLE IN FULL [AT THE END OF — YEARS OR ON DEMAND]. [AT MATURITY OR IF THE BANK DEMANDS PAYMENT] YOU MUST REPAY THE ENTIRE PRINCIPAL BALANCE OF THE LOAN AND UNPAID INTEREST THEN DUE. THE BANK IS UNDER NO OBLIGATION TO REFINANCE THE LOAN AT THAT TIME. YOU WILL THEREFORE BE REQUIRED TO MAKE

PAYMENT OUT OF OTHER ASSETS YOU MAY OWN, OR YOU WILL HAVE TO FIND A LENDER WILLING TO LEND YOU THE MONEY AT PREVAILING MARKET RATES, WHICH MAY BE CONSIDERABLY HIGHER THAN THE INTEREST RATE ON THIS LOAN.

Fixed-rate short-term or demand loans for which this notice has been properly given will not be characterized as adjustable-rate mortgage loans.

(d) No later than the date on which an adjustable-rate mortgage loan is made by a national bank, the bank must inform the borrower of the base index value against which interest rate changes will be measured. This base value must be included in the note which the borrower signs, and the borrower must be given a copy of this note no later than at loan closing.

§ 29.9 Certain payment-capped mortgages.

(a) *Authority to Lend, Subject to Review by Comptroller.* The limitations imposed by this Part shall not apply to adjustable-rate mortgage loans which contain meaningful limitations on the magnitude of permissible changes in the amount of installment payments that offer borrowers sufficient protection against payment volatility. The Office of the Comptroller of the Currency may at any time require a national bank to modify or terminate a loan program qualifying under this subsection if it is determined that the program does not adequately provide for repayment of the loans in a timely manner or that the program does not sufficiently protect borrowers against payment volatility.

(b) *Prior Notice of New Programs.* Before a national bank initiates an adjustable-rate mortgage loan program pursuant to this subsection, it must send a copy of all program loan documents and disclosure forms to Chief National Bank Examiner, Office of the Comptroller of the Currency, Washington, D.C. 20219. If the Office of the Comptroller of the Currency has not required the bank in writing to modify or abandon the program within 60 days from the date on which the documents were postmarked or similarly marked as having been sent to the address given above, the bank may proceed with the program.

(c) *Notice on Existing Programs.* Notwithstanding the transition rule contained in § 29.10, if on the effective date of this rule a national bank has already made a loan or a binding commitment to lend under a program qualifying under this subsection, the bank may continue to make loans under such program but must immediately send a copy of the documents described above in subsection (b) to the address above. The Office of the Comptroller of the Currency may subsequently require modification or termination of the program in accordance with the provisions of this section.

(d) *Program Modifications.* Substantively modified programs shall be regarded as new programs for the purpose of this section.

§ 29.10 Transition rule.

If on the effective date of this rule a national bank has already made a loan or a binding commitment to lend under an adjustable-rate mortgage loan program which would violate any of the provisions of this Part, the national bank may continue to make loans or binding commitments to lend under the program for 120 days from the effective date of this rule before the program must be brought into conformity with all of the provisions of this Part.

Appendix to Part 29*

A. Model Form for Initial Adjustable-Rate Mortgage Disclosure

Important Mortgage Loan Information—Please Read Carefully

If you wish to apply for an Adjustable-Rate Mortgage (ARM) loan with ——— National Bank, you should read the information below concerning the difference between this mortgage and other mortgages with which you may be familiar.

General Description of Adjustable-Rate Mortgage Loan

THE LOAN OFFERED BY ——— NATIONAL BANK IS AN ADJUSTABLE-RATE MORTGAGE. ITS INTEREST RATE WILL CHANGE [fill in frequency] BASED ON MOVEMENTS OF AN INTEREST RATE INDEX. YOUR MONTHLY PAYMENTS WILL INCREASE IF THE INTEREST RATE RISES OR DECREASE IF THE INTEREST RATE FALLS. BECAUSE FUTURE MOVEMENTS OF THE INDEX ARE RELATED TO MARKET CONDITIONS THAT CANNOT BE PREDICTED, IT IS IMPOSSIBLE TO KNOW IN ADVANCE HOW MUCH YOU WILL HAVE TO PAY, EITHER EACH MONTH OR OVER THE LIFE OF THE LOAN. INTEREST RATE AND PAYMENT CHANGES WILL BE MADE ACCORDING TO CERTAIN RULES THAT ARE EXPLAINED BELOW.

Key Terms of ——— National Bank's Adjustable Rate Mortgage

The following outline of the terms on ARM's offered by ——— National Bank is intended for easy reference only. You will find other essential information in this disclosure statement and in the loan note itself.

Loan term	
Frequency of rate changes	
*[Grace period before first rate change	]
Interest rate index	
Maximum rate change at one time	
Maximum rate change over life of loan	
*[Minimum rate change at one time	]
*[Minimum increments of rate change	]
*[Prepayment fee	]
Assumability [assumable, not assumable *or* at lender's discretion]	
Possibility of increasing loan balance [yes *or* no]	

*Bracketed items and footnotes are instructions to national banks or contain optional language to be selected as appropriate.

How Your Adjustable-Rate Mortgage Would Work

Starting Interest Rate

The starting interest rate offered by ——— National Bank on an ARM will be specified [at loan closing, when we make a loan commitment to you, other] based on market conditions at that time.

Frequency of Interest Rate Changes

Your interest rate will be reviewed every ——— beginning ——— after the date on which you take out your loan, and may increase or decrease at those times based on changes in the index.

Index for Measuring Interest Rate Changes

The index to which your interest rate will be tied is ———.

Information on this index is published monthly in ———. The table below shows a ten-year history of movements of this index. This does not necessarily indicate how the index may perform in the future.

10-Year History of ——— Index

Date	Index	Change from preceding rate
1/1/x0		
7/1/x0		
1/1/x1		
.	.	.
7/1/x9		

Size of Interest Rate Changes

The interest rate on your ARM will increase or decrease based on movements in the index. A change in the index of 1 percentage point will be translated into a 1 percentage point change of the same direction in your ARM interest rate. However, no single change in the interest rate will be more than —— percentage points no matter how much the index may have moved. [Also, there will be no change in your interest rate if the index moves less than —— percentage points.] All changes will be in increments of —— percentage points.]

Mandatory and Optional Rate Changes

Decreases in your interest rate warranted by decreases in the index will always be automatic within the rules for maximum [and minimum] changes. However, increases warranted by increases in the index may be forgone at the bank's option. If the bank forgoes an interest rate increase, we may take it at a later interest rate change date, unless doing so would conflict with the carryover rule described below.

Carryover of Unused Index Changes

Changes in the index not passed on to you as changes in your ARM interest rate will be carried over to the next interest rate change date. This can happen when the index has moved more than the maximum permitted change (percentage points) [or less than a minimum permitted change (percentage points)] or when the bank has forgone an interest rate increase to which it is entitled. The carryover is the amount by which the net index change exceeds the net interest rate change since the loan was made. The net change is the difference between the interest rate (or index) on a given date and the interest rate (or index) on the date the loan was made. In addition to new index changes, index changes carried over may be passed on to you at the next rate adjustment date as a change in your ARM interest rate. However, we may not pass these carryovers on to you to the extent they have been offset by an opposite movement in the index as of that date. Also, if the total of the new index change and the carryover still exceeds the maximum permitted change (percentage points) [or is less than a minimum permitted change (percentage points)] the excess must be carried over again.

[The following example may be included at the bank's option:

An example shows how this carryover rule works. Suppose the index increases by 1.60 percentage points during the first period, but your rate change is limited by the rules to 1.00 percentage point. The remaining .60 percentage point would be carried over, so that at your next rate change date:

- If the index in the new period had *stayed the same*, your mortgage rate would *still rise* by .60 percentage point.
- If the index *had decreased* by .20 percentage point your mortgage rate would *still rise* by .40 percentage point (the difference between the increase that was carried over and the decline).
- If the index had *decreased* by 1.0 percentage point your mortgage rate would *decrease by only* .40 percentage point (again, the difference between the new decrease and the carried over increase).
- If the index had *increased* by .70 percentage point, your mortgage rate would increase by only 1.0 percentage point because of the 1.0 percentage point limit, *but* there would be a *new carryover* of .30 percentage point into the next rate change period (the difference between the 1.0 percentage point limit and the 1.30 percentage points justified by the old carryover plus the index change).]

Payment Changes

Changes in the interest rate on your mortgage will mean that your monthly payment will change to an amount sufficient to repay your loan over its life at the new interest rate. [1]

Notice of Rate Changes

———— National Bank will send you notice of any rate change at least 30 days before it becomes effective. The notice will tell you how the index has changed and how your interest rate and payment schedule will be affected. This notice will also be sent whenever the bank forgoes an interest rate increase it is permitted to take [and/but not] when the index has not changed at a rate adjustment date. All interest rate changes will be based on index information available at the time the notice is sent, rather than when the rate change goes into effect.

Prepayment Penalty

You may prepay an ARM in whole or in part without penalty at any time after the first notice of index movement has been sent to you [or, if the index has not changed, any time after the last date on which such a notice would have been sent]. This prepayment may be a lump sum payment of all or part of the remaining debt or may be in the form of larger monthly payments than required under the terms of the loan.

———— National Bank imposes a penalty charge of —— for prepayments prior to the first rate change notice date.[3]

Assumption of Mortgage Loan

Your ARM may be assumed by a purchaser of your home who meets our credit standards. [We have the right to change the loan terms, including the interest rate, upon assumption, and we may also charge the purchaser assumption fees.][3]

Fees

You will be charged fees by ———— National Bank and by other persons in connection with the origination of an ARM. We will give you an estimate of these fees within 3 days after receiving your loan application. However, ———— National Bank will not charge you any finance or processing fees at the time of any rate adjustment.

How Rapidly Rising Interest Rates Could Affect Your Adjustable-Rate Mortgage Loan

The following table shows the effect a 10 percentage point increase in the index rate, taken as rapidly as possible, would have on monthly payments on a $10,000 ARM made at a starting interest rate of —%. To figure the equivalent potential payment increases for your mortgage, simply multiply the payments in the table times 2 for a $20,000 loan, times 3 for a $30,000 loan, etc.

[The table that follows would apply to an ARM with interest rate adjustments occurring every six months, a one percentage point periodic interest rate limit, an aggregate interest rate cap in excess of 10 percentage points, and an initial contract interest rate of 10%. Lender should insert relevant example.

Payments No.	Year No.	Interest rate (percent)	Amount of payment
1 to 6	1	10.0	$87.75
7 to 12		11.0	95.15
13 to 18	2	12.0	102.71
19 to 24		13.0	110.34
25 to 30	3	14.0	118.04
31 to 36		15.0	125.81
37 to 42	4	16.0	133.63
43 to 48		17.0	141.49
49 to 54	5	18.0	149.39
55 to 60		19.0	157.32
61 to 360	6+	20.0	165.27

B. Periodic Notice Form

Important Notice of Intent To Change the Interest Rate on Your Adjustable-Rate Mortgage Loan

Dear ————————:

This is to inform you that on [date] ———— National Bank intends to [increase, decrease] the interest rate on your ARM loan from —% to —%. As a result of this change, we are adjusting your installment payments from $—— to $——. Beginning with your [date] payment, please remit your payments at this new amount.[1]

The index upon which interest rate changes on your loan are based was —% when your loan was made and is currently —%, an [increase, decrease] of — percentage points. The interest rate on your loan was —% when your loan was made and will be changed to —% at the upcoming rate adjustment date, an [increase, decrease] of — percentage points. [Because the net index change exceeds the net interest rate change on your ARM, an

---

[1] In lieu of this sentence, you may insert the following paragraph, if appropriate:

The monthly payment on your loan will remain fixed [for —— months/years at a time, the first —— months/years of your loan]. Any changes in your interest rate during that time will be accomplished through a change in the rate of amortization. This means that during the fixed-payment period the amount of each monthly payment allocated to repayment of principal will increase when the interest rate decreases, and will decrease when the interest rate increases. If the interest rate increases substantially, the rate of amortization will actually turn negative, which means that the monthly payments will be too small to cover all of the accrued interest. These shortfalls will be added to your principal balance, which may grow during the ——year period by up to ——%. If the principal grows by the full % limit *before* the end of the —— year period, your monthly payments will be increased *at that time* for the remainder of the period to an amount that will cover the accrued interest. At the end of the —— year fixed-payment period, the monthly payment will be changed to the level that will repay all principal and interest over the remaining life of the loan at the interest rate then in effect.

[3] If appropriate, the following paragraph may be used in lieu of this paragraph:

You may prepay your ARM in whole or in part without penalty at any time. This prepayment may be a lump sum payment of all or part of the remaining debt or may be in the form of larger monthly payments than required under the terms of the loan.

[3] In lieu of this paragraph, the following sentence may be used, if appropriate:

An ARM made by ———— National Bank may not be assumed by a purchaser of your home.

[1] The following paragraph may be used in lieu of this paragraph:

This is to inform you that on [date] ———— National Bank intends to [increase, decrease] the interest rate on your ARM loan from —% to —%. As a result of the change in your interest rate, your monthly payments will remain the same but the rate of amortization on your loan will be [decreased, increased]. Because of this change in the rate of amortization, the rate at which you accumulate equity in your home will [decrease, increase] [and your outstanding loan balance will increase]. [In order to fully repay your adjustable-rate mortgage loan over its life at the new interest rate, your installment payment would have to be increased from $—— to $——.]

index change of —% will be carried over to the next period.]

You may repay the entire loan or any part of it without penalty at any time.

Thank you for your attention to this matter.

C. Adjustable-Rate Mortgage Indexes

Monthly Rate for June and December 1969–80

[In percent]

BILLING CODE 4810-33-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 230 and 239

[Release No. 33-6299]

Availability of Simplified Registration Form to Certain Mining Companies

AGENCY: Securities and Exchange Commission.

ACTION: Final rule amendments.

SUMMARY: The Commission announces the adoption of amendments to Form S–18, a simplified registration form, which allow certain issuers engaged in the mining business to register their securities on that Form. The amendments to Form S–18 also provide a new disclosure item which sets forth requirements applicable to mining companies registering securities on that Form. The Commission also announces the recision of Form S–3, a registration form utilized by certain start-up or unprofitable companies engaged in the mining business.

EFFECTIVE DATE: April 27, 1981. While the amendments will not be effective until such date, in view of the cost and other savings the amendments may provide the registrants, the Commission will accept filings complying with the amendments beginning immediately for those wishing to utilize them.

FOR FURTHER INFORMATION CONTACT: Daniel Abdun-Nabi, Office of Small Business Policy, Division of Corporation Finance, (202) 272–2644. With respect to Item 7A of Form S–18 contact Hubert W. Norman, Office of Engineering, Division of Corporate Finance, (202) 272–3257.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission today announced the adoption of certain amendments to Form S–18 [17 CFR 239.28] and the recision of Form S–3 [17 CFR 239.13].

Form S–18 is a simplified registration statement available to certain domestic and Canadian corporate issuers for the registration under the Securities Act of 1933 [15 U.S.C. 77a, et seq., as amended (1976)] of up to $5 million worth of securities to be sold for cash. Form S–3 is a registration statement designed exclusively for start-up or unprofitable mining companies. The amendments adopted today permit mining companies, heretofore precluded from utilizing Form S–18, to register their securities for sale on that Form. A new disclosure item specifically applicable to mining issuers has been added. This item incorporates the substantive disclosure concepts set forth in Form S–3 and has been updated to reflect current Commission disclosure policies and practices. The Commission, in light of the expanded availability of Form S–18, is rescinding Form S–3.

Discussion

The Commission has for some time been examining steps which might be taken to facilitate capital formation by small businesses. The adoption of Form S–18 in April 1979 represented a significant initiative in this regard.[1] In view of the experimental nature of the Form and the initiation of regional processing of registration statements, the Commission determined to proceed cautiously in connection with the adoption of Form S–18. Thus, issuers who engaged or intended to engage in significant mining operations, as well as issuers engaged in oil and gas operations and non-corporate issuers, were precluded from using the Form.[2] The Commission did express its intent to monitor the use of the Form for an appropriate period and to consider whether the conditions as to its availability should be expanded. In view of the relatively widespread acceptance of the Form and the absence of any significant disclosure or enforcement problems, the Commission proposed that Form S–18 be made available to certain companies engaged in the mining business.[3] Since the proposed amendments would permit virtually all Form S–3 type issuers to utilize Form S–18, and since Form S–18 provides significant benefits over Form S–3, it was contemplated that the proposed amendments would be effected in tandem with a recision of Form S–3.

Since the initial Form S–18 disclosure requirements were not specifically tailored to elicit relevant information regarding mining companies, a new disclosure item for the Form was proposed. The Commission also proposed a comprehensive set of disclosure requirements to be included in Item 2 of Regulation S–K in order that similar and consistent disclosures would appear in all filings by mining companies under the Securities Act of 1933 and the Securities Exchange Act of 1934. As proposed, Item 2(c) would require disclosure as to an issuer's operations on a mine by mine basis. The comments received regarding this proposal, as it affected larger operating companies, were numerous and controversial.

In general the commentators believed that the informational requirements of

[1] Securities Act Release No. 33–6049, April 3, 1979 [44 FR 21562].

[2] In this regard Rule 242 was similarly restricted as to its use. The Commission indicated, in Release No. 33–6180 (January 17, 1980), that should revisions to Form S–18 be effected in order to permit limited partnerships or companies engaged in oil and gas or mining operations to use the form, a review of the definition of "qualified issuer" in Rule 242 would be made. Thus, the Commission today authorized the publication of a release announcing proposed amendments to Rule 242 which, if effected, would permit certain mining companies to rely on that rule in the offer and sale of their securities. Release No. 33–6300, March 19, 1981.

[3] Release Nos. 33–6245, 34–17197, October 7, 1980 [45 FR 66905].

proposed Item 2(c), if not amended to permit a presentation on an aggregate basis, would result in unnecessarily detailed disclosure by large operating companies. Many commentators stated that such detailed information would result in high cost to these companies without substantial benefits to investors and could have adverse effects on a company's competitive position. Because of the nature of the comments received on Item 2, the staff wishes to take additional time to consider what, if any, revisions should be made to that Item as it applies to large operating companies. However, because of the positive response to the proposal to make Form S–18 available to mining companies and the lack of significant objections to the requirements to be included in that Form, the Commission has determined to adopt amendments to Form S–18 at this time.

The Commission notes the standards adopted in Item 7A impose no new material disclosure requirements from those set forth in Form S–3 and represent a codification of past practice with respect to the processing of registration statements for mining issuers.

Synopsis of Amendments

As indicated above, the Commission has determined to make Form S–18 available to companies engaged in the mining business. This change is accomplished by deleting the existing prohibition against usage of the form by mining companies in General Instruction A to the Form.[4] The other restrictions present in the Instructions to Form S–18 remain. Therefore a mining issuer is required to be a domestic or Canadian corporation which proposes to sell not more than $5 million worth of securities to the public for cash. A mining issuer also may not be a company reporting under the Securities Exchange Act of 1934, a limited partnership or a subsidiary of a parent that would be unable to use the form.[5]

Form S–18 is amended to provide a new disclosure item, Item 7A, specifically applicable to mining issuers. As proposed, Item 7A incorporated the substantive disclosure concepts of Form S–3 and also included certain additional requirements applicable to companies with operations. These additional requirements are not included in the amendments adopted today but may be reconsidered in the future after the proposed amendments to Item 2 of Regulation S–K are adopted.

[4] *See* General Instruction A(a)(6) and instruction thereto.

[5] *See* General Instruction A(a).

The following summarizes the amendments to Form S–18 and discusses the disclosure requirements for mining companies using that form. The principal comments received on the proposal and any changes made in response to such comments are also discussed. The full text of the amendment is included at the end of this release.

Item 7A. Description of Property—Issuers Engaged or to be Engaged in Significant Mining Operations.

(a) Definitions—Numerous commentators noted that the proposed definitions regarding proved and probable reserves differ from the definitions set forth by the Financial Accounting Standards Board (FASB) in their Statement of Financial Accounting Standards No. 39.[6] Given the desire to establish uniform definitional and disclosure requirements and to avoid duplicative analysis and confusion, the commentators urged the Commission to adopt the standards of FASB Statement No. 39.

The proposed definitions incorporate the views from the U.S. Geological Survey Circular 831 [7] and from standard mining dictionaries. These definitions represent the culmination of a long term project between staff members of the U.S. Bureau of Mines and the U.S. Geological Survey to establish uniform definitions and classifications of mineral and energy resources. An examination of FASB Statement No. 39 reveals the FASB did not intend to provide a uniform definition of "reserves." Further, although the FASB definitions of "proved" and "probable" reserves appear to be somewhat inconsistent with those proposed by the Commission, the intended scope of the two standards appears to be the same. In this regard, the Commission's proposed definitions are merely more detailed and thus provide guidance in complying with FASB Statement No. 39. Additionally, the Item 7A definitions set forth standards which represent a codification of past practice. The Commission therefore has determined to adopt the definitions as proposed.

(b) Mining Operations Disclosure—Proposed Items 7A(b)(1)–(6) incorporate the substantive disclosure requirements of Form S–3 Items 4(a)(1)–(6), updated to reflect current disclosure practices. In general these subsections require disclosure of significant facts regarding each of the properties owned or operated, or currently intended to be owned or operated, by the registrant.

These disclosures include the location of and means of access to the property, form of title or lease and any known mineralization on the property. In addition, a description of the history of operations and work done by the registrant will be required. An instruction indicating that the summation of proven (measured) and probable (indicated) reserves will be allowed under certain circumstances also has been inserted. This instruction will be applied where the difference between the issuers's proven (measured) and probable (indicated) reserves cannot reliably be defined. In addition, the Form S–3 prohibition against disclosure of reserves of lesser assurance than proven (measured) or probable (indicated) has been retained. Finally, disclosure regarding the present state of the property, plant and equipment is included.

The commentators raised no objection to the application of these provisions to smaller issuers expected to utilize Form S–18. The Commission, noting that these provisions were adopted in substance from Form S–3 as well as the absence of any objections to these provisions by the commentators, has adopted Items 7A(b)(1), (2), (3) and (5) as proposed. Proposed Items 7A(b)(4) and (6) have been consolidated in the interest of clarity into new Item 7A(b)(4) with no substantive revisions.

Proposed Items 7A(b) (7) and (8) set forth new disclosure requirements which would most directly affect operating mining companies. Proposed Item 7(A)(b)(7) requires on a mine by mine basis a description of the total tonnage produced, the grade of such ore and relevant production cost statistics. Proposed Item 7A(b)(8) would elicit, on a mine by mine basis, disclosure of the changes in the deposits mined and the changes in the mining conditions experienced by the issuer.

Many commentators objected to these disclosure items as calling for information which is confidential or proprietary in nature. Further, several commentators questioned the benefits to investors of such detailed disclosure in the context of large operating mining companies. Moreover, numerous commentators opined that the cost of providing such disclosures would be substantial and would significantly

[6] Statement of Financial Accounting Standards No. 39, Financial Reporting and Changing Prices: Specialized Assets—Mining and Oil and Gas, a supplement to FASB Statement No. 33, October 1980.

[7] Principles of a Resources/Reserve Classification for Minerals, U.S. Bureau of Mines and the U.S. Geological Survey (1980). This survey was intended as a revision of the widely utilized U.S. Geological Survey Bulletin No. 1450–A.

outweigh any potential benefit to investors.

As indicated above, the Commission has determined to postpone the adoption of the amendments to Form S-K in order to further consider the appropriate disclosure requirements that should apply to large operating mining issuers. In addition, the Commission is sensitive to the fact that the requirements of proposed Items 7(b) (7) and (8) might result in the disclosure of information which is proprietary or confidential by large or small mining issuers. Accordingly, Items 7A(b) (7) and (8) are not being adopted at this time. When the amendments to Item 2 of Regulation S-K are adopted the Commission will consider whether the disclosure requirements for mining companies being adopted today in the Form S-18 should be amended.

Proposed Item 7A(b)(9) set forth a new requirement with respect to the inclusion of a glossary of terms. Proposed Item 7A(b)(10) prohibits from the presentation in a registration statement detailed maps and reports and other highly technical data. Such information may, under certain circumstances, be furnished to the Commission as supplemental information. These standards represent a codification of prior practice with respect to processing registration statements on Form S-1 and Form S-2. These proposals, to which no objection was raised, have been adopted without revision as Items 7A(b) (7) and (8).

(c) Supplemental Information—Item 7A(c) addresses three separate subject matter areas of supplemental information. The first concerns maps, drill data, and calculations upon which the reserve estimates are based. The second section requires that each engineering or metallurgical report concerning the registrant's property be filed supplementally. The third section requires filing of certain documents necessary to support representations made in the registration statement. These requirements are similar to those set forth in Form S-2.

The Commission received no comments raising material concerns regarding the requirements of Item 7A(c) and therefore has determined to adopt the item substantially as proposed.

Item 15. Financial Statements and Instructions

As set forth in the proposing release, FASB Statement No. 7 [8] groups together under the title "Development Stage Enterprises" issuers that are in both the exploratory and development stages. The distinction from the perspective of the geologist or engineer is significant. In mining terminology an exploratory stage company is basically engaged in the search for minerals. A development stage company, on the other hand, has found a commercially feasible body of minerals and is engaging in the preparation of that body for production. Financial statements for exploratory stage mining issuers will typically identify the issuer as a "development stage company." Such a classification may be confusing to investors. Therefore, new subsection (f) has been added to this item in order that the definitional terms set forth in Item 7A(a) will be utilized in a consistent manner throughout the textual and financial portions of the registration statement.

The Commission received no adverse comments regarding this proposal and has therefore decided to adopt the item as proposed.

Technical Amendments

Both General Instruction A(a)(5) and Rule 242(a)(5)(ii) currently preclude a company which engages or intends to engage in oil and gas related operations which exceed the criteria for exemption specified in § 201.3-18(k) of Regulation S-X from using Form S-18 or relying on Rule 242. In light of the recent amendments to Regulation S-X [9] the reference to § 201.3-18(k) is no longer appropriate. The Commission is therefore amending this reference to read § 210.4-10(k).

Text of Amendments

17 CFR Chaper II is amended as follows:

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

§ 239.13 [Removed]

1. By removing § 239.13 in its entirety.

2. By amending the General Instructions to Form S-18, § 239.28 to read as follows:

§ 239.28 Form S-18, optional form for the registration of securities to be sold to the public by the issuer for an aggregate cash price not to exceed $5,000,000.

* * * * *

General Instruction

A. Rule as to Use of Form S-18

* * * * *

(5) does not engage or intend to engage in oil and gas related operations which exceed the criteria for exemption specified in Section 210.4-10(k) of Regulation S-X;

(6) (delete the text of subsection (6) and insert the text of subsection(7))

(7) (insert the text of subsection (8))

(8) (delete this subsection)

* * * * *

Item 7. Description of Property

[no change]

Item 7A. Description of Property—Issuers Engaged or To Be Engaged in Significant Mining Operations

(a) *Definitions:* The following definitions apply to registrants engaged or to be engaged in significant mining operations:

(1) *Reserve:* That part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination.

Note.—Reserves are customarily stated in terms of "ore" when dealing with metalliferous minerals; when other materials such as coal, oil shale, tar sands, limestone, etc. are involved, an appropriate term such as "recoverable coal" may be substituted.

(2) *Proven (Measured) Reserves:* Reserves for which (a) quantity is computed from dimensions revealed in outcrops, trenches, workings, or drill holes; grade and/or quality are computed from the results of detailed sampling and (b) the sites for inspection, sampling and measurement are spaced so closely and the geologic character is so well defined that size, shape, depth, and mineral content of reserves are well-established.

(3) *Probable (Indicated) Reserves:* Reserves for which quantity and grade and/or quality are computed from information similar to that used for proven (measured) reserves, but the sites for inspection, sampling, and measurement are farther apart or are otherwise less adequately spaced. The degree of assurance, although lower than that for proven (measured) reserves, is high enough to assume continuity between points of observation.

(4) (i) *Exploration Stage*—includes all issuers engaged in the search for mineral deposits (reserves) which are not in either the development or production stage.

(ii) *Development Stage*—includes all issuers engaged in the preparation of an established commercially mineable deposit (reserves) for its extraction which are not in the production stage.

(iii) *Production Stage*—includes all issuers engaged in the exploitation of a mineral deposit (reserve).

Instruction—Mining companies in the exploration stage should not refer to themselves as development stage companies in the financial statements, even though such companies should comply with FASB Statement No. 7, if applicable.

(b) *Mining Operations Disclosure*—Furnish the following information as to each of the mines, plants and other significant properties owned or operated, or presently intended to be owned or operated, by the registrant:

(1) The location of and means of access to the property.

(2) A brief description of the title, claim, lease or option under which the registrant and its subsidiaries have or will have the right to hold or operate the property.

---

[8] Statement of Financial Accounting Standards No. 7, Accounting and Reporting by Development Stage Enterprises, June 1975.

[9] Release No. AS-280, September 2, 1980 [45 FR 63660].

indicating any conditions which the registrant must meet in order to obtain or retain the property. If held by leases or options, the expiration dates of such leases or options should be stated. Appropriate maps may be used to portray the locations of significant properties.

(3) A brief history of previous operations, including the names of previous operators, insofar as known.

(4)(a) A brief description of the present condition of property, the work completed by the registrant on the property, the registrant's proposed program of exploration and development, and the current state of exploration and/or development of the property. Mines should be identified as either open-pit or underground. If the property is without known reserves and the proposed program is exploratory in nature, a statement to that effect shall be made.

(b) The age, details as to modernization and physical condition of the plant and equipment, including subsurface improvements and equipment. Further, the total cost for each property and its associated plant and equipment should be stated. The source of power utilized with respect to each property should also be disclosed.

(5) A brief description of the rock formations and mineralization of existing or potential economic significance on the property, including the identity of the principal metallic or other constituents insofar as known. If proven (measured) or probable (indicated) reserves have been established, state (i) the estimated tonnages and grades (or quality, where appropriate) of such classes of reserves, and (ii) the name of the person making the estimates and the nature of his relationship to the registrant.

Instructions

1. It should be stated whether the reserve estimate is of in-place material or of recoverable material. Any in-place estimate should be qualified to show the anticipated losses resulting from mining methods and beneficiation or preparation.

2. The summation of proven (measured) and probable (indicated) ore reserves is acceptable if the difference in degree of assurance between the two classes of reserves cannot be reliably defined.

3. No estimates or reserves of lesser assurance than proven (measured) and probable (indicated) such as "possible" or "inferred" should be set forth.

(6) If technical terms relating to geology, mining or related matters whose definitions cannot be readily found in conventional dictionaries (as opposed to technical dictionaries or glossaries) are used, an appropriate glossary should be included in the registration statement.

(7) Detailed geological maps and reports, feasibility studies and other highly technical data should not be included in the registration statement but should be, to the degree appropriate and necessary for the Commission's understanding of the registrant's presentation of business and property matters, furnished as supplemental information.

(c) *Supplemental Information:*

(1) If an estimate of proven (measured) or probable (indicated) reserves is set forth in the registration statement, furnish:

(i) maps drawn to scale showing any mine workings and the outlines of the reserve blocks involved together with the pertinent sample-assay thereon,

(ii) all pertinent drill data and related maps,

(iii) the calculations whereby the basic sample-assay or drill data were translated into the estimates made of the grade and tonnage of reserves in each block and in the complete reserve estimate.

Instructions—Maps and other drawings submitted to the staff should include:

1. A legend or explanation showing, by means of pattern or symbol, every pattern or symbol used on the map or drawing; the use of the symbols used by the U.S. Geological Survey is encouraged;

2. A graphical bar scale should be included; additional representations of scale such as "one inch equals one mile" may be utilized provided the original scale of the map has not been altered;

3. A north arrow on maps;

4. An index map showing where the property is situated in relationship to the state or province, etc., in which it was located;

5. A title of the map or drawing and the date on which it was drawn;

6. In the event interpretive data is submitted in conjunction with any map, the identity of the geologist or engineer that prepared such data;

7. Any drawing should be simple enough or of sufficiently large scale to clearly show all features on the drawing.

(2) Furnish a complete copy of every material engineering, geological or metallurgical report concerning the registrant's property, including governmental reports, which are known and available to the registrant. Every such report should include the name of its author and the date of its preparation, if known to the registrant.

Any of the above-required reports as to which the staff has access need not be submitted. In this regard, issuers should consult with the staff prior to filing the registration statement. Any reports not submitted should be identified in a list furnished to the staff. This list should also identify any known governmental reports concerning the registrant's property.

(3) Furnish copies of all documents such as title documents, operating permits and easements needed to support representations made in the registration statement.

* * * * *

Item 15. Financial Statements and Instructions

(f) With respect to companies engaged or to be engaged in the mining business, attention is directed to the instruction to Item 7A(a)(4) concerning the appropriate classification of issuers engaged in the exploratory, development and production stage of mining.

* * * * *

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

1. By revising paragraph (a)(5)(ii) of § 230.242 to read as follows:

§ 230.242 Exemption of limited offers and sales by qualified issuers.

* * * * *

(a) * * *

(5) * * *

(ii) Does not engage or intend to engage in oil and gas related operations which exceed the criteria for exemption specified in § 210.4–10(k) of Regulation S–X.

* * * * *

Statutory Authority

The Commission hereby adopts the amendments to Form S–18 pursuant to Sections 6, 7, 8, 10, and 19(a) of the Securities Act of 1933.

(Secs. 6, 7, 8, 10, 19(A), 48 Stat. 78, 79, 81, 85; secs. 205, 209, 48 Stat. 906, 908; sec. 301, 54 Stat. 857; sec. 8, 68 Stat. 685; sec. 1, 79 Stat. 1051; sec. 308(a)(2), 90 Stat. 57; 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a))

With respect to the technical amendments to Form S–18 and Rule 242 under the Securities Act the Commission believes that it is appropriate to adopt these technical amendments in order to clarify potentially confusing language therein. Accordingly, the Commission pursuant to Section 553(b) of the Administrative Procedure Act ("APA") (5 U.S.C. 553(b)) for good cause finds that notice and opportunity for public comment at this time is impracticable, unnecessary and contrary to the public interest.

By the Commission.

George A. Fitzsimmons,

Secretary.

March 18, 1981.

Notice of Further Deferral of Effective Dates of Regulations

AGENCY: Department of Labor.

ACTION: Notice of further deferral of effective dates of regulations.

SUMMARY: The Department of Labor further defers the effective dates of three final rules from March 30, 1981 (see 46 FR 11253, Feb. 6, 1981), until the dates set forth below.

This action is taken in order to permit reconsideration of these rules in accordance with Executive Order 12291 and in order to permit proposed rulemaking.

For complete information on these actions see the following Federal Register documents in the Proposed Rules section of this issue of the Federal Register:

1. 81-9411 (ETA)
2. 81-9412 (OSHA)
3. 81-9410 (OFCCP)

DATE: The effective date of this deferral is March 27, 1981.

ADDRESS: Gail Lively, Director, Executive Secretariat, Room S-2519, Frances Perkins Building, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: (1) For the Employment and Training Administration (ETA)—Mr. Kenneth Bell—Telephone: 202-376-6297. (2) For the Occupational Safety and Health Administration (OSHA)—Mr. H. Berrien Zettler—Telephone 202-523-7725. (3) For the Office of Federal Contract Compliance Programs—Mr. James W. Cisco—Telephone 202-523-9426.

Rule and agency	Subject	Old effective date	New effective date
1. 20 CFR Part 655 ETA (Originally published on Jan. 16, 1981 at 46 FR 4368).	Labor Certification Process for the Temporary Employment of Aliens in Agriculture: Adverse Effect Wage Rate Methodology.	Mar. 30, 1981	Deferred until action taken on today's proposed rules.
2. 29 CFR Part 1903 OSHA (Originally published on Jan. 16, 1981 at 46 FR 3652).	Walkaround Compensation	do	May 30, 1981.
3. 41 CFR Part 60-1 OFCCP (Originally published on Jan. 16, 1981 at 46 FR 3682).	Payment of Membership Fees and Other Expenses to Private Organizations.	do	Deferred until action taken on today's proposed rules.

Signed at Washington, D.C. this 25th day of March, 1981.

Raymond J. Donovan,

Secretary of Labor.

[FR Doc. 81-9523 Filed 3-26-81; 8:45 am]

BILLING CODE 4510-23-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 50

[Docket No. 78N-0049]

Protection of Human Subjects; Prisoners Used as Subjects in Research; Delay of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule; delay of effective date.

SUMMARY: The Food and Drug Administration (FDA) is delaying the effective date of its regulations on the use of prisoners as subjects in research to a date to be announced in a later issue of the Federal Register.

DATE: The delay is effective March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Halyna P. Breslawec, Office of Health Affairs (HFY-2), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: In the Federal Register of May 5, 1978 (43 FR 19417), the Food and Drug Administration (FDA) proposed to adopt regulations to provide protection for prisoners involved in research activities that fall within the agency's jurisdiction. After considering the comments it received on this proposal, in the Federal Register of May 30, 1980 (45 FR 36386), FDA adopted the final rule on the use of prisoners in research. At that time, the agency announced that the regulations would become effective on June 1, 1981.

On July 29, 1980, suit was brought in the United States District Court for the Eastern District of Michigan to have these regulations declared invalid. See *Fante and the Upjohn Company* v. *Department of Health and Human Services, et al.*, Civil Action No. 80-72778. Because of the nature and circumstances of this litigation, the agency has determined that it is appropriate to delay the effective date of these regulations. Therefore, FDA announces that unless the District Court declares these regulations to be invalid, the final rule will become effective 5 months from the date of the District Court's final judgment on the merits of the suit. The agency will publish an appropriate notice in the Federal Register, as soon as the District Court rules.

The regulation is affected by Executive Order 12291, dated February 17, 1981 (46 FR 13193, February 19, 1981). If the District Court holds that the final rule is valid, and a decision is made to put the regulation into effect, the agency will comply with Section 7 of the Executive Order and report this regulation to the Director of the Office of Management and Budget before it becomes effective. The report will be filed under Section 7 (a) or (b) of the Executive Order, depending on the final determination as to whether the regulation is a major rule. Based on the amended regulatory analysis assessment of the regulation, which was prepared before its promulgation, and on the criteria for a major rule in Section 1(b) of the Executive Order, it appears that this regulation may not be a major rule. (It should be noted that FDA-regulated research is being conducted at only three prisons.)

Dated: March 17, 1981.

Mark Novitch,

Acting Commissioner of Food and Drugs.

[FR Doc. 81-9005 Filed 3-26-81; 8:45 am]

BILLING CODE 4110-03-M

21 CFR Parts 74, 81, and 82

[Docket No. 76C-0044]

D&C Orange No. 10 and D&C Orange No. 11

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is permanently listing D&C Orange No. 10 and D&C Orange No. 11 for use in externally applied drugs and cosmetics. This document responds to a petition filed by the Cosmetic, Toiletry, and Fragrance Association, Inc. (CTFA) for use of the colors in drugs and cosmetics. This rule

will remove these color additives from the provisionally approved listing for all uses in drugs and cosmetics after April 28, 1981, and D&C Orange No. 10 and D&C Orange No. 11 may not be added to ingested drugs and cosmetics after the date.

DATES: Effective April 28, 1981; objections by April 27, 1981.

ADDRESS: Written objections may be sent to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Bureau of Foods (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 6, 1973 (38 FR 21199), FDA announced that a petition (CAP 6C0042) for the permanent listing of D&C Orange No. 10 and D&C Orange No. 11 as color additives for use in drugs and cosmetics had been filed by the Cosmetic, Toiletry, and Fragrance Association, Inc. (1133 15th St. NW., Washington, DC 20005), c/o Hazleton Laboratories, Inc., 9200 Leesburg Turnpike, Vienna, VA 22180. The petition was filed pursuant to section 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 376). A subsequent notice published in the **Federal Register** of March 5, 1976 (41 FR 9584) amended the filing of this petition to include the additional use of D&C Orange No. 10 in cosmetics intended for use in the area of the eye. FDA did not receive any comments in response to these notices.

FDA has evaluated data in the petition and concludes that D&C Orange No. 10 and D&C Orange No. 11 are safe under the conditions set forth below for use in externally applied drugs and cosmetics, and that certification is necessary for the protection of the public health. This order permanently lists D&C Orange No. 10 and D&C Orange No. 11 for use in externally applied drugs and cosmetics under §§ 74.1260, 74.1261, 74.2260, and 74.2261 (21 CFR 74.1260, 74.1261, 74.2260, and 74.2261), respectively.

The provisional regulations published in the **Federal Register** of February 4, 1977 (42 FR 6992) required new chronic toxicity studies for D&C Orange No. 10 and D&C Orange No. 11, as a condition of their continued provisional listing for ingested uses. The closing date for the provisional listing of the color additives was postponed until January 31, 1981, for completion of those studies. The petitioner was also notified by letter of the need for data to support the use of D&C Orange No. 10 in cosmetics intended for use in the area of the eye. The petitioner subsequently notified FDA that it did not intend to test the colors as would be required for continued provisional listing for ingested uses and amended the petition for these colors to request the listing of D&C Orange No. 10 and D&C Orange No. 11 for use only in externally applied drugs and cosmetics. Because there is no petition for the listing of D&C Orange No. 10 and D&C Orange No. 11 for use in drugs and cosmetics that may be ingested, FDA finds that there no longer exists a basis for the continuation of the provisional listing for this use.

The agency therefore concludes that the current provisional listing of these two colors should be terminated when the permanent listing of these color additives for external uses takes effect. In addition, the provisional listing of D&C Orange No. 10 and D&C Orange No. 11 for use in drugs and cosmetics under § 81.1(b), which was extended to January 31, 1981 by regulation published in the **Federal Register** of February 4, 1977, and which has been further extended to June 25, 1981 by a regulation, will be deleted when this order becomes effective on April 28, 1981 unless it is stayed by the timely filing of objections.

The petitioner was notified in a letter of August 17, 1978, that consideration of the petitioned use of D&C Orange No. 10 in cosmetics intended for use in the area of the eye would require the submission and evaluation of data adequate to support such use. The required data for eye area use have not been submitted to the agency. Therefore, that portion of the petition that was amended by filing on March 5, 1976 (Docket No. 76C–0044), to include the permanent listing of D&C Orange No. 10 for eye area use, is now considered by the agency to be withdrawn without prejudice in accordance with the provisions of § 71.4 (21 CFR 71.4). This section of the regulations requires that such requested information be submitted within 180 days after filing of the petition or will be considered withdrawn without prejudice. Use of D&C Orange No. 10 in the area of the eye has never been covered by provisional listing. Future consideration of the permanent listing of D&C Orange No. 10 for eye area use will require the submission of a new color additive petition for that use. Listing of a color additive for use in externally applied drugs and cosmetics does not encompass eye area use.

All certificates heretofore issued for batches of D&C Orange No. 10 and D&C Orange No. 11 and their lakes for ingested use are revoked, and the addition of the colors and their lakes to ingested drugs or to ingested cosmetics after April 28, 1981 will cause such products to be adulterated within the meaning of the Federal Food, Drug, and Cosmetic Act (22 U.S.C. 301 et seq.), and the products and the persons causing the violation may be subject to regulatory action. This prohibition applies to the use of the straight colors, their lakes, and color additive mixtures containing D&C Orange Nos. 10 or 11. The agency concludes that the protection of the public health does not require the removal from the market of drugs and cosmetics containing the color additives for ingested use or the destruction of drugs or cosmetics that are being manufactured to which these color additives have been added on or before April 28, 1981.

Manufacturers of new drugs and new animal drugs (including certifiable antibiotics for animal use) that may be ingested and that contain D&C Orange Nos. 10 or 11 may either cease adding the color additives or substitute a different color in accordance with the provisions of § 314.8(d)(3) and (e) or § 514.8(d)(3) and (e) (21 CFR 314.8(d)(3) and (e) or 21 CFR 514.8(d)(3) and (e)), as appropriate. If a substitute color is used, the manufacturer shall file with FDA a Supplemental New Drug Application or Supplemental New Animal Drug Application, which contains data describing the new composition and showing that the change in composition does not interfere with any assay and control procedures used in manufacturing the drug, or that the assay and control procedures used in manufacturing the drug have been revised to make them adequate. The applicant shall also submit data that establish the stability of the revised formulation or, if the data are too limited to support a conclusion that the drug will retain its declared potency for the reasonable marketing period, a commitment to test the stability of marketed batches at reasonable intervals, to submit the data as they become available, and to recall from the market any batch found to fall outside the approved specification for the drug.

Each sponsor of a notice of claimed investigational exemption for a new drug (IND) or a notice of claimed investigational exemption for a new animal drug (INAD) containing the subject color should promptly amend the IND or INAD to indicate that the color additives have been deleted or a different color additive substituted.

The agency is aware that supplies of alternative color additives may be difficult to obtain immediately. Consequently, drug and cosmetic labeling that states that the product contains "artificial color," or that specifically identifies D&C Orange Nos. 10 or 11 may continue to be used with uncolored products, or products containing substitute colors, during the time necessary to obtain supplies of revised labeling or until April 28, 1982, whichever occurs first.

The agency has determined under 21 CFR 25.24(b)(12) and 21 CFR 25.24(d)(5) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant effect on the environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

A Regulatory Flexibility Analysis is not required for this final rule. Color additive regulations, such as this one, which are initiated by an industry petition, are promulgated without a proposed rule as specified under section 706(d)(1) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 376(d)(1)). The requirement to perform a Regulatory Flexibility Analysis under sections 601(2) and 604(a) of the Regulatory Flexibility Act does not apply to final rules that are published without the need for a notice of proposed rulemaking. In addition, the filing notice on which this rule is based was published prior to the January 1, 1981 effective date of the provisions of the Regulatory Flexibility Act that require preparation of initial and final regulatory flexibility analyses (5 U.S.C. 603 and 604).

This final rule is also exempt from the requirement to perform a Regulatory Impact Analysis under section 3(a) of Executive Order 12291 because this rulemaking is subject to the formal rulemaking provisions of 5 U.S.C. 556 and 557 by virtue of sections 706(d) and 701(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 376(d) and 371(e)). See section 1(a)(1) of Executive Order 12291.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 706 (b), (c), and (d), 74 Stat. 399–403 (21 U.S.C. 376 (b), (c), and (d))), the formal rulemaking provisions of sec. 701(e), 70 Stat. 919 as amended 21 U.S.C. 371(e)); the Transitional Provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86–618, sec. 203, 74 Stat. 404–407 (21 U.S.C. 376, note)); and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Parts 74, 81, and 82 are amended as follows:

PART 74—LISTING OF COLOR ADDITIVES SUBJECT TO CERTIFICATION

1. Part 74 is amended:

a. By adding new § 74.1260 to Subpart B, to read as follows:

§ 74.1260 D&C Orange No. 10.

(a) *Identity.* (1) The color additive D&C Orange No. 10 is a mixture consisting principally of 4',5'-diiodofluorescein, 2',4',5'-triiodofluorescein, and 2',4',5',7'-tetraiodofluorescein.

(2) Color additive mixtures for drug use made with D&C Orange No. 10 may contain only those diluents listed in this subpart as safe and suitable for use in color additive mixtures for coloring externally applied drugs.

(b) *Specifications.* D&C Orange No. 10 shall conform to the following specifications and shall be free from impurities other than those named to the extent that such other impurities may be avoided by good manufacturing practice:

Sum of volatile matter (at 135° C) and halides and sulfates (calculated as sodium salts), not more than 6 percent.

Insoluble matter (alkaline solution), not more than 0.5 percent.

Phthalic acid, not more than 0.5 percent.

2-[3',5'-Diiodo-2',4'-dihydroxybenzoyl] benzoic acid, not more than 0.5 percent.

Fluorescein, not more than 1 percent.

4'-Iodofluorescein, not more than 3 percent.

2',4'-Diiodofluorescein and 2',5'-diiodofluorescein, not more than 2 percent.

2',4',5'-Triiodofluorescein, not more than 35 percent.

2',4',5',7'-Tetraiodofluorescein, not more than 10 percent.

4',5'-Diiodofluorescein, not less than 60 percent and not more than 95 percent.

Lead (as Pb), not more than 20 parts per million.

Arsenic (as As), not more than 3 parts per million.

Mercury (as Hg), not more than 1 part per million.

Total color, not less than 92 percent.

(c) *Uses and restrictions.* D&C Orange No. 10 may be safely used for coloring externally applied drugs in amounts consistent with good manufacturing practice.

(d) *Labeling requirements.* The label of the color additive and any mixtures prepared therefrom intended solely or in part for coloring purposes shall conform to the requirements of § 70.25 of this chapter.

(e) *Certification.* All batches of D&C Orange No. 10 shall be certified in accordance with regulations in Part 80 of this chapter.

b. By adding new § 74.1261 to Subpart B, to read as follows:

§ 74.1261 D&C Orange No. 11.

(a) *Identity.* (1) The color additive D&C Orange No. 11 is a mixture consisting principally of the disodium salts of 4',5'-diiodofluorescein, 2',4',5'-triiodofluorescein and 2',4',5',7'-tetraiodofluorescein.

(2) Color additive mixtures for drug use made with D&C Orange No. 11 may contain only those diluents listed in this subpart as safe and suitable for use in color additive mixtures for coloring externally applied drugs.

(b) *Specifications.* The color additive D&C Orange No. 11 shall conform to the following specifications and shall be free from impurities other than those named to the extent that such impurities may be avoided by good manufacturing practice:

Sum of volatile matter (at 135° C) and halides and sulfates (calculated as sodium salts), not more than 6 percent.

Water-insoluble matter, not more than 0.5 percent.

Phthalic acid, not more than 0.5 percent.

2-[3',5'-Diiodo-2',4'-dihydroxybenzoyl] benzoic acid, sodium salt, not more than 0.5 percent.

Fluorescein, disodium salt, not more than 1 percent.

4'-Iodofluorescein, disodium salt, not more than 3 percent.

2',4'-Diiodofluorescein and 2',5'-diiodofluorescein, not more than 2 percent.

2',4',5'-Triiodofluorescein, not more than 35 percent.

2',4',5',7'-Tetraiodofluorescein, disodium salt, not more than 10 percent.

4',5'-Diiodofluorescein, disodium salt, not less than 60 percent and not more than 95 percent.

Lead (as Pb), not more than 20 parts per million.

Arsenic (as As), not more than 3 parts per million.

Mercury (as Hg), not more than 1 part per million.

Total color, not less than 92 percent.

(c) *Uses and restrictions.* D&C Orange No. 11 may be safely used for coloring externally applied drugs in amounts consistent with good manufacturing practice.

(d) *Labeling requirements.* The label of the color additive and any mixtures prepared therefrom intended solely or in part for coloring purposes shall conform to the requirements of § 70.25 of this chapter.

(e) *Certification.* All batches of D&C Orange No. 11 shall be certified in accordance with regulations in Part 80 of this chapter.

c. By adding new § 74.2260 to Subpart C, to read as follow:

§ 74.2260 D&C Orange No. 10.

(a) *Identity and specifications.* The color additive D&C Orange No. 10 shall conform in identity and specifications to the requirements of § 74.1260(a)(1) and (b).

(b) *Uses and restrictions.* D&C Orange No. 10 may be safely used for coloring externally applied cosmetics in amounts consistent with good manufacturing practice.

(c) *Labeling requirements.* The label of the color additive shall conform to the requirements of § 70.25 of this chapter.

(d) *Certification.* All batches of D&C Orange No. 11 shall be certified in accordance with regulations in Part 80 of this chapter.

d. By adding new § 74.2261 to Subpart C, to read as follows:

§ 74.2261 D&C Orange No. 11.

(a) *Identity and specifications.* The color additive D&C Orange No. 11 shall conform in identity and specifications to the requirements of § 74.1261(a)(1) and (b).

(b) *Uses and restrictions.* D&C Orange No. 11 may be safely used for coloring externally applied cosmetics in amounts consistent with good manufacturing practice.

(c) *Labeling requirements.* The label of the color additive shall conform to the requirements of § 70.25 of this chapter.

(d) *Certification.* All batches of D&C Orange No. 11 shall be certified in accordance with regulations in Part 80 of this chapter.

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

2. Part 81 is amended:

§ 81.1 [Amended]

a. In paragraph (b) of § 81.1 *Provisional lists of color additives* by removing the entries for "D&C Orange No. 10" and D&C Orange No. 11."

b. In § 81.10 by adding new paragraph (m), to read as follows:

§ 81.10 Termination of provisional listing of color additives.

* * * * *

(m) *D&C Orange Nos. 10 and 11.* In the absense of a petition to list D&C Orange No. 10 and D&C Orange No. 11 for use in ingested drugs and cosmetics, there no longer exists a basis for provisional listing for such uses. Therefore, FDA is terminating the provisional listing of D&C Orange No. 10 and D&C Orange No. 11 for use in ingested drugs and cosmetics, effective April 28, 1981.

c. In § 81.30 by adding new paragraph (n), to read as follows:

§ 81.30 Cancellation of certificates.

* * * * *

(n)(1) Certificates issued for D&C Orange No. 10, D&C Orange No. 11, their lakes, and all mixtures containing these color additives are cancelled and have no effect as pertains to their use in ingested drugs and cosmetics after April 28, 1981 and use of these color additives in the manufacture of ingested drugs or cosmetics after this date will result in adulteration.

(2) The agency finds, on the basis of the scientific evidence before it, that no action has to be taken to remove from the market drugs and cosmetics to which the color additives were added on or before April 28, 1981.

PART 82—LISTING OF CERTIFIED PROVISIONALLY LISTED COLORS AND SPECIFICATIONS

3. Part 82 is amended:

a. By revising § 82.1260, to read as follows:

§ 82.1260 D&C Orange No. 10.

The color additive D&C Orange No. 10 shall conform in identity and specifications to the requirements to . § 74.1260(a)(1) and (b) of this chapter. D&C Orange No. 10 is restricted to use in externally applied drugs and cosmetics.

b. By revising § 82.1261, to read as follows:

§ 82.1261 D&C Orange No. 11.

The color additive D&C Orange No. 11 shall conform in identity and specifications to the requirements of § 74.1261(a)(1) and (b) of this chapter. D&C Orange No. 11 is restricted to use in externally applied drugs and cosmetics.

Any person who will be adversely affected by the foregoing regulation may at any time on or before April 27, 1981 file with the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the regulation, specify with particularity the provisions of the regulation deemed objectionable, and state the grounds for the objections. Objections shall be filed in accordance with the requirements of 21 CFR 71.30. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Four copies of all documents shall be filed and shall be identified with the docket number found in brackets in the heading of this regulation. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective April 28, 1981, except as to any provisions that may be stayed by the filing of proper objections. All affected products initially introduced or initially delivered for introduction into interstate commerce on or after April 28, 1982 shall fully comply with this regulation. Notice of the filing of objections or lack thereof will be announced by publication in the **Federal Register.**

(Sec. 706(b), (c), and (d), 74 Stat. 399–403 (21 U.S.C. 376(b), (c), and (d)); sec. 203, Pub. L. 86–618, 74 Stat. 404–407 (21 U.S.C. 376 note))

Dated: March 24, 1981.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

---

21 CFR Part 81

[Docket No. 76N-0366]

Provisional List of Certain Color Additives; Extension of Closing Dates

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: In response to three citizen petitions, the Food and Drug Administration (FDA) in this document is extending the closing dates for the use of 23 provisionally listed color additives beyond January 31, 1981. The extension is conditioned upon the timely completion of ongoing scientific investigations and the submission of data to FDA on a prescribed schedule.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Marvin D. Mack, Bureau of Foods (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5740.

SUPPLEMENTARY INFORMATION: Under Title II of the Color Additive Amendments of 1960, Pub. L. 86-618, sec. 203(a)(2), 74 Stat. 405 (21 U.S.C. 376, note) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), FDA is authorized to extend a closing date for the provisional listing of a color additive on its own initiative or upon the application of an interested person. Section 203(d)(1) of Title II of the Color Additive Amendments requires the issuance of regulations or amended regulations establishing, insofar as practicable, a current listing of color additives and the particular uses considered to be provisionally listed.

In the Federal Register of February 4, 1977 (42 FR 6392), FDA extended the closing dates for 52 provisionally listed color additives based upon the agency's conclusion that the postponement was consistent with the objective of carrying to completion, in good faith, and as soon as reasonably practicable, the scientific investigations necessary for making a determinations as to listing these color additives under section 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 376) (the act). This action was part of the agency's publicly stated commitment, published in the Federal Register of January 5, 1976 (41 FR 754), to make final determination about the permanent listing of the provisionally listed colors and to take steps to resolve the status of each of the provisionally listed color additives. Since February 4, 1977, final action has been taken on 24 provisionally listed color additives.

In April 1980, FDA received three citizen petitions from the Cosmetic, Toiletry, and Fragrance Association, Inc. (CTFA), 1133 15th St. NW., Washington, DC 20005, the Pharmaceutical Manufacturers Association, Inc. (PMA), 1155 15th St. NW., Washington, DC 20004, and the Certified Color Manufacturers Association, Inc. (CCMA), 900 17th St. NW., Washington, DC 20006, requesting the Commissioner to amend §§ 81.1 and 81.27 (21 CFR 81.1 and 81.27) to postpone the closing dates for the provisional listing of 23 color additives for which they have submitted color additive petitions requesting permanent listing. These petitions requested postponements in order that ongoing chronic feeding studies can be completed on each additive.

The February 4, 1977 Federal Register announcement required the initiation of these chronic feeding studies for the 23 color additives because earlier chronic studies in the 1950's and 1960's on those colors were not considered adequate to conclusively determine their safety when judged by contemporary scientific standards (see 42 FR 6392; February 4, 1977). However, due to unavoidable and unforeseen delays occurring in the conduct of these chronic feeding studies, the petitioners sought the instant postponements.

In response to the CTFA, PMA, and CCMA citizen petitions, the agency in the Federal Register of November 14, 1980 (45 FR 75228) proposed to postpone the closing dates for the 23 provisionally listed color additives under test beyond January 31, 1981, the closing date established in the regulation published on February 4, 1977. In the preamble of the November 14, 1980 proposal, the agency set forth its views on why, under the peculiar circumstances surrounding the ongoing chronic feeding studies, such postponements were reasonable, necessary, and consistent with its statutory mandate of carrying to completion as soon as reasonably practicable the safety determinations for the additives at issue. The specific bases for the postponements set forth in that notice will not be repeated herein, except to the extent necessary to respond to the three comments submitted in response to it.

Although the agency had decided to postpone the closing date for these colors before it expired, FDA did not publish and make effective the final rule before President Reagan signed his Executive Memorandum of January 29, 1981, which directed agencies to postpone for 60 days all pending regulations, with certain exemptions inapplicable to postponements of closing dates for provisionally listed colors. Therefore, the provisional listing of these colors lapsed. However, because the agency fully intended to extend the provisional list at the first opportunity, on February 2, 1981, the agency notified the three trade associations that had petitioned the agency for an extension of the provisional listing of the 23 color additives that it intended to extend the list, and that it would not take any regulatory action against the provisionally listed color additives during the period the list was technically not in effect. The Office of Management and Budget has now granted FDA an exemption to publish these regulations, even though the 60-day period has not expired.

FDA believes that it is appropriate and consistent with Congress's intent in enacting the Color Additive Amendments of 1960 to extend the provisional listing of these color additives at this time. Section 203(a)(1) of Title II of Pub. L. 86-618 states:

> The purpose of this section is to make possible, on an interim basis for a reasonable period through provisional listings, the use of commercially established color additives to the extent consistent with the public health, pending the completion of the scientific investigations needed as a basis for making determinations as to listing of such additives under the basic Act [the Federal Food, Drug, and Cosmetic Act] as amended by this Act.

As explained below, FDA has given individual consideration to each color additive and has found no public health reason that requires the immediate cessation of use of any of the colors. The scientific investigations that will provide the basis for a final determination on the safety of these color additives have not been unreasonably prolonged. Therefore, the fact that the agency was prevented from extending the closing date for the provisional list in a timely manner because that closing date, established over 3 years ago, happened to coincide with a Presidential directive not to issue new regulations, provides no basis for not continuing to make these color additives available. FDA has determined that these colors should remain provisionally listed until the agency has had an opportunity to make an appropriate determination about their listing under section 706 of the act (21 U.S.C. 376).

The November 14, 1980 proposal generated the submission of two supportive comments from trade associations and one comment from a citizens group which challenges FDA's legal authority to postpone the closing date of the provisional list for the 23 color additives. These comments and FDA's responses are summarized below.

1. One comment from a trade association agreed with FDA's account in the November 14, 1980, preamble to the proposed postponements concerning the petitioners' good faith efforts to comply with the original timetable for completing the ongoing chronic toxicological studies on the 23 color additives. The association also agreed with each conclusion in the preamble concerning the justification for the postponements and that the postponement of deadlines is consistent with the protection of the public health. This comment further endorsed the proposed staggered extension schedule because it would allow both the agency and the testing laboratories flexibility in allocating their available resources more efficiently to prepare and review the final study reports. In conclusion, the association agreed that the requested postponements are consistent with FDA's "statutory 'objective of carrying to completion in good faith, as soon as

reasonably practicable, the scientific investigations necessary for making a determination as to listing' the 23 color additives. 21 U.S.C. 376, note." The other trade association reiterated the conclusion made by the first association that the proposed postponements were consistent with FDA's statutory responsibilities under the transitional provisions of the Color Additive Amendments of 1960.

2. The comment from the citizen's group, while alleging that the agency does not possess the authority to make the proposed postponements, did not make a per se challenge to FDA's statutory authority to extend the color additive provisional list. Rather, this comment implied that there exists no rational nexus between the facts found to be underlying the proposed postponements and the choices made by FDA. The comment asserted that FDA had failed to show that any "extraordinary circumstances" exist for granting the proposed extensions. Thus, the comment suggested that FDA would be acting in an arbitrary and capricious manner if it promulgated the proposed postponements. In addition, the comment attempted to bolster its primary legal argument by citing a "Stipulation" between FDA and the Health Research Group (HRG), which was entered into after a district court found that FDA had the authority to postpone the provisional list to allow for the performance of "new" animal feeding studies. See *Health Research Group* v. *Califano*, Civ. No. 77-293 (D.D.C. 1977). In that stipulation the agency agreed that any further postponement of the closing dates would be made on consideration of each color additive individually. The comment concluded that the proposed postponements are "generic" and based upon "general considerations". Thus, the comment contended that the proposed postponements violate the stipulation. For the reasons set forth below the agency rejects this entire comment.

FDA possesses broad discretion in granting postponements of the provisional listing for color additives. An examination of the legislative history, the statute, and the case law supports this conclusion.

In vesting FDA with the authority to administer the transitional provisions of the Color Additive Amendments, Congress did not impose a rigid formula on the manner in which the agency must apply its expertise to the development and evaluation of safety data on provisionally listed color additives. The House of Representatives' report on the transitional provisions does not express any intent to constrict the agency's discretionary authority to postpone the provisional list for color additives. It clearly indicated that provisional listings are to be used "pending the development of the scientific data required for a definitive determination as to the listing of those colors under the permanent provisions of the bill." H.R. Rep. No. 1761, 86th Cong., 2d Sess. 10 (1960). Here, the completion of the ongoing chronic-feeding studies are necessary, so that definitive safety determinations can be made based upon the most current and accurate scientific data.

The statute itself also provides for the exercise of judgmental and discretionary functions:

> The [Commissioner] may by regulation * * * from time to time postpone the original closing date with respect to a provisional listing * * * for such period or periods as he finds necessary to carry out the purpose of this section, if in the [Commissioner's] judgment such action is consistent with the objective of carrying to completion in good faith, as soon as reasonably practicable, the scientific investigations necessary for making a determination as to listing such additive * * *.

Section 203(a)(2) of Color Additive Amendments of 1960.

The case law confirms the broad discretionary powers vested in FDA in making judgments on whether to postpone a color additive provisional listing. In *Health Research Group* v. *Califano, supra*, the court found that the agency possessed the authority to extend the provisional list not only in cases where the studies are ongoing, as here, but also possesses the authority to extend such listing when new studies are required:

> It is clear, then, that the Color Additive Amendments of 1960 do not limit the Commissioner's authority to extend provisional listings only in cases where it is necessary to complete ongoing tests. Rather, the Commissioner has discretion to postpone the closing dates of provisional listings so long as the postponements are consistent with his statutory mandate to protect the public health.

Id. at 4. See also *Certified Color Manufacturers Ass'n* v. *Mathews*, 543 F. 2d 284, 294 (D.C. Cir. 1976).

Thus, it is clear from the legislative history, the statute, and the case law that if reasonable grounds exist, the extension of the provisional list for the purpose of completing the ongoing chronic feeding studies for the 23 color additives is, as a matter of law, proper.

However, the comment further contended that the proposed postponements violate FDA's own announced standards for evaluating all further requests for provisional list extensions; namely, the existence of "unavoidable, unforeseen, and extraordinary circumstances." (See 42 FR 6908; Feb. 4, 1977). Therefore, the comment implied that no reasonable grounds exist for the proposed postponements.[1] The agency disagrees.

The November 14, 1980 proposal identified several unanticipated and unavoidable delays surrounding the conduct of the current chronic feeding studies, which lead the agency to conclude, in its considered judgment, that "extraordinary circumstances" exist and warrant extension of the closing date for the 23 color additives. Those unforeseen and unavoidable circumstances are as follows:

1. FDA needed additional time to approve the protocols and dosage levels.

2. FDA changed the high-dose levels after the studies were initiated, necessitating the addition of another dose level to some studies.

3. There were laboratory delays in preparing the test protocols and final reports.

4. There were shortages of some color additives midway through the testing program.

Because of the novel protocols involved in these studies, one source of unexpected delay was the lack of historical data to assist the petitioners and FDA toxicologists in accurately predetermining the dose levels that should be fed to the test animals, including *in utero* exposure. The stringent timetable forced the petitioners to begin the chronic feeding studies before FDA had approved the dose levels to be fed. FDA later disagreed with the choice of dose levels involving 13 of the color additives. The petitioners and FDA agreed at that time that an additional higher dose level with a concurrent control group would be initiated for each of the color additives involved as soon as possible. In each case, however, the data on the first three dose levels were to be submitted to FDA by August 4, 1980. FDA would then evaluate the data on the three dose levels submitted to determine whether provisional listing should continue until the final report containing the data on the fourth and highest dose was submitted.

---

[1] The comment does not contravene by the submission of data or other evidence any of the factual circumstances set forth in the November 14, 1980, proposal. Rather, it only makes broad conclusory suggestions that such circumstances may not exist. Thus, the factual findings which, in the agency's opinion, constitute "unavoidable, unforeseen, and extraordinary circumstances," stand uncontroverted.

Unavoidable delays were also caused by the shortage of adequate animal testing laboratories and, especially, trained pathologists in this country and abroad at a time when Congress and many Federal agencies are requiring more and more animal safety testing. This shortage has caused large work backlogs in these laboratories. In addition, the implementation of FDA's Good Laboratory Practice regulations in Part 58 (21 CFR Part 58) has increased this backlog by decreasing the number of acceptable testing facilities. These unavoidable occurrences lead the agency to conclude that "extraordinary circumstances" exist, and that the postponement of the provisional list is reasonable.

It must be pointed out that it was not known by FDA at the beginning of these safety studies that these circumstances would occur and necessitate postponing the closing dates. Once these delays occurred they first had to be overcome, so that FDA would be able to make the safety determinations based upon the best available data. Thus, this action is consistent with the overriding objective of Congress in enacting the transitional provisions of Color Additive Amendments.

The final aspect of this comment concerned the FDA/HRG stipulation, which states that FDA must grant further extensions of the provisional list only on an individual basis. Consideration of each individual color additive by FDA has occurred here. The closing dates, as listed in the November 14, 1980 proposal were individually evaluated before proposing these varying dates, including consideration of the original starting date for the study, the need to add additional dosage groups to the study, the difficulties that have occurred in the conduct of specific studies, and the unavailability of pathologists. FDA has also concluded that varying the closing dates is necessary because of the current status of each chronic feeding study, and because a staggered system is better suited to the needs of the testing laboratories.

The agency has established a closing date for each color additive that is 1 year after the date of the final report is due from the petitioner. The agency has established this 1-year period to ensure that there is sufficient time for it to complete its evaluation of the data and for it to take final action on the petition. The agency will endeavor to act on petitions as quickly as possible, however, and if the agency is able to take final action on a petition before its closing date, FDA will exercise its authority under section 223(a)(2) of Title II of Pub. L. 86-618 and terminate the extension of the closing date at that time.

The staggered final report dates would also allow the four animal testing laboratories sufficient time, considering their available resources, to evaluate and prepare final reports. The agency will be required to review the histopathological slides from these studies, in addition to the related study reports, in order to make its safety determinations. After review of these data, FDA must issue final decisions as to whether these color additives will be listed under section 706 of the act.

In addition to the foregoing, and as also agreed to in the FDA/HRG stipulation, FDA continues to advise HRG when copies of petitioners' progress reports on individual color additive studies are submitted to the agency, when FDA evaluates and makes reports on each of the progress reports, and when applications for extension of the January 31, 1981, closing date for any of the provisionally listed color additives are received.

Progress reports on color additives, FDA's evaluation of those reports, and applications for extensions of the closing date are also placed on file with FDA's Dockets Management Branch for public review. The agency has received no objections or comments stating that the evaluations on the progress reports indicate that a public health problem exists. Indeed, the agency concludes that its review of progress reports on each color under test demonstrates that there continues to be no public health or safety concerns with any of the 23 color additives. Thus, extension of the provisional list is consistent with FDA's statutory mandate to protect the public health.

Having evaluated the comments, the agency concludes that the extension of the closing dates for provisionally listed color additives in §§ 81.1 and 81.27 (21 CFR 81.1 and 81.27) is reasonable and in the public interest.

The agency notes that this document does not extend the provisional listing for D&C Orange No. 10, D&C Orange No. 11, D&C Green No. 6, and caramel. Elsewhere in this issue of the Federal Register, the provisional listings for these color additives are being extended. With respect to the color additive caramel, this document deletes the requirement for a lifetime mouse skin-painting study to make that listing consistent with the decision on caramel contained elsewhere in this edition of the Federal Register. In addition, this document adds the restriction of "External use only" for D&C Green No. 6 in accordance with the agency's decision found elsewhere in this issue of the Federal Register.

Therefore, under the transitional provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86-618, 74 Stat. 404-407 (21 U.S.C. 376, note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 81 of Subchapter A of Title 21 of the Code of Federal Regulations is amended as follows:

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

1. In § 81.1 the tables in paragraphs (a), (b), and (c) are revised to read as follows:

§ 81.1 Provisional lists of color additives.

BILLING CODE 4110-03-M

21 CFR Part 81

[Docket No. 78N-0386]

Extension of Closing Dates for Provisional Listings; D&C Orange No. 10, D&C Orange No. 11, D&C Green No. 6, and Caramel

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is extending for 90 days from the date of publication of this document the closing dates for the provisional listings of D&C Orange No. 10 and D&C Orange No. 11 for use as color additives in externally applied drugs and cosmetics. This order will permit the continued use of these color additives until the new closing dates. The new closing date for D&C Orange No. 10 and D&C Orange No. 11 is being established to provide time for completing final action on the petitions for the listing of these color additives for use in externally applied drugs and cosmetics. The agency is also extending for 120 days from the date of publication of this document the closing dates for the provisional listings of D&C Green No. 6 and caramel. The brief extension for D&C Green No. 6 will provide time for FDA to issue a final decision either to approve or to deny the petition for permanent listing of this color additive. The 120-day extension of the closing date for caramel will provide the agency with a brief period that is necessary to complete final action on the petition for caramel as a color additive for general use in cosmetics.

DATES: Effective March 27, 1981, the new closing date for D&C Orange No. 10 and D&C Orange No. 11 will be June 25, 1981, the new closing date for D&C Green No. 6 and caramel will be July 27, 1981.

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: These regulations extend the provisional listings of D&C Orange No. 10, D&C Orange No. 11, D&C Green No. 6, and caramel. The closing date for the provisional listing of these color

additives was January 31, 1981. That date was established by regulations published in the Federal Register of February 4, 1977 (42 FR 8992).

Although the agency had decided to postpone the closing date for these colors before it expired, FDA did not publish and make effective this final rule before President Reagan signed his Executive Memorandum of January 29, 1981, which directed agencies to postpone for 60 days all pending regulations, with certain exemptions inapplicable to postponements of closing dates for provisionally listed colors. Therefore, the provisional listing of these colors lapsed. However, because the agency fully intended to extend the provisional list at the first opportunity, on February 2, 1981, the agency notified the three trade associations that had petitioned the agency for an extension of the provisional listing of 23 color additives that it intended to extend the list, and that it would not take any regulatory action against the provisionally listed color additives during the period the list was technically not in effect. The Office of Management and Budget has now granted FDA an exemption to publish these regulations, even though the 60-day period has not expired.

FDA believes that it is appropriate and consistent with Congress' intent in enacting the Color Additive Amendments of 1960 to extend the provisional listing of D&C Orange No. 10, D&C Orange No. 11, D&C Green No. 6, and caramel at this time. Section 203(a)(1) of Title II of Pub. L. 86-618 states:

> The purpose of this section is to make possible, on an interim basis for a reasonable period through provisional listings, the use of commercially established color additives to the extent consistent with the public health, pending the completion of the scientific investigations needed as a basis for making determinations as to listing of such additives under the basic Act [the Federal Food, Drug, and Cosmetic Act] as amended by this Act.

FDA has given individual consideration to each of these color additives and has found no public health reason that requires the immediate cessation of use of any of the colors. The agency is prepared to take final action on each of these color additives within a short period of time. Therefore, the fact that the agency was prevented from extending the closing date for the provisional list in a timely manner because that closing date, established over three years ago, happened to coincide with a Presidential directive not to issue new regulations, provides no basis for not continuing to make these color additives available. FDA has determined that these colors should remain provisionally listed until the agency has made an appropriate determination about their listing under section 706 of the Act (21 U.S.C. 376).

The regulations set forth below will establish a new closing date for the provisional listings of D&C Orange No. 10 and D&C Orange No. 11 of June 25, 1981, and will extend the closing date for the provisional listings of D&C Green No. 6 and caramel to July 27, 1981.

The extension of the closing dates for D&C Orange No. 10 and D&C Orange No. 11 to June 25, 1981 will provide a brief period within which the agency can complete the procedural requirements in taking final action concerning the petition for the permanent listings of these color additives for use in externally applied drugs and cosmetics. This extension is also necessary to accommodate the 30-day objection period and the evaluation of any objections that may be received in response to a final regulation.

The January 31, 1981 closing date for D&C Green No. 6 was conditioned upon the petitioner, the Cosmetic, Toiletry, and Fragrance Association, Inc. (CTFA), 1133 15th St., NW., Washington, DC 20005, undertaking and successfully completing chronic feeding studies. These studies were required to support all uses of D&C Green No. 6 involving ingestion of the color.

In a letter dated August 21, 1978, the petitioner advised FDA that, for business reasons only, CTFA would not initiate the chronic feeding studies required under 21 CFR 81.27(d) for permanent listing of D&C Green No. 6 for uses subject to ingestion and requested the agency to discontinue consideration of such uses. In the absence of appropriate data from chronic feeding studies, the agency intended to permit the provisional listing of D&C Green No. 6 for all uses involving ingestion of the color to expire on January 31, 1981. By this notice, FDA hereby removes all ingested uses of D&C Green No. 6 from the provisional list.

However, the petition for permanent listing of this color additive also includes external uses, and FDA has been unable to complete its review and evaluation of the data relevant to these uses. Therefore, FDA has concluded that a short extension is necessary to complete procedural requirements and to publish the required Federal Register documents outlining the final decision by FDA regarding the petition for D&C Green No. 6 for use as a color additive. Therefore, the regulation set forth below will extend the closing date for the provisional listing of D&C Green No. 6 to July 27, 1981.

The agency is also postponing the closing date for the provisional listing of caramel as a color additive for use in cosmetics until July 27, 1981. The brief postponement will provide the agency with an additional period within which to receive comments on the petition and to publish a final order in the Federal Register regarding its decision on whether to approve the color additive petition for it.

The agency concludes that these brief extensions of the closing date for the four color additives are necessary and that no harm to the public health will result.

Because of the need for these regulations to take effect immediately, under 5 U.S.C. 553(b)(B), FDA has concluded that notice and public procedure on these regulations are impracticable, and that good cause exists for issuing this extension as a final rule. This regulation, to be effective on March 27, 1981, will permit the uninterrupted use of the color additives until further action is taken.

In accordance with 5 U.S.C. 553(d)(1) and (3), this regulation is being made effective on March 27, 1981.

Therefore, under the Transitional Provisions of the Color Additive Amendments of 1960 to the Federal Food, Drug, and Cosmetic Act (Title II, Pub. L. 86-618, sec. 203, 74 Stat. 404-407 (21 U.S.C. 376 note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 81 is amended in § 81.1 *Provisional lists of color additives,* by revising the closing date for "D&C Orange No. 10" and "D&C Orange No. 11" in paragraph (b) to read June 25, 1981, and by revising the closing date and adding a restriction for "D&C Green No. 6" in paragraph (b) to read "July 27, 1981, External use only" and by revising the closing date for "Caramel" in paragraph (g) to read "July 27, 1981."

Effective date. This regulation is effective March 27, 1981.

(Sec. 203, 74 Stat. 404-407 (21 U.S.C. 376, note))

Dated: March 24, 1981.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

---

21 CFR Parts 510 and 520

Animal Drugs, Feeds, and Related Products; Phenylbutazone Granules

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) amends the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Sterivet Laboratories, Inc., providing for use of phenylbutazone granules for relief of inflammatory conditions associated with the musculoskeletel system of horses, to add Sterivet Laboratories to the list of sponsors of approved NADA's, and to present conclusions of an NAS/NRC evaluation of the product.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Sandra K. Woods, Bureau of Veterinary Medicine (HFV–114), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: Sterivet Laboratories, Inc., 20102 Progress Dr., Strongsville, OH 44136, filed an NADA (113–510) providing for use of a packet containing 1 gram of phenylbutazone in granules for treatment of horses for inflammatory conditions associated with the musculoskeletal system.

This application concerns a product which is similar to those which were the subject of a National Academy of Sciences/National Research Council (NAS/NRC) evaluation published in the **Federal Register** of August 12, 1970 (35 FR 12790). The product was approved based on bio-equivalence to the NAS/NRC reviewed product. The NAS/NRC review concerned several phenylbutazone products marketed by Jensen-Salsbery Laboratories. The report concluded and FDA concurred that these products are probably effective as a nonhormonal anti-inflammatory agent for use in horses and dogs but noted that the labeling implied certain effects which were not supported by documentation, that controlled experiments did not appear to have been performed in dogs or horses, that disintegration information is needed, and that directions for use need revision. In addition, FDA required the labeling to include the veterinary prescription legend.

In response to the NAS/NRC evaluation, Jensen-Salsbery Laboratories submitted supplemental NADA's which brought their products into compliance with the conclusions of the evaluation. The approvals were codified by publication in the **Federal Register** of May 26, 1972 (37 FR 10662). That publication failed to designate those conditions of use which reflect the conclusions of the NAS/NRC evaluation. This document amends the current regulation for use of phenylbutazone granules for horses to indicate those portions which comply with the NAS/NRC review, and that submission of applications for similar products reflecting the same conditions of use need not include certain data and information required by § 514.111 (21 CFR 514.111), but may require bioequivalency and safety information.

In addition, the sponsor has not previously been included in the regulations under the list of approved sponsors (21 CFR 510.600(c)). The regulations are amended to reflect this approval and to add this sponsor to the list of sponsors of approved NADA's.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessement nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Parts 510 and 520 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. In Part 510, § 510.600 is amended by adding a new sponsor alphabetically to paragraph (c)(1) and numerically to paragraph (c)(2) to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code
* * * * *	
Sterivet Laboratories, Inc., 20102 Progress Dr., Strongsville, OH 44136	047406
* * * * *	

(2) * * *

Drug labeler code	Firm name and address
* * * * *	
047406	Sterivet Laboratories, Inc., 20102 Progress Dr., Strongsville, OH 44136.
* * * * *	

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

2. In Part 520, § 520.1720b is revised to read as follows:

§ 520.1720b Phenylbutazone granules.

(a) *Specifications.* The drug is in granular form. It is packaged to contain either 8 grams of phenylbutazone per package or 1 gram of phenylbutazone per package.

(b) *Sponsor.* See 017220 in § 510.600(c) for 8-gram package, see 047406 for 1-gram package.

(c) *NAS/NRC status.* The conditions of use have been NAS/NRC reviewed and found effective. NADA's for approval of drugs for these conditions of use need not include effectiveness data specified by § 514.111 of this chapter, but may require bioequivalency and safety information.

(d) *Conditions of use.* (1) *Horses.* (i) *Amount.* 1 or 2 grams per 500 pounds of body weight, not to exceed 4 grams, daily, as required.

(ii) *Indications.* For the treatment of inflammatory conditions associated with the musculoskeletal system.

(iii) *Limitations.* Administer orally by adding to a portion of the usual grain ration. Use a relatively high dose for the first 48 hours, then gradually reduce to a maintenance level of the lowest level capable of producing the desired clinical response. Treated animals should not be slaughtered for food use. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

(2) [Reserved]

Effective date. This regulation is effective March 27, 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: February 6, 1981.

Robert A. Baldwin,

Associate Director for Scientific Evaluation.

[FR Doc. 81-9239 Filed 3-26-81; 8:45 am]

BILLING CODE 4110-03-M

21 CFR Parts 510 and 520

Animal Drugs, Feeds, and Related Products; Dichlorophene and Toluene Capsules

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by K. C. Pharmacal, Inc., providing for safe and effective use of dichlorophene-toluene capsules for treating dogs and cats for certain helminth infections, and to add K. C. Pharmacal to the list of approved NADA sponsors.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Bob G. Griffith, Bureau of Veterinary Medicine (HFV-112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3430.

SUPPLEMENTARY INFORMATION: K. C. Pharmacal, Inc., 1310 Atlantic, P.O. Box 7496, North Kansas City, MO 64116, filed an NADA (120-671) providing for use of dichlorophene and toluene capsules for treating dogs and cats for infections of certain ascarids, hookworms, and tapeworms. This product is the generic equivalent of a product that was the subject of a National Academy of Sciences/National Research Council (NAS/NRC), Drug Efficacy Study Group evaluation published in the Federal Register of February 1, 1969 (34 FR 1613) and reflected in § 520.580 (21 CFR 520.580). Approval of K. C. Pharmacal's product does not require submission of data to demonstrate bioequivalency because it is manufactured by the firm currently manufacturing the NAS/NRC-reviewed product. In addition, K. C. Pharmacal, Inc., was not included in the list of sponsors of approved applications found in § 510.600(c) (21 CFR 510.600(c)). The regulations are amended to include this sponsor and their approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of the safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Director, Bureau of Veterinary Medicine, has carefully considered the potential environmental impact of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement therefore will not be prepared. The Director's finding of no significant impact and the evidence supporting this finding, contained in a statement of exemption (pursuant to 21 CFR 25.1(f)(1)(ii)(*a*) and (g)(2)) may be seen in the Dockets Management Branch (HFA-305), address above.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), under the authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Parts 510 and 520 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. In Part 510, § 510.600 is amended by adding a new sponsor alphabetically to paragraph (c)(1) and numerically to paragraph (c)(2), to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm Name and Address and Drug Labeler Code

* * * * *

K. C. Pharmacal, Inc., 1310 Atlantic, P.O. Box 7496, North Kansas City, MO 64116; 038782

* * * * *

(2) * * *

Drug Labeler Code and Firm Name and Address

* * * * *

038782 K. C. Pharmacal, Inc., 1310 Atlantic, P.O. Box 7496, North Kansas City, MO 64116

* * * * *

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

2. In Part 520, § 520.580 is amended by revising paragraph (b)(2), to read as follows:

§ 520.580 Dichlorophene and toluene capsules.

* * * * *

(b) * * *

(2) For single and multiple dose, see 000124, 000859, 011716, and 038782 in § 510.600(c) of this chapter.

* * * * *

Effective date. This regulation is effective March 27, 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: February 11, 1981.

Gerald B. Guest,

Acting Director, Bureau of Veterinary Medicine.

[FR Doc. 81-9247 Filed 3-26-81; 8:45 am]

BILLING CODE 4110-03-M

21 CFR Parts 510 and 522

Animal Drugs, Feeds, and Related Products; Promazine Hydrochloride Injection

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) amends the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Anthony Products Co. providing for safe and effective use of promazine hydrochloride injection for horses as a tranquilizer and preanesthetic, and to amend the list of approved sponsors to reflect the new firm address.

EFFECTIVE DATE: March 27, 2981.

FOR FURTHER INFORMATION CONTACT: Sandra K. Woods, Bureau of Veterinary Medicine (HFV-114), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3420.

SUPPLEMENTARY INFORMATION: Anthony Products Co., 5600 Peck Rd., Arcadia, CA 91006, filed an NADA (119-141) providing for safe and effective intravenous use of a 50 milligram per milliliter promazine hydrochloride injection as a tranquilizer and preanesthetic for the treatment of horses. The drug is one of several phenothiazine tranquilizers that were subject to a National Academy of Sciences/National Research Council (NAS/NRC) report published in the Federal Register of November 18, 1969 (DESI 10782V, 34 FR 18304). The review concluded that certain phenothiazines are probably effective for veterinary use as tranquilizers, but dosage levels should be documented and adjusted to ranges shown to be conclusively effective for veterinary use and certain precautionary statements be added to the labeling. FDA concurred with the NAS/NRC conclusion, and recommended an additional warning statement concerning use with

organophosphates and a veterinary prescription statement. In response to the NAS/NRC review, two firms submitted supplemental NADA's which brought their applications into compliance with the conclusions of the review. The regulations in 21 CFR 522.1962 were amended to reflect the conditions of approval of these supplemental NADA's. The regulations were subsequently amended to indicate those conditions of use which were NAS/NRC reviewed and found effective and that applications for those uses need not include certain types of effectiveness data as specified in § 514.111(a)(5)(ii) (21 CFR 514.111(a)(5)(ii)), but may require bioequivalency and safety information.

The product is a solution for intravenous use in horses. Being a true solution for intravenous use, bioequivalency data are not required.

Based on the information provided in the NADA, the application is approved and the regulations are amended to reflect this approval. In addition, the regulation in § 510.600(c) (21 CFR 510.600(c)) is amended to reflect the sponsor's change of address.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined pursuant to 21 CFR 25.24 (d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Parts 510 and 520 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. In Part 510, § 510.600 is amended by revising the sponsor name and address for "Anthony Veterinary Products" in paragraph (c)(1) and for 000864 in paragraph (c)(2) to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c)* * *

(1)* * *

Firm name and address	Drug labeler code
* * * * *	
Anthony Products Co., 5800 Peck Rd., Arcadia, CA 91006	000864
* * * * *	

(2)* * *

Drug labeler code	Firm name and address
* * * * *	
000864	Anthony Products Co., 5800 Peck Rd., Arcadia, CA 91006.
* * * * *	

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

2. In Part 522, § 522.1962 is revised to read as follows:

§ 522.1962 Promazine hydrochloride injection.

(a) *Specifications.* Each milliliter of sterile aqueous solution contains 50 milligrams of promazine hydrochloride.

(b) *Sponsor.* In § 510.600(c) of this chapter, see No. 000006 for conditions of use as in paragraph (c)(1)(i) of this section; see No. 000856 for conditions of use as in paragraph (c)(1)(ii) of this section; see No. 000864 for conditions of use as in paragraph (c)(1)(iii) of this section.

(c) *Conditions of use.* (1)(i) To horses either intramuscularly or intravenously at a dosage of 0.2 to 0.5 milligram per pound of body weight, and to dogs and cats 1 to 3 milligrams per pound of body weight, every 4 to 6 hours as a tranquilizer or preanesthetic.[1]

(ii) To horses either intramuscularly or intravenously at a dosage of 0.2 to 0.5 milligram per pound of body weight, and to dogs and cats at 1 to 2 milligrams per pound of body weight, every 4 to 6 hours as a tranquilizer, preanesthetic, for minor operative procedures in conjunction with local anesthesia, as adjunctive therapy for tetanus, and as an antiemetic in dogs and cats prior to worming, or to prevent motion sickness in dogs.[1]

(iii) To horses intravenously at a dosage of 0.2 to 0.5 milligram per pound of body weight, as a tranquilizer and preanesthetic, as required.[1]

(2) Not for use in conjunction with organophosphates because their toxicity may be potentiated, nor with procaine hydrochloride as its activity may be increased.[1]

(3) Not for use in horses intended for food.[1]

(4) Federal law restricts this drug to use by or on the order of a licensed veterinarian.[1]

Effective date. This amendment shall be effective March 27, 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: February 20, 1981.

Gerald B. Guest,

Acting Director, Bureau of Veterinary Medicine.

[FR Doc. 81-9248 Filed 3-26-81; 8:45 am]

BILLING CODE 4110-03-M

[1] These conditions are NAS/NRC reviewed and found effective. Applications for these uses need not include effectiveness data as specified in § 514.111 but may require bioequivalency and safety information.

---

21 CFR Part 520

Animal Drugs, Feeds, and Related Products; Thiabendazole, Piperazine Phosphate

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) amends the animal drug regulations to codify two previously approved new animal drug applications (NADA's) providing for safe and effective use of equine anthelmintics. The NADA's are held by Merck Sharp & Dohme Research Labs.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Sandra K. Woods, Bureau of Veterinary Medicine (HFV-114), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3420.

SUPPLEMENTARY INFORMATION: Merck Sharp & Dohme Research Labs., Division of Merck & Co., Inc., Rahway, NJ 07065 is sponsor of NADA 37-410 providing for use of thiabendazole/piperazine phosphate powder for treating horses for infections of large and small strongyles, pinworms, threadworms, and ascarids.

The firm's application was originally approved by letter of January 10, 1968.

Merck is also sponsor of NADA 39-436 providing for use of thiabendazole/piperazine phosphate granules for treating weanling foals over 4 months of age for the same infections as NADA 37-410. The application was originally approved by letter of February 6, 1969.

Approval at those times were not routinely codified by publication in the Federal Register. This action codifies the two previously approved NADA's but does not change the approved uses of the drugs. Under the Bureau of Veterinary Medicine's supplemental approval policy (42 FR 64367; December 23, 1977), this action, codification of previously approved NADA's, does not require reevaluation of the drugs' safety and effectiveness. Because the applications were approved before July 1, 1975, the sponsor has not been required to submit summaries of safety and effectiveness data and information under the freedom of information provisions of the animal drug regulations (§ 514.11(e)(2) (21 CFR 514.11(e)(2))).

The Bureau of Veterinary Medicine has determined pursuant to proposed 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 520 is amended by adding new § 520.2360f to read as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 520.2360f Thiabendazole, piperazine phosphate.

(a) *Specifications.* As a water dispersible powder containing 6.67 grams of thiabendazole and 8.33 grams of piperazine (as piperazine phosphate) per ounce for horses; as granules containing 3.0 grams of thiabendazole and 3.75 grams of piperazine (as piperazine phosphate) per ounce for weanling foals over 4 months of age.

(b) *Sponsor.* See No. 000006 in § 510.600(c) of this chapter.

(c) *Conditions of Use—Horses and weanling foals (over 4 months of age)*—(1) *Amount.* 2 grams of thiabendazole and 2.5 grams of piperazine per 100 pounds of body weight (horses—0.3 ounce of powder; foals—0.67 ounce of granules).

(2) *Indications for Use.* Treatment of infections of large strongyles (genus *Strongylus),* small strongyles (genera *Cyathostomum, Cylicobrachytus,* and related genera *Craterostomum, Oesophagodontus, Poteriostomum),* pin worms (*Oxyuris),* threadworms (*Strongyloides),* and ascarids *(Parascaris).*

(3) *Limitations.* (i) *Horses.* As a water dispersible powder. Use a single oral dose. Administer as a drench or by stomach tube suspended in 1 pint of warm water; by dose syringe suspended in ½ ounce of water for each 100 pounds of body weight; or sprinkled over a small amount of daily feed. Not for animals intended for food use. If the label bears directions for administration by stomach tube or drench, it shall also bear the statement "Caution: Federal law restricts this drug to use by or on the order of a licensed veterinarian"; if not labeled for use by stomach tube or drench, the label shall bear the statement, "Consult your veterinarian for assistance in the diagnosis, treatment, and control of parasitism".

(ii) *Weanling foals (over 4 months of age).* As granules. Use a single oral dose. Sprinkle over the usual grain ration, or mix in a few ounces of warm water and administer by dose syringe. Not for animals intended for food use. Consult your veterinarian for assistance in the diagnosis, treatment, and control of parasitism.

Effective date. March 27, 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: March 12, 1981.

Robert A. Baldwin,

Associate Director for Scientific Evaluation.

21 CFR Part 520

Animal Drugs, Feeds, and Related Products; Monensin Blocks

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the new animal drug regulations for monensin blocks. In a document reflecting approval of a monensin block, the product was inadvertently designated as a monensin feed block. This amendment corrects the product designation.

EFFECTIVE DATE: December 12, 1980.

FOR FURTHER INFORMATION CONTACT: David N. Scarr, Bureau of Veterinary Medicine (HFV-214), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3183.

SUPPLEMENTARY INFORMATION: In the Federal Register of December 12, 1980 (45 FR 81736), FDA published a document reflecting approval of a new animal drug application (NADA 109-471) for use of monensin in a molasses-mineral medicated block. The product was designated as a monensin feed block. In § 510.455(a) (21 CFR 510.455(a)), "medicated blocks" are defined as agglomerated feed containing one or more drugs. To be consistent with this definition, the name of the monensin product is revised to read "monensin block".

The agency has determined pursuant to 21 CFR 25.24(d)(1) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 520 is amended in § 520.1448 by revising the section heading, and paragraph (a), and amending the first sentence in paragraph (d)(3) to read as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 520.1448 Monensin blocks.

(a) *Specifications.* Each pound of molasses-mineral block contains 400 milligrams of monensin (0.088 percent) as monensin sodium.

* * * * *

(d) * * *

(3) *Limitations.* Block to be fed free choice to pasture cattle (slaughter, stocker, and feeder) weighing more than 400 pounds. * * *

Effective date. December 12, 1980.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: February 20, 1981.

Gerald B. Guest,

Acting Director, Bureau of Veterinary Medicine.

BILLING CODE 4110-03-M

---

21 CFR Part 522

Animal Drugs, Feeds, and Related Products; Methocarbamol Injection

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) amended the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) for methocarbamol injection providing for deleting sodium bisulfite as an ingredient and revising the pH specification. The amendment failed to provide for the pH revision. This document revises the pH statement.

EFFECTIVE DATE: December 2, 1980.

FOR FURTHER INFORMATION CONTACT: Bob G. Griffith, Bureau of Veterinary Medicine (HFB-112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3430.

SUPPLEMENTARY INFORMATION: A. H. Robins Co., Inc., 1211 Sherwood Ave., Richmond, VA 23220, filed a supplemental NADA (38-838) providing that methocarbamol injection will no longer contain sodium bisulfite and will have a pH specification of pH 3.5 to 6.0. A document reflecting the approval was published in the **Federal Register** of December 2, 1980 (45 FR 79757). The document amended the regulations to reflect the deletion of sodium bisulfite and to reflect current format, but did not amend the specifications to reflect the revised pH of 3.5 to 6.0. This document amends the regulations to reflect the amended pH.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

§ 522.1380 [Amended]

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), § 522.1380 *Methocarbamol injection* is amended in paragraph (a) *Specifications* by removing "5.2 to 5.6" and inserting in its place "3.5 to 6.0".

Effective date: December 2, 1980.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: March 23, 1981.

Robert A. Baldwin,

Associate Director for Scientific Evaluation.

[FR Doc. 81-9307 Filed 3-26-81; 8:45 am]

BILLING CODE 4110-03-M

---

21 CFR Part 522

Animal Drugs, Feeds, and Related Products; Spectinomycin Injection

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) amends the animal drug regulations to reflect approval of a supplemental new drug animal application (NADA) filed for CEVA Laboratories, Inc., providing for subcutaneous use of a 100-milligram-per-milliliter (mg/ml) spectinomycin injectable solution in baby chicks as an aid in the control of mortality and to lessen severity for certain infections.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Adriano R. Gabuten, Bureau of Veterinary Medicine (HFV-149), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4913.

SUPPLEMENTARY INFORMATION: CEVA Laboratories, Inc., 10560 Barkley, Overland Park, KS 66212, is sponsor of an approved NADA (40-040) providing for use of spectinomycin injection for the treatment of 1- to 3-day-old turkey poults, baby chicks, and dogs. As the result of a change of sponsor, CEVA Laboratories acquired the NADA from Abbott Laboratories. The supplemental NADA provides for subcutaneous use of a 100 mg/ml spectinomycin injectable in place of a 25 mg injectable in baby chicks to control mortality and to lessen the severity of certain infections. The injectable is diluted to 2.5 to 5.0 mg per 0.2 ml dose before injection for use as currently approved in 21 CFR 522.2120(d)(2)(ii).

Approval of this supplement does not change the currently approved use of the drug nor does it affect the drug's safety and effectiveness. Under the Bureau of Veterinary Medicine's supplemental approval policy (42 FR 64367; December 23, 1977), this is a Category II change, approval of which does not require reevaluation of the safety and effectiveness data in the parent application.

The agency has determined pursuant to 21 CFR 25.24(d)(1) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 522 is amended in § 522.2120 by removing paragraph (a)(2) and reserving it for future use, and by revising paragraph (a)(3) to read as follows:

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 522.2120 Spectinomycin injection.

(a) * * *

(2) [Reserved]

(3) 100 milligrams for use as in paragraph (d)(2), (3), and (4) of this section.

* * * * *

Effective date. This amendment is effective March 27, 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: March 16, 1981.

Robert A. Baldwin,

Associate Director for Scientific Evaluation.

BILLING CODE 4110-03-M

---

21 CFR Part 524

Animal Drugs, Feeds, and Related Products; Nitrofurazone Ointment

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration amends the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Farnam Companies, Inc., providing for the use of nitrofurazone ointment as a topical antibacterial on dogs and horses. The application provides labeling that reflects the conclusions of the National Academy of Sciences—National Research Council (NAS/NRC) review of such products.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Bob G. Griffith, Bureau of Veterinary Medicine (HFV-112), Food and Drug

Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: Farnam Companies, Inc., 2230 E. Magnolia St., Phoenix, AZ 85036, is sponsor of an NADA (100–854) providing for use of an ointment containing 0.2 percent nitrofurazone as a topical antibacterial on dogs and horses. This product is essentially the same as one codified for animal use in 21 CFR 524.1580b. The section provides that since the conditions of use are NAS/NRC reviewed and found effective, applications for these uses need not include certain effectiveness data as specified by 21 CFR 514.111. The product is an ointment; therefore, the requirement for bioequivalency data may be waived under 21 CFR 320.22(b)(2). In addition to the NAS/NRC review, the firm submitted studies conducted with the drug to show safety and effectiveness.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.83), Part 524 is amended by revising § 524.1580b(b) to read as follows:

§ 524.1580b Nitrofurazone ointment.

* * * * *

(b) *Sponsor.* For use in dogs, cats, and horses see No. 000149 in § 510.600(c) of this chapter. For use in dogs and horses see No. 017135 in § 510.600(c) of this chapter.

* * * * *

Effective date. This amendment is effective March 27, 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: February 5, 1981.

Gerald B. Guest,

Acting Director, Bureau of Veterinary Medicine.

[FR Doc. 81-9429 Filed 3-26-81; 8:45 am]

BILLING CODE 4110-03-M

21 CFR Part 529

Animal Drugs, Feeds, and Related Products; Enflurane

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) amends the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Pitman-Moore, Inc., providing for safe and effective use of a halogenated, inhalation anesthetic in horses for induction and maintenance of general anesthesia.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Sandra K. Woods, Bureau of Veterinary Medicine (HFV–114), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: Pitman-Moore, Inc. Washington Crossing, NJ 08560, filed an NADA (121–291) providing for administration to horses of a halogenated, inhalation anesthetic for induction and maintenance of general anesthesia.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Director, Bureau of Veterinary Medicine, has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment. Therefore, an environmental impact statement will not be prepared. The Director's finding of no significant impact and the evidence supporting that finding are contained in a statement of exemption (21 CFR 25.1(f)(1)(ii)(*a*) and (f)(1)(ii)(*c*)), which may be seen in the Dockets Management Branch (HFA–305), address above.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 529 is amended by adding new § 529.810 to read as follows:

PART 529—CERTAIN OTHER DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 529.810 Enflurane.

(a) *Specifications.* The drug is a clear, colorless, nonflammable, nonexplosive liquid.

(b) *Sponsor.* See 011716 in § 510.600(c) of this chapter.

(c) *Conditions of use*—(1) *Amount.* For induction of surgical anesthesia: 4 to 5 percent enflurane (with oxygen) for 10 to 15 minutes. For maintenance of surgical anesthesia: 2.2 to 3.5 percent enflurane (with oxygen).

(2) *Indications for use.* For induction and maintenance of general anesthesia in horses.

(3) *Limitations.* Administer by inhalation; not for use in horses sensitive to halogenated anesthetics; increasing depth of anesthesia may produce muscle twitching, particularly about face, neck, and forelimb; not for use in pregnant mares, foals or weanlings; use less than usual amounts of nondepolarizing muscle relaxants with enflurane; not for use in horses intended for food; observe all customary precautions for use of vasoconstrictor substances; Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective Date: March 27, 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: March 19, 1981.

Gerald B. Guest,

Acting Director, Bureau of Veterinary Medicine.

[FR Doc. 81-9427 Filed 3-26-81; 8:45 am]

BILLING CODE 4110-03-M

21 CFR Parts 556 and 558

Animal Drugs, Feeds, and Related Products; Virginiamycin

AGENCY: Food and Drug Administration.
ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of two supplemental new animal drug applications (NADA's) filed by SmithKline Animal Health Products, Division of SmithKline Corp., providing for the use of virginiamycin in broiler chicken feeds for increased rate of weight gain and improved feed efficiency, and to establish a tolerance for residues of the drug in foods. Virginiamycin is currently approved for use in swine feeds for treatment and control of swine dysentery and for increased rate of weight gain and improved feed efficiency.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Jack C. Taylor, Bureau of Veterinary Medicine (HFV-136), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5247.

SUPPLEMENTARY INFORMATION: SmithKline Animal Health Products, Division of SmithKline Corp., 1500 Spring Garden St., Philadelphia, PA 19101, filed two supplemental NADA's (91-467 and 91-513) providing for use of virginiamycin premixes for manufacture of broiler chicken feeds containing 5 to 15 grams per ton for increased rate of weight gain and 5 grams per ton for improved feed efficiency, and for a tolerance for residues of the drug in foods. The drug is currently approved for the manufacture of swine feeds for the control and treatment of swine dysentery and for increased rate of weight gain and improved feed efficiency. Effectiveness of virginiamycin as a growth enhancer for broiler chickens is established by data from three controlled clinical studies which also indicate the optimal dose level. The safety of the approved uses of virginiamycin was demonstrated by controlled acute and subacute toxicity studies on three species of laboratory test animals. This document amends the regulations to provide for use of virginiamycin in broiler chicken feeds.

Under the Bureau of Veterinary Medicine's proposed supplemental new animal drug policy (December 23, 1977, 42 FR 64367), the approval of these supplemental NADA's required a complete reevaluation of the safety data supporting the NADA's. The studies submitted were judged to be acceptable, for demonstrating the safety and effectiveness of virginiamycin under the recommended conditions of use in chickens. Standards prescribed in the agency's proposal of March 20, 1979, (44 FR 17070) on chemical compounds in food-producing animals were not applied to the approval of these NADA's. The approval is based on alternative criteria which assure that the products are safe and on factors which justify the equitable treatment of this sponsor who completed drug development testing adequately according to scientific standards extant prior to March 20, 1979.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information supporting this approval may be seen in the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has carefuly considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement therefore will not be prepared. The Bureau's finding of no significant impact and the evidence supporting this finding, contained in an environmental impact analysis report (pursuant to 21 CFR 25.1(j)) may be seen in the Dockets Management Branch, Food and Drug Administration.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Parts 556 and 558 are amended as follows:

PART 556—TOLERANCES FOR RESIDUES FOR NEW ANIMAL DRUGS IN FOOD

1. In Part 556, § 556.750 is revised as follows:

§ 556.750 Virginiamycin.

Tolerances are established for negligible residues of virginiamycin in edible tissues as follows:

(a) Swine—
(1) 0.4 ppm in kidney, skin, and fat.
(2) 0.3 ppm in liver.
(3) 0.1 ppm in muscle.
(b) Broiler chickens—
(1) 0.5 ppm in kidney.
(2) 0.3 ppm in liver.
(3) 0.2 ppm in skin and fat.
(4) 0.1 ppm in muscle.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

2. In Part 558, § 558.635 is amended by redesignating paragraph (f) as (f)(1) and adding new paragraph (f)(2). As revised, paragraph (f) reads as follows:

§ 558.635 Virginiamycin.

* * * * *

(f) *Conditions of use.* (1) *Swine*—It is used in complete feeds as follows:

(i) 100 grams per ton for 2 weeks, for treatment of swine dysentery in nonbreeding swine over 120 pounds.

(ii) 100 grams per ton for 2 weeks, 50 grams per ton thereafter, for treatment and control of dysentery in swine up to 120 pounds.

(iii) 25 grams per ton, as an aid in control of dysentery in swine up to 120 pounds. For use in animals or on premises with a history of swine dysentery but where symptoms have not yet occurred.

(iv) 10 grams per ton from weaning up to 120 pounds followed by 5 grams per ton to market weight, for increased rate of weight gain and improved feed efficiency. For continuous use from weaning to market weight.

(v) 10 grams per ton from weaning up to 120 pounds followed by 5 to 10 grams per ton to market weight, for increased rate of weight gain and improved feed efficiency for swine up to 120 pounds, for increased rate of weight gain for swine from 120 pounds to market weight. For continuous use from weaning to market weight.

(2) *Poultry*—It is used in complete feeds as follows:

(i) 5 to 15 grams per ton for increased rate of weight gain, for use in broiler chickens, not for use in layers.

(ii) 5 grams per ton for improved feed efficiency in broiler chickens, not for use in layers.

Effective date. March 27, 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: March 9, 1981.

Gerald B. Guest,

Acting Director, Bureau of Veterinary Medicine.

[FR Doc. 81-9089 Filed 3-25-81; 8:45 am]
BILLING CODE 4110-03-M

21 CFR Part 558

Animal Drugs, Feeds, and Related Products; Melengestrol Acetate

AGENCY: Food and Drug Administration.
ACTION: Final rule.

SUMMARY: The Food and Drug Administration amends the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) providing for use of a 200-milligram-per-pound melengestrol acetate premix for making finished feeds for heifers. The application was filed by The Upjohn Company.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: William D. Price, Bureau of Veterinary Medicine (HFV-123), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3442.

SUPPLEMENTARY INFORMATION: The Upjohn Co., Kalamazoo, MI 49001, filed a supplemental NADA (34-254) providing for use of a dry premix containing 200 milligrams of melengestrol acetate (MGA) per pound in addition to the currently approved 100- and 500-milligram-per-pound (mg/lb) premixes. In accordance with the current animal drug regulations, these premixes are used to make finished feeds for feedlot heifers. The animals are administered 0.25 to 0.50 milligram of MGA per head per day from either a supplement or complete ration.

The new 200 mg/lb MGA premix will be used as currently regulated in complete feeds for heifers (see 21 CFR 558.342). Under the Bureau of Veterinary Medicine's supplemental approval policy (see the Federal Register of December 23, 1977; 42 FR 64367), this is a Category II supplement that does not increase the risk of exposure. Accordingly, this approval did not require reevaluation of safety and effectiveness data in the parent application.

The agency has determined pursuant to 21 CFR 25.24(d)(1) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 558 is amended in § 558.342 by revising paragraph (a), to read as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

§ 558.342 Melengestrol acetate.

(a) *Approvals.* Dry premixes containing 100 or 200 milligrams of melengestrol acetate per pound or liquid premix containing 500 milligrams of melengestrol acetate per pound granted to 000009 in § 510.600(c) of this chapter.

* * * * *

Effective date. March 27, 1981.

BILLING CODE 4110-03-M

21 CFR Part 558

Animal Drugs, Feeds, and Related Products; Monensin and Roxarsone Premix

AGENCY: Food and Drug Administration.
ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations by removing that portion of the regulations which reflects approval of a new animal drug application (NADA) providing for use of monensin and roxarsone premix in chicken feed. The sponsor, Central Soya Co., Inc., requested the withdrawal of approval.

EFFECTIVE DATE: April 6, 1981.

FOR FURTHER INFORMATION CONTACT: Howard Meyers, Bureau of Veterinary Medicine (HFV-216), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4093.

SUPPLEMENTARY INFORMATION: In a notice published elsewhere in this issue of the Federal Register, approval of NADA 91-612 is withdrawn. The document amends the regulations to remove that portion which reflects approval of this NADA.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1 (a)(1) of the Order.

§ 558.355 [Amended]

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345-347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.84), § 558.355 *Monensin* is amended by removing paragraph (b)(4).

Effective date. This regulation is effective April 6, 1981.

(Sec. 512(e), 82 Stat. 345-347 (21 U.S.C. 360b(e))).

Dated: March 23, 1981.

Gerald B. Guest
Acting Director, Bureau of Veterinary Medicine.

BILLING CODE 4110-03-M

Animal Drugs, Feeds, and Related Products; Tylosin

21 CFR Part 558

AGENCY: Food and Drug Administration.
ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) amends the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Cadco, Inc., providing for safe and effective use of an 8-gram-per-pound tylosin premix for making complete swine feeds.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Jack C. Taylor, Bureau of Veterinary Medicine (HFV-136), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5247.

SUPPLEMENTARY INFORMATION: Cadco, Inc., P.O. Box 3599, Des Moines, IA 50322, is the sponsor of supplemental NADA (91-783) providing for use of a premix containing 8 grams of tylosin (as tylosin phosphate) per pound, in addition to existing approvals for use of 4- and 10-gram-per-pound premixes, for making complete swine feeds used to increase rate of weight gain and improve feed efficiency.

Approval of this application is based on safety and effectiveness data contained in Elanco Products Co.'s approved NADA 12-491. Use of the data in NADA 12-491 to support this supplement has been authorized by Elanco. This approval does not change the approved use of the drug. Consequently, approval of this NADA poses no increased human risk from exposure to residues of the animal drug, nor does it change the conditions of the drug's safe use in the target animal species. Accordingly, under the Bureau of Veterinary Medicine's supplemental approval policy (42 FR 64367; December

23, 1977), approval of this supplemental NADA did not require reevaluation of safety and effectiveness data in NADA 12-491.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined pursuant to 21 CFR 25.24 (d)(1)(i) and (iii) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 558 is amended in § 558.625 by revising paragraph (b)(4) to read as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

§ 558.625 Tylosin.

* * * * *

(b) * * *

(4) To 011490: 4, 8, and 10 grams per pound; paragraph (f)(1)(vi)(*a*) of this section.

* * * * *

Effective date. This regulation is effective March 27 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: February 10, 1981.

BILLING CODE 4110-03-M

---

21 CFR Part 558

Animal Drugs, Feeds, and Related Products; Tylosin and Sulfamethazine

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed for Seeco, Inc., for use of a tylosin and sulfamethazine premix in the manufacture of swine feeds.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Jack C. Taylor, Bureau of Veterinary Medicine (HFV-136), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5247.

SUPPLEMENTARY INFORMATION: Seeco, Inc., Box 1014, North Highway 71, Willmar, MN 56201, is sponsor of an NADA (107-002) filed on its behalf by Elanco Products Co. The NADA provides for safe and effective use of a premix containing 10 grams per pound each of tylosin (as tylosin phosphate) and sulfamethazine for subsequent manufacture of complete swine feed for (1) maintaining weight gain and feed efficiency in the presence of atrophic rhinitis, (2) lowering the incidence and severity of *Bordetella bronchiseptica* rhinitis, (3) prevention of swine dysentery (vibrionic), and (4) control of swine pneumonias caused by bacterial pathogens (*Pasteurella multocida* and/or *Corynebacterium pyogenes*).

Approval of this application is based on safety and effectiveness data contained in Elanco Products Co.'s approved NADA 41-275. Use of this data in NADA 41-275 to support this application has been authorized by Elanco. This approval does not change the approved use of the drug. Consequently, approval of this NADA poses no increased human risk from exposure to residues of the animal drug, nor does it change the conditions of the drug's safe use in the target animal species. Accordingly, under the Bureau of Veterinary Medicine's supplemental approval policy (42 FR 64367; December 23, 1977), approval of this NADA has been treated as would approval of a Category II supplemental NADA and does not require reevaluation of the safety and effectiveness data in NADA 41-275.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined pursuant to 21 CFR 25.24(d)(1) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), § 558.630 is amended by revising paragraph (b)(3) to read as follows:

§ 558.630 Tylosin and sulfamethazine.

* * * * *

(b) * * *

(3) To 011490, 011749, 016968, 017255, 017274, 024174, 026186, 034500, 035955, 043743, and 046987: 10 grams per pound each, paragraph (f)(2)(ii) of this section.

* * * * *

Effective date. This regulation is effective March 27, 1981.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: February 5, 1981.

BILLING CODE 4110-03-M

DEPARTMENT OF STATE

22 CFR Part 19

[Dept. Reg. 108.805]

Benefits for Spouses and Former Spouses of Participants in the Foreign Service Retirement and Disability System

AGENCY: Department of State.

ACTION: Amendment of rule.

SUMMARY: On February 19, 1981, the Department of State published a final rule on benefits for spouses and former spouses of participants and certain former participants in the Foreign Service Retirement and Disability System (46 FR 12957). This was necessary because those benefits came

into effect on February 15, 1981, but the Department of State undertook to consider subsequent comments for possible amendments. Such comments have been received and considered. The results of the consideration and further review are reflected below.

EFFECTIVE DATE: March 20, 1981.

FOR FURTHER INFORMATION CONTACT: Gertrude Wieckoski, Chief, Retirement Division, Bureau of Personnel, Department of State, Washington, D.C. 20520, Phone (202) 632-0315.

SUPPLEMENTARY INFORMATION: The comments received by the Department are set forth below together with the Department's response.

1. *Comment:* Several letters were received recommending that the Department honor court orders directing or implying that the employee make payments from annuity to a former spouse or which make no reference to the paying agent.

Response: The Department is amending paragraph (3) of section 19.6–2(a) to permit a finding that a court order is qualified when it makes no reference to the paying agent, i.e. merely directs that payments from a principal's annuity be paid to a former spouse. However, the Department is bound to follow the provisions of each court order, and if an order directs that payment be made by the principal, the Department is not authorized to take over that payment responsibility if the principal objects.

2. *Comment:* Establish procedures for dealing with situations in which the retiree was named payor, but has fallen behind in payments. Such procedures should include a timely review, with minimum delay for appeals by the retiree, and provisions for the Secretary of State to take over the payor role within as short a time as possible.

Response: The Department does not have authority to implement this suggestion, however, annuities of the retiree are subject to garnishment for alimony or child support under 42 U.S.C. 659.

3. *Comment:* Section 19.6–7(b) provides a principal 30 days to initiate legal action to contest a court order in cases where the record contains support for the objection. The phrase "legal action" is vague. It should be made clear that some formal legal action, beyond merely consulting an attorney, is required.

Response: The Department is amending the paragraph to use the phrase "formal legal action."

4. *Comment:* Sections 19.6–6 and 19.6–7 both seem to assume that only the principal would have an interest in contesting a court order. The regulation should provide for automatic notification to both spouses whenever the Department receives notice of a divorce, with or without a court order, from either spouse. It should also allow a period for response before the Department makes any determination. If neither party objects, the divorce decree will automatically be considered valid.

Response: Section 19.6–6 provides for prompt notice to both the principal and the spouse of pertinent information submitted by either party. There is clearly an opportunity for both to contest any action. Section 19.6–7 does not provide for deferral of payment to a spouse following submission of a divorce decree or court order by a principal because of the adverse impact of such a delay on the spouse. With respect to the last point in the comment, section 19.6–5(b)(1) states that any decree recognized as valid by both parties will be considered valid.

5. *Comment:* The Department cannot determine that a pro rata share is or will be payable, without first giving the principal an opportunity to submit a court order which provides that no such share be paid.

Response: Under the Act, a pro rata share of a principal's annuity becomes payable to a former spouse effective the first of the month in which the final decree of the divorce is obtained. The Act also gives a court up to one year following the divorce to order that some other share be paid to a former spouse. Section 19.6–7 of the regulations provides that payment to a former spouse of a pro rata share will commence promptly after the Department is notified of the divorce—to reduce the need for large retroactive payments—unless the principal has a valid objection. Section 19.6–4(b) provides for adjustment in pro rata share payments when such adjustment is subsequently ordered by a court.

6. *Comment:* There is no indication of how the amount of any proposed payment to a former spouse will be determined. This is a serious omission, because that amount is likely to be the subject of dispute between the parties. There is no justification for withholding all payments to a former spouse when a court order is ambiguous.

Response: A court order directing payment to a former spouse must state the amount to be paid in specific dollar terms or as a percentage of the principal's annuity. If the order is ambiguous on this point, it is not a qualified order. Unless the department is in receipt of a qualified order or a spousal agreement, a division under the pro rata share formula is made. A sentence has been added at the end of § 19.6–5(b) to make this clear; and the definition in § 19.2(j) has been corrected.

7. *Comment:* Provision should be made for multiple court orders applying to the *same* former spouse, which could occur when a husband and wife obtain divorces in two different jurisdictions.

Response: In this situation, under a general principle of common law, the most recent qualified court order filed with the Department would supersede any previous order.

8. *Comment:* When two or more former spouses are involved, distribution on a first-come, first-served basis as provided in the regulations, seems inappropriate.

Response: This situation where there are several former spouses must be distinguished from that described in comment 7. The rights of the first former spouse may not be diminished by administrative action of the Department in order to provide for a second former spouse. The latter should be on notice at the time of marriage of the principal's financial obligations.

9. *Comment:* The Department does not have the power to control the provisions of court orders or spousal agreements. It should provide instead that it will not honor orders or agreements to the extent that they exceed the net annuity.

Response: This is the effect of § 19.6–2(a)(1).

10. *Comment:* Substitute the term "spouse" for "wife or husband" in § 19.11–7 which relates to benefits for surviving children.

Response: The phrase "wife or husband" was used to avoid confusion with "surviving spouse" which is a defined term which requires a minimum period of marriage in certain cases.

11. *Comment:* Regarding § 19.6–7, an addition should be made to paragraph (b) to provide that the withheld payments will accrue interest at the rate for Treasury bills during the pendency of any action.

Response: The Department does not have authority to implement this suggestion.

12. *Comment:* Payments should be made to the former spouse upon the issuance of an appropriate interlocutory decree.

Response: The Act authorizes payments to "former spouses." A spouse does not become a former spouse until a final decree of divorce is obtained.

13. *Comment:* The regulations omit a savings clause in section 820(b)(5) of Act which reads as follows: "(5) The 10-year requirement of section 804(b)(6), or any other provision of this chapter, shall not be construed to affect the rights any

spouse or individual formerly married to a participant or annuitant may have, under any law or rule of law of any State or the District of Columbia, with respect to an annuity of a participant or annuitant under this chapter." The burden must be with the parties to bring to the Department's attention more favorable domiciliary State law, but a vested right to retirement benefits must not be regarded as forfeitable solely on the ground of a delay in a notice requirement contained in the Federal statute.

Response: The Department may not make any payment to a beneficiary from the Foreign Service Retirement and Disability Fund not authorized by Federal law. Any right to a Foreign Service retirement benefit granted a beneficiary by a State law not authorized by Federal statute to be paid to the beneficiary must be enforced against the person authorized by Federal law to receive the payment from the Fund. These regulations in Part 19 implement Federal law to which the savings clause in section 820(b)(5) of the Act does not apply.

Amendments

Through inadvertence, the regulations entitled "Benefits for Spouses and Former Spouses of Participants in the Foreign Service Retirement and Disability System" were published on February 19, 1981 as Part 18 of title 22 of the Code. Part 18 has been used for other regulations; accordingly Part 18 as published on February 19, 1981 is renumbered as Part 19 and all the section numbers and cross references are changed accordingly.

In addition, the following amendments are made as a result of comments received by the Department or to correct errors in the previous regulations:

§ 19.2 [Amended]

1. Paragraph (j) of § 19.2 as renumbered is amended to strike "a previous spouse" appearing at the end thereof and to substitute "an eligible beneficiary" in lieu thereof.

2. Subparagraph (3) of § 19.6–2(a) as renumbered is revised to read as follows:

§ 19.6–2 Qualifying court orders.

(a) * * *

(3) Direct that payments be made to an eligible beneficiary from a principal's Foreign Service retirement benefit or survivor benefit. If a court directs or implies that a principal, rather than the Secretary of State or the Government, make the payments, the order will not be considered qualified unless the principal does not object during the 30-day notice period provided under § 19.6–6;

* * * * *

3. Section 19.6–5(b)(3) as renumbered is amended by inserting the following as the next to the last sentence thereof:

§ 19.6–5 [Amended]

* * * * *

(b)(3) * * * If a divorce decree is deemed valid under this paragraph, a pro rata share payment is due a former spouse unless PER/ER/RET is in receipt of a court order which it has deemed qualified under paragraph (a), or a valid spousal agreement providing otherwise. * * *

§ 19.6–7 [Amended]

4. Section 19.6–7(b) as renumbered is amended to insert the word "formal" immediately preceding the phrase "legal action" each time it appears.

§ 19.9–1 [Amended]

5. Paragraph (a) of § 19.9–1 as renumbered is amended by striking the words "on or" immediately preceding the phrase "after February 15, 1981."

§ 19.11–3 [Amended]

6. Section 19.11–3(c) as renumbered is amended by removing all text after the first sentence.

§ 19.11–5 [Amended]

7. The second sentence of § 19.11–5(d) as renumbered is amended by removing "or former spouse" immediately preceding the phrase "of a participant."

Dated: March 18, 1981.

Richard T. Kennedy,

Under Secretary for Management.

BILLING CODE 4710-15-M

INTERNATIONAL COMMUNICATION AGENCY

22 CFR Parts 502, 504, 505, 525

Authority Delegations, Organization, and Privacy Act Policies and Procedures; Miscellaneous Amendments

AGENCY: International Communication Agency.

ACTION: Final rule.

SUMMARY: The International Communication Agency amends it general regulations relating to delegations of authority, organization, and privacy. These amendments will update the regulations to reflect organizational changes, office moves, and minor editorial corrections.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Jane S. Grymes, Management Analyst, Management Analysis/Regulations Staff, Associate Directorate for Management, International Communication Agency, Washington, D.C. 20547, AC 202–523–4306.

SUPPLEMENTARY INFORMATION: Pursuant to the authority of the Director of the International Communication Agency set forth in Reorganization Plan No. 2 of 1977 and Executive Order 12048 of March 27, 1978, 22 CFR, Chapter V is amended as follows:

PART 502—WORLDWIDE FREE FLOW (EXPORT-IMPORT) OF AUDIO-VISUAL MATERIALS

1. In § 502.1(a), the fifth sentence is amended to add the office symbol and will read as follows:

§ 502.1 Summary; general.

(a) * * * Export certification, import certificate authentication, rulings, and information, respecting the Agreement may be obtained from the Chief Attestation Officer of the United States—International Communication Agency, (PGM/TR), Washington, D.C. 20547.

* * * * *

2. In § 502.2(a)(1), italics are added to the first sentence to emphasize the title of the Agreement. In § 502.2(a)(1), the first sentence is amended as follows:

§ 502.2 Implementing statute and Executive Order.

(a) * * *

(1) After the heading to Part 6, insert: "Part 6 Headnote:

"1. No article shall be exempted from duty under item 870.30 unless a Federal agency or agencies designated by the President determines that such article is visual or auditory material of an educational, scientific, or cultural character within the meaning of the *Agreement for Facilitating the International Circulation of Visual and Auditory Materials of an Educational, Scientific, and Cultural Character.* * * *

* * * * *

3. In § 502.2(d), the introductory statement is revised to read as follows:

* * * * *

(d) Pub. L. 89–634 further provides:

* * * * *

4. Section 502.3(b) is revised to add italics and will read as follows:

§ 502.3 Procedures.

* * * * *

(b) Imports: Educational/informational audio-visual materials, as identified in the *Substantive Criteria* of the regulations in this part, are permitted duty-free entry into the United

States upon authentication by the International Communication Agency of the Certificate of the Government of the country wherein basic ownership is held, or the certificate of the United Nations Educational, Scientific and Cultural Organization (UNESCO), attesting the educational/informational character of such materials within the meaning of the "Agreement", and compliance with applicable Customs entry procedures (see 19 CFR 10.121).

* * * * *

5. § 502.3(c) is revised to add the office symbol and will read as follows:

* * * * *

(c) In order to establish qualification for entry into the United States under the provisions of Tariff Item 870.30, the Applicant shall forward the foreign certificate directly to:

Chief Attestation Officer of the United States International Communication Agency, (PGM/TR), Washington, D.C. 20547.

* * * * *

6. Section 502.3(f) is revised to add italics and will read as follows:

* * * * *

(f) Exports: U.S. educational/informational audio-visual materials, as identified in the *Substantive Criteria* of these Regulations, may, if eligible as provided herein, be certified by the International Communication Agency as being "of international educational character," and thus entitled to special import privileges such as duty-free entry abroad in "Beirut countries" (see § 502.7 on history and background, for a list of the countries where there is formal and informal participation under the Beirut Agreement).

* * * * *

7. Section 502.3(g) is amended in the address section to add the office symbol and will read as follows:

* * * * *

(g) For general information and application forms, Applicants should write to:

Chief Attestation Officer of the United States International Communication Agency, (PGM/TR), Washington, D.C. 20547.

* * * * *

8. In § 502.4(a), the first sentence is amended to correct the title of the Chief Attestation Officer and will read as follows:

§ 502.4 Consultation of experts.

(a) The Chief Attestation Officer of the United States and the Attestation Officers under his/her supervision will routinely and continuously receive Agency policy and legal guidance, and protests of Applicants will be reviewed by the Review Board and by the Agency's Director as provided below.

* * * * *

9. In § 502.4(b), remove "Department of Health, Education, and Welfare (including U.S. Office of Education and the National Institutes of Health)", and insert in lieu thereof "Department of Health and Human Services (including the National Institutes of Health), Department of Education,".

10. Section 502.5(b) has been amended in the address section to correct the office symbol and will read as follows:

§ 502.5 Review and appeal.

* * * * *

(b) Any Applicant may ask for formal review of any ruling of a USICA Attestation Officer. The request for review must be made in writing and addressed to the—

Review Board for the International Audio-Visual Program (PGM/T), International Communication Agency, Washington, D.C. 20547.

* * * * *

11. Section 502.6(c)(3) is amended to define maps as being unbound. Section 502.6(c)(3) is revised to read as follows:

§ 502.6 Substantive criteria.

(c) * * *

(3) Photographs, transparencies and slides; models, static and moving; charts, globes, maps (not bound) and posters.

* * * * *

12. In § 502.7(d), the third sentence is amended to include 1980 figures and will read as follows:

§ 502.7 History and background.

* * * * *

(d) * * * As of December 31, 1980, the U.S. Government had issued over 59,000 certificates covering an estimated 000,000 items of visual and auditory materials (a number of the certificates cover a series of items), and over 4,000 different Applicants had submitted materials for export certification. * * *

* * * * *

13. Section 502.7(d) is amended to remove the fourth (last) sentence.

14. In § 502.7(e)(2), remove "United Kingdom" and "France" from the second list of countries (list of 4 countries), and insert "United Kingdom" and "France" alphabetically in the first list of countries.

PART 504—ORGANIZATION

15. In § 504.2(c), the last full sentence is amended to correct the number of foreign countries in which USICA maintains posts. Section 504.2(c) is amended to read as follows:

§ 504.2 Description of central and field organization, established places of which, officers from whom, and methods whereby the public may obtain information.

* * * * *

(c) * * * The International Communication Agency operates field posts in 125 foreign countries.

* * * * *

16. In § 504.2(d), in the flush paragraph which follows subparagraph (1)(i)(3), remove the number "38" and insert in lieu thereof the number "39".

17. In § 504.2(d)(1)(ii), the second, third, and fourth sentences are amended to read as follows:

* * * * *

(d) * * *

(1) * * *

(ii) * * * The Program Evaluation Staff performs followup for the Agency's inspection activities and evaluates the extent to which media products reflect the Agency's subject priorities. The Planning and Guidance Staff provides both fast daily and in depth background guidance for operating elements of the Agency and those U S. foreign policy issues which are susceptible to public diplomacy and on those domestic concerns which are relevant to the conduct of it. This staff also reviews program proposals of the Agency's overseas posts and Washington elements to assure that they are consistent with agreed-upon policy and that resources are allocated in accordance with priorities, and represents USICA in interagency meetings on public affairs issues. * * *

* * * * *

18. In § 504.2(d)(1)(iii), the fourth sentence is amended to read as follows:

* * * * *

(d) * * *

(1) * * *

(iii) * * * The Office of Private Sector Programs works with organizations in the private sector and in some cases provides limited financial assistance for their non-profit activities in support of the Agency's public diplomacy and international exchange of persons objectives. * * *

* * * * *

19. In § 504.2(d)(1)(vi), the first sentence is amended to read as follows:

* * * * *

(d) * * *

(1) * * *

(vi) The Agency maintains 201 posts abroad in 125 countries. * * *

* * * * *

20. In § 504.2(d)(1)(vii) beginning with the third sentence, the balance of the paragraph is amended to read as follows:

* * * * *

(d) * * *
(1) * * *

(vii) * * * The Office assists in the drafting of proposed legislation, Executive Orders, regulations, contracts, leases, and other legal documents, and participates in the negotiation of international agreements. The Office represents the Agency in hearings arising from disputes on contracts, equal employment opportunity, grievances, labor disputes, and licensing. The Office provides support to trial counsel in cases tried before domestic and foreign courts. The Office secures the necessary rights clearances for the Agency's activities, recommends waivers of certain J visa restrictions, and advises on matters relating to ethical conduct and conflict of interest of Agency employees.

* * * * *

21. Section 504.2(d)(1)(viii) is revised to read as follows:

* * * * *

(d) * * *
(1) * * *

(viii) The Office of Congressional and Public Liaison, (CPL), directs and carries out activities designed to discharge the Agency's obligation to provide information about USICA policies, mission and programs to the American people, the Congress and the communications media. It publishes news releases, fact sheets and pamphlets; provides Agency speakers in response to invitations from organizations and institutions in the U.S.; and holds seminars and workshops with academic, business, professional and public interest institutions and groups. It is responsible for the preparation of the Agency's Annual Report to Congress, dissemination of appropriate Agency-produced material to Congress and publication of the Agency's internal newsletter. The office is responsible for conducting tours of the Agency exhibit at the VOA headquarters and for all USICA actions under the Freedom of Information Act and the Privacy Act. On congressional matters it maintains contact with Members and their staffs and serves as Agency coordinator of hearings on substantive legislation and of Agency programming of Members and staff. The 1982 estimate provides for a staff of 22 positions.

Appendix I [Amended]

* * * * *

22. In § 504.2 Appendix I, in item No. 1, the sixth office listing is revised to read as follows:

* * * * *

(1)* * *

Associate Directorate for Management
Office of Equal Employment Opportunity
Office of Systems Technology;

* * * * *

23. In § 504.2 APPENDIX I item No. (2) (c) is revised to read as follows:

* * * * *

(2)* * *

(c) International Communication Agency, Health and Human Services Building, 330 Independence Avenue, S.W., Washington, D.C. 20547; Associate Directorate for Broadcasting (VOA).

* * * * *

Appendix II

24. In § 504.2 APPENDIX II the third office listing is removed.

PART 505—PRIVACY ACT POLICIES AND PROCEDURES

§ 505.3 Procedures for requests pertaining to individual records in a system of records.

25. In § 505.3(b), the first sentence is amended to correct the mailing address and should read as follows:

* * * * *

(b) All requests under the Privacy Act should be directed to the Office of Congressional and Public Liaison, 1750 Pennsylvania Ave., N.W., Washington, D.C. 20547, which will coordinate the search of all systems of records specified in the request. * * *

* * * * *

26. In § 505.3(c), the second sentence is amended to read as follows:

(c) * * * All other requests shall be submitted by the post to the Office of Congressional and Public Liaison, as noted in paragraph (b) of this section, and the individual so notified of this action in writing.

* * * * *

27. In § 505.5(b)(1), the second sentence is amended to read as follows:

§ 505.5 Disclosure of requested information to individuals.

* * * * *

(b) *Access to Records*—(1) * * * All requests for information on whether or not the Agency's system or systems of records contain information about the individual will be acknowledged within ten working days after receipt of the request by the Office of Congressional and Public Liaison.

* * * * *

PART 525—ADMINISTRATIVE ENFORCEMENT PROCEDURES OF POST-EMPLOYMENT RESTRICTIONS

28. § 525.8 is revised to read as follows:

§ 525.8 Appointment and qualifications of examiner.

When a former Government employee after receiving adequate notice requests a hearing, a presiding official (hereinafter referred to as "examiner") shall be appointed by the Director to make an initial decision. The examiner shall be a member of the bar of a State or of the District of Columbia, who is impartial and who has not participated in any manner in the decision to initiate the proceedings.

29. In § 525.8, the introductory paragraph is amended to add a colon at the end of the paragraph. The paragraph is revised to read as follows:

§ 525.8 Rights of parties at hearing.

A hearing shall include, at a minimum, the following rights for both parties:

* * * * *

30. § 525.14 is revised to read as follows:

§ 525.14 Judicial review.

Any person found to have participated in a violation of statutory or regulatory post-employment restrictions (18 U.S.C. 207(a), (b), or (c) or the regulations compiled in Part 737 of Title 5 of the Code of Federal Regulations) may seek judicial review of the administrative determination.

It is the general policy of the International Communication Agency to allow time for interested parties to take part in the rulemaking process. These amendments are administrative in nature, therefore, the rulemaking process involving comment and public procedure is waived and these amendments become effective March 27, 1981.

Issued at Washington, D.C. on March 19, 1981.

John W. Shirley,

Acting Director, International Communication Agency.

BILLING CODE 8230-01-M

DEPARTMENT OF LABOR

Wage and Hour Division, Employment Standards Administration

Office of the Secretary

29 CFR Parts 1, 4, 5, and 6

Further Deferral of Effective Dates of Regulations

AGENCY: Wage and Hour Division, and Office of the Secretary, Labor.

ACTION: Notice of further deferral of effective dates of final rules.

SUMMARY: This notice further defers the effective dates of certain Labor Department regulations from March 30, 1981 and April 17, 1981 until May 1, 1981. This action is taken in order to permit reconsideration of these rules in accordance with Executive Order 12291.

DATES: The effective dates are deferred until May 1, 1981. See the table below for more information.

ADDRESS: Henry T. White, Jr., Deputy Administrator, Wage and Hour Division, Employment Administration, Frances Perkins, Department of Labor Building, Room S-3502, 200 Constitution Avenue, NW, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Henry T. White, Jr., Telephone: (202) 523-8305.

SUPPLEMENTARY INFORMATION: In the Federal Register of February 6, 1981 (46 FR 11253-11254) the Department of Labor published a notice deferring the effective dates of Parts 1, 5, and 6 of Title 29 of the Code of Federal Regulations (29 CFR Parts 1, 5, and 6) until March 30, 1981. This action was taken in response to a January 29, 1981 Memorandum from President Reagan in order to allow for a full and appropriate review of these rules. In the Federal Register of February 12, 1981 (46 FR 11971) this Department published a notice deferring (staying) the effective date of Part 4 (including § 4.133) of title 29 of the Code of Federal Regulations (29 CFR Part 4) until April 17, 1981 to permit further review of the rule.

This document will further defer the effective dates of all of these regulations until May 1, 1981. This action is necessary in order to permit reconsideration of these regulations in accordance with Executive Order 12291. Because these rules raise a great many issues, reconsideration will take additional time. The need for such reconsideration constitutes good cause for this deferral. For this reason and because these rules are scheduled to become effective very shortly, additional notice and public procedure on this change of effective dates is impracticable, unnecessary and contrary to the public interest and good cause exists for making these postponements effective immediately.

The following chart contains a description of each of the rules being deferred by this notice:

Rule	Subject	Original publication of rule in final form	Previously scheduled effective date
1. 29 CFR Part 1	Procedure for Predetermination of Wage Rates.	Jan. 16, 1981 (46 FR 4306)	Mar. 30, 1981.
2. 29 CFR Part 4	Service Contract Act; Labor Standards for Federal Service Contract.	Jan. 16, 1981 (46 FR 4320) and Jan. 29, 1981 (46 FR 4998).	Apr. 17, 1981.
3. 29 CFR Part 5	Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction (Also Labor Standards Provisions Applicable to Nonconstruction Contracts Subject to the Contract Work Hours and Safety Standards Act).	Jan. 16, 1981 (46 FR 4380)	Mar. 30, 1981.
4. 29 CFR Part 6	Rules of Practice for Administrative Proceedings Enforcing Labor Standards in Federal and Federally Assisted Construction Contracts and Federal Service Contracts.	Jan. 16, 1981 (46 FR 4396)	Do.

Authority

The statutory authority for this action is as follows:

1. As to 29 CFR Part 1:

(5 U.S.C. 301; R.S. 161, 64 Stat. 1267; Reorganization Plan No. 14 of 1950, 5 U.S.C. Appendix; 29 U.S.C. 259; 40 U.S.C. 276a—276a-7; 40 U.S.C. 276c; and the laws listed in Appendix A of this Part)

2. As to 29 CFR Part 4:

(41 U.S.C. 351, *et seq.*, 79 Stat. 1034, as amended in 86 Stat. 789, 90 Stat. 2358; 41 U.S.C. 38 and 39; and 5 U.S.C. 301)

3. As to 29 CFR Part 5:

(40 U.S.C. 276a—276a-7; 40 U.S.C. 276; 40 U.S.C. 327-332; Reorganization Plan No. 14 of 1950, 5 U.S.C. Appendix; 5 U.S.C. 301; and the statutes listed in section 5.1(a) of this Part)

4. As to 29 CFR Part 6:

(Secs. 4 and 5, 79 Stat. 1034, 1035 as amended by 86 Stat. 789, 790, 41 U.S.C. 353 and 354; 5 U.S.C. 301; Reorg. Plan No. 14 of 1950, 64 Stat. 1267, 5 U.S.C. Appendix; 48 Stat. 1494, as amended by 49 Stat. 1011, 78 Stat. 238, 40 U.S.C. 276a—276a-7; 76 Stat. 357-359, 40 U.S.C. 327-332; 48 Stat. 948, as amended by 63 Stat. 108, 72 Stat. 967, 40 U.S.C. 276c)

Signed at Washington, D.C. this 24th day of March 1981.

Raymond J. Donovan,

Secretary of Labor.

Craig A. Berrington,

Deputy Assistant Secretary for Employment Standards.

BILLING CODE 4510-27-M

Occupational Safety and Health Administration

29 CFR Part 1910

[Docket No. H-004E]

Occupational Exposure to Lead; Supplemental Statement of Reasons and Amendment of Standard; Notice of Deferral of Effective Date

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice of further deferral of effective date of final rule.

SUMMARY: This notice defers the effective date of the Supplemental Statement of Reasons and Amendment of the Lead Standard until April 30, 1981. The action is necessary to allow additional time to consider the appropriateness of the lengthy and complex document in light of the numerous petitions for administrative review which have been received.

On January 21, 1981, OSHA published in the Federal Register (46 FR 6134) a supplemental statement of reasons assessing the technological and economic feasibility of meeting the permissible exposure level for lead contained in the lead standard (29 CFR 1910.1025), in 46 industries. The document was prepared in response to a remand order from the U.S. Court of Appeals for the D.C. Circuit, in the "United Steelworkers of America v. Marshall," No. 79-1048 (August 15, 1980). The supplemental statement of reasons covered nearly 100 pages in the Federal Register, and was originally scheduled to be effective on February

20, 1981. On February 6, 1981, the effective dates of several final regulations were deferred until March 30, 1981 pursuant to a Presidential Memorandum to the Secretary of Labor and other cabinet officials (46 FR 11253). Due to the length and complexity of the document and the numerous petitions for administrative review which have been received, additional time is needed to allow for a full and appropriate review of the supplemental statement of reasons. Therefore, the effective date of this document is hereby deferred until April 30, 1981. Due to the short deferral period, notice and opportunity for public comment on the deferral is impractical and unnecessary under 5 U.C.S. 533 and 29 U.S.C. 655(b).

DATES: The effective date is deferred until April 30, 1981.

FOR FURTHER INFORMATION CONTACT: Dr. Robert Beliles, Occupational Safety and Health Administration, Room N3617, U.S. Department of Labor, Washington, D.C. 20210, (202) 523–7081.

Signed at Wash.ngton, D.C. this 24th day of March 1981.

Thorne G. Auchter,

Assistant Secretary of Labor.

BILLING CODE 4510-26-M

---

29 CFR Part 1910

[Docket No. H–004M]

Occupational Exposure to Lead; New Trigger Levels for Medical Removal Protection; Deferral of Effective Date

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Notice of further deferral of effective date of new trigger levels for medical removal protection; request for comments on one-year delay of effective date.

SUMMARY: OSHA is delaying the effective date of the new trigger levels for medical removal protection under the lead standard (Sec. 1910.1025(k)) from the April 1, 1981 date previously announced in the **Federal Register** (46 FR 14897) to May 1, 1981. This action is taken upon the request of several industry parties and members of the public to allow more time for the submission and evaluation of additional information from all interested persons concerning any further relief that may be appropriate. All interested persons are again invited to submit information and views on any issues involved in the requests for a one-year delay in the effective date of the new MRP trigger levels.

DATES: The effective date of the new trigger levels is May 1, 1981. All data and comments must be received by April 15, 1981.

ADDRESS: All comments should be submitted to the Docket Officer, Docket No. H–004M, Occupational Safety and Health Administration, Room S6212, U.S. Department of Labor, 200 Constitution Avenue, NW, Washington, D.C. 20210. Telephone (202) 523–7894.

FOR FURTHER INFORMATION CONTACT: Dr. Robert P. Beliles, Occupational Safety and Health Administration, Room N3718, U.S. Department of Labor, Washington, D.C. 20210, Telephone (202) 523–7081.

SUPPLEMENTARY INFORMATION: On March 3, 1981, OSHA published a notice in the **Federal Register** (46 FR 14897) delaying the effective date from March 1, 1981 to April 1, 1981 of the new removal and return trigger levels for medical removal protection (MRP) under the standard on occupational exposure to lead. That notice summarized the provisions of MRP and explained the need in the standard for progressively phased-in air-lead and blood-lead levels triggering employee removal from and subsequent return to lead-exposed jobs.

The one month delay was granted as an interim measure in response to an application from certain employers and industry groups representing major segments of the lead industry for a one-year delay in the effective date of the new trigger levels provided in the lead standard (29 CFR 1910.1025(k)). In their application industry alleged that the implementation of the new trigger levels is infeasible because: (1) it would require the removal of many skilled employees, including supervisors, foremen, and maintenance workers, whose blood-lead levels currently exceed the new 60μg/100g removal level; and (2) in order to achieve the new return level of 40μg/100g an unexpectedly long removal time would be needed, which would deprive industry of employees' skills and experiences that could not easily be replaced. The result, they assert, would be serious and adverse to the continued operation and productivity of their plants, including the proper functioning of health and safety controls.

The adequacy and accuracy of these allegations and supporting data as a basis for the requested delay have been challenged in responses by several unions. The unions further state that any delay industry may eventually prove to be justified should be granted only on a plant-by-plant basis.

Since industry's allegations raised serious questions concerning the feasibility of the new trigger levels and what relief would be appropriate to protect employees, the effective date of the new trigger levels was delayed until April 1, 1981 to enable the agency to obtain and consider the necessary evidence.

To facilitate this process, OSHA in a letter dated March 5, 1981, specifically requested from industry the following information:

Issue: On March 1, 1981 when the provision to remove workers with blood-lead levels in excess of 60 μg/100 grams of blood becomes effective a portion of the industrial force may be required to be removed. The agency requests that the industry or other interested parties provide information on:

1. Describe the *total* workforce in each plant for which relief from the 60 MRP trigger is requested or is to be considered with specific information on the following:

(a) The number of supervisory or skilled workers exposed to lead in each plant. Of this group, how many will be removed because their blood-lead levels are at or above 60 μg/100 grams of whole blood?

(b) The number of employees who were transferred because their blood-lead levels were at or above 60 or 70 μg/100 grams of whole blood.

(c) Were any of these employees removed when their blood lead levels were lower than the triggers? If so why?

All of the above information (a–c) requested for supervisory or skilled workers should also be provided for other employees, i.e., those not classified as skilled or supervisory.

2. For all employees who were removed at triggers of 60 or 70 μg/100 grams of whole blood *and* those who would be removed at 60 μg/100 grams of whole blood, please submit the following data:

(a) Blood-lead measures from 1976 to the present, to include dates of testing;

(b) Pre-employment blood-lead levels;

(c) Dates of removal and length (weeks, months, years) of removal period;

(d) Environmental lead levels;

(e) Respiratory protective devices (types of respirators and duration of use, i.e., hours per day);

(f) Efforts and accomplishments in improving hygiene facilities and practices.

Issues: In the medical protection removal provision, OSHA designated the reduced blood-lead level which employees must achieve before they can return to the job from which they were removed. The industry contends that the removal periods are long and burdensome.

To address this issue commentors should provide the following information:

1. Individualized blood lead data, plus the first re-entry blood lead data (including all dates of sampling) for lead exposed employees.

2. Data for employees exposed to lead for each plant for which relief is requested. These data sets must include:

(a) Medical removal protection blood lead level for those undergoing MRP, serial blood-lead levels during the "removal-return-to-job" period, including dates on which blood-lead level determinations were made for employees at all plants;

(b) For all skilled/supervisory employees, the Agency will need information on:

—Individual blood lead levels, records of serial measurements and dates of such measurements;
—Airborne lead levels to which individual workers were exposed;
—Respiratory protective devices used by each employee (specify the type and duration of use in hours);
—Blood-lead levels for community residents who were never employed by the lead industry or otherwise experienced occupational exposure to lead. If available, these data should be related to the proximity of the residents to the plant.

Further, the applicant should address this relevant question: How much time (weeks, months) must elapse before workers removed at the "60 μg trigger" can achieve a blood-lead level of 40 μg/100 grams of whole blood and return to the job from which they were removed; a rationale for the estimates will be helpful.

Issue: The application for relief cites the Lyman and Nelson paper "Predicting Return to Work after Removal Required by Health Standards." This report analyzed the reduction in blood lead levels experienced by 87 workers in a primary lead smelter which was closed because of an employee strike. The petitioners have been asked the following specific questions with regard to this paper:

1. Identify the location of the plants where these workers are employed.

2. Show that percentage of the workforce which was represented by striking employees.

3. Submit blood-lead measurements for all individuals cited in the report. These data should cover the period 1976 to the present.

4. Provide a work history for each employee, including length of time at various job sites.

5. Describe non-occupational lead sources to which the employees were exposed and the contribution of those sources to the workers' lead burdens.

6. Submit data on type of respiratory protective devices and the duration (hours/day) such devices are worn by the employees.

7. Show the historical MRP pattern for each worker.

8. Submit Figures 5 and 6, referred to in the text, but not included in the application submitted to OSHA.

Finally, commentors should speak to the issue of (a) whether the relief the applicants are seeking can be accomplished by the temporary variance procedure on a plant-by-plant basis, and (b) whether the removal of workers at the trigger will affect the industry's technological ability to comply with the standard to prevent lead induced disease and disability.

To summarize, the five basic issues on which information was requested are as follows:

1. What per cent of workers are affected by the 60 ug/100g trigger?

2. Does this differ by industry or plant? If so, why?

3. How long does it take the blood-lead concentration of workers removed from lead exposure to reach a point at which they can be returned to work? In other words, what is the biological half life of blood-lead of workers removed from lead exposure?

4. Is there a subpopulation of workers, such as supervisors, who do not respond in the above manner?

5. Are there confounding factors with regard to the effect of blood-lead of reduction after removal, such as previous history of exposure, age, type of exposure, etc?

It has now become apparent that more time will be needed to allow adequate submissions of additional data and argument. In response, therefore, to several requests from industry and interested members of the public for additional time, OSHA has decided to further delay the effective date of the new trigger levels, provided in Sections 1910.1025(k)(1)(i)(C) and 1910.1025(k)(1)(iii)(A)(*3*), until May 1, 1981. This brief additional delay will enable all interested persons to submit their comments and information and will allow the agency to better evaluate the requests and responses to determine what long-term action, if any, is appropriate.

All interested persons are again invited to submit information and views on any issues involved in the requests for delay in the effective date of the new MRP trigger levels. Because of time limitations, all comments must be received by April 15, 1981 to be assured of consideration by the agency. Written comments should be submitted in quadruplicate, to the OSHA Docket Office, Docket No. H-004M, Room S6212, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210, telephone (202) 523-7894. The requests and comments received so far, as well as the entire March 5 letter and all comments received in response to this notice, will be available for inspection and copying at the Docket Office.

In view of the brief time available and the limited nature of the delay in the effective date provided herein, OSHA has determined that public notice and comment on this extension of the delay of the effective date are impracticable, unnecessary and contrary to the public interest, within the meaning of 5 U.S.C. 553(b) and section 6(b) of the Occupational Safety and Health Act.

Signed at Washington, D.C., this 24th day of March 1981.

Thorne G. Auchter,

Assistant Secretary of Labor.

DEPARTMENT OF EDUCATION

Office of Special Education

34 CFR Parts 104 and 300

Assistance to States for Education of Handicapped Children, and Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving or Benefiting From Federal Financial Assistance; Notice of Interpretation

AGENCY: Department of Education.

ACTION: Notice of postponement of interpretation.

SUMMARY: The Secretary of Education postpones the effective date of the notice of interpretation published in the Federal Register on January 19, 1981 (46 FR 4912). The new effective date is May 10, 1981. The Secretary takes this action in order to provide an opportunity for analyzing this interpretation.

DATE: The effective date of this interpretation is postponed until May 10, 1981.

FOR FURTHER INFORMATION CONTACT: A. Neal Shedd, telephone: (202) 245-7091.

SUPPLEMENTARY INFORMATION: On January 19, 1981 (46 FR 4912), the Secretary of Education published a notice of interpretation of Part B of the Education of the Handicapped Act and Section 504 of the Rehabilitation Act of

1973 to require a public educational agency to provide clean intermittent catheterization as a "related service" when it is required to provide a free appropriate public education, including services in the least restrictive environment, to handicapped children who are entitled to receive services under these statutes.

Pursuant to a Presidential memorandum dated January 29, 1981, the effective date of this interpretation was postponed until March 30, 1981 (46 FR 12495; February 17, 1981).

The Secretary further postpones the effective date of this interpretation. During the period of postponement the Department will review the interpretation.

BILLING CODE 4000-01-M

Office of Elementary and Secondary Education

34 CFR Parts 200 and 201

Financial Assistance to Local and State Agencies To Meet Special Educational Needs; and Financial Assistance to Local Educational Agencies for Children With Special Educational Needs

AGENCY: Department of Education.

ACTION: Amendments to final regulations.

SUMMARY: The Secretary of Education amends the final regulations for Title I of the Elementary and Secondary Education Act of 1965. The regulations provide for financial assistance to local and state agencies to meet special educational needs and financial assistance to local educational agencies for children with special educational needs. These amendments designate the provisions regarding "excess costs" and "supplement not supplant" as guidelines and make minor changes in these provisions. The Secretary makes these amendments as a result of public comments on these provisions and to relieve burdens on grantees.

DATES: Except for §§ 200.93–200.95 and §§ 201.130–144, the final Title I regulations that were published in the **Federal Register** on January 19, 1981, as amended by this document will take effect as final regulations on an interim basis on March 30, 1981. As amended by this document, §§ 200.93–200.95 and §§ 201.130–201.144 will take effect as guidelines 45 days after they are transmitted to Congress. These guidelines will be transmitted to Congress at about the same time this notice is published in the **Federal Register**. If you want to know the effective date of the guidelines, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Dr. John F. Staehle, Office of Compensatory Education, Department of Education, 400 Maryland Avenue, SW., (Room 3642, ROB-3) Washington, D.C. 20202.

SUPPLEMENTARY INFORMATION:

A. Excess Costs and Supplement, not Supplant Provisions Designated as Guidelines

Final regulations for Title I of the Elementary and Secondary Education Act of 1965 were published in the **Federal Register** on January 19, 1981 (46 FR 5136–5235). Pursuant to a Presidential memorandum, the effective date of these regulations was postponed until March 30, 1981 (46 FR 12495 (Feb. 17, 1981)).

On the same date that the final Title I regulations were published, the Department published a Notice of Proposed Rulemaking: Cross-reference (46 FR 5236 (Jan. 19, 1981)) which invited public comment on the provisions in §§ 200.93–200.95 (Excess costs) and §§ 201.130–201.143 (Supplement, not supplant). The Department has received a number of comments objecting to the burdens imposed by those provisions. In particular, a number of school administrators expressed the opinion that the final regulations regarding "excess costs" did not provide as much flexibility as the June 11, 1980 proposed regulations.

After further reviewing the final Title I regulations concerning the "excess costs" and "supplement, not supplant" requirements, the Secretary has decided to amend §§ 200.93–200.95 and §§ 201.130–201.144 to designate them as guidelines, rather than regulations. As guidelines, these provisions do not impose any requirements on grantees beyond those specified in the Title I statute. Rather, the guidelines are intended to assist agencies in meeting the statutory requirements. While the guidelines describe permissible ways of meeting the statutory "excess costs" and "supplement, not supplant" requirements, grantees may develop and pursue alternative approaches that comply. Grantees must, of course, continue to comply fully with the "excess costs" requirement in section 126(b) of the Title I statute and the "supplement, not supplant" requirements in sections 126 (c) and (d) of the Title I statute.

This notice implements the Secretary's decision by amending the final Title I regulations to make §§ 200.93–200.95 and §§ 201.130–201.144 guidelines. These guidelines will take effect 45 days after they are transmitted to Congress.

B. Changes in the Excess Costs and Supplement, not Supplant Guidelines

Section 116.94(d)(2)(ii) of the proposed Title I regulations that were published on June 11, 1980 (45 FR 39728) indicated that, in computing the number of non-Title I staff needed to meet the excess costs requirement, an agency could "disregard a fraction of a full-time equivalent staff member." In contrast, § 200.94(d)(2)(i)(B) of the final regulations reduced agency discretion by only authorizing rounding of the required full-time equivalent staff to the nearest whole number. Based on a number of public comments objecting to the burden imposed by this change, this notice amends § 200.94(d) to permit an agency to disregard a fraction of a full-time equivalent staff member in complying with the excess costs requirement.

Section 200.90 of the June 11, 1980 proposed Title I regulations paraphrased the Title I statutory prohibition against considering Title I funds in determining the amount of State aid to be paid to an LEA. This provision was renumbered as § 201.144 in the final Title I regulations published on January 19, 1981, but was inadvertently omitted in publication. This notice amends the guidelines to include § 201.144.

(Catalog of Federal Domestic Assistance, No. 13,428, Educationally Deprived Children—Local Educational Agencies and No. 13,430, Educationally Deprived Children—State Administration)

Dated: March 24, 1981.

T. H. Bell,

Secretary of Education.

The Secretary amends Parts 200 and 201 of Title 34 of the Code of Federal Regulations, as published in the **Federal Register** on January 19, 1981 (46 FR 5136–5235), as follows:

PART 200—FINANCIAL ASSISTANCE TO LOCAL AND STATE AGENCIES TO MEET SPECIAL EDUCATION NEEDS

(1) On page 5146, revise § 200.92(b) as follows:

§ 200.92 Supplement, not supplant.

* * * * *

(b) *Guidelines for LEAs.* In addition to meeting the basic requirement in

paragraph (a) of this section, and LEA that receives Title I assistance should refer to the guidelines in 34 CFR 201.130–201.143 to assist it in meeting other supplement, not supplant requirements that apply to certain State and local programs.

(2) On page 5146, revise § 200.93(a) as follows:

§ 200.93 Excess costs: introduction.

(a) *Basic standard.* (1) Except for the exemptions in 34 CFR 201.118, an agency that receives Title I assistance shall use Title I funds in compliance with the excess costs requirement in section 126(b) of Title I. Sections 200.93–200.95 are guidelines to assist agencies in meeting that requirement. While these guidelines describe permissible ways of meeting the statutory requirement, grantees may develop alternative approaches that comply.

(2) An agency complies with the requirement in section 126(b) of Title I if both of the following conditions are met:

(i) The agency provides Title I instruction as described in the guidelines in § 200.94 (Excess costs: instructional services).

(ii) The agency uses Title I funds to provide noninstructional services as described in the guidelines in § 200.95 (Excess costs: noninstructional services).

* * * * *

(3) On page 5147, revise §§ 200.94 (d)(2) and (d)(3) and remove the accompanying example, as follows:

§ 200.94 Excess costs: instructional services.

(d) * * *

(2) An agency uses Title I funds for the excess costs of an extended pull out project if either of the following conditions are met:

(i) The agency allocates to the Title I project the full-time equivalent number of non-Title I staff that—in the absence of the Title I service—would have been used to provide the non-Title I funded instructional service that is replaced with the Title I funded service.

(ii) The agency allocates to the Title I project an amount of non-Title I funds required to provide the number of non-Title I funded staff referred to in paragraph (d)(2)(i) of this section.

(3) For purposes of this section, the agency may disregard a fraction of a full-time equivalent staff member. For example, if the full-time equivalent number of staff members is 3.6, the agency is only required to provide the equivalent of 3 non-federally funded staff members.

(4) On page 5147, third column, revise the last paragraph in the example of § 200.94(f) as follows:

* * * * *

The LEA provides the appropriate number of non-Title I funded staff (disregarding a fraction of a full-time equivalent staff member). Alternatively, the LEA allocates to its Title I project the amount of funds that would be required to provide the appropriate number of non-Title I funded staff.

PART 201—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES FOR CHILDREN WITH SPECIAL EDUCATIONAL NEEDS

(5) On page 5175, revise § 201.118(a) as follows:

§ 201.118 Exclusions from the excess costs and comparability requirements.

(a) *General standard.* Subject to the requirements in this paragraph and advance determinations under paragraph (e) or (f) of this section, an LEA may exclude, for the purpose of determining compliance with the comparability requirements in §§ 201.112–201.117 and the excess cost requirement in section 126(b) of Title I—

* * * * *

(6) On page 5177, revise § 201.130 as follows:

§ 201.130 Introduction.

(a) An LEA that receives Title I funds shall use those funds only to supplement, not supplant the level of funds that would, in the absence of Title I funds, be made available from—

(1) Regular non-federal sources and from non-federal sources from State phase-in programs described in section 131(b) of Title I for the education of pupils participating in Title I projects;

(2) Non-federal sources for each of the special programs described in section 131(b) of Title I for the education of educationally deprived children, in the aggregate, in eligible school attendance areas or attending eligible schools.

(b) Sections 201.130–201.144 are guidelines to assist agencies in meeting the supplement, not supplant requirements in sections 126 (c) and (d) of Title I. While these guidelines describe permissible ways of meeting those requirements, grantees may develop alternative strategies that comply.

(7) On page 5185, § 201.144 is correctly added to read as follows:

§ 201.144 Prohibition against considering Title I funds in determining State aid.

(a) Except as provided in paragraph (b) of this section, a State may not consider Title I funds in determining—

(1) The eligibility of an LEA for State aid; or

(2) The amount of State aid to be paid to the LEA for the free public education of children.

(b) The State may provide additional State funds to an LEA on the basis of the LEA's eligibility for, or receipt of, Title I funds.

(Sec. 174, 20 U.S.C. 2814)

[FR Doc. 81-9506 Filed 3-26-81; 8:45]
BILLING CODE 4000-01-M

VETERANS ADMINISTRATION

38 CFR Part 2

Delegation of Authority

AGENCY: Veterans Administration.

ACTION: Notice of final regulation.

SUMMARY: This regulation is being amended to show the delegation of authority to the Chairman of the VA Board of Contract Appeals and Contract Appeals Board to certify copies of documents routinely issued by the Boards and to affix the VA Seal thereto.

EFFECTIVE DATES: March 17, 1981.

FOR FURTHER INFORMATION CONTACT: Morris Pullara, Jr., VA Contract Appeals Board (001B), Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 275–1750.

SUPPLEMENTARY INFORMATION: Under § 2.5 of Title 38, Code of Federal Regulations, the Administrator has delegated the authority to certify copies of public documents, records, or papers belonging to or in the VA files to persons occupying four specified positions in the Office of the General Counsel. The Veterans Administration Board of Contract Appeals and Contract Appeals Board are required to transmit authenticated copies of decisions directly to the parties involved and to issue orders and other documents which, under the provisions of 38 U.S.C. 202, require the VA Seal in order to be judicially noticed. Responsibility for certification of such copies, including affixing the seal, cannot practicably depend upon action by other elements in the agency due to geographical and organizational separation. It is therefore necessary that the Chairman be delegated authority to certify those documents which are routinely issued by the Boards.

It is the general policy of the Veterans Administration to allow time for interested parties to participate in the regulatory process (38 CFR 1.12). The amendment herein, however, is

primarily a matter of agency practice and procedures and the public regulatory process is deemed unnecessary in this instance.

This regulation is excluded from the provisions of Executive Order 12291, Federal Regulation, since it is strictly related to Veterans Administration internal organization and management.

Approved: March 17, 1981.

Rufus H. Wilson,

Acting Administrator.

Title 38, Code of Federal Regulations, § 2.5, is revised to read as follows:

§ 2.5 Delegation of authority to certify copies of documents, records, or papers in Veterans Administration files.

(a) Persons occupying or acting in the following positions in the Office of the General Counsel are authorized to certify copies of public documents, records, or papers belonging to or in the files of the Veterans Administration for the purposes of 38 U.S.C. 202: General Counsel, Associate General Counsel, Assistant General Counsel, and Deputy Assistant General Counsel.

(b) The person occupying or acting in the position of Chairman of the Veterans Administration Board of Contract Appeals and Contract Appeals Board is authorized to certify copies of decisions, orders, subpoenas, and other documents, records, or papers issued by, belonging to, or in the files of the Boards for the purposes of 38 U.S.C. 202. (38 U.S.C. 210(c)).

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 123

[SW FRL 1789-5]

Requirements for Authorization of State Hazardous Waste Programs; Extension of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of comment period.

SUMMARY: In response to a request from the Assocation of State and Territorial Solid Waste Management Officials, EPA is extending the comment period on its interim final rule amending the requirements for authorization of State hazardous waste programs.

DATES: Comments on the amendments published on January 26, 1981 (46 FR 8298) will be accepted until May 11, 1981.

ADDRESS: Comments should be sent to Docket Clerk (Docket No. 3006), Office of Solid Waste (WH-563), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: John H. Skinner, Director, State Programs and Resource Recovery Division, Office of Solid Waste (WH-563), U.S. Environmental Protection Agency, Washington, D.C. 20460, (202) 755-9107.

SUPPLEMENTARY INFORMATION: On January 26, 1981 (46 FR 8296), EPA published an interim final rule amending the requirements for authorization of State hazardous waste programs under Section 3006(c) of the Resource Conservation and Recovery Act (RCRA). The amendments made changes in the schedule and related requirements of Phase II of interim authorization. The amendments were effective upon publication. EPA announced that it would accept comments on them until March 27, 1981.

EPA has since received a request from the Association of State and Territorial Solid Waste Management Officials to extend the deadline for comments for forty-five days. The Association noted that the regulations "will have far-reaching impacts on the States and the extension will allow time for a more detailed examination and a coordinated consensus response from the Association members."

The Agency agrees that such an extension is warranted, because the January 26 amendments made significant changes in the interim authorization schedule. EPA wants to receive thoughtful and thorough comments from State officials and others and is extending the comment period so that interested persons can provide the Agency with such comments. The requirements in 40 CFR Part 123, as amended on January 26, continue in effect during this extended comment period.

Dated: March 23, 1981.

James N. Smith,

Acting Assistant Administrator for Water and Waste Management.

[FR Doc. 81-8328 Filed 3-26-81; 8:45 am]

BILLING CODE 6560-26-M

---

40 CFR Part 180

[PP 9F2198/R303; PH-FRL 1790-3]

Tolerances and Exemptions From Tolerances; Pesticide Chemicals in or on Raw Agricultural Commodities;

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for residues of the herbicide fluchloralin [*N*-(2-chloroethyl)-α,α,α-trifluoro-2,6-dinitro-*N*-propyl-p-toluidine] in or on the raw agricultural commodities peanuts, peanut forage, and peanut hay at 0.05 part per million (ppm) and peanut hulls at 0.1 ppm. This regulation was requested by BASF Wyandotte Corp. This regulation establishes the maximum permissible levels for residues of fluchloralin in or on peanuts, peanut forage, peanut hay, and peanut hulls.

EFFECTIVE DATE: Effective on March 27, 1981.

ADDRESS: Written objections may be submitted to the: Hearing Clerk, Environmental Protection Agency, Rm. M-3708, 401 M St. SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Robert J. Taylor, Product Manager (PM) 25, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 412, CM#2,1921 Jefferson Davis Highway, Arlington, Va 22202, (703-557-7066).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the Federal Register of December 24, 1980 (45 FR 85102) that BASF Wyandotte Corp., 100 Cherry Hill Rd., PO Box 181, Parsippany, NJ 07054, had filed a pesticide petition (9F2198) with the EPA. The petition proposed the establishment of tolerances for residues of the herbicide fluchloralin [*N*-(2-chloroethyl)-α,α,α-trifluoro-2,6-dinitro-[*N*-propyl-p-toluidine] in or on the raw agricultural commodities peanuts, peanut forage, and peanut hay at 0.05 part per million (ppm) and peanut hulls at 0.1 ppm. No comments or requests for referral to an advisory committee were received in response to this notice of proposed rulemaking.

The data submitted in the petition and other relevant material have been evaluated. The toxicology data evaluated included an acute oral LD_{50} study (rat) with an LD_{50} of 1,550 milligrams (mg)/kilogram (kg); a 90-day feeding study (rat) with a no-observable-Effect-level (NOEL) greater than 500 mg/kg/day; a 90-day oral dosing study (dog) with a NOEL of 5.25 mg/kg/day; a 2-year feeding study (rat) with a NOEL of 4,400 ppm (no oncogenicity); a three-generation reproduction study (rat) with a NOEL of 10,144 ppm; a teratology study (rabbit)—negative at 3,000 mg/kg; a dominant lethal mutagenicity study (rat)—

negative at 500 mg/kg; a cytogenicity study (rat)— negative at 10,144 ppm; and an 18-month feeding study (mice) with a NOEL of 4,400 ppm (no oncogenicity).

Desirable data that are lacking are a subchronic oral toxicity study in a nonrodent species longer than 90 days in duration, a teratology study on a second species, and additional mutagenicity testing. Although a subchronic oral toxicity study in dogs has not been submitted, establishment of these tolerances is acceptable, since exposure from peanuts will increase the allowable daily intake (ADI) by only 0.17 percent. The petitioner has been informed of these data deficiencies and has agreed (in his letter of June 13, 1980) to perform the studies and to remove the use from the label should the results of these studies exceed the risk criteria for chronic toxicity as stated in § 162.11 of the regulations.

Tolerances of 0.05 ppm have previously been established for fluchloralin on cottonseed and soybeans for a theoretical maximal residue contribution (TMRC) of 0.0008 mg/day in a 1.5 kg diet compared with a maximal permissible intake (MPI) of 0.1575 for a 60-kg human or 0.51 percent of the ADI. The current action will add 0.0003 mg/day to the diet for a total TMRC of 0.0011 mg/day/1.5 kg or 0.68 percent of the ADI. The ADI is based on the NOEL in the 90-day oral dosing study in dogs and a safety factor of 2,000.

There are no regulatory actions pending against continued registration of fluchloralin. The product contains a nitrosamine at levels of under 1 ppm. Based on the recent agency policy that was published in the Federal Register of June 15, 1980 (45 FR 42854) this falls below the currently acceptable risk criteria. The metabolism of fluchloralin in plants and animals has been adequately delineated for the proposed use. An adequate analytical method (gas chromatography using an electron capture detector) is available for enforcement purposes. There is no reasonable expectation of residues occurring in eggs, milk, meat, and meat byproducts of poultry and livestock, therefore § 180.6(a)(3) applies. There are no other considerations in establishment of these tolerances and it is concluded that the tolerances will protect the public health. Therefore, 40 CFR Part 180 is amended as set forth below.

Any person adversely affected by this regulation may, on or before April 27, 1981, file written objections with the Hearing Clerk, EPA, Rm. M-3708 (A-110), 401 M St. SW., Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this regulation from the OMB review requirements of Executive Order 12291 pursuant to Section 8(b) of that Order.

Effective date: March 27, 1981.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

Dated: March 19, 1981.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

Therefore, Subpart C of 40 CFR Part 180 is amended by alphabetically adding the following raw agricultural commodities in the table under § 180.363 to read as follows:

§ 180.363 Fluchloralin; tolerances for residues.

* * * * *

Commodities	Parts per million
* * * * *	
Peanuts	0.05
Peanut forage	.05
Peanut hay	.05
Peanut hulls	.1
* * * * *	

[FR Doc. 81-8825 Filed 3-26-81; 8:45 am]

BILLING CODE 6560-32-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2 and 97

[Docket 21117; FCC 81-118]

Type Acceptance of Equipment Marketed for Use in the Amateur Radio Service

AGENCY: Federal Communications Commission.

ACTION: Final rule (second report and order).

SUMMARY: This document extends the effective date of the existing regulations that require type acceptance of all external radio frequency power amplifiers and amplifier kits capable of operation below 144 MHz, affecting primarily those amplifiers used in the Amateur Radio Service. This extension is necessary as the present regulations are due to expire on April 28, 1981. The expiration of these regulations would allow the marketing of external amplifiers designed for illegal operation in and around the Citizens Band Radio Service.

DATES: The effective date of the order is April 28, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: John A. Reed, Office of Science and Technology, Washington, D.C. 20554 (202) 653-6288.

SUPPLEMENTARY INFORMATION: In the matter of amendment of Parts 2 and 97 of the Commission's Rules to require type acceptance of equipment marketed for use in the Amateur Radio Service.

Second Report and Order

Adopted: March 23, 1981.

Released: March 26, 1981.

By the Commission: Chairman Ferris not participating; Commissioner Jones absent.

1. On March 20, 1978, the Commission released a Report and Order in the above entitled matter (FCC 78-107, 43 FR 12682). That document implemented type acceptance procedures and certain technical requirements for external radio frequency power amplifiers and amplifier kits that are designed for operation below 144 MHz. The effect of that order was to require type acceptance for the majority of amplifiers used in the Amateur Radio Service (ARS). Type acceptance is a procedure whereby the Commission approves radio transmitting equipment as being capable of complying with the necessary technical specifications. Such approval, where required, is necessary before the equipment may be marketed. See 47 CFR 2.901 *et seq.* In this specific case, the type acceptance procedure allows the Commission to determine whether the external amplifiers are capable of meeting those FCC technical standards that are designed to minimize the possibility of interference and, also, to determine whether the amplifiers are intended for use only in the ARS and not in or around the Citizens Band (CB) Radio Service.

2. As noted above, compliance with the revised technical standards to allow for the commercial manufacture and marketing of these external amplifiers is enforced, in part, through our type acceptance procedures. The standards were implemented due to the large number of amplifiers being marketed and promoted for illegal operation in and around the CB Radio Service. Such illegal use of external amplifiers created a severe interference problem to television reception and to the reception of other radio services. It was estimated that in fiscal year 1978 that about four

million persons and perhaps as many as ten million persons experienced interference to televisions reception from CB radio stations. About half of this interference was caused by or intensified by the illegal use of these amplifiers. It was also predicted that this interference would significantly increase unless countered by Commission action.

3. These interference problems are detailed in earlier reports, as cited in the reference Report and Order in paragraph one and in the Notice of Proposed Rule Making (released February 28, 1977) for this docket, and will not be further repeated here. It was clear that when the Commission issued its Order on the subject in 1978, it was faced with resolving a serious national problem. In fact, the interference caused by the illegal use of external amplifiers was so severe as to require immediate implementation of the technical standards and type acceptance requirement by this Commission. Because of this rapid implementation, the technical regulations and the type acceptance requirement were made effective for only three years so that the effects of this action would be subject to a mandatory review prior to the expiration date of April 28, 1981. It was expected that this three year period would allow the Commission additional time to investigate other methods of controlling the promotion and use of external amplifiers in radio services other than the ARS and to monitor the effectiveness of the new regulations.

4. During this three year investigation period, other methods of controlling the manufacture and marketing of external amplifiers were studied. One such method was to require the showing of an appropriate amateur license prior to the purchase of amateur transmitting equipment (FCC 79–586). However, as we concluded in our first Report and Order in this Docket, no other method was considered to offer the effectiveness provided under the current type acceptance program. The problem with attempting to require retailers to ask potential buyers of amateur equipment to display their amateur licenses before they may make a purchase is that it is uncertain whether this Commission has the legal authority to impose this requirement.[1] Even if the Commission had such authority, there are two other problems. First, this type of regulation would be burdensome for retailers. Second, it is more effective for the Commission to enforce its regulations through contact with a limited number of manufacturers (i.e., through type acceptance) than with a vast number of sellers.

5. The effectiveness of the current type acceptance program in halting the promotion of external amplifiers for illegal applications has led this Commission to believe that the program should be continued. Numerous manufacturers and distributors of amplifiers designed for illegal operation in and around the CB service have ceased manufacture and marketing, although legal action was required in some instances. The majority of this litigation has already been detailed in previous Commission releases and will not be repeated in this item. Other cases are still under investigation with court actions pending and, therefore, will not be discussed. However, certain manufacturers are still promoting their non-type accepted amplifiers for illegal operations. Some U.S. Attorneys have questioned the advisability of prosecuting these manufacturers for violation of the existing type acceptance requirement due to the impending cut-off date of the regulations. These U.S. Attorneys feel that it would be inappropriate to prosecute a manufacturer for violation of a temporary regulation. Instead, most prosecutions have been for violations of the regulation that prohibits the manufacture and marketing of any external amplifier with amplification capability between 24.00 MHz and 35.00 MHz § 2.815(b) of the Commission's regulations). This form of prosecution would be sufficient provided all of the amplifiers promoted for CB operation operated within that banned frequency range. Unfortunately, many do not operate within that frequency range as manufactured. For example, without the type acceptance requirement, manufacturers would have no restrictions on producing amplifiers that can be easily altered by purchasers to operate with CB radio equipment even though those amplifiers are designed to operate above or below the prohibited frequency range. Thus, it is necessary to invoke a violation of the type acceptance regulation to cover all of the available amplifier models. That action requires a removal of the cut-off date for type acceptance in order for these regulations to be more generally effective. In light of this and the information contained in the preceding paragraphs, a continuation of the present type acceptance requirement would be in the public interest.

6. The Administrative Procedure Act permits federal agencies to forgo the usual notice and comment procedures in rule makings if "* * * public procedures thereon are * * * unnecessary." (5 U.S.C. 553(b)(3)(B)). Prior notice and comment procedures concerning a continuation of the current type acceptance requirement are unnecessary for a variety of reasons. First, the possibility of a permanent type acceptance requirement was previously subject to public comments in this Docket in the original Notice of Proposed Rule Making, 42 FR 12204, released February 28, 1977. It is not anticipated that requesting additional comments on the subject would provide the Commission with further useful information. Second, in our Report and Order in Docket No. 21117, adopted February 16, 1978, released March 20, 1978, 43 FR 12082, we indicated that the Commission might make the temporary type acceptance requirement permanent. In paragraph 12 of that Order, we stated "If at the end of this three year period it is determined that the type acceptance requirement is still necessary and that it has indeed reduced the problems caused by these amplifiers, this program can be continued by further Commission action." During this three year period, we have not received any adverse comments regarding the type acceptance requirement. Third, in our Report and Order in Docket No. 21117, we found that the type acceptance requirement itself imposed only a slight burden on manufacturers.

In paragraph 13 of that Order (while discussing § 2.1005(b) of our regulations), we stated:

> * * * No piece of radio equipment from any service should be marketed before a number of samples are tested to determine that the equipment is in compliance with our regulations. As these tests should be performed regardless of the requirement for type acceptance, the only additional expense that type acceptance would cost the manufacturer or supplier is the few hours of paperwork to compile the application and the time delay in marketing during which the Commission processes this application.

Fourth, all the Commission is now doing is making a rule permanent that was found to be in the public interest in our Report and Order in Docket No. 21117. Since we are merely continuing an existing rule, there will be no additional impact on manufacturers. Finally, as discussed above, after

[1] The provision in the Communications Act of 1934, as amended, that provides the chief support for this requirement is Section 302(a) (47 U.S.C. 302(a)). This Section authorizes the Commission to "* * * make reasonable regulations governing the interference potential of devices * * *" and further states that these regulations apply to the sale of devices. This Section has been relied on by the Commission to establish standards for radio "devices" and to prohibit retailers from selling noncomplying devices.

extensive and protractive consideration, we do not believe that there are any viable alternatives to a continuation of the type acceptance requirement.

7. The enforcement actions by the U.S. Attorneys and the Commission's Field Operations Bureau against the manufacturers of those amplifiers intended for operation around the CB service and the reduction in the availability of these amplifiers to the public have demonstrated that this method of controlling the illegal operation of these amplifiers is effective. However, the continued, though smaller, illegal market necessitates retaining these regulations. Therefore, the expiration date of the type acceptance requirement for external radio frequency power amplifiers and amplifier kits is deleted, as shown in the attached appendix.

8. Other changes to these regulations, as also shown in the appendix, will be made in accordance with the provisions of Subsections 553(b)(3)(A) and 553(b)(3)(B) of the Administrative Procedure Act (5 U.S.C. 553). These subsections allow the Commission to finalize regulations without the necessity of providing prior notice or seeking comments when the changes involve interpretative rules or "* * * when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are * * * unnecessary, or contrary to the public interest." When the regulations establishing type acceptance requirements for external amplifiers were implemented, there was a considerable rush in their preparation in order to place them into effect at the earliest possible time. This rush was due to the large number of manufacturers promoting their amplifiers for illegal operation and because of the severity of the interference problems resulting from the use of those amplifiers. As a result, some editorial errors in the regulations occurred and some regulations that were either awkward or unclear were adopted. The language of these regulations has therefore been reworded to correct the editorial errors, to clarify the requirements and to refine the statement of the requirements. Since the meaning of the regulations remains unchanged, it is considered unnecessary to issue a further Notice of Proposed Rule Making on this matter. Additionally, the prompt clarification of the existing regulations is in the public interest since the changes will make the regulations more understandable and encourage compliance. Any new problems which may arise in the specific wording of the Part 97 regulations can be considered under Docket No. 80-729 which looks toward a rewrite of the amateur regulations into a "plain language" format.

9. It should also be noted that the Commission's policy concerning waivers of the amplifier technical requirements or the type acceptance requirement is unchanged. The type acceptance requirement may still be waived for those amplifiers designed for industrial, scientific or medical (ISM) applications. Additionally, waivers of the technical requirements will be considered for those amplifiers designed to operate within the frequency range of 50.00 MHz to 54.00 MHz as long as the amplifiers can not be easily converted to operate at lower frequency ranges.

10. In view of the foregoing, this Commission is of the opinion that the amended regulations, as described above and in the attached appendix, are in the public interest, convenience and necessity. The authority for these amendments is contained in Sections 4(i), 302, 303(e), 303(f) and 303(r) of the Communications Act of 1934, as amended. Accordingly, it is ordered, effective April 28, 1981, that Parts 2 and 97 of the Commission's Rules and Regulations are amended as set out in the attached appendix. It is further ordered that this proceeding is continued.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

A. 47 CFR Part 2 is amended as follows:

1. Section 2.815 is amended by revising paragraph (c) to read as follows:

§ 2.815 External radio frequency power amplifiers.

* * * * *

(c) No person shall manufacture, sell or lease, offer for sale or lease (including advertising for sale or lease) or import, ship or distribute for the purpose of selling or leasing or offering for sale or lease, any external radio frequency power amplifier or amplifier kit capable of operation on any frequency or frequencies below 144 MHz unless the amplifier has received a grant of type acceptance in accordance with Subpart J of this Part and Subpart C of Part 97 or other relevant Parts of this Chapter. No more than 10 external radio frequency power amplifiers or amplifier kits may be constructed for evaluation purposes in preparation for the submission of an application for a grant of type acceptance.

Note.—For the purposes of this part, an amplifier will be deemed incapable of operation below 144 MHz if the amplifier is not capable of being easily modified to increase its amplification characteristics below 120 MHz, and either:

(1) The mean output power of the amplifier decreases, as frequency decreases from 144 MHz, to a point where 0 decibels or less gain is exhibited at 120 MHz and below 120 MHz; or

(2) The amplifier is not capable of even short periods of operation below 120 MHz without sustaining permanent damage to its amplification circuitry.

* * * * *

2. Section 2.1001 is amended by revising paragraph (f)(2) to read as follows:

§ 2.1001 Changes in type accepted equipment.

* * * * *

(f) * * *

(2) Modifications made pursuant to this Paragraph are limited to equipment used at licensed amateur radio stations.

* * * * *

3. Section 2.1005 is amended by revising the introductory text of paragraph (c) and paragraph (d) to read as follows:

§ 2.1005 Equipment for use in the Amateur Radio Service.

* * * * * *

(c) Any supplier of an external radio frequency power amplifier kit as defined by § 97.3(z) of this Chapter shall comply with the following requirements:

(1) * * *
(2) * * *
(3) * * *
(4) * * *
(5) * * *

(d) Type acceptance of external radio frequency power amplifiers and amplifier kits may be denied when denial serves the public interest, convenience and necessity by preventing the use of these amplifiers in services other than the Amateur Radio Service. Other uses of these amplifiers, such as in the Citizens Band Radio Service, are prohibited (CB Rule 21 of this Chapter). Examples of features which may result in the denial of type

acceptance are contained in § 97.77 of this Chapter.

PART 97—AMATEUR RADIO SERVICE

B. 47 CFR Part 97 is amended as follows:

1. Section 97.75 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 97.75 Use of external radio frequency (RF) power amplifiers.

(a) Any external radio frequency (RF) power amplifier used or attached at any amateur radio station shall be type accepted in accordance with Subpart J of Part 2 of the FCC's Rules for operation in the Amateur Radio Service, unless one or more of the following conditions are met:

* * * * *

2. Section 97.76 is amended by revising the introductory text of paragraph (a) and subparagraphs (a)(1) and (a)(5) to read as follows:

§ 97.76 Requirements for type acceptance of external radio frequency (RF) power amplifiers and external radio frequency power amplifier kits.

(a) Any external radio frequency (RF) power amplifier or external RF power amplifier kit marketed (as defined in § 2.815 of this Chapter), manufactured, imported or modified for use in the Amateur Radio Service shall be type accepted for use in the Amateur Radio Service in accordance with Subpart J of Part 2 of the FCC's Rules. This requirement does not apply if one or more of the following conditions are met:

(1) The amplifier is not capable of operation on any frequency or frequencies below 144 MHz. For the purposes of this part, an amplifier will be deemed to be incapable of operation below 144 MHz if the amplifier is not capable of being easily modified to increase its amplification characteristics below 120 MHz, and either:

(i) The mean output power of the amplifier decreases, as frequency decreases from 144 MHz, to a point where 0 decibels or less gain is exhibited at 120 MHz and below 120 MHz; or

(ii) The amplifier is not capable of even short periods of operation below 120 MHz without sustaining permanent damage to its amplification circuitry.

(2) * * *

(3) * * *

(4) * * *

(5) The amplifier is purchased in used condition by an equipment dealer from a licensed amateur radio operator who constructed or modified the equipment in accordance with § 2.1001 of the regulations and the amplifier is further sold to another amateur radio operator for use at their licensed amateur radio station.

* * * * *

BILLING CODE 6712-01-M

---

47 CFR Parts 81 and 83

Stations on Land in the Maritime Services and Alaska—Public Fixed Stations and Stations on Shipboard in the Maritime Services; Editorial Amendments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action amends sections of the Commission's rules in Stations on land and on shipboard in the maritime services to delete obsolete dates and associated language. These dates have since passed and have no present or future utility. This action is being taken to bring the rules up to date.

EFFECTIVE DATE: April 27, 1981.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Charles D. Fisher, Private Radio Bureau, (202) 632-7175.

SUPPLEMENTARY INFORMATION:

In the matter of Editorial amendment of Parts 81 and 83 of the FCC Rules and Regulations.

Order

Adopted: March 12, 1981.

Released: March 17, 1981.

1. We are editorially amending a number of sections of Part 83 of the Commission's rules to delete obsolete dates and associated language. These dates have since passed and have no present or future utility or effect. The affected sections are: 81.133, 81.361, 83.103, 83.106, 83.132, 83.133, 83.134, 83.136, 83.137, 83.155, 83.156, 83.233, 83.318, 83.320, 83.321, 83.329, 83.339, 83.359, 83.360, 83.364, 83.367, 83.472, 83.484.

2. Authority for this action is contained in sections 4(i), and 303(r) of the Communications Act of 1934, as amended, and § 0.231(d) of the Commission's rules. Since the amendment is editorial in nature, the public notice, procedure and effective date provisions of 5 U.S.C. 553 do not apply.

3. Regarding questions on matter covered in this document contact Charles D. Fisher, telephone (202) 632-7175.

4. In view of the above, it is ordered, That the rule amendments set forth in the attached Appendix are adopted effective April 27, 1981.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Federal Communications Commission.

R. D. Lichtwardt,

Executive Director.

Appendix

Parts 81 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA—PUBLIC FIXED STATIONS

1. In § 81.133 the table in paragraph (a) is revised and footnote 3 is removed and reserved as follows:

§ 81.133 Authorized bandwidth.

(a) * * *

Class of emission	Emission designator	Authorized bandwidth (kHz)
A1	0.16 A1	0.3
A2	2.66 A2	2.8
A3	6 A3	8.0
F1	[3] 0.3 F1	[3] 0.5
F3	[3] 16 F3	[3] 20
P0	Variable	Variable
A3A	2.8A3A	[3] 3.0
A3H	2.8A3H	[3] 3.0
A3J	2.8A3J	[3] 3.0

* * * * *

[3] [Reserved].

* * * * *

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

§ 83.103 [Amended]

1. Section 83.103, is amended by changing the reference in line 13 from "§ 83.75" to "§ 83.54".

2. In § 83.106, footnote 1 is removed and paragraph (a) is revised to read as follows:

§ 83.106 Required frequencies for radiotelephony.

(a) Except for vessels fitted with radiotelephone installations pursuant to § 83.442, each ship radiotelephone station licensed to operate in the band 1605–3500 kHz shall be able to receive and transmit A3J on the carrier frequency 2182 kHz. Ship stations are, additionally, authorized to receive and transmit using A3H emission for communications with foreign coast stations and with vessels of foreign registry. If the station is used for other than safety communications, it shall be capable also of receiving and

transmitting the emission A3A on at least two other frequencies in that band. Ship stations operating (1) exclusively on the Mississippi River and its connecting waterways, and (2) also on high frequency bands above 3300 kHz, shall be equipped with only one, instead of two other frequencies within the band 1605–3500 kHz in addition to the frequency 2182. Additionally, use of A3 emissions is permitted for distress and safety purposes on 2182 kHz for portable survival craft equipment having the capability to operate on 500 kHz and for transmitters authorized for use prior to January 1, 1972, in accordance with applicable rules of this part.

* * * * *

3. In § 83.132, paragraph (a)(2)(i) is revised; the existing footnote 3 is removed; and footnote 2 is revised to read as follows:

§ 83.132 Authorized classes of emission.

(a) * * *

(2) * * *

(i) For frequencies below 23 MHz designated in § 83.251(a):

* * * * *

Frequency band	Classes of emission
2182 kHz	[2]A3J
Other	[1]A3J

* * * * *

[2] Ship stations are, additionally, authorized to receive and transmit using emission A3A when communicating with coastal harbor stations employing A3A emission.

* * * * *

4. In § 83.133, the table in paragraph (a) is revised and footnote 3 is removed and reserved as follows:

§ 83.133 Authorized bandwidth.

(a) * * *

Classes of emission	Emission designator	Authorized bandwidth (kilohertz)
A1	0.16A1	0.4.
A2	2.66A2	2.8.
A3	6A3	8.0.
A9	3.2A9	25.0. [3]

* * * * *

[3] [Reserved].

* * * * *

5. In § 83.134, paragraph (a)(1) is revised and the table in paragraph (d) is revised as follows:

§ 83.134 Transmitter power.

(a) * * *

(1) For emissions A3A, A3H, and A3J: Peak envelope power (see § 83.7);

* * * * * *

(d) * * *

Area	Frequency band (s) (MHz)	Class of emission	Transmitter power
Great Lakes area and Mississippi River north of Baton Rouge, La., and connecting inland waters.	2–27.5	Any	150
Other than the above	2–4	Ship to shore:	
		A3—2182 kHz only.	[1] [2] 400
		A3H, A3A, A3J	[1] [2] [3] 150
		Ship to ship:	
		A3—2182 kHz only.	150
		A3H, A3A, A3J	150
	4–27.5	Any	[4] 1500

6. In § 83.136, the introductory clauses of paragraphs (a) (1) and (2) are revised as follows:

§ 83.136 Emission limitations.

(a) * * *

(1) When using emissions other than A3A, A3H, and A3J:

* * * * *

(2) When using emissions A3A, A3H, and A3J:

* * * * *

7. In § 83.137, the introductory clause of paragraph (c) is revised; paragraph (d) is removed and reserved; and paragraph (f) is revised as follows:

§ 83.137 Modulation requirements.

* * * * *

(c) Single sideband transmitters shall be capable of operation in the following modes:

* * * * *

(d) [Reserved]

* * * * *

(f) Single sideband transmitters shall automatically limit the peak envelope power to the authorized transmitter power.

* * * * *

8. In § 83.155, paragraph (d) is revised to read as follows:

§ 83.155 Operator(s) required by Title III of Communications Act of 1934.

* * * * *

(d) Each cargo ship of the United States which in accordance with Part II of Title III of the Communications Act, is equipped with a radiotelephone station shall for distress and safety purposes carry at least one qualified operator. Where the power of the station does not exceed 1500 watts peak envelope power for A3A, A3H and A3J emissions, such operator shall hold a radiotelephone third-class operator permit or higher class of operator authorization. Where the power of the station exceeds 1500 watts peak envelope power for A3A, A3H and A3J emissions, such operator shall, as a minimum, hold a radiotelephone second-class operator license.

* * * * *

9. In § 83.156, paragraph (b)(3) is revised to read as follows:

§ 83.156 Operator(s) required by the Safety Convention.

* * * * *

(b) * * *

(3) Where the power of the station does not exceed 1500 watts peak envelope power for A3A, A3H and A3J emissions such operator shall hold a radiotelephone third-class operator permit or higher class of operator authorization. Where the power of the station exceeds 1500 watts peak envelope power for A3A, A3H and A3J emissions such operator shall, as a minimum, hold a radiotelephone second-class operator license.

§ 83.233 [Amended]

10. In § 83.233, footnote 1 is removed and reserved.

11. In § 83.318, paragraph (a) preceding the table is revised to read as follows:

§ 83.318 Digital selective calling frequencies.

(a) The frequencies set forth in the table below are available for use by ship stations for calls to coast radiotelegraph stations by means of digital selective calling. The associated reply frequencies are also shown.

* * * * *

§ 83.320 [Amended]

12. In § 83.320, paragraph (b) is removed and reserved.

§ 83.321 [Amended]

13. In § 83.321, paragraph (c) is removed.

14. In § 83.329, paragraph (a) is revised to read as follows:

§ 83.329 Calling by narrow-band direct-printing.

(a) Until such time as a digital selective calling system and associated procedures have been agreed upon and adopted into the ITU Radio Regulations, ship stations employing narrow-band direct-printing (NB-DP) may use the frequencies designated in § 83.318 to call

United States coast radiotelegraph stations.

* * * * *

15. In § 83.339, the introductory clause of paragraph (a) is revised to read as follows:

§ 83.339 Station documents.

(a) The compulsorily fitted ship radiotelegraph station shall be provided with the following current documents:

* * * * *

16. In § 83.359, the table is revised for the listing under Intership Safety to read as follows:

§ 83.359 Frequencies in the band 156–162 MHz available for assignment.

* * * * *

Channel designation	Frequency (MHz)		Points of Communication
	Ship	Coast	
Intership Safety			
DI	156.300		a. Intership. b. For SAR: Ships and aircraft of the U.S. Coast Guard.

* * * * *

17. In § 83.360, the left hand column of the table and footnotes in paragraph (a) are removed, and paragraph (a) is revised to read as follows:

§ 83.360 Frequencies for business and operational purposes.

(a) The following carrier frequencies are available for business and operational communications with limited coast stations and other ship stations using the same carrier frequency. The conditions of use are set forth in paragraph (b) of this section.

Carrier frequency (kHz)		
2096.5	8291.1	16593.3
4125.0	8294.2	22124.0
4143.8	12429.2	22127.1
4419.4	12432.3	22130.2
6218.6	12435.4	22133.3
6221.6	16587.1	22136.4
6521.9	16590.2	

* * * * *

§ 83.364 [Amended]

18. In § 83.364(d), the reference to § 83.40 is corrected to read § 83.50

19. In § 83.367, the introductory clause of paragraph (a) is revised to read as follows:

§ 83.367 Station documents.

(a) Ship radiotelephone stations subject to the radio provisions of the Safety Convention shall be provided with the following current documents:

* * * * *

§ 83.472 [Amended]

20. In § 83.472, footnote 1 is removed, and reference to it in paragraph (c) is removed.

21. In § 83.484, paragraphs (a) and (d)(2) are revised and footnote 1 is removed to read as follows:

§ 83.484 Radiotelephone transmitter.

(a) The transmitter shall be capable of effective transmission of A3H and A3J emission on 2182 kHz, and A3J emission on 2638 kHz and at least two other frequencies within the band 1605 to 3500 kHz available for ship-to-shore or ship-to-ship communication.

* * * * *

(d) * * *

(2) The transmitter has been demonstrated, or is of a type which has been demonstrated, to the satisfaction of the Commission as capable with normal operating voltages applied of delivering not less than 60 watts peak envelope power for A3H and A3J emission on the frequency 2182 kHz and for A3J emission on the frequency 2638 kHz into either an artificial antenna consisting of a series network of 10 ohms effective resistance and 200 picofarads capacitance, or an artificial antenna of 50 ohms nominal impedance. An individual demonstration of the power output capability of the transmitter, with the radiotelephone installation normally installed on board ship, may be required whenever in the judgment of the Commission this is deemed necessary.

47 CFR Part 83

[Docket No. 18948; Gen. Docket No. 80-106; FCC 81-97]

Stations on Shipboard in the Maritime Services; Implementation of a Provision of the 1974 Safety Convention Regarding Compulsory Carriage of Radar Onboard Vessels of 1600 Tons Gross Tonnage and Over

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action will amend the rules to implement a provision of the 1974 Safety Convention. The provision requires this country to establish specifications for radar that is carried aboard ships of U.S. registry by reason of Safety Convention requirements. Additionally, a predecessor proceeding is terminated.

EFFECTIVE DATE: April 27, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Charles D. Fisher, Private Radio Bureau, (202) 632-7175.

SUPPLEMENTARY INFORMATION:

Report and Order

Adopted: March 11, 1981.
Released: March 23, 1981.

In the matter of amendment of Part 83 of the Commission's Rules to implement a provision of the 1974 Safety Convention regarding compulsory carriage of radar onboard vessels of 1600 tons gross tonnage and over.

By the Commission: Chairman Ferris not participating.

1. On March 12, 1980, the Commission adopted a Notice of Proposed Rule Making, 45 FR 19583, with the object of promulgating regulations to implement a new treaty provision about to come into force on May 25, 1980.[1] This treaty provision—Regulation 12(a) of Chapter V of the International Convention for the Safety of Life at Sea, 1974 (SOLAS), to which the United States is signatory—requires the compulsory carriage of radar by all U.S. vessels of 1600 tons gross tonnage and over on all voyages except certain voyages on the Great Lakes and their connecting and tributary waters.

2. Implementation of the SOLAS radar provision entails the establishment by the Commission of two complementary series of regulations: (1) those that are concerned with the operating characteristics of the required radar equipment, and (2) those specifying the conditions, external to the radar unit, under which the equipment will operate. These external conditions include: (1) routing of power supply wiring to the "radar equipment"; (2) a ceiling on transmitter power and a floor under antenna efficiency; (3) how to make application for inspection of the station; (4) licensing requirements for maintenance and repair personnel; (5) procedures to be followed in the event of equipment breakdown; (6) logging requirements; (7) provision of materiel for maintenance and repair (spare parts, tools, test instruments, equipment manuals); and (8) facilities for plotting.

[1] A predecessor proceeding (Docket No. 18948) also dealing with compulsory radar specifications was in effect superseded by the proceedings in the present Docket No. 80-106. Proceedings in both dockets will be terminated simultaneously.

3. With respect to the first of these sets of regulations—those addressed to the radar unit itself and referred to in the NPRM in paragraphs (a), (b) and (d) of proposed new § 83.465—support by the commenters was near-unanimous. The three specifications incorporated by reference in the three paragraphs of § 83.465 referred to, had been developed by RTCM's Special Committee 65. With a solitary exception,[2] every participant supported the positions that had been negotiated at the SC-65 meetings.

4. With regard to the second set of regulations, those dealing with administrative questions and with technical matters external to the radar, the comments received were in general of two kinds, either addressing overall questions such as FCC jurisdiction and national specifications, or dealing with specific proposed rule changes. Of the former, most of the commenters supported the proceeding, while calling for minor modifications which will be considered separately below.

5. Two of the commenters questioned the authority of the Commission to proposed rules in this matter, claiming that the Department of State had designated the Coast Guard to assume that responsibility. As noted in paragraphs 1 and 2 of the Notice of Proposed Rule Making in this Docket, the source of the FCC's authority in this matter is section 303(r) of the Communications Act of 1934, as amended. In this matter of radar specifications there was coordination with the Coast Guard. That agency was a party to the inter-agency agreement that eventuated in the U.S. Senate's understanding of the term "radar" as "radio."[3] This point was in fact specifically recommended to the attention of the Senate by the Department of State with the knowledge and concurrence of the Coast Guard.[4] The Coast Guard took an active part in the deliberations of SC-65 that formulated the radar specifications presently under consideration.

6. A similar situation holds with respect to the comment "that SC-65 is duplicating requirements of the Occupational Safety and Health Administration (OSHA)". This item was introduced after extensive informal coordination with OSHA by the Chief, FCC Laboratory Division, and it meets with their approval.

7. Thus, the Commission clearly has responsibility and authority in the matter of promulgating regulations to implement a treaty requirement for the compulsory carriage of radar.

8. Some of the commenters have remarked on the differences between the proposed FCC regulations and the minimum performance specifications that the Intergovernmental Maritime Consultative Organization (IMCO) is trying to adopt. (IMCO has not yet adopted specifications and the final recommendations will depend on negotiations still in progress.) These differences reflect a difference in aims of the two organizations and this is made explicit in the text of SOLAS. Regulation 12, Chapter V of SOLAS specifies that the radar shall be "of a type approved by the Administration". ("Administration" means, by Regulation 2(b) of Chapter I of SOLAS, "the Government of the country in which the ship is registered.") Thus each country signatory to SOLAS is called upon to develop radar specifications suitable to its own national requirements.

9. There remain the comments on specific rule proposals. These will be taken up in numerical order.

10. Section 83.107(a)—Antenna requirements. It is suggested "that the words 'good efficiency' should be more clearly spelled out in a quantitative technical manner that can be measured, such as in terms of gain, length or other physical parameters". Specifications of this sort for radar antennas (radiation pattern requirements for S- and X-band antennas) may be found in paragraph 7 of the radar specifications referred to in § 83.465(a) of the proposed rules. The text will be found on page 9 of volume II of the RTCM final report there referred to.

11. Section 83.110(b)—Maintenance of transmitter power. The commenter questions the relevance of this paragraph to the proceeding because, unlike § 83.110(a), it does not apply to ship radar stations but only to ship stations. This is true. The sole reason for its appearance in the appendix to this NPRM is that the old rule had to be modified by the addition of the phrase "in a ship station" in order to make clear that radar transmitters were *not* being referred to. ("Ship station" defined in § 83.3(e) of the Commission's rules, is in the maritime mobile service and does not include the radar equipment. "Ship radar station", defined in § 83.4(j) is in the maritime radio determination service and does not include the telegraph transmitters.) The commenter's request for deletion of the item is therefore inappropriate.

12. Section 83.115 (a) and (e).—Retention of radio station logs. A commenter requests clarification as to whether the ship radar station log is a "technical log" or a "radar operations log". The answer to this is that the "ship radar station log" is the "permanent installation and maintenance record" presently required by § 83.405(d)(1) of the regulations. The entries that are required are those given in § 83.405(d)(3) (which is presently being modified to include the contingencies of radar failure, repair and maintenance referred to in paragraphs (b) and (c) of § 83.464, discussed below). It is unnecessary to label this log as "technical" or "operations".

13. The same commenter asks that the requirement of § 83.115(e)—that logs be kept at the principal operating position—be modified to include the possibility of their being kept in the radio room. The Commission agrees and will modify its regulations in accordance with the suggested wording.

14. Section 83.464 (b) and (c).—Requirements of radar installation. Several of the commenters take exception to the proposals in paragraphs (b) and (c) of § 83.464 that radar malfunctions "be reported to the master and to the radio officer and entered into the ship radar station log by the radio officer", and that clearance of faults

---

[2] In 1974, after protracted negotiations on the subject of the size of the radar scopes to be required in "existing installations," the following compromise was made: Instead of recommending an immediate requirement for 10-inch scopes on all vessels, the RTCM would recommend, for "existing installations" only, a postponement of this requirement for at least three years (but not to extend beyond January, 1, 1980). Although ADMS was a party to the compromise agreement, ADMS and one of its member companies commented in the present proceeding that RTCM had no authority to set a compliance date in the specification. But the Commission, not RTCM, sets the effective date of the regulations.

[3] It was with this understanding that the Coast Guard issued a notice "Proposed Rules" (CGD 75-074) dated 18 September 1975 Serial 14-P-75, proposing to amend its Vessel Inspection Regulations by requiring, *inter alia*, the compulsory carriage of radar aboard certain U.S. vessels (40 FR #180, 24585 (Sept. 16, 1975)). Thus, for example, section 185.17 reads in pertinent part:

All vessels of 1600 gross tons and over in ocean or coastwise service must be fitted with a radar. Details of the application of these requirements as well as the details of the installations, must comply with the regulations under the jurisdiction of the Federal Communications Commission. . . .

Unfortunately, the FCC regulations were not issued in time to permit their reference in the final Coast Guard Rules, 26 January 1977 (42 FR #20, 3962, January 31, 1977). As a result the Coast Guard was placed in the position of issuing its final rule requiring compulsory carriage of radar without a sufficient indication of what was expected of the radar's capabilities and installation. The outcome of the present proceeding is intended to alleviate that situation.

[4] See Department of State "Letter of Submittal" respecting "eleven amendments to the Convention for the Safety of Life at Sea, 1960," transmitted to the Senate (92nd Congress, 2nd Session) by the President in his Message of July 24, 1972, seeking advice and consent. It is specifically stated therein "that 'radar' as used in the amendments is 'radio' within the meaning of Section 303(r) of the Act [the Communications Act of 1934] as amended."

"shall be entered into the ship radar station log by the radio officer". They point out that in his normal course of duties the mate on watch always reports to the master the failure of equipment and that clearance of faults may be made by a shoreside technician in which case the clearance should be logged by the technician and not by the radio officer (according to § 83.405 of the present rules). In order to avoid possible conflict with that section, the wording of paragraphs (b) and (c) of proposed § 83.464 has been modified, and § 83.405 has in its turn been modified to include the contingencies referred to in proposed § 83.464.

15. Section 83.465(c).—Requirements for tools, etc. The proposed regulation concerning carriage of tools, spares, test instruments and manuals was unique in one respect: it was based on the only recommendation of RTCM that failed of a consensus. AIMS, the sole dissenter, filed a minority report embodying less extensive lists. Speaking for the radio officers who would be called on in large measure to use these spares and associated materiel, another commenter asserted the equipment was necessary, and already being met on better than 92% of U.S. flag vessels. Accordingly, we think this was a reasonable requirement.

16. In the NPRM, the Commission requested comments "concerning the approval of these radars". However, no comments were received which directly addressed this matter. Three equipment authorization procedures were considered for marine radars: type approval, type acceptance, and verification. Type approval requires 100% testing by the Commission. Type acceptance requires that the manufacturer perform testing and submit the information to the Commission. Verification would require the manufacturer to make measurements or take necessary steps to insure that the equipment complies with the appropriate technical standards. Submittal to the Commission of a sample unit or representative data demonstrating compliance would not be required unless specifically requested by the Commission. In addition, a sample of the equipment could be requested for testing under the type acceptance program or the verification program.

17. After a study of the various equipment authorizations available, the Commission has decided to require type acceptance for marine radars based on the requirements in Part 2 of this chapter. For radars which will be used in compulsorily installed ship-radar stations, test data and measurement procedures must be submitted to the Commission along with an affidavit stating that the radar has been manufactured and tested to meet the requirements in § 83.465 of the Commission's rules. Since the Commission does not have the facilities to test for the performance requirements specified in § 83.465 and there are no established measurement procedures for these requirements, the Commission feels that this is the most equitable method of assuring compliance with the requirements. The Commission will explore the possibility of using existing test facilities, including those of other Administrations, or establishing a test facility of its own to evaluate the performance requirements. The Commission will also be evaluating the test methods used in demonstrating compliance.

18. The Commission has determined that sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354) do not apply to this rule making proceeding, because the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

19. Regarding questions on matters covered in this document contact Charles D. Fisher (202) 632-7175.

20. Accordingly, it is ordered, That, under the authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r), the Commission's rules are amended as set forth in the attached Appendix (B), effective April 27, 1981.

21. It is further ordered, That the proceedings in Docket Numbers 18948 and 80-106 are terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix B

Part 83 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

1. In § 83.70, paragraph (b) is amended by adding the following sentence to the end of the text to read as follows:

§ 83.70 Application for inspection and certification.

* * * * *

(b) * * *

In the case of ship radar stations, the license of the service representative shall, in addition, bear the radar endorsement.

* * * * *

2. In § 83.107, paragraph (a) is revised to read as follows:

§ 83.107 Antenna requirements.

(a) The antenna(s) of each ship station and ship radar station compulsorily provided on board a vessel for safety purposes pursuant to statute or international agreement shall, insofar as is practicable in each case, have electrical characteristics that will, in conjunction with the particular transmitting apparatus employed, assure good efficiency in the conversion of antenna power to radiated power.

* * * * *

3. Section 83.110 is revised to read as follows:

§ 83.110 Maintenance of transmitter power.

(a) The actual power of each radio transmitter in a ship station or ship radar station shall, insofar as is practicable, be no more than that necessary to carry on the service for which the station is licensed and in no event more than 20 percent above the power specified in the license.

(b) Except for transmitters using single sideband and independent sideband emissions, each radio transmitter in a ship station, rated by the manufacturer as being capable of a plate input power in excess of 200 watts or carrier power in excess of 100 watts, shall be fitted with the instruments necessary to determine the transmitter power during its operation.

4. In § 83.115, paragraphs (a)(1), (a)(2) and (e) are revised to read as follows:

§ 83.115 Retention of radio station logs.

(a) * * *

(1) Station logs involving communications or other entries incident of a distress or disaster shall be retained by the station licensee for a period of 3 years from date of entry;

(2) Station logs which include entries of communications other matter incident to or involved in an investigation by the Commission and concerning which the station licensee has been notified shall be retained by the station licensee until such licensee is specifically authorized in writing by the Commission to destroy them;

* * * * *

(e) The logs of the bridge-to-bridge and ship radar stations shall be retained at their respective principal operating locations on board the vessel for a period of not less than 30 days from the date of entry. The ship radar station log may alternatively be retained during this period in the radio room. After the 30-day period these logs may be removed from the principal operating locations of their respective stations and filed at a place where they will be readily available to an authorized representative of the Commission upon request, and shall be retained as stipulated by paragraph (a) of this section.

5. Section 83.138 is revised to read as follows:

§ 83.138 Special requirements for ship radar transmitters.

(a) Each radar transmitter authorized in a ship-radar station must be type accepted or type approved by the Commission. After April 27, 1981, radar transmitters will only be type accepted pursuant to the type acceptance procedure set forth in Part 2 of this chapter. Radar transmitters type approved prior to the effective date for type acceptance may continue to be licensed.

(b) In order to license a type accepted or type approved radar for use in a compulsorily installed ship-radar station, it must comply with the requirements in § 83.465. The grantee of such a type accepted or type approved radar transmitter shall demonstrate compliance with the performance requirements by submitting the test data and the measurement procedures employed. The grantee shall also submit a signed affidavit which states:

This radar has been manufactured and tested to meet the requirements specified in Section 83.465 of the Commission's Rules. To the best of my knowledge the test data is correct and the tests have been performed in accordance with the procedures described. Each unit manufactured will conform to the unit tested within the variations that can be expected due to quantity production and testing on a statistical basis.

(c) In addition to meeting all other applicable requirements, all transmitters shall comply with the following limitations and conditions:

(1) The design and construction of the radar transmitter shall be such that, when properly installed, its use will not produce harmful interference to any other radio determination service or any maritime mobile service;

(2) The radar transmitter shall not have means available for any external adjustment which can result in a deviation from the terms of the station authorization or any deviation from the applicable technical requirements for ship-radar stations stipulated in this part.

6. In § 83.405, subparagraph (d)(1) is revised by adding a phrase to the end of the text and subparagraph (d)(3) is amended by redesignating present entry (vi) as entry (vii), and inserting a new entry (vi) as follows:

§ 83.405 Special provisions applicable to ship radio stations.

* * * * *

(d) * * *

(1) The station licensee of each ship-radar station shall provide and require to be kept at the station a permanent installation and maintenance record. Entries in this record shall be made by or under the personal direction of the responsible installation, service, or maintenance operator concerned in each particular instance, but the station licensee shall have joint responsibility with the responsible operator concerned for the faithful and accurate making of such entries as are required by this paragraph and by paragraph (b) of § 83.464.

* * * * *

(3) * * *

(vi) On vessels with radar installations compulsorily installed, such entries as are required by paragraph (b) of § 83.464.

(vii) The name, license number, and date of the ship-radar operator endorsement on the first or second class radio operator license of the responsible operator performing or immediately supervising the installation, servicing, or maintenance.

* * * * *

7. The title of Subpart R is revised to read as follows:

Subpart R—Radiotelegraph and Ship Radar Stations Provided for Compliance With Part II of Title III of the Communications Act or the Radio Provisions of the Safety Convention

8. Section 83.442 is revised to read as follows:

§ 83.442 Radio station.

The radio station required to be provided on a ship by reason of the provisions of part II of title III of the Communications Act, or on a U.S. ship by reason of the Safety Convention, shall comply in an efficient manner with the provisions of this subpart in addition to all other applicable requirements of this part. The radio station consists of a radiotelegraph station and a ship radar station. The radiotelegraph station comprises a main and a reserve radiotelegraph installation, electrically separate and electrically independent of each other (except as otherwise provided in paragraph (b) of § 83.443, a radiotelephone installation [1] and such other equipment as may be necessary for the proper use and operation of these installations. The ship radar station comprises a radar installation and such other equipment and facilities as may be necessary for its proper use and operation.

9. Section 83.447 is revised to read as follows:

§ 83.447 Routing of power supply wiring.

The conductors connecting the main power supply to the main installation, and those connecting the reserve power supply to the reserve installation, and those connecting the radar power supply to the ship radar station, shall be so routed as to ensure adequate protection from mechanical injury, shall be protected from overload, and shall be kept clear of electrical grounds.

§ 83.460 [Redesignated from § 83.464.]

10. Redesignate present § 83.464 as § 83.460 and add a new § 83.464 as follows:

§ 83.464 Requirements of radar installation.

All radar installations provided to meet the requirements of the Safety Convention shall comply with the following conditions in addition to all other applicable requirements of Part 83 of this chapter.

(a) The main display position of the radar station shall be located in the wheelhouse and the radar shall be capable of being switched on and off

[1] Effective January 1, 1980, radiotelephone installations are required.

and operated from that position. The installation shall be such that the radar functions normally within the guidelines set by § 83.465.

(b) In accordance with the provisions of paragraphs (c) and (d) of § 83.405, an entry shall be made without undue delay in the ship radar station log whenever: (1) the radar becomes inoperative or its output becomes in any way suspect; (2) a radar fault is cleared (the entry to include the means whereby the clearance was accomplished); and (3) routine or extraordinary maintenance is carried out.

(c) A reflection plotter shall be available and facilities for plotting provided as necessary.

11. Add new § 83.465 as follows:

§ 83.465 Ship radar station.

All compulsorily installed ship radar stations shall, in addition to meeting all other relevant provisions of this chapter, comply with the applicable radar specifications issued by the Radio Technical Commission for Marine Services under date of July 18, 1978, as given in the Final Report of Special Committee 65—Ship Radar. These requirements shall take effect on April 27, 1981 and shall not be retroactive. These specifications may be obtained from the Radio Technical Commission for Marine Services, c/o Federal Communications Commission, Washington, D.C. 20554 or from the Commission's Private Radio Bureau. The applicable specifications hereby incorporated by reference in this subpart are the following:

(a) For radar equipment installed after May 25, 1980, the applicable document is entitled "Performance Specification for a General Purpose Navigational Radar Set for Oceangoing Ships of 1600 Tons Gross Tonnage and Upwards, *For New Radar Installations.*" This specification including its Appendix A—Design and Testing Specifications—may be found in Part I of Volume II of the SC-65 Final Report.

(b) For equipment installed before May 25, 1980, the applicable document is entitled "Performance Specification for a General Purpose Navigational Radar Set For Oceangoing Ships of 1600 Tons Gross Tonnage and Upwards *For Ships Already Fitted.* This specification including its Appendix A—Design and Testing Specifications—may be found in Part I of Volume II of the SC-65 Final Report.

(c) Requirements for Tools, Test Instruments, Spares and Technical Manuals may be found in Appendixes I, II, III and IV of Part IV of Volume III of the SC-65 Final Report.

(d) Specifications for reliability testing may be found in Part V of Volume III of the SC-65 Final Report under the title "Equipment Reliability Specification for Design and Production of Radar, Collision Avoidance, and Marine Radar Interrogator—Transponder Equipment".

BILLING CODE 6712-01-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 214

Nonimmigrant Classes; Effect of Strike; Withdrawal of Provisions Relating to Intra-company Transferees

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Withdrawal of paragraph of Final Rule.

SUMMARY: In the **Federal Register** of January 19, 1981 [46 FR 4856], the Service published a final rule which sets forth restrictions on the admission and continued employment of nonimmigrant temporary workers, intra-company transferees, and students in the occupations and at the places of strikes or other labor disputes involving work stoppages. This notice serves as a withdrawal of that provision in the final rule which relates to intra-company transferees. The remaining provisions of the final rule shall be effective on March 30, 1981.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT:

For general information: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 Eye Street, NW., Washington, DC 20536, Telephone: (202) 633-3048.

For specific information: Michael Heilman, General Attorney, Immigration and Naturalization Service, 425 Eye Street, NW., Washington, DC 20536, Telephone: (202) 633-2620.

SUPPLEMENTARY INFORMATION: On January 19, 1981 [46 FR 4856] the Immigration and Naturalization Service published a final rule which sets forth restrictions on the admission and continued employment of nonimmigrant temporary workers, nonimmigrant intra-company transferees, and nonimmigrant students in the occupations and at the strike sites or other labor disputes involving work stoppages. The rule was to be effective on February 18, 1981, but the effective date was postponed until March 30, 1981 to comply with the President's Memorandum of January 29, 1981, which required agencies to postpone pending final regulations for a period of 60 days. The Service published notice of postponement of the effective date of the final rule at 46 FR 10901 on February 5, 1981.

After appropriate review of the postponed rule by the Office of Management and Budget and the Service, it has been determined that the provisions relating to the work authorization of nonimmigrant intra-company transferees should be withdrawn from the final rule pending further review. Therefore, paragraph (l)(3a) *Effect of Strike*, § 214.2, relating to intra-company transferees (defined in Section 101(a)(15)(L) of the Act) is removed from the final order before it becomes effective on March 30, 1981.

For the reasons set out in the preamble, 8 CFR 214.2(l)(3a) *Effect of Strike*, in FR Doc. 81-1769 (46 FR 4858, dated January 19, 1981), is withdrawn.

(Secs. 103, 214; 8 U.S.C. 1103, 1184)

Dated: March 25, 1981.

Doris M. Meissner,

Acting Commissioner of Immigration and Naturalization.

[FR Doc. 81-9048 Filed 3-26-81; 10:40 am]
BILLING CODE 4410-10-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2613 and 2615

Office of Management and Budget Approval of Regulations Under the Federal Reports Act

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of approval of recordkeeping and reporting requirements.

SUMMARY: This notice announces the effective date of the recordkeeping and reporting requirements of 29 CFR Part 2613, Employer Liability for Single Employer Plan Terminations, and 29 CFR Part 2615, Determination of Plan Sufficiency and Termination of Sufficient Plans. When originally published on January 28, 1981, these regulations noted that the recordkeeping and reporting requirements would be effective on the later of the effective date of the regulation or the date the PBGC published an announcement of OMB approval. On March 7, 1981, OMB approved both of these regulations. Accordingly, the recordkeeping and reporting requirements of 29 CFR Parts 2613 and 2615 are effective on April 1, 1981.

EFFECTIVE DATE: April 1, 1981.

SUPPLEMENTARY INFORMATION: On January 28, 1981, the Pension Benefit Guaranty Corporation ("PBGC") published a regulation on Employer Liability for Single Employer Plans, 46 FR 9520 and a regulation on Determination of Plan Sufficiency and Termination of Sufficient Plans, 46 FR 9532. Both of these regulations were made effective March 1, 1981, with the proviso that all recordkeeping and reporting requirements of the regulations would be stayed beyond the March 1 date unless, prior to that date, PBGC received the approval of the Office of Management and Budget, as required under 44 U.S.C. Chapter 35, the Federal Reports Act. The regulations further stated that upon receipt of OMB approval, PBGC would publish an announcement of that approval or any modifications to meet OMB requirements. Accordingly, the effective date of the recordkeeping and reporting requirements of both regulations was to be the later of March 1, 1981 or the publication of the announcement of OMB approval.

On February 19, 1981, PBGC published a notice in the **Federal Register** (46 FR 12970) delaying the effective date of these two regulations until April 1, 1981, pursuant to the President's Memorandum on Postponement of Pending Regulations, dated January 29, 1981, and published in the **Federal Register** on February 6, 1981 (46 FR 11227).

OMB has now approved the recordkeeping and reporting requirements of both the employer liability and plan sufficiency regulations. The approval was given on March 7, 1981, for use through December 31, 1982. The OMB approval number for 29 CFR Part 2613, Employer Liability for Single Employer Plan Terminations is No. 1212-0017. The OMB approval number for 29 CFR Part 2615, Plan Sufficiency and Termination of Sufficient Plans is No. 1212-0018. Accordingly, the regulations, including all recordkeeping and reporting requirements, will be effective April 1, 1981.

Issued at Washington, D.C. on this 24th day of March, 1981.

Robert E. Nagle,

Executive Director, Pension Benefit Guaranty Corporation.

[FR Doc. 81-9367 Filed 3-26-81; 8:45 am]

Proposed Rules

Federal Register
Vol. 46, No. 59
Friday, March 27, 1981

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food Safety and Quality Service

9 CFR Parts 317 and 381

[Docket No. 80-068N]

Prior Labeling Approval Pilot Program

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Advance notice of proposed rulemaking; extension of pilot program.

SUMMARY: On October 31, 1980, the Food Safety and Quality Service (FSQS) published in the **Federal Register** a document announcing that, in an effort to streamline its regulatory procedures, it is considering amending the meat and poultry inspection regulations to include the delegation of certain labeling authority to Inspectors-in-Charge in the field. A pilot program began December 1, 1980, in three selected meat and poultry inspection areas. In an effort to obtain additional information and experience in order for the Agency to make an informed decision concerning any amendment to the regulations under consideration, the pilot program is being extended 120 days beyond the March 31, 1981, termination date.

DATE: Pilot program to be extended until July 29, 1981.

FOR FURTHER INFORMATION CONTACT: Ms. Joan Moyer Schwing, Deputy Director, Meat and Poultry Standards and Labeling Division, Compliance Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–4293.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to the authority contained in the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*), FSQS conducts a program for approving labels and other labeling prior to their use on federally inspected meat and poultry products.

In an effort to streamline the prior approval process, which had been operated exclusively at Agency headquarters in Washington, D.C., a joint Compliance/Meat and Poultry Inspection (MPI) Task Force recommended that FSQS delegate certain labeling approval authority to Agency field offices. FSQS published an advance notice of proposed rulemaking on October 31, 1980 (45 FR 72197), in which it announced that it would test the feasibility of this recommendation.

The regulatory changes under consideration would:

1. Allow the Inspector-in-Charge to approve final labeling which is identical to a sketch previously approved by the Washington Office;

2. Separate labeling into two distinct classes—"simple" and "nonsimple" labeling, as described in the advance notice of proposed rulemaking, and;

3. Delegate the labeling approval authority for simple labeling to the Inspector-in-Charge at the field level.

Three areas were selected for the pilot program. They were: Missouri (Southwestern Region), Kentucky (Southeastern Region), and the Hyattsville area, including Maryland, Delaware, and the District of Columbia (Northeastern Region). The comment period closed December 31, 1980, but was reopened January 23, 1981, (46 FR 7387) to February 23, 1981. The pilot program commenced December 1, 1980, and was originally scheduled to terminate March 31, 1981.

Extension

The Agency has decided to extend the pilot program for 120 days beyond March 31, 1981, until July 29, 1981. This extension will permit the continued operation of the pilot program while the Task Force analyzes the data already gathered from the program. The purpose of the extension is to obtain additional information and experience needed by the Agency to make an informed decision concerning any proposed amendment to the meat and poultry inspection regulations. The extension will also permit industry and the Agency to gain additional experience in the field with the pilot program procedures at no additional government expense. Businesses which have found participation in the program to be beneficial can continue to voluntarily submit their labels for approval to the field inspectors until the pilot program concludes.

After considering the comments received in response to the notice of October 31, 1980, and after evaluating the results of the pilot program, FSQS will determine whether field delegation of certain labeling approval authority should be proposed as an amendment to the meat and poultry inspection regulations. Notice of the Agency's findings, including any proposed rulemaking, will be published in a future issue of the **Federal Register**.

Dated: March 25, 1981.

Donald L. Houston,

Administrator, Food Safety and Quality Service.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

[Release No. 34-17644; File No. S7-873]

Customer Complaint Registries

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: The Commission has published notice of a proposed rule concerning the establishment of customer complaint registries. In view of several requests to extend the period for public comment received by the Commission from parties with a substantial interest in the proposed rule, the Commission has determined to extend the period for public comment to May 1, 1981.

DATES: Comments must be received on or before May 1, 1981.

ADDRESSES: All comments should refer to File No. S7–873 and should be sent in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549. All submissions will be made available for public inspection at the Commission's Public Reference Room, Room 6101, 1100 L Street, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:
Stuart Strauss, Esq., Division of Market Regulation, 500 North Capitol Street, Washington, D.C. 20549, (202) 272-2413.

SUPPLEMENTARY INFORMATION: On February 19, 1981, the Commission published for public comment proposed Rule 17a-24 concerning the establishment of customer complaint registries.[1] The period for public comment with respect to proposed Rule 17a-24 is due to expire on March 20, 1981. The purpose of this release is to extend the comment period on the proposed rule to May 1, 1981. The Commission has recently received requests from the Municipal Securities Rulemaking Board, the Public Securities Association, the Securities Industry Association, the Chicago Board Options Exchange and Waddell & Reed, Inc. to extend the time period for the submission of public comments. In view of requests from these parties, who have a substantial interest in the proposed rule, the Commission has determined that the comment period should be extended in order to ensure an adequate opportunity for all interested persons to comment on the proposed rule.

Accordingly, all interested persons are invited to submit in writing, no later than May 1, 1981, 10 copies of their views concerning proposed Rule 17a-24 to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Room 892, 500 North Capitol Street, Washington, D.C. 20549. All submissions should refer to File No. S7-873 and will be available for public inspection at the Commission's Public Reference Room, Room 6101, 1100 L Street, NW., Washington, D.C. 20549.

By the Commission.

George A. Fitzsimmons,
Secretary.

March 20, 1981.

BILLING CODE 8010-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 655

Labor Certification Process for the Temporary Employment of Aliens in Agriculture: Adverse Effect Wage Rate Methodology; Proposal to Withdraw Revised Rule

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of proposed rulemaking; withdrawal of rule.

SUMMARY: The Department of Labor proposes to withdraw the final rule published on January 16, 1981, which would have established a new methodology for computing adverse effect wage rates for the temporary alien agricultural labor certification program. Adverse effect wage rates are wage rates which must be offered and paid to U.S. and alien workers by employers seeking to employ temporarily nonimmigrant alien agricultural workers.

DATES: The public is invited to file written comments on this proposal to withdraw the final rule. Comments must be filed on or before April 27, 1981. In view of the issuance of this proposed withdrawal of the rule, the effectiveness of this rule is further suspended until the Department takes final action on the proposed withdrawal. Since this regulation has never gone into effect and since the agency is herewith proposing to revoke this regulation for the reasons stated, we believe it would be inappropriate to require compliance with this regulation during the brief period until a final determination is made. Under the circumstances, the agency also finds that separate notice and public comment on this further brief deferral of the effective date is impractical and unnecessary within the meaning of section 553(b)(3)(B) of the Administrative Procedure Act.

ADDRESS: Written comments on the proposal to withdraw the final rule may be mailed to Mr. David O. Williams, Administrator, United States Employment Service, Employment and Training Administration, United States Department of Labor, Room 8000—Patrick Henry Building, 601 "D" Street, NW., Washington, D.C. 20213.

FOR FURTHER INFORMATION CONTACT:
Mr. Kenneth Bell (telephone: 202-376-6297).

SUPPLEMENTARY INFORMATION: On January 16, 1981, a document was published in the Federal Register announcing a final rule revising the adverse effect wage rate methodology for the temporary alien agricultural labor certification program. 20 CFR § 655.207; 46 FR 4568. The effective date of that final rule was deferred through March 30, 1981, in response to the President's January 29, 1981, Memorandum to the Secretary of Labor and other cabinet officials. 46 FR 11253 (February 6, 1981). The revised rule is being withdrawn at this time, however, so that the subject of adverse effect wage rates may be included in the Department of Labor's broader review of its policies regarding immigration, refugees, and other issues dealing with the admission of aliens to the United States. The rulemaking record preceding the issuance of the final rule will be included in the Department's review process.

The approach of the 1981 harvest season necessitates the issuance of adverse effect wage rates as soon as possible. Since the methodology at 20 CFR 655.207 (1980) remains in effect, and requires that adverse effect wage rates be issued pursuant to it annually, a separate notice document is being published in the Federal Register, announcing agricultural adverse effect wage rates for 1981.

Accordingly, it is proposed that the final rule revising 20 CFR 655.207, published on January 16, 1981, at 46 FR 4568 (FR Doc. No. 81-1623), be withdrawn and the rulemaking closed.

Development of Proposed Rule

The proposed rule was prepared under the direction and control of Mr. David O. Williams, Administrator, United States Employment Service, Employment and Training Administration, United States Department of Labor, Washington, D.C.

Regulatory Impact

If this proposed rule is adopted, the effect would be to retain the present adverse effect wage rate methodology contained in 20 CFR 655.207 (1980). That regulation impacts upon agricultural employers, in general, less than the rule being withdrawn. At the same time, 20 CFR 655.207 (1980) maintains a system of adverse effect wage rates to protect U.S. workers from the adverse effect of the importation of temporary alien agricultural workers.

The regulatory and economic impact of the rule proposed to be withdrawn and the current adverse effect wage rate methodology were discussed at great length in the document published at 46 FR 4568 (January 16, 1981).

For the above reasons, it has been determined that this proposal to withdraw the January 16, 1981, final rule is not so major as to require the preparation of a regulatory impact analysis. See E.O. 12291 (February 17, 1981). This shall also reflect that the Secretary of Labor has certified, in accordance with 5 U.S.C. 605(b), that the proposed regulation in this document will not have a significant impact on a substantial number of small business entities.

---

BILLING CODE 4510-30-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Ch. I

[Docket No. 81N-0004]

Policy for Irradiated Foods; Advance Notice of Proposed Procedures for the Regulation of Irradiated Foods for Human Consumption

AGENCY: Food and Drug Administration.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Food and Drug Administration (FDA) is considering proposing procedures for regulating irradiated foods. As a first step, FDA is making available to the public for comment the report of an internal agency task force, the Bureau of Foods' Irradiated Food Committee. The agency is publishing this notice to encourage interested persons to submit pertinent data and to express their views to aid in FDA's decisions on this subject. The preamble to any proposed procedures for the regulation of irradiated foods will include consideration of comments received in response to this notice.

DATE: Comments, information, and data by June 25, 1981.

ADDRESS: Written comments and material to the Dockets Management Branch (formerly the Hearing Clerk's office), (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Clyde A. Takeguchi, Bureau of Food (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION:

Introduction

In 1958, the Congress amended the Federal Food, Drug, and Cosmetic Act (the act) prohibiting the use of a new food additive until the sponsor establishes its safety and FDA issues a regulation specifying conditions of safe use. This amendment was the result of an extensive examination of the safety of the American food supply and the recognition that substances added to food may have a potential harmful effect.

Congress also showed concern over a new method of food preservation with ionizing radiation and specifically included sources of radiation in the definitions of food additive (section 201(s)) and adulterated food (section 402(a)(7)) of the act. Section 201(s) states: "The term 'food additive' means *any substance* the intended use of which results or may reasonably be expected to result, directly or indirectly, in its becoming a component or *otherwise affecting the characteristics of any food (including any substance intended for use in* producing, manufacturing, packing, *processing*, preparing, *treating*, packaging, transporting, or holding *food; and including any source of radiation intended for any such use),* * * *" [emphasis added]. The adulteration clause, section 402(a)(7) states: "A food shall be deemed to be adulterated— * * * (a) * * * (7) if it has been intentionally subjected to radiation, unless the use of the radiation was in conformity with a regulation or exemption in effect pursuant to section 409." The specific inclusion of irradiated food in the amendment shows clearly that the FDA is responsible for regulating the use of irradiated foods by requiring a rigorous review of the potential hazards associated with this food treatment.

Background

Food irradiation may involve the following sources of ionizing radiation: gamma radiation from radionuclides, high energy electrons derived from electron beam accelerators, and X-rays. A variety of technical effects such as sprout inhibition, insect control, pasteurization, and food sterilization have been demonstrated.

These technical effects are a function of the absolute amount of energy absorbed by food (expressed as radiation dose in rads). In considering the safety of irradiated foods, the agency has considered both the induction of new radioactive species and production of toxic radiolytic products. The question of induction of new radioactive species was resolved in the early 1960's: the accumulated evidence shows that the use of ionizing radiation of appropriate source energy levels does not induce any detectable radioactivity in foods when measured by methods that can easily detect the presence of radioisotopes that occur naturally in foods. The question of the safety of radiolytic products is addressed in the Bureau of Foods' Irradiated Food Committee report. (A National Bureau of Standards paper, "Radioactivity Criteria for Radiation Processing of Foods" by H. W. Koch and E. H. Eisenhower, is on file with the FDA Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857 and may be seen from 9 a.m. to 4 p.m. Monday through Friday. The Bureau of Foods' Irradiated Food Committee report is also on file and copies are available on request from the Dockets Management Branch, (address above)).

Applications for food irradiation extend from low doses for limited shelf-life extension to high doses for complete sterilization of foods. Existing alternative methods for achieving these effects in foods require the use of a variety of chemical and physical means. For example, irradiation might be used as a substitute for food additives (nitrite), fumigants (ethylene dibromide, ethylene oxide), and plant regulators (maleic hydrazide), and as a food processing technique for food preservation (canning, pasteurization).

In the 1960's FDA received several petitions for regulation of irradiation processing for various types of foods. At present only irradiation for sprout inhibition of potatoes and insect disinfestation of wheat and wheat flour are approved, and there has been no commercial application of these approved uses.

There have been many difficulties encountered in the process of determining whether irradiated foods are safe. In the past, toxicological indices and protocols were applied to irradiated foods as if the whole irradiated food were a discrete chemical entity similar to a "conventional" food additive. This approach was based on section 409(c)(5)(A) of the act, which states: "In determining * * * whether a proposed use of a food additive is safe, the Secretary shall consider among other relevant factors—(a) the probable consumption of the additive and of any substance formed in or on food because of the use of the additive; * * *."A major problem with the safety evaluation of irradiated foods was the lack of knowledge of the identity, amount, and toxicity of the radiolytic products formed in food by irradiation. Thus, irradiated food, a food containing unknown amounts of radiolytic products formed by the irradiation process, was

tested for safety using chronic animal feeding studies.

Evaluating the safety of irradiated foods by such testing methods was impractical, for several reasons. The most significant problem was the limited ability to obtain a "safety factor" from a classical dose response curve obtained from animal feeding studies. Because irradiated food itself was considered the "chemical" to be tested in these studies, it was very difficult to feed the exaggerated amounts of food that are necessary for the purpose of traditional toxicity testing. For example, it is not possible to obtain a 100-fold safety factor if the food fed to animals is greater than 1 percent of the total human diet. It was further recognized in early studies that increasing the radiation dose (10x, 100x, etc.) as a means of exaggerating the amount of radiolytic products is not a viable alternative for practical as well as theoretical reasons.

The renewed interest in irradiation as a possible safe alternative to chemicals in food led the agency to review the complex issue of irradiated foods. An internal FDA task force, the Bureau of Foods's Irradiated Food Committee, was formed to evaluate the agency's policy on irradiated foods according to the current state-of-the-art knowledge in toxicology and radiation chemistry and to recommend criteria for safety evaluation. The Committee submitted its final report to the Director, Bureau of Foods, FDA, in August 1980.

The Committee has submitted the following recommendations:

a. Food irradiated at doses of 100 kilorads (krad) or less will be considered wholesome and safe for human consumption.

b. Food irradiated at doses exceeding 100 krad will be subject to toxicological testing consisting of a battery of four short-term mutagenicity tests and two 90-day feeding studies (one rodent, one nonrodent mammalian species).

c. A food class comprising no more than 0.01 percent of the daily diet and irradiated at doses of 5 megarads (Mrad) or less will be considered safe for human consumption without toxicological testing.

The work of the Committee did not include a complete evaluation of existing toxicologic data. The Committee focused on how the safety of irradiated foods can be scientifically evaluated, applying scientific principles, and not on whether any irradiated food has been demonstrated to be safe. Hence, these recommendations were based on: (1) projected levels of human exposure, (2) qualitative and quantitative estimates of radiolytic products and how these compare with common food constituents in the human diet, and (3) state-of-the-art sensitivity of toxicological tests.

The agency has accepted the Committee's report on the safety evaluation of irradiated foods and will supplement this report with recent experimental data relevant to the safety of irradiated foods.

The agency is considering the following actions:

1. Proposal of a regulation on the Commissioner's initiative under section 409 and other provisions of the act permitting irradiation of any food at a dose not exceeding 100 krad. FDA is initially considering monitoring food irradiation at such a dose by a registration process. Alternatively, FDA is also considering requiring a limited petition that demonstrates the intended technical effect of the process but without the additional safety data that would ordinarily be required to support a food additive petition.

2. Publication of guidelines for the preparation of petitions seeking FDA approval for food irradiation at a dose exceeding 100 krad.

3. Adoption of a policy that a food class comprising only a minor portion of the daily diet and irradiated at a dose of 5 Mrad or less may be considered safe for human consumption based upon minimal biological testing.

FDA also will consider the report of the Joint FAO/IAEA/WHO Expert Committee on Wholesomeness of Irradiated Food in its evaluation. This international committee, sponsored by the Food and Agriculture Organization, International Atomic Energy Agency, and the World Health Organization, first met in 1976 to review and assess all data on the wholesomeness of irradiated foods and to identify specific uses of food irradiation where data were sufficient to conclude that the process could be used safely. The most recent meeting of this Committee in Geneva from October 27 to November 3, 1980, was held to review data accumulated worldwide since 1976 to establish the wholesomeness of irradiated foods. The Committee's proceedings will have a direct bearing on any Codex Alimentarius standards that are developed for irradiated foods and sent to member States for approval.

Request for Comments

FDA invites public comment on all aspects of the agency's proposed food irradiation policy. The agency is particularly interested in receiving substantive comments on the Bureau of Foods' Irradiated Food Committee report, pertinent data on the safety of irradiated foods, and suggestions for any necessary safeguards for the irradiation processing of food. These comments will aid FDA in considering its irradiated foods policy. The agency is also aware of the following issues which may have a bearing on its deliberation:

1. Whether there is need for specific good manufacturing practice regulations, including any necessary safeguards, for the irradiation processing of food.

2. Whether there is need for labeling of irradiated foods. The present regulations require the following labeling declarations: "Treated with ionizing radiation" or "Treated with electron radiation" on retail packages, and "Treated with ionizing radiation—do not irradiate again" or "Treated with electron radiation—do not irradiate again" on wholesale packages and on invoices or bills of lading of bulk shipments.

3. The environmental impact of foods processed by irradiation or of the process itself.

4. The economic impact of the proposed agency actions, including any specific good manufacturing practice regulations and any labeling requirements that may be adopted. The proposed changes in criteria for evaluating the safety of processing of food may impose a less costly burden on food processors while still assuring safety.

Any proposed regulation based on this advance notice would have beneficial economic impact on manufacturers, due to reduced testing requirements. FDA requests information and views on whether any such proposed regulation will be a "major rule" under the criteria in section 1(b) of Executive Order 12291, as well as information to enable the agency to determine whether to prepare an initial regulatory flexibility analysis as required by the Regulatory Flexibility Act (Pub. L. 96-354, 5 U.S.C. 603 and 604). FDA specifically requests information on the total number of businesses affected by the proposal, the number of small businesses affected by the proposal, and the effect (in quantitative terms, where feasible) on each firm, including any small business.

Interested persons may, on or before June 25, 1981, submit to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this advance notice of proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this

document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 23, 1981.

Mark Novitch,

Acting Commissioner of Food and Drugs.

21 CFR Parts 73 and 81

[Docket No. 81C-0022]

Caramel; Proposed Color Additive for Use in Cosmetics

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to permanently list caramel as a color additive for general use in cosmetics and to exempt it from certification. The Cosmetic, Toiletry, and Fragrance Association, Inc., filed a petition for this use.

DATES: Comments by April 27, 1981.

ADDRESS: Written comments to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mary W. Lipien, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: The Color Additive Amendments of 1960 established a system of premarket approval for all color additives used in foods, drugs, and cosmetics. Under the amendments, the sponsor of a color additive has the burden of demonstrating prior to marketing that the additive is safe for its intended use.

Recognizing that many colors were already in use at the time the amendments were enacted, Congress established transitional provisions to allow for the provisional listing and continued use of those colors where completion of studies was necessary to determine whether they should be permanently listed under the standards established in the new amendments.

Section 81.1 (21 CFR 81.1) of the color additive regulations designates those color additives that are provisionally listed under section 203(b) of the Transitional Provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86-618, sec. 203, 74 Stat. 404-407 (21 U.S.C. 376, note)), along with their respective "closing dates." A "closing date" is the last day upon which a provisionally listed color may legally be used, absent an approval of the color additive petition and its permanent listing.

A color additive may be permanently listed only if data establish that it is safe under its intended conditions of use. The transitional provisions permit the provisional listing of color additives for a period of time necessary to complete scientific investigations needed to establish their safety.

Caramel was provisionally listed as a color additive for use in cosmetics in 1961 (26 FR 7578; August 16, 1961). In 1976 the Cosmetic, Toiletry, and Fragrance Association, Inc. (CTFA) submitted a color additive petition (CAP 6C0120) requesting that caramel be permanently listed for use in cosmetics, including ingested cosmetics such as lipsticks and mouthwashes, externally applied cosmetics such as body lotions, hair preparations, baby products, and suntan lotions, and cosmetics for use in the area of the eye.

The petition was not accepted for filing because the data did not include information to support the safety of long-term external applications of this color. For the reasons set forth elsewhere in this document, the agency is now withdrawing its requirement for additional testing on the effects of long-term external use, and, therefore, the petition has now been filed pursuant to section 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 376). Normally a notice of filing is published in the **Federal Register**. However, because the agency is now prepared, as a result of the changed toxicological requirements, to act on this petition, and because the agency wishes to ensure that the comments it receives on this petition are as informed as possible, FDA decided to issue a proposal indicating its tentative decision to permanently list caramel as a color additive for cosmetics before taking final action. This proposal is also intended to satisfy the agency's obligation under § 71.2(b) (21 CFR 71.2(b)) to publish a notice of filing of a petition and a brief description of that petition.

FDA published a proposal in the **Federal Register** of September 23, 1976 (41 FR 41860) to extend to December 31, 1980 the closing date for the provisional listing of caramel, because of the need for additional toxicity data to assess the safety of caramel for the petitioned uses. The proposal outlined the need for data from the following studies:

1. A short-term eye area study, to provide a measure of assurance of safety for use in eye area cosmetics.

2. A short-term animal skin painting study, to support the use of caramel in externally applied cosmetics.

3. A two-year mouse skin-painting study, to determine whether caramel causes chronic adverse effects, including carcinogenicity, upon external application.

A final rule based on the September 23, 1976, proposal was published in the **Federal Register** of February 4, 1977 (42 FR 6992). The rule postponed the closing date for caramel until January 31, 1981. (This closing date has been extended to July 20, 1981 by a notice published elsewhere in this issue of the **Federal Register**.)

CTFA submitted to FDA data from the required eye area study in 1977 and the 90-day dermal test results in 1978. CTFA delayed initiating the 2-year skin-painting study because of questions that had arisen in the international scientific community concerning the chemical identity and purity of various types of caramel. CTFA was uncertain about which type of caramel to use in the skin-painting study. These chemical questions still have not been resolved.

However, research is being conducted at the Ontario Research Foundation on the chemical characterization of caramel colors, and biennial reports on this work are submitted to the agency by the International Technical Caramel Association. Copies of these biennial reports are on file with the Dockets Management Branch.

Reviews of the eye area study and the 90-day dermal study indicate that those data support the safety of caramel. Furthermore, the agency has recently determined that data from a chronic skin-painting study would not contribute significantly to further evaluation of the safety of caramel. The model for carcinogenesis induced by topical application has several disadvantages, one of which is the inherent limitation on dosage. The small area available for skin painting, which avoids oral ingestion in a small animal such as the mouse, imposes restrictions on experimental exposure that make it unlikely that positive results could be elicited by caramel. Because this natural color is composed predominantly of polysaccharides,[1] and because of its molecular size and solubility, the agency concludes that topical application of caramel would result in minimal, if any, skin penetration. This minimal skin penetration is reflected in the absence of

[1] Although caramel is made up predominantly of large molecular weight polymers, it contains a maximum of 15 percent of small molecular substances many of which are as yet unidentified.

local or systemic toxic effects from topical administration. The lack of any local effects in rabbits following repeated (90-day) dermal applications and the lack of positive effects in the Salmonella/Ames test clearly reinforce the view that the proposed skin-painting study of caramel would provide no additional assurance of safety. Accordingly, under § 70.42(b) (21 CFR 70.42(b)), FDA hereby withdraws its requirement for a two-year mouse skin-painting study.

FDA's regulations provide that a color additive is "safe" if there is "convincing evidence that establishes with reasonable certainty that no harm will result from the intended use of the color additive." (21 CFR 70.3(i).) Caramel is generally recognized as safe (GRAS) (21 CFR 182.1235) for use in foods as a flavor. On the basis of its GRAS status, caramel was permanently listed as a color additive for use in foods (21 CFR 73.85) in the Federal Register of June 28, 1963 (28 FR 6489) and as a color additive for use in coloring ingested and topically applied drugs (21 CFR 73.1085) in the Federal Register of July 14, 1963 (28 FR 6309).

Therefore, in view of the long in-use safety record of caramel and the additional safety data submitted by CTFA, the Commissioner of Food and Drugs hereby withdraws the agency's requirement for a 2-year mouse skin-painting study and proposes to list caramel as a color additive for general use in cosmetics. FDA will consider any comments it receives in response to this proposal and then publish a final rule on this petition in accordance with 21 U.S.C. 706(d) and 701(e).

The agency has determined under 21 CFR 25.24(d)(5) (proposed December 11, 1979; 44 FR 71742) that this proposed action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental statement is required.

FDA, in accordance with the Regulatory Flexibility Act, has considered the effect that this regulation would have on small entities, including small businesses. The agency has determined that because the effect of the proposed regulation is to continue current uses that have been permitted by the provisional listing of caramel, no adverse small business economic impact will result from this action.

This proposal is exempt from the requirement to perform a Regulatory Impact Analysis under section 3(a) of Executive Order 12291 because this rulemaking is subject to the formal rulemaking provisions of 5 U.S.C. 556 and 557 by virtue of sections 706(d) and 701(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 376(d) and 371(e)). See section 1(a)(1) of the Executive Order 12291.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 701(e), 706(b), (c), and (d), 70 Stat. 919 as amended, 74 Stat. 399-403 (21 U.S.C. 371(e), 376(b), (c), and (d))) and the Transitional Provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86-618, sec. 203, 74 Stat. 404-407 (21 U.S.C. 376, note)), and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), it is proposed that Parts 73 and 81 be amended as follows:

PART 73—LISTING OF COLOR ADDITIVES EXEMPT FROM CERTIFICATION

1. Part 73 is amended in Subpart C by adding new § 73.2085 to read as follows:

§ 73.2085 Caramel.

(a) *Identity and specifications.* The color additive caramel shall conform in identity and specifications to the requirements of § 73.85(a)(1), (2), and (3) and (b).

(b) *Uses and restrictions.* Caramel is safe for use in coloring cosmetics generally, including cosmetics applied to the area of the eye, in amounts consistent with good manufacturing practice.

(c) *Labeling requirements.* The label of the color additives and any mixtures intended soley or in part for coloring purposes prepared therefrom shall conform to the requirements of § 70.25 of this chapter.

(d) *Exemption from certification.* Certification of this color additive is not necessary for the protection of the public health, and therefore batches thereof are exempt from the certification requirement of section 706(c) of the act.

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

2. Part 81 is amended:

§ 81.1 [Amended]

a. In § 81.1 *Provisional listing of color additives*, by removing "caramel" from the list in paragraph (g).

§ 81.27 [Amended]

b. In § 81.27 *Conditions of provisional listing*, by removing paragraphs (b)(1), (2), and (3) and (d).

Interested persons may, on or before April 27, 1981 submit to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 24, 1981.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 81-9349 Filed 3-26-81; 3:55 pm]

BILLING CODE 4110-03-M

---

21 CFR Part 165

[Docket No. 80N-0439]

Soda Water; Amendment of Standard; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Proposed rule; further extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is further extending the period for submitting comments on a proposal to amend the standard of identity for soda water to accomplish the following: (1) Designate kola nut extract, rather than caffeine from this extract or from other extracts that naturally contain caffeine, as the mandatory ingredient in "cola" and "pepper" type soda water beverages; (2) provide for decaffeinated "cola" or "pepper" soda water beverages under the standard of identity; (3) continue to permit the use of added caffeine in these beverages as an optional ingredient. This action is based on requests received by FDA.

DATE: Comments must be received on or before July 29, 1981.

ADDRESS: Written comments, data, or information to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Bureau of Foods (HFF-214), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-1164.

SUPPLEMENTARY INFORMATION: In the Federal Register of October 21, 1980 (45 FR 69616), FDA proposed to amend the standard of identity for soda water to delete the requirement that "cola" and "pepper" beverages contain "caffeine

from kola nut extract and/or other natural caffeine-containing extracts." As amended, the standard would designate kola nut extract per se as the mandatory characterizing ingredient in "cola" and "pepper" beverages and allow explicitly for these beverages to be decaffeinated. The amended standard would continue to allow the use of added caffeine as optional ingredients up to maximum total level of 0.02 percent by weight. Written comments were to be submitted on or before December 22, 1980.

FDA received several requests for extension of the comment period. After carefully evaluating the merits of the requests for extension of the comment period, FDA concluded that an extension was necessary to provide adequate time for the compilation and submission of data and information that the agency requested be included in comments to assist FDA in developing an appropriate final rule on the proposal. Therefore, FDA published in the **Federal Register** of December 23, 1980 (45 FR 84837) a notice extending the comment period to March 23, 1981.

FDA has now received requests for an additional extension of the comment period from the National Soft Drink Association, Pepsico, Inc., the Coca-Cola Co., the Dr. Pepper Co., the National Coffee Association of U.S.A., Inc., and the Grocery Manufacturers Association. These requests, and the earlier ones, are on file with the Dockets Management Branch, FDA.

It is apparent from the requests for extension of time that significant review and analysis of this matter is being diligently pursued by interested parties, and that this review and analysis is in part based on records only recently provided by FDA under the Freedom of Information Act. FDA has carefully reviewed these requests for extension of time in this matter and has concluded that an extension of 120 days in which to comment is appropriate.

Interested persons may, on or before July 29, 1981, submit to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 20, 1981.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 81-9103 Filed 3-23-81; 11:01 am]

BILLING CODE 4110-03-M

---

21 CFR Parts 180 and 182

[Docket No. 80N-0418]

Caffeine; Deletion of GRAS Status, Proposed Declaration That No Prior Sanction Exists, and Use on an Interim Basis Pending Additional Study; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Proposed rule; further extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is further extending the period for submitting comments on a proposal to delete caffeine used as an added food ingredient from the list of substances that are generally recognized as safe (GRAS), to declare that no prior sanction exists for the use of caffeine as an added food ingredient, to restrict the use of caffeine as an added food ingredient to current uses and levels, and to require that the presence of caffeine as an added ingredient be reflected on the product label in the ingredient declaration. Under this proposal, the current uses of added caffeine would be permitted under an interim food additive regulation pending the completion of studies that are considered necessary to resolve questions about the safety of caffeine added to food. These questions include the potential fetotoxic and teratogenic properties of caffeine, the comparative metabolism and pharmacokinetic handling of caffeine in humans and experimental animals, the potential behavioral effects of caffeine, particularly in children, the potential reproductive effects of caffeine, and the potential carcinogenicity of caffeine. The studies FDA proposes to require include both animal studies and human epidemiological studies. In addition, there are questions that need to be addressed about the purpose for which caffeine is added to foods, especially soft drinks. This proposal does not directly affect the caffeine that occurs naturally in such foods as coffee and tea.

DATE: Comments must be received on or before July 29, 1981.

ADDRESS: Written comments to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 21, 1980 (45 FR 69817), FDA proposed to delete caffeine used as an added food ingredient from the list of substances that are generally recognized as safe (GRAS), to declare that no prior sanction exists for the use of caffeine as an added food ingredient, to restrict the use of caffeine as an added food ingredient to current uses and levels, and to require that the presence of caffeine as an added ingredient be reflected on the product label in the ingredient declaration. Under this proposal, the current uses of added caffeine would be permitted under an interim food additive regulation pending the completion of studies that are considered necessary to resolve questions about the safety of caffeine added to food. The document presents the data on caffeine that raise safety questions, explains the basis for FDA's proposal to remove added caffeine from the GRAS list, and describes the studies FDA considers necessary to resolve the existing questions about caffeine's safety and function as an added food ingredient. Written comments were to be submitted on or before December 22, 1980.

FDA received several requests for extension of the comment period. After carefully evaluating the merits of requests, FDA concluded that an extension was necessary to provide adequate time for the compilation and submission of data and information that the agency requested be included in comments to assist FDA in developing an appropriate final rule on the proposal. A notice was published in the **Federal Register** of December 23, 1980 (45 FR 84837) announcing extension of the comment period to March 23, 1981.

FDA has now received requests for an additional extension of the comment period from the National Soft Drink Association, Pepsico, Inc., the Coca-Cola Co., the Dr. Pepper Co., the National Coffee Association of U.S.A., Inc., the Grocery Manufacturers Association, and the Flavor and Extract Manufacturers Association of U.S.A. These requests, and the earlier ones, are on file with the Dockets Management Branch, FDA. the requests contain justifications for an extension of the comment period and data demonstrating

diligence in seeking to meet the current comment period closing date of March 23, 1981.

In the earlier notice (45 FR 64637) granting extension of the comment period to March 23, 1981, FDA noted that the scientific issues involved are complex, and the agency expressed a desire to ensure that all interested parties are given a fair amount of time to comment. At the same time, FDA expressed a desire to ensure that the rulemaking proceeds in a reasonable and timely manner. In this light, FDA has carefully evaluated the requests for a further extension of the comment period. In the agency's view the justifications represent good faith attempts to diligently participate in this scientifically and legally complex rulemaking. Based on the reasons discussed in those requests as well as the several reasons discussed below, the agency believes an extension of time for comments of 120 days is appropriate.

Several extensive Freedom of Information Act (FOIA) requests have been received from potential commenters. These requests seek large numbers of records and have required extensive search and review efforts on the part of agency personnel. Amongst the records sought are those generated by Dr. Collins in his recent study on the teratogenic potential of caffeine in rats (see Ref. 29; 45 FR 69835, October 21, 1980) as well as agency records that bear on whether a prior sanction exists for soft drinks containing caffeine. Many of these records have been made available; however, some were made available only within the last several weeks. In addition, some of the requested records are in a central Federal records storage facility and have not as yet been received by the agency. Upon receipt of any remaining responsive records which are publicly disclosable, the agency will promptly make them available. The agency believes that the limited extension of time being granted will allow the requestors sufficient time to review relevant records made available to them and will also allow them sufficient time to comment fully on the issues presented in this proceeding.

There is also some new evidence, not available before this time, which bears on the issue of the safety of added caffeine. This new evidence will be placed on the administrative record shortly and, at that time, FDA will describe its significance in this rulemaking through a notice in the Federal Register. This notice will serve to amend and update the original proposal published on October 21, 1980.

When the proposal was published, approximately 12 of the scientific articles relied upon by the agency were in a foreign language only. Since that time, FDA has received the English translations for these acticles and recently placed the translations in the record in this matter. These translations are now on file in the Dockets Management Branch under the docket number in the heading of this notice. The translations may be found by using the reference numbers of the original citations in the proposed rule. Those reference numbers are 13, 17, 18, 19, 20, 23, 24, 50, 55, 80, and 89 (see 45 FR 69835; October 21, 1980).

During this extended time for comments, FDA will also place into the record for public comment all relevant publicly available records relating to a recent FDA inspection of the Bureau of Foods laboratories at Federal Office Building 8. The agency routinely inspects its own laboratories to ensure compliance with its Good Laboratory Practice regulations (21 CFR 58.1 et seq.). As part of that inspection, the Dr. Collins study dealing with the teratogenic potential of caffeine on rats (Ref 29.) was audited. At this time, the agency is placing in the record both the List of Observations (From FD–483) and the Bureau of Foods' initial response of January 29, 1981. When the agency review of this inspection is completed, the remaining publicly available documents will be placed into the record as well. In addition, the agency intends to the have the Collins study (Ref. 29) reviewed by a team of qualified scientists who will evaluate the scientific data derived from that study in light of the recent findings of the FDA inspection team. The report prepared by this group will also be made part of the record. All of these records will be available at the Dockets Management Branch in the record for this rulemaking.

The agency fully recognizes its obligations to proceed with this rulemaking in a timely manner. However, for the reasons discussed above, the agency concludes that an additional period of 120 days in which to comment on this proposal is fully justified. To deny additional time for comments would unjustly deprive interested parties as a full and fair opportunity to participate in this important rulemaking in a meaningful way.

Interested persons may, on or before July 29, 1981, submit to the Docket Management Branch (HFA–305), Food and Drug Administration, Rm 4–62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m. Monday through Friday.

Dated: March 20, 1981.

Joseph P. Hile,

Associate Commissiner for Regulatory Affairs.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 115

[Docket No. R–81–815]

Recognition of Substantially Equivalent Laws; Two States and Nine Localities

AGENCY: Department of Housing and Urban Development.

ACTION: Notice of transmittal of proposed rule to Congress under Section 7(o) of the Department of HUD Act.

SUMMARY: Recently enacted legislation authorizes Congress to review certain HUD rules for fifteen (15) calendar days of continuous session of Congress prior to each such rule's publication in the Federal Register. This Notice lists and summarizes for public information a proposed rule which the Secretary is submitting to Congress for such review. This proposed rule would amend 24 CFR 115.11 to add two States and nine localities to the list of jurisdictions which HUD recognizes as having fair housing laws substantially equivalent to Title VIII of the Civil Rights Act of 1968.

FOR FURTHER INFORMATION CONTACT: Burton Bloomberg, Director, Office of Regulations, Office of General Counsel, 451 7th Street, SW, Washington, D.C. 20410 (202) 755–6207.

SUPPLEMENTARY INFORMATION: Concurrently with issuance of this Notice, the Secretary is forwarding to the Chairmen and Ranking Minority Members of both the Senate Banking, Housing and Urban Affairs Committee and the House Banking, Finance and Urban Affairs Committee the following rulemaking document:

24 CFR Part 115—Recognition of Substantially Equivalent Laws—Two States and Nine Localities

(Sec. 7(o) of the Department of HUD Act, 42 U.S.C. 3535(o), Sec. 324 of the Housing and Community Development Amendments of 1978)

Issued at Washington, D.C., March 20, 1981.

Samuel R. Pierce, Jr.,

Secretary, Department of Housing and Urban Development.

Investment Credit for Single Purpose Agricultural or Horticultural Structures; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to the investment credit for single purpose agricultural or horticultural structures.

DATES: The public hearing will be held on June 25, 1981, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by June 11, 1981.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW, Washington, D.C. The outlines should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR-88-79), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Charles Hayden of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW, Washington, D.C. 20224, 202-566-3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 48 of the Internal Revenue Code of 1954. The proposed regulations appeared in the **Federal Register** for Friday, January 23, 1981 (46 FR 7397).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking, March 24, 1981, and also desire to present oral comments at the hearing on the proposed regulations should submit an outline of the comments to be presented at the hearing and the time they wish to devote to each subject by June 11, 1981. Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive for improving government regulations appearing in the **Federal Register** for Wednesday, November 8, 1978.

By direction of the Commissioner of Internal Revenue.

David E. Dickinson,

Acting Director, Legislation and Regulations Division.

BILLING CODE 4830-01-M

DEPARTMENT OF LABOR

Wage and Hour Division, Employment Standards Administration

29 CFR Part 541

Defining and Delimiting the Terms "Any Employee Employed in a Bona Fide Executive, Administrative, or Professional Capacity (Including any Employee Employed in the Capacity of Academic Administrative Personnel or Teacher in Elementary or Secondary Schools), or in the Capacity of Outside Salesman"

AGENCY: Wage and Hour Division, Employment Standards Administration, Department of Labor.

ACTION: Notice of proposed rulemaking.

SUMMARY: Final regulations scheduled to become effective February 13, 1981, increasing the salary levels used in determining eligibility for exemption under Section 13(a)(1) of the Fair Labor Standards Act for employees employed in a bona fide executive, administrative or professional capacity were published in the **Federal Register** of January 13, 1981 (46 FR 3010). On February 12, 1981, a notice was published in the **Federal Register** announcing that the effective date of these regulations was stayed indefinitely (46 FR 11972). According to this notice, the purpose of that action was to allow the Department to review the rule fully before it takes effect. The comment period was reopened, and pending final determination in this rulemaking, the interim salary tests which became effective April 1, 1975 were continued.

That notice is now republished herein as a notice of proposed rulemaking, inasmuch as it is proposed that the regulation scheduled to become effective February 13, 1981 be suspended indefinitely. Comments are invited on the question of whether there should be an indefinite suspension of the regulation, pending further review of the regulation. As indicated in the February 12, 1981 notice, comments are also invited regarding the substance of the regulation itself, and specifically regarding the economic effects of the regulation.

DATES: Comments should be received on or before April 27, 1981.

ADDRESS: Send written comments to Henry T. White, Jr., Deputy Administrator, Wage and Hour Division, Employment Standards Administration, Room S-3502, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210; (202) 523-8305.

FOR FURTHER INFORMATION CONTACT: Henry T. White, Jr., Telephone (202) 523-8305.

SUPPLEMENTARY INFORMATION: The notice which was published in the **Federal Register** on February 12, 1981 made clear the Department of Labor's intention to suspend indefinitely final regulations which were to become effective on February 13, 1981. These regulations increase the salary levels used in determining eligibility for exemption under Section 13(a)(1) of the Fair Labor Standards Act for employees employed in a bona fide executive, administrative, or professional capacity. Such suspension will provide further time for the Department to consider the economic effects of the regulation, and to determine whether it should go into effect in its present form. That notice did not, however, specifically invite public comment with respect to whether such an indefinite supension should take place. The Department believes that such comment should be invited and considered before any final decision is made regarding indefinite suspension.

Secondly, although the February 12, 1981 notice reopened the comment period to aid the Department in further review of the regulation, it was not made clear what types of comments were desired on the substance of the

regulation. Comments thus far received have tended to be of a general or rhetorical nature, and have failed to focus on the precise economic impact of the regulation. The Department invites specific comment as follows:

1. Economic data (statistical, not anecdotal) on the probable economic impact of raising the salary tests to the revised levels, with respect to employees who specifically meet the duties and responsibilities tests of the regulation;

2. Extent to which employers have already increased salary levels in anticipation of the regulation;

3. Specific effects of the revised salary tests on various industries, or segments of industries.

Accordingly, the following action is proposed:

29 CFR Part 541, as amended at 45 FR 3010, January 13, 1981, is suspended indefinitely, pending further review by the Department; the applicable sections of Part 541 relating to interim salary tests which became effective April 1, 1975, will remain in effect.

(Sec. 13, 52 Stat. 1067, as amended; 29 U.S.C. 213; Reorganization Plan No. 6 of 1950 (3 CFR 1945–53 comp. p. 1004); Secretary's Order No. 16–75, 40 FR 55913, December 2, 1975; and Employment Standards Order No. 78–1, 43 FR 51469, November 3, 1978)

Signed at Washington, D.C., this 23rd day of March 1981.

Craig Berrington,

Deputy Assistant Secretary of Labor for Employment Standards.

BILLING CODE 4510-27-M

Occupational Safety and Health Administration

29 CFR Part 1903

[Docket No. W-005 A]

Walkaround Compensation; Effective Date Delay and Proposed Revocation

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Delay of effective date of final rule and proposed revocation of the regulation.

SUMMARY: OSHA is delaying the effective date of the regulation requiring compensation for employee representatives participating in the walkaround and related portions of an OSHA enforcement inspection from March 30, 1981, to May 30, 1981. The agency is also proposing to revoke the regulation in its entirety. This action is taken as a result of a reevaluation of the record and the conclusion that it does not sufficiently establish the need for the regulation.

DATES: The effective date of the regulation is delayed until May 30, 1981. All data and comments regarding the proposed revocation must be postmarked on or before April 30, 1981.

ADDRESS: All comments should be submitted to the Docket Officer, Docket No. W-005 A, Occupational Safety and Health Administration, Room S–6212, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210. Telephone (202) 523–7894.

FOR FURTHER INFORMATION CONTACT: Mr. H. Berrian Zettler, Office of Field Coordination, Occupational Safety and Health Administration, Room N–3603, U.S. Department of Labor, Washington, D.C. 20210; Telephone (202) 523–7725.

SUPPLEMENTARY INFORMATION:

I. History of Walkaround Compensation

On September 20, 1977, a legal interpretation was published in the Federal Register (42 FR 47344) which amended section 29 CFR 1977.21 so as clearly to require the payment of walkaround compensation. Subsequently, on October 31, 1980, that regulation was deleted in response to a District Court Order vacating it. (45 FR 72118). On November 14, 1980, OSHA proposed new regulations requiring walkaround compensation and established a 45 day comment period ending December 29, 1980 (45 FR 75232). On January 16, 1981, OSHA published in the Federal Register a final rule on walkaround compensation. The essential requirement of that rule is that employers must pay their employee representatives for time spent during OSHA compliance inspections (46 FR 3852). The original effective date of February 17, 1981, was delayed to March 30, 1981 (46 FR 11253), pursuant to the President's memorandum.

II. Basis and Purpose of the Proposal

By memorandum dated January 29, 1981, President Ronald Reagan requested that all executive agencies postpone for sixty days the effective dates of final regulations promulgated but not yet effective. As a result, the Acting Secretary of Labor issued a notice of deferral in effective dates of regulations in the Federal Register (46 FR 11253). As a result the effective date of the walkaround compensation regulation was delayed from February 17, 1981, to March 30, 1981.

The purpose of this delay was to allow the agencies to reexamine these regulations in the light of the priorities of the new Administration. A thorough review of the record relating to the walkaround pay issue has been accomplished. The record developed during the comment period for the regulation tended to show overwhelmingly the usefulness of employee representation during an OSHA inspection. The record does not support adequately the need for a walkaround pay regulation. On the contrary, it rather suggests that the vast majority of employers already do pay their employees who serve as walkaround representatives during OSHA inspections. Consequently, the record fails to show that more than a few employees (mostly limited to one industry) have suffered any economic loss by exercising their statutory right. The record is unclear, even in the cases where the employer refused to pay, that the employee actually lost pay. In most cases the union appears to have paid the representative when the employer did not. There are a few instances where employee representation was cut short or eliminated when the employer refused to pay and the union was unable to do so. These few instances, however, do not establish a clear need for a regulation to remedy the problem. Indeed the issue appears to be one which can best be left to the traditional collective bargaining process in those few cases where the employer refuses to pay.

The proposed revocation of the walkaround pay rule is not a major rule under the criteria established by Executive Order No. 12291 on federal regulations. Since the proposed rulemaking is a withdrawal of a regulation and not the promulgation of one, there will be no economic effect.

III. Public Participation

Interested persons or groups are invited to submit written data, views and arguments with respect to this proposal and all issues involved therein These comments must be postmarked on or before April 30, 1981, and submitted in quadruplicate to: Docket Officer, Docket No. W–005 A, Room S–6212, 200 Constitution Avenue, NW., Washington D.C. 20210. Comments previously submitted on this regulation need not be resubmitted. The data, views, and arguments that are submitted will be available for public inspection and copying at the above address. All timely written submissions received will be made a part of the record of this proceeding and will be considered in formulating the final rule.

IV. Further Delay of the Effective Date of the Rule

In view of the issuance of this proposed revocation of the rule, the effective date of the rule is further suspended until the Department takes final action on the proposed withdrawal. Since this regulation has never gone into effect, and since the Agency is herewith proposing to revoke this regulation for the reasons stated, we believe it would be inappropriate to require compliance with this regulation during the brief period until a final determination is made. Under the circumstances, OSHA finds that separate notice and public comment on this further brief deferral of the effective date is impractical and unnecessary within the meaning of section 553 (b)(3)(B) of the Administrative Procedure Act (5 U.S.C. 553). Accordingly, pursuant to sections 8(e) and 8(g)(2) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 657 (e) and (g)(2)), 5 U.S.C. 553, and Secretary of Labor's Order 8–76, (41 FR 25059) OSHA is proposing to amend 29 CFR 1903.8 by removing paragraph (e).

Signed at Washington, D.C., on this 24th day of March, 1981.

Thorne G. Auchter,

Assistant Secretary of Labor.

§ 1903.8 Representatives of employers and employees.

BILLING CODE 4510-26-M

---

29 CFR Parts 1952 and 1955

Withdrawal of Complaint To Withdraw Indiana State Plan

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Notice of Withdrawal of Complaint.

SUMMARY: This notice publishes the Assistant Secretary's decision to withdraw the complaint initiating the withdrawal of approval of the Indiana State plan, which was published in the **Federal Register** on January 16, 1981 (46 FR 3919–3920).

EFFECTIVE DATE: March 26, 1981.

FOR FURTHER INFORMATION CONTACT: Barbara Bryant, Chief, Eastern Divison, Office of State Programs, Occupational Safety and Health Administration, Room N–3613, 200 Constitution Avenue, NW., Washington, D.C. 20210 (202) 523–8045.

SUPPLEMENTARY INFORMATION:

Pursuant to Section 18(f) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667(f)) and Part 1955 of this Chapter, on April 2, 1980, the Assistant Secretary initiated an administrative action for withdrawal of approval of the Indiana plan for occupational safety and health. This action was based upon OSHA monitoring activity through June 30, 1979. The formal Notice of Initiation of Withdrawal Action was published in the **Federal Register** on January 16, 1981 (46 FR 3919–3920). The period for response by the State was extended on February 6, 1981 by **Federal Register** notice delaying the effective dates of certain administrative actions (46 FR 11253).

Based upon a reevaluation of the evidence, and upon consideration of the substantial passage of time since that evidence was obtained together with a review of the information collected subsequently, the Assistant Secretary has determined that continuation of the withdrawal action is not warranted. Accordingly, notice is hereby given that a Notice of Withdrawal of Complaint is being filed with the Chief Administrative Law Judge and served on the Commissioner of the Indiana Division of Labor.

(Sec. 18, Pub. L. 91–596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Washington, D.C. this 24th day of March 1981.

Thorne G. Auchter,

Assistant Secretary of Labor.

BILLING CODE 4510-26-M

---

29 CFR Part 1990

Identification, Classification and Regulation of Potential Occupational Carcinogens; Withdrawal of Proposed Amendments

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Withdrawal of proposed amendments.

SUMMARY: On January 19, 1981 (46 FR 4889) OSHA issued a notice listing deletions from its standard, for Identification, Classification and Regulation of Potential Occupational Carcinogens (29 CFR Part 1990) to conform the standard to the Supreme Court's decision regarding OSHA's benzene standard, *Industrial Union Department, AFL–CIO* v. *American Petroleum Institute, et al.* 65 L. Ed. 2d 1010, 100 S. Ct. 2844 (July 2, 1980). The notice deleted the requirement that worker exposure to Category I potential carcinogens automatically be reduced to the lowest feasible level. With this deletion, exposure levels to Category I carcinogens would be set on a case-by-case basis in conformance with law. The deletions will become effective on March 30, 1981, pursuant to 46 FR 11253 (February 6, 1981). As a result, 29 CFR Part 1990 will, at that time, be consistent with the Supreme Court's decision.

On January 19, 1981, the Assistant Secretary for OSHA signed a notice proposing various amendments to 29 CFR Part 1990. This notice was published on January 23, 1981 (46 FR 7402). The proposed amendments included requirements for making an assessment of the risk based on a consideration of all relevant data and for reducing exposure levels sufficiently to eliminate significant risk.

The proposed amendments and the request for public comment published at 46 FR 7402 are hereby withdrawn.

This withdrawal action will permit the Department to address alternatives that had not been fully considered and then later, if appropriate, to repropose the amendments.

EFFECTIVE DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. James Foster, Room N3641, Office of Public Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210, Telephone: (202) 523–8151.

Signed at Washington, D.C., this 24th Day of March 1981.

Thorne G. Auchter,

Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510-26-M

DEPARTMENT OF EDUCATION

Office of the Secretary

34 CFR Parts 75, 76, 78, 104, 200, 201, 211, 215, 223, 230, 231, 300, 305, 307, 309, 315, 318, 322, 324, 332, 336, 361, 362, 365, 366, 369, 370, 371, 372, 373, 374, 375, 378, 379, 385, 386, 387, 388, 389, 390, 395, 408, 525, 526, 527, 624, 643, 644, 645, 646, 649, 655, 656, 658, 660, 667, 668, 674, 675, 676, 682, 690, 726, 735, 740, 753, 757, 776, and 778

Review of Certain Regulations and Interpretations

AGENCY: Department of Education.

ACTION: Notice of intent to review and amend certain regulations and interpretations.

SUMMARY: The Secretary of Education provides notice of his intent to review and, as appropriate, amend certain regulations and interpretations that take effect March 30, 1981. The Secretary takes this action to analyze regulatory burdens and to identify opportunities for de-regulation and possible alternative approaches to achieving program objectives, in accordance with Executive Order 12291. Based on this review for each regulation or interpretation, the Secretary intends, by particular target dates, to publish a notice indicating that the regulation or interpretation will remain in effect, issue a revised regulation or interpretation, or provide other guidance needed by organizations and persons affected by the regulation or interpretation.

DATE: All comments received on or before May 31, 1981 will be considered.

FOR FURTHER INFORMATION CONTACT: A. Neal Sheild, Director, Division of Regulations Management, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, D.C. 20202. Telephone: (202) 245-7091.

SUPPLEMENTARY INFORMATION: Pursuant to a January 29, 1981 memorandum from the President, the Secretary published two notices in the Federal Register postponing until 60 days from the date of the memorandum the effective date of all Education Department final regulations scheduled to become effective during the 60-day period (February 4, 1981 at 46 FR 10721; February 17, 1981 at 46 FR 12496). During this period the Secretary initiated a review of the regulations to analyze regulatory burdens and identify opportunities for de-regulation. Additional time is now required to complete this review.

This notice indicates the Secretary's intent to implement this review thoroughly under Executive Order 12291 and with an opportunity for public comment.

The purpose of this notice is not to repeal the regulations and leave the affected programs without any regulations. On the contrary, the purpose is to provide for an orderly review of regulations in a manner that avoids disruption of programs and confusion for participants under the programs.

To permit the orderly implementation of the subject programs in Fiscal Year (FY) 1981 (which ends September 30, 1981), the regulations and interpretations will take effect March 30, 1981, even though a review of them has not been completed.

The Secretary intends to communicate to program participants decisions with respect to future regulations governing these programs well in advance of the target dates indicated below. For example, if, upon review (and in the light of any public comments), the Secretary decides that no changes are appropriate in a particular regulation, a notice will be published to this effect. On the other hand, if the Secretary decides to change the regulation in order to eliminate regulatory burdens on program participants or to take an alternative approach to achieving program objectives, modified regulations will be issued. The Secretary also will provide other guidance needed by program participants.

Regulations and interpretations subject to this notice will govern pertinent program activities for the duration of FY 1981, and they will remain in effect until further notice.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding each of these regulations. Respondents are particularly encouraged to address their comments to burdens imposed by the regulations, opportunities for de-regulation and alternative approaches to addressing these concerns. These comments will assist the Secretary in reviewing the regulations in accordance with Executive Order 12291. Oral and written comments should be directed to the contact person listed in the preamble of the regulation on which the comment is made. A Federal Register citation is provided for each regulation included in this notice. Any general comments should be directed to the contact person listed in this notice. All comments received on or before May 31, 1981 will be considered in deciding whether to revise these regulations and, if so, how to revise them.

Regulations To Be Reviewed by Target Date of September 30, 1981

The Secretary establishes a target date of September 30, 1981 to review the following regulations:

Title of Regulations or Interpretation; Published in the "Federal Register"

Rehabilitation Training; 34 CFR Parts 385, 386, 387, 388, 389, 390; Dec. 30, 1980, at 45 FR 86378

Nondiscrimination on the Basis of Handicap in Progams and Activities Receiving or Benefitting from Federal Financial Assistance; and Assistance to States for Education of Handicapped Children; 34 CFR Parts 104, 300; Dec. 30, 1980, at 45 FR [illegible]

International Education Programs; 34 CFR Parts 655, 656, 658, 660, 667; Dec. 31, 1980, at 45 FR 86672

Education Appeal Board; 34 CFR Part 78; Jan. 5, 1981, at 46 FR 881

Education Department General Administrative Regulations (EDGAR); Annual Funding Priorities; 34 CFR Part 75; Jan. 14, 1981, at 46 FR 3205

Instructional Media for the Handicapped; 34 CFR Part 332; Jan. 14, 1981, at 46 FR 3206

Graduate and Professional Study Fellowships; 34 CFR Part 649; Jan. 14, 1981, at 46 FR 3400

Assistance to States for Education of Handicapped Children; 34 CFR Part 300; Jan. 16, 1981, at 46 FR 3835

Minority Institutions Science Improvement Program (MISIP); 34 CFR Part 735; Jan. 16, 1981, at 46 FR 3673

Law-Related Education Program; 34 CFR Part 757; Jan. 16, 1981, at 46 FR 3677

Asbestos Detection and Control: Local Educational Agencies; Asbestos Detection and State Plan: State Educational Agencies; 34 CFR Parts 230, 231; Jan. 16, 1981, at 46 FR 4536

Assistance to States for Education of Handicapped Children, and Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving or Benefiting from Federal Financial Assistance; Notice of Interpretation

AGENCY: Department of Education.

ACTION: Notice of proposed suspension of interpretation.

SUMMARY: The Secretary proposes to suspend indefinitely the effective date of the notice of interpretation published in the **Federal Register** on January 19, 1981. The effective date of this interpretation is postponed until May 10, 1981 in a separate notice published in this issue. the Secretary takes this action in order to provide an opportunity for public comment on this interpretation and the proposed suspension. Based on the comments received the Secretary will decide whether or not to suspend this interpretation indefinitely.

DATES: Comments must be received on or before April 27, 1981.

ADDRESSES: Comments should be addressed to A. Neal Shedd, Director, Division of Regulations Management, U.S. Department of Education, (Room 2129 FOB–6) 400 Maryland Avenue, SW., Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: A. Neal Shedd, Telephone: (202) 245–7091.

SUPPLEMENTARY INFORMATION: On January 19, 1981 at 46 FR 4912 the Secretary of Education published a notice of interpretation of Part B of the Education of the Handicapped Act and Section 504 of the Rehabilitation Act of 1973 to require a public educational agency to provide clean intermittent catheterization as a "related service" when it is required to provide a free appropriate public education, including services in the least restrictive environment, to handicapped children who are entitled to receive services under these statutes.

Pursuant to a memorandum from the President dated January 29, 1981, the effective date of this interpretation was postponed until March 30, 1981 (46 FR 12495; February 17, 1981). In a separate notice in this issue the Secretary further postpones the effective date of this interpretation until May 10, 1981. This notice proposes an indefinite suspension of the interpretation.

No public comment has previously been requested on this interpretation. the Secretary believes that the potential economic and administrative burdens which may be imposed upon public educational agencies by this interpretation justify the postponement of the effective date of the interpretation for a period of further review. The Secretary also requests public comments on whether the effective date of this interpretation should be suspended indefinitely.

After review of this interpretation and in light of the public comments received, the Secretary will decide whether to let this interpretation take effect on May 10, 1981 or to suspend it indefinitely.

(20 U.S.C. 1221e–3, 1401, 1411–1420; 29 U.S.C. 794)

Dated: March 25, 1981.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000-01-M

VETERANS ADMINISTRATION

38 CFR Part 3

Veterans' Benefits; Reduction of Aid and Attendance Allowance

AGENCY: Veterans Administration.

ACTION: Proposed Regulation Change.

SUMMARY: The Veterans Administration is proposing to amend its regulation governing reduction of the aid and attendance allowance to a veteran hospitalized by the Veterans Administration. The need for this action results from the lack of specificity in the current regulation concerning the effective date of reduction of the aid and attendance allowance when this benefit is first granted during hospitalization. The current regulation only provides aid and attendance reduction rules for a veteran already in receipt of the aid and attendance allowance at the time of hospital admission.

DATES: Comments must be received on or before April 27, 1981. The Veterans Administration proposes to make this change effective the date of final approval.

ADDRESSES: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420.

Comments will be available for inspection at the above address during normal business hours until May 6, 1981.

FOR FURTHER INFORMATION CONTACT: T. H. Spindle (202–389–3005).

SUPPLEMENTARY INFORMATION: Under 38 CFR 3.552(b) the aid and attendance allowance is discontinued when a veteran in receipt of this benefit is hospitalized at Veterans Administration expense, effective the last day of the month following the month of hospital admission. This regulation is applicable to a veteran in receipt of the aid and attendance allowance at the time of admission to hospitalization at Veterans Administration expense. Section 3.552, Title 38, Code of Federal Regulations, does not cover the situation that arises when a veteran establishes entitlement to the aid and attendance allowance during a period of hospitalization at Veterans Administration expense.

The Veterans Administration has determined that when initial entitlement to the aid and attendance allowance is established on or after the date of admission to hospitalization at Veterans Administration expense, the additional pension or compensation payable by reason of need for aid and attendance should not be paid until discharge or release from hospitalization. Consequently, we are proposing to amend 38 CFR 3.552 to implement this determination.

There are two reasons why the aid and attendance allowance payable to a hospitalized veteran at time of

admission is not reduced until the end of the month following the month of admission. First, the veteran is in reliance upon this benefit and it would be inequitable to discontinue it for short periods of hospitalization. Second, immediate reduction of the aid and attendance allowance might deter a veteran from seeking needed hospital treatment.

Neither of these reasons is applicable to a veteran whose eligibility for the aid and attendance allowance is established during hospitalization. The veteran would not be in reliance upon the additional amount payable by reason of need for aid and attendance and consequently could not be deterred from seeking hospitalization by fear of loss of aid and attendance benefits. Since a hospitalized veteran is already receiving aid and attendance from the hospital staff, there is no justification for payment of aid and attendance benefits during hospitalization to a veteran who establishes entitlement to the aid and attendance allowance during hospitalization.

The Agency has determined that this proposed regulation is non-major in accordance with the requirements of E.O. 12291, Federal Regulation. It has also been determined as required by the Regulatory Flexibility Act (Pub. L. 96–354) that it poses no compliance costs or reporting burdens upon the public and has no effect on businesses or State and local governments.

Additional Comment Information

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans' Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays) until May 6, 1981. Any person visiting the Veterans Administration Central Office in Washington, DC for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Approved: March 13, 1981.

Rufus H. Wilson,

Acting Administrator.

The Veterans Administration proposes to amend Part 3 as follows:

In § 3.552, paragraphs (a)(1) and (b)(3) are revised and paragraph (k) is added so that the added and revised material reads as follows:

§ 3.552 Adjustment of allowance for aid and attendance.

(a)(1) When a veteran who is already entitled to the aid and attendance allowance is hospitalized, the additional compensation or increased pension for aid and attendance shall be discontinued as provided in paragraph (b) of this section except as to disabilities specified in paragraph (a)(2) of this section. (See paragraph (k) of this section for rules applicable to a veteran who establishes entitlement to the aid and attendance allowance on or after date of admission to hospitalization).

* * * * *

(b) * * *

(3) Where a veteran affected by the provisions of paragraph (b)(1) and (2) or paragraph (k) of this section is discharged or released from the hospital against medical advice or as the result of disciplinary action, and is readmitted to such hospitalization within 6 months after that date, the allowance, additional compensation, or increased pension will be discontinued effective the day preceding the date of readmission. A readmission 6 months or more after such discharge or release will be considered as a new admission. (38 U.S.C. 3203(e)).

* * * * *

(k)(1) This paragraph is applicable to hospitalized veterans who were not entitled to the aid and attendance allowance prior to hospital admission but who establish entitlement to it on or after the date of hospital admission.

(2) If the effective date of entitlement to the aid and attendance allowance is on or after the date of admission to hospitalization, the aid and attendance allowance shall not be paid until the date of discharge or release from hospitalization, unless the aid and attendance allowance is based on a disability specified in paragraph (a)(2) of this section. If the aid an attendance allowance is based on a disability specified in paragraph (a)(2) of this section, the aid and attendance allowance shall be paid during hospitalization.

(3) If the aid and attendance allowance is not payable to a veteran under paragraph (k)(2) of this section, the veteran shall receive the appropriate reduced rate under paragraphs (d) through (j) of this section while hospitalized.

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-3-FRL 1784-6]

Air Quality; Commonwealth of Virginia State Implementation Plan; Withdrawal

AGENCY: Environmental Protection Agency.

ACTION: Notice of withdrawal of previously proposed revision.

SUMMARY: On August 18, 1977, the Commonwealth of Virginia submitted a proposed revision to the State Implementation Plan (SIP) consisting of a variance request (in the form of a Consent Agreement) for boilers Nos. 4 and 5 at Avtex Fibers, Inc. in Front Royal, Virginia. The variance would permit boilers Nos. 4 and 5 to continue burning coal in excess of the emissions permitted under Rules 2 and 3 of the Regulations for the Control and abatement of Pollution in the Commonwealth of Virginia which limit visible emissions and particulate matter. The Consent Agreement required that Avtex Fibers, Inc. achieve compliance with the above requlations on or before July 1, 1980. This document withdraws the proposed changes to the Virginia State Implementation Plan from further consideration by the EPA.

DATE: March 27, 1981.

FOR FURTHER INFORMATION CONTACT: Ms. Eileen M. Glen, Project Officer (3AH11), U.S. Environmental Protection Agency, Curtis Building, 6th and Walnut Streets, Philadelphia, Pa. 19106, (215) 597–8187, REF: AH014VA.

SUPPLEMENTARY INFORMATION: On August 18, 1977, the Secretary of Commerce and Resources, on behalf of the Commonwealth of Virginia, submitted a variance request, in the form of a Consent Agreement, to the Administrator of the Environmental Protection Agency and requested that it be reviewed and processed as a revision of the Virginia State Implementation Plan (SIP). The variance would permit Boilers Nos. 4 and 5 at the Front Royal Plant of Avtex Fibers, Inc. to continue burning coal in excess of federally-approved Regulations for the Control and Abatement of Air Pollution in the Commonwealth of Virginia as specified in Section IV, Rule 2 (Emission Standards for Visible Emissions) and Rule 3 (Emission Standards for Particulate Emissions from Fuel Burning Equipment).

On August 22, 1977, the Executive Director of the State Air Pollution Control Board transmitted to the EPA

six (6) copies of the revision and supporting documentation. Following a review of the information, the EPA advised the Commonwealth in April, 1978, that the variance could not be approved as a revision of the Virginia SIP due to deficiencies in the control strategy demonstration. In a letter dated April 21, 1978, the Commonwealth requested EPA to withhold any formal action until a revised demonstration could be completed to remedy the modeling deficiencies. This revised demonstration was submitted as additional support documentation by the Commonwealth on July 12, 1978. Further technical difficulties associated with the modeling demonstration were raised, and EPA and Avtex Fibers subsequently entered into a Consent Agreement which is now being reviewed by the Department of Justice.

The original variance was proposed for approval as a SIP revision on May 11, 1979 (44 FR 27699) and no public comments were received. The baghouses have been installed, the boilers are now in compliance with the SIP, and the variance expired on July 1, 1980.

For the above stated reasons, the EPA does not plan to continue to process the variance and is withdrawing it from consideration as a SIP revision.

Note.—This is not a rule under Executive Order 12291 and therefore has not been submitted to OMB for review.

(42 U.S.C. 7401–7642)

Dated: February 25, 1981.

Jack J. Schramm,

Regional Administrator.

BILLING CODE 6560-38-M

DEPARTMENT OF LABOR

Office of Federal Contract Compliance Programs

41 CFR Part 60–1

Payment of Membership Fees and Other Expenses to Private Organizations; Proposed Rule Withdrawal

AGENCY: Office of Federal Contract Compliance Programs, Labor.

ACTION: Proposed withdrawal of rule.

SUMMARY: On January 16, 1981, the Department of Labor published a new rule (46 FR 3892), to be codified at 41 CFR 60–1.11, affecting contractor payments for employee memberships in private clubs and organizations which discriminate in membership policies. The rule originally was to go into effect on February 17, 1981, but pursuant to notice published in the Federal Register on February 6, 1981 (46 FR 11253), the effective date was deferred until March 30, 1981. The proposal published today seeks public comments on withdrawing the rule published on January 16, 1981.

DATES: Comments will be received until April 27, 1981.

ADDRESS: Comments should be sent to James W. Cisco, Acting Director, Division of Program Policy, Office of Federal Contract Compliance Programs, U.S. Department of Labor, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: James W. Cisco, Acting Director, Division of Program Policy, Office of Federal Contract Compliance Programs, U.S. Department of Labor, Washington, D.C. 20210, telephone (202) 523–0426.

SUPPLEMENTARY INFORMATION: On January 16, 1981, the Department of Labor published a final rule codifying a new section 41 CFR 60–1.11 affecting payments by Federal contractors of membership fees to private organizations which discriminate in membership on the basis of race, color, religion, sex, or national origin. That regulation was to take effect on February 17, 1981.

On January 29, 1981, President Reagan requested that the executive agencies postpone for 60 days the effective date of new regulations to allow full review of the new regulations by the incoming administration. On February 6, 1981, at 46 FR 11253, the Department of Labor published a notice in the Federal Register deferring the effective date of section 60–1.11 until March 30, 1981.

The proposed rule published today seeks public comments on withdrawing the rule published on January 16, 1981.

I. Reasons for the Proposed Withdrawal

Executive Order 11246, as amended, prohibits employment discrimination by Government contractors on the basis of race, color, religion, sex, or national origin. The Executive Order also requires that Government contractors take affirmative action to ensure that employees and applicants for employment are treated without regard to their race, color, religion, sex or national origin. The Department of Labor's position, after a full review of the deferred regulation, is that the payment of dues for individual employees to an outside membership organization by an employer is not itself a violation of the Executive Order. Indeed, the regulation of such payments may raise serious legal problems. The prohibition against discrimination and the affirmative action requirement under the Executive Order are, however, adequate to prevent an employer from using such memberships to structure the conduct of its business in a manner which creates employment discrimination.

Accordingly, withdrawal of the rule will not affect the interests of minorities, women and other employees of Government contractors.

In order to publish the proposal in the Federal Register prior to March 30, 1981, and to avoid an additional postponement prior to publishing the proposed withdrawal notice, the Department of Labor requested EEOC to grant a waiver of the consultation process under Executive Order 12067. EEOC responded to the request, in part, as follows:

> The Equal Employment Opportunity Commission has granted a waiver from the normal coordination requirements of Executive Order 12067 and its regulations because the Department of Labor has demonstrated an urgent need to publish a notice on this subject which will have the effect of delaying implementation beyond the scheduled March 30, 1981 effective date of the regulation.
>
> The Department of Labor and EEOC will continue to consult on the subject matter of the proposed withdrawal during the public comment period. Both agencies also will review the public comments received.
>
> EEOC has previously expressed its concurrence with the regulation published on January 16, 1981. The granting of this waiver does not constitute a change in EEOC's views or original concurrence on the underlying regulation. The EEOC also has not reviewed the reformulation of Department of Labor policy as stated in this proposed withdrawal.

II. Further Suspension of the Effective Date of the Rule

In view of the issuance of this proposed withdrawal of the rule, the effectiveness of this rule is further suspended until the Department takes final action on the proposed withdrawal. Since this regulation has never gone into effect and since the agency is herewith proposing to revoke this regulation for the reasons stated, we believe it would be inappropriate to require compliance with this regulation during the brief period until a final determination is made. Under the circumstances, the agency also finds that separate notice and public comment on this further brief deferral of the effective date is impractical and unnecessary within the meaning of 53(b)(3)(B) of the Administrative Procedure Act.

III. Regulatory Flexibility Act Certification

I, Raymond J. Donovan, Secretary of Labor, certify, pursuant to 5 U.S.C. 605(b), that the

proposed rule published herein will not, if promulgated, have a significant economic impact on a substantial number of small entities. The proposed rule would eliminate for all Government contractors subject to Executive Order 11246, including small entities, an existing rule which imposes recordkeeping and reporting requirements. Removal of these requirements is expected to reduce burdens on all covered Government contractors, including small entities.

IV. Preparation of This Document

This document was prepared under the direction and control of Craig Berrington, Acting Assistant Secretary for Employment Standards.

V. Proposed Rule

Accordingly, it is proposed that 41 CFR Part 60–1 be amended by removing § 60–1.11.

§ 60–1.11 [Removed]

Signed at Washington, D.C., this 24th day of March 1981.

Raymond J. Donovan,
Secretary of Labor.

Craig A. Berrington,
Deputy Assistant Secretary, Employment Standards Administration.

BILLING CODE 4510-27-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[Gen. Docket No. 80-756]

Digital Communications Protocols; Order Extending Time for Filing Comments

AGENCY: Federal Communications Commission.

ACTION: Extension of time for filing comments to Notice of Inquiry.

SUMMARY: The Commission extends the date for the filing of comments to the Notice of Inquiry in General Docket No. 80–756, Digital Communications Protocols, released on December 8, 1980. The deadline for filing reply comments remains unchanged. This action is taken in response to a Motion for extension of time.

DATES: The filing date for comments is extended two additional weeks. Comments must now be filed on or before March 30, 1981. Reply comments must still be filed on or before May 15, 1981.

ADDRESS: Federal Communications Commission, 1919 M Street, NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Michael D. Kennedy, Technical Planning Staff, Office of Science and Technology, 2025 M Street, NW., Washington, D.C. 20554 (202) 632-7073—Room 7334.

SUPPLEMENTARY INFORMATION: In the Matter of Digital Communications Protocols, Order Extending Time for Filing Comments (See 45 FR 84140).

Adopted: March 13, 1981.
Released: March 18, 1981.

1. On march 11, 1981 GTE Telenet Communication Corporation (Telenet), by its attorneys, pursuant to Section 1.46 of the Commission's Rules and Regulations, 47 CFR 1.46, filed a request to extend the time for filing comments to March 30, 1981 in the above-captioned matter. Comments on the Notice of Inquiry in this matter, released by the Commission on December 8, 1980 are currently due on or before march 16, 1981.

2. Because the Inquiry raises substantial and complex questions relating to the implementation of the Commission's decision in the Second Computer Inquiry, Telenet feels that they will not be in a position to file comments which will do justice to the issues by March 16. Telenet's personnel are presently developing a technical discussion of the protocol issues which Telenet believes will make a significant contribution to the Commission's consideration of the matters raised in the Notice of Inquiry.

3. On March 12, 1981 Tymnet, Inc. (Tymnet), by its attorneys, filed comments supporting Telenet's motion for an extension of time.

4. The Commission is aware that the questions presented in this proceeding involve highly complex technical and policy issues. By developing the fullest record practicable, the Commission can insure that the issues will be examined and evaluated thoroughly. Therefore, for the above reasons and because we do not anticipate harm to any party, the request for extension of the comment period to March 30, 1981 is Granted.

5. Therefore, it is ordered, pursuant to § 0.241(d) of the Commission's Rules and Regulations, that the date for filing comments in this proceeding is extended. Comments must now be filed on or before March 30, 1981. The deadline for filing reply comments remains May 15, 1981.

Federal Communications Commission.
S. J. Lukasik,
Chief Scientist.

47 CFR Part 73

[BC Docket No. 81-170; RM-3712]

TV Broadcast Station in Lander, Wyo.; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes the assignment of VHF television Channel *5 to Lander, Wyoming, as its first noncommercial educational station, in response to a petition filed by Central Wyoming College.

DATES: Comments must be filed on or before May 12, 1981, and reply comments on or before June 1, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Broadcast Bureau, (202) 632-7792.

SUPPLEMENTARY INFORMATION: In the matter of amendment of § 73.606(b), table of assignments, Television Broadcast Stations (Lander, Wyoming), BC Docket No. 81-170 RM-3712.

Notice of Proposed Rule Making

Adopted: March 13, 1981.
Released: March 19, 1981.

By the Chief, Policy and Rules Division:

1. The Commission herein considers a petition for rulemaking [1] filed by Central Wyoming College ("petitioner"), which seeks the amendment of Section 73.606(b) by reserving VHF television Channel 4 at Lander, Wyoming, for noncommercial educational use. Petitioner stated it would apply for Channel 4, if it were reserved. Supporting comments were filed by Harriscope Broadcasting Corporation (licensee of AM Station KTWO and VHF Station KTWO–TV, Casper, Wyoming). Opposing comments were filed by the Chrysostom Corporation (permittee of UHF Station KCWY–TV), Casper, Wyoming.

2. Lander (pop. 7,125),[2] in Fremont County (pop. 28,352), is located in the western portion of Wyoming, approximately 32 kilometers (20 miles) southwest of Riverton, Wyoming. It is presently assigned VHF Channel 4 (unoccupied and unapplied for).

3. Petitioner claims that the public interest would be served by reserving

[1] Public Notice of the petition was given on August 8, 1980, Report No. 1242.
[2] Population figures are taken from the 1970 U.S. Census.

Channel 4 for noncommercial educational use. It would allow an expansion of the hands-on experience program for students enrolled in Radio/Television Broadcasting at the College, in addition to providing educational and cultural programming to Lander and the Wind River Basin area. It contends that no interest has been shown in operating a commercial station on Channel 4 since it was assigned.

4. Chrysostom, in opposition, argues that of all the reserved channels assigned in Wyoming, none has ever been applied for. It further claims that Lander would lose its only commercial channel, if this proposal is adopted. Chrysostom states that it intends to apply for authority to operate Channel 4 as a satellite of KCWY-TV, within the next sixty days, noting that its concrete expression for use of the channel, warrants denial of the proposal.[3]

5. It appears that Chrysostom's opposition stems from a desire to have a commercial channel available should it desire to apply for its use. However, there appears to be a need for a first noncommercial television service in western Wyoming. A staff study shows that Channel 5 is available for assignment to that community, thus leaving Channel 4 for commercial use. Since another channel can be assigned to Lander, we believe the public interest would be served by assigning and reserving Channel 5 for noncommercial educational use.

6. Comments are invited on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Rules) with regard to the city of Lander, Wyoming, as follows:

City	Channel No.	
	Present	Proposed
Lander, Wyoming	4	4, *5

7. The Commission's authority to institute rulemaking proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

8. Interested parties may file comments on or before May 12, 1981, and reply comments on or before June 1, 1981.

9. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rulemaking proceedings to amend the Television Table Assignments, Section 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

10. For further information concerning this proceeding, contact Montrose H. Tyree, Broadcast Bureau, (202) 632-7792. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission

Henry L. Baumann,

Chief, Policy and Rules Division, Broadcast Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[Gen. Docket No. 79-168; FCC 81-66]

Compulsory Telegraph Vessels; Requirement To Be Capable of Generating a Field Strength of 30 mV/m at a Distance of One Nautical Mile

AGENCY: Federal Communications Commission.

ACTION: Order Terminating the Proceeding.

SUMMARY: The Report and Order vacates without prejudice the proposal in this docket to establish a minimum field strength for compulsory telegraph installations, and looks toward gathering information on the efficiency of modern vertical antennas as compared with that of long-wire antennas used on vessels equipped with these compulsory installations. The question of whether to establish a minimum emitted field strength for these vessels will be reexamined after sufficient data has been amassed with respect to present day antenna efficiencies.

EFFECTIVE DATE: April 27, 1981.

ADDRESS: Federal Comunications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Irvin Hurwitz, Private Radio Bureau, (202) 632-7175.

SUPPLEMENTARY INFORMATION:

REPORT AND ORDER

(Proceeding Terminated)

Adopted: March 11, 1981.

Released: March 24, 1981.

By the Commission: Chairman Ferris not participating.

In the matter of amendment of Part 83 of the Rules to require all compulsory telegraph vessels to be capable of generating a field strength of 30 mV/m at a distance of one nautical mile.

1. On June 27, 1978, the Commission released a Notice of Proposed Rule Making in Docket 78-185 (43 FR 28840) on the above-captioned subject. This rulemaking was initiated in an attempt to update regulations that had been adopted by the Commission soon after the Ship Power Hearing (Docket) 5212 was completed late in 1936.

Background

2. The Ship Power Hearing was held in order to determine the minimum power that the FCC should require of radio transmitters compulsorily installed on vessels subject to the Communications Act of 1934, as amended (Act). The Act did not directly specify transmitter power on these vessels; instead it called for (Section 355, paragraph (e)):

> The main and reserve installations shall when connected to the main antenna, have a minimum normal range of two hundred nautical miles and one hundred nautical miles, respectively; that is, they must be capable of transmitting and receiving clearly perceptible signals from ship to ship by day and under normal conditions and circumstances over the specified ranges.

3. The purpose of the Ship Power Hearing was to translate these range requirements into transmitter power requirements. The conclusion that was agreed upon (200 watts output for the main transmitter; 25 watts for the reserve transmitter) was arrived at by construing the phrases from the Act quoted above in the following manner:

a. "Normal conditions and circumstances" was interpreted to mean calm seas, clear weather and average values of noise—atmospheric, galactic and man-made—for the frequencies involved.

b. "By day" restricted consideration to groundwave propagation—sky-wave did not have to be allowed for.

c. "Clearly perceptible signal" was taken to be 82.5 microvolts per meter (uV/m). This figure was reached in two stage: first, by agreeing on a signal-noise ratio of 5 to 1 and, second, by taking the value of noise at the antenna to be 16.5 uV/m. A determination of these values was essential for the following reasons:

(i) The signal-noise ratio tells us how strong an incoming radio signal must be—if it is to achieve a specified level of intelligibility—compared to the radio noise in the vicinity. Obviously, if the noise level is high, it will tend to interfere with the desired incoming signal unless the signal level is high enough to overcome the effect of the noise.

The factor by which the desired incoming signal must exceed the surrounding radio noise level, if it is to achieve a specified measure of intelligibility, is the signal-noise ratio referred to in the last paragraph. Experimental tests have shown that for some purposes and under some conditions it might be advisable to take it as high as 10 to 1; for other purposes and under other conditions, a ratio as low as 2 to 1 is adequate. These figures were in general derived by subjecting groups of radio operators to tests made up of incoming signals mixed with varying levels of artificially introduced noise; the scores they made on the tests were used to specify the intelligibility of the transmission. For a specified intelligibility, the different signal-noise ratios required by the individual operators were then averaged to arrive at a single figure. Of the various signal-noise ratios suggested at the Ship Power Hearing, a compromise figure of 5 to 1 was finally adopted by the Commission in order to take into account a possible lowering of operator competence as a result of the stresses engendered by a distress situation.

(ii) It was also essential to arrive at a reasonable figure for the external noise level. Noise varies with geographical location, time of day, season of the year, solar phenomena, and the amount and nature of the electrical equipment on board the vessel. To arrive at a reasonable average value of noise, FCC engineers recorded continuously the noise levels encountered on commercial vessels during eight separate voyages plying routes over different parts of the earth's surface. When these noise values were averaged and the seasonal variations of atmospheric noise taken into account, the figure arrived at was 16.5 uV/m.

These two average values, the noise and the signal-noise ratio were then multiplied together to yield a value for "clearly perceptible signal" of 82.5 uV/m. This meant that if a vessel were in an average noisy location (noise=16.5 uV/m) and that if a signal came in that was five times as great (82.5 uV/m), this would be considered for purposes of the Act (and, in practice, actually was) a "clearly perceptible signal."

d. Knowing that a signal of 82.5 uV/m was required at 200 nautical miles for the main transmitter (and at 100 miles for the reserve transmitter) it became a simple matter to calculate, within the statistical limits of accuracy of published propagation curves, that for the main installation the field strength at one nautical mile should be 30 mV/m (approximately 10 mV/m for the reserve installation).

e. The efficiencies of the antennas on board some 80 vessels were then measured.

f. Taking the median of these values, the investigator found that a main transmitter with a power output of 200 watts could be expected to generate a field strength of 30 mV/m at a mile and, similarly, a reserve installation with an output of 25 watts could be expected to generate a field strength of about 10 mV/m.

4. It was in this way that the statutory requirements of 200 miles (main installation) and 100 miles (reserve installation) were translated into transmitter powers of 200 watts and 25 watts respectively.

5. There was no attempt made at the time or subsequently to ensure that all vessels would under all conditions be able to communicate with other vessels at a distance of 200 miles. This, as the report of the hearing pointed out, could not be guaranteed by the state of the art at that time given the constraints of the problem (frequency, power, etc.). It still cannot be. All that was attempted was to achieve a likelihood that transmissions from a vessel with an average antenna in a location with average noise could be heard 200 miles away by an operator with average skill and equipment when conditions were "normal." The nature of radio and of radio propagation, taken in conjunction with the power levels involved, dictated a statistical approach and a resorting to averages.

6. Over the past forty years, most of the considerations leading to the established transmitter power values

remained constant. Geographical noise levels, signal-noise ratios, propagation characteristics showed little change. The one exception was antenna efficiencies. Because many of the newer vessels were built without kingposts or other structures to which long wire antennas might be attached, a shift was made by about a third of the U.S. fleet to vertical antennas. Vertical antennas are, in general, self-supporting metal masts approximately 50 feet in height (roughly 10% of a quarter wave-length); they are inherently less efficient than the long-wire antennas of thirty and forty years ago. And so the question arose whether the efficiency of the "average antenna" had been substantially reduced. Tests on about 10 vertical antennas installations carried out during the period 1970–73, showed none of them to be emitting a field strength as large as 30 mV/m at a mile. These tests were held under the auspices of the International Radio Consultative Committee (CCIR), a technical arm of the International Telecommunication Union.

7. As a result of these concerns, we proposed to make the criterion of 30 mV/m at a mile obligatory on all vessels instead of only on a mythical "average" vessel. A recently developed and tested vertical antenna which was expected to meet the 30 mV/m field strength served as an impetus for the proposal.

Comments

8. Comments in this Docket were received from the following organizations:

American Institute of Merchant Shipping (AIMS)
American Petroleum Institute (API)
Council of American-Flag Ship Operators (CASO)
ITT Mackay Marine (Mackay)
Rockwell International Corporation (Rockwell)

There were no reply comments. With the exception of Rockwell, all commenters were opposed to the proposal.

9. Rockwell, who strongly supports the Commission's proposed rule change, produces the "Collins 938G–1" MF/HF maritime vertical antenna which is was instrumental in developing. This is a new vertical mast antenna which, for some azimuth angles, can meet the FCC criterion of 30 mV/m at a nautical mile when fed with a telegraph signal of 200 watts. Tests have shown, however, that under some conditions radiation from the new antennas fall short of this goal by better than 15%.[1] In fact, all that is claimed in the Rockwell Symposium Paper (page 5) is ". . . that the antenna, *at some azimuth angles*, can meet the 30 mV/m field strength requirement with 200 watts of input power," (emphasis added).

10. The opposing comments may be summarized as follows (proponents of the several arguments are given in parentheses):

A. The proposed regulation is in conflict with SOLAS—the Safety of Life at Sea Convention (AIMS, API, CASO). It is argued that the proposal ignores the continuously updated advances in SOLAS over the past 40 years (AIMS). Hence, it is discriminatory, since its provisions are more stringent than those of SOLAS (AIMS, CASO) and might contribute to driving U.S. vessels off the market (CASO). There is no rationale why the U.S. should be burdened with excessive requirements (API). Let us adopt the SOLAS provisions,[2] unless the Commission can document its proposed position with substantial evidence (CASO).

B. The present rulemaking does not take into account technical advances in the last 40 years especially with regard to receiver sensitivity (AIMS, API, CASO). We would be better off replacing our present receivers with those of higher sensitivity (API). We should take advantage of the increased selectivity of present day receivers which make the proposed field strength figures needlessly high (Mackay).

C. Only one company manufactures the new antenna; there may be a possibility of the Commission encouraging monopolistic practices through regulatory mandate (AIMS).

D. This would be the first time a definitive figure for field strength was being incorporated into the rules. No evidence has been adduced that the old rule is unsatisfactory (AIMS).

E. Since the new antenna is the only one that purportedly meets the criterion (200 watts input/30 mV/m output at 1 nautical mile), and is just barely meets it with little margin for deterioration due to aging, environmental and other considerations (API), AIMS raises the question of what the FCC would do if the antenna's performance was reduced to the point where its output dipped below 30 mV/m at 1 nm. They want to know if the companies would have to go to the expense of replacing them is spite of their operating satisfactorily (even if marginally) now.

F. Replacing present day vertical antennas with a new vertical antenna capable of meeting the proposed requirements will be expensive. Estimated cost per installation will be $18,000 to $27,000 (API, Mackay, AIMS, CASO). For vessels using two such antennas the cost would be doubled (API). The total cost to the industry may well be over $6,000,000 (Mackay). Anticipated improvements in the distress system make the cost of implementing the instant proposal an unjustified expenditure (API).

G. The FCC has given no indication of how or under what conditions it intends to measure the field strengths which is a necessary adjunct to the legal enforcement of the regulation (AIMS).

Discussion

11. An evaluation of these arguments follows. It is presented in the order in which they are summarized above.

A. *Conflict with SOLAS.* The provisions of the Communications Act of 1934, as amended, where more stringent, are not in conflict with SOLAS, but supplementary to it.[3] The United States did in fact, agree to the minimum provisions on which agreement could be reached by all the SOLAS countries. But agreement to require no more of foreign-flag vessels than that they meet these minimum requirements, did not mean that the U.S. lowered safety standards for its own U.S.-flag vessels to those minimum requirements. As we have noted, this proceeding was instituted to implement the requirements contained in Section 355 of the Act.[4]

---

[1] See RTCM Symposium Papers, 1978, Vol III, Page 11 of "MF/HF Vertical Antenna Meets the Tests" by A. I. Osborne, Jr., Rockwell International.

[2] SOLAS provides for a range of 150 nautical miles in lieu of the 200 miles required by the Act. It defines a "clearly perceptible signal" as 50 uV/m instead of the 82.5 uV/m that is the U.S. standard.

[3] That this was the intent of Congress is demonstrated by the Act's legislative history. When in 1937 Congress added Title III Part II to the Act (Public Law 97), the committee reported:

Your committee assert generally that we have written into the bill the standards of the world, that in some respects we have raised such standards * * *. Page 3 Senate Report 196 on S. 605 (Pub. L. 97), March 17, 1937, 75th Congress, 1st Session.

Further, when Title III Part II was amended in 1954 after the 1948 Safety Convention came into effect, the Senate and House Reports on S. 2453 (Pub. L. 594), in identical language, contain the following:

This amendment also went beyond the radio provisions of the Convention of applying higher technical radio standards to United States vessels * * *. Page 2 of Senate Report No. 1883 (June 11, 1954) and page 2 of House Report No. 2286 (July 19, 1954) on S. 2453 (Pub. L. 594) 83rd Congress 2nd Session.

[4] With respect to the argument by AIMS that the proposal ignores the continually updated advances of SOLAS over the past forty years, the only changes made in this connection were as follows. SOLAS of 1929 reads (Article 31, 6):

"The main transmitter shall have a normal range of 100 nautical miles, that is to say, it must be capable of transmitting clearly perceptible signals from ship to ship over a range of at least 100 nautical miles by day under normal conditions and circumstances, the receiver being assumed to be one

Continued

B. No account is taken of recent technical advances. (i) *Sensitivity.* Sensitivity is a measure of the noise generated by a receiver's own low-level circuitry. If it were possible to reduce this low-level noise by 50%, a signal could be amplified twice as much as previously before the noise would be amplified to the same level which previously interfered with intelligibility. Thus the required strength of a usable signal would be halved. The commenters are correct in saying that receiver sensitivity has been improved over the years.

But in the case we are considering, amplification has never been limited by receiver low-level noise. Amplification of weak telegraph signals at these frequencies is normally limited by external, usually atomospheric noise. That noise comes into the receiver antenna along with the signal, and the receiver does not distinguish between the two and amplifies them both. Thus, increasing the receiver sensitivity will not reduce the noise, and the usability of a signal (which depends on the ratio of its amplitude to this noise amplitude—the signal-noise ratio) will not be improved.[6]

Unfortunately, although it has been possible over the years to reduce low-level receiver noise and so improve sensitivity, external noise has increased. Thus more sensitive receivers do not alleviate the problem.

(ii) *Selectivity.* The commenter correctly pointed out that the effect of external atmospheric noise can be reduced by narrowing the bandwidth of the receiver. However, there are constraints on the necessary bandwidth of the receiver.

First, it must be broad enough to accept a properly sent signal. This means ". . . effectively receiving A1 and A2 emissions on all frequencies within the bands 100–200 kHz and 405–535 kHz. . . ."[8] The modulating frequency of an A2 signal must be between 450 and 1350 Hz,[9] and a common speed of sending is 25 words a minute which equals 20 bauds. The necessary bandwidth to accommodate a properly sent A2 signal modulated with a tone of 1350 Hz and sent at a speed of 25 words per minute is 2700 Hz.[8]

This figure, however, does not take into account transmitter tolerances which in the present case would be 2500 Hz.[8] The bandwidth of the Assigned Frequency Band would therefore be 7700 Hz[10] and the band would extend under these conditions from 496.120 kHz to 503.880 kHz. Consequently, a minimum bandwidth of close to 8 kHz is required.

Thus, although it is true that a receiver with a 0.4 kHz bandwidth can tolerate many times as much noise as the old receivers, to employ them means paying an unacceptable price: the possibility of remaining unaware of the existence of an SOS issuing from a lifeboat in distress whose transmitter has strayed off 500 kHz by an amount only 1/5 of what this government has committed itself to regard as permissible. Since the U.S. agreed in an international convention to abide by these tolerances, it cannot change its position unilaterally and permit a vessel's call for help to go unheeded. Until international tolerances are reduced on emergency and survival craft transmitters, it is difficult to see how the United States can unilaterally take advantage of receivers with higher selectivities. The ITU World Administrative Radio Conference just held (1979) has provided for a new reduced tolerance but it will not be effective until January 1, 1990.

C. *Monopolistic practices.* We do not agree that adoption of the proposal would lead to monopoly in the manufacture and supply of ship vertical antennas. Although only one supplier makes the antenna which comes close to meeting the proposed requirement, the manufactuer of vertical antennas, like other items of radio equipment, takes place in an open market. There is nothing to preclude anyone from manufacturing vertical antennas. The fact that one company at present is the only manufacturer does not *per se* establish a monopoly. We would neither confer a privilege nor give any vested advantage to this sole manufacturer. If the demand exists, others can enter the market to compete.

D. *Field Strength criterion placed in rules.* AIMS is correct in declaring that the precise figure for field strength has never before appeared in the rules, but only partially correct in stating that there is no evidence that the present rule is unsatisfactory. Pressure for amending the rule has grown as the result of growing awareness that today's vertical antennas seem to be less efficient than the long-wire antennas. Values of the efficiencies of some vertical antenna installations may be found in Report 502–2 of Volume VII of the CCIR XIV Plenary Assembly, Kyoto, 1978.

E. *Margin for deterioration in the new antennas.* We share API's concern with respect to the small margin for deterioration of the new antennas when used in conjunction with 200-watt output transmitters. Although the proposed rule change was written to enable an increase of the margin by the use of higher power transmitters, this approach is not entirely satisfactory for the following reasons:

First, its effect on the ship's reserve installation may be undesirable. Normally, the emergency transmitter has a power supply of comparatively limited capacity; a decrease in efficiency of the antenna link in the transmission chain cannot be automatically compensated for simply by increasing the power of the transmitter—not when there are severe constraints on the capacity of the power supply energizing it. Where the trade offs in a system are delicately balanced, as is customary in the reserve installations of oceangoing vessels, it could be hazardous to depend on the strengthening of one link, in the hope of

---

employing a rectifier of the crystal type without amplification."

The SOLAS increase from 100 to the present requirement of 150 nautical miles was made in 1948 at which time the restriction to crystal rectifiers was dropped and "clearly perceptible signal" was spelled out in terms of the R.M.S. value of the field strength at the receiver being at least 50 microvolts per meter. The United States, which had adopted in 1938 a value for "clearly perceptible signal" of 62.5 microvolts per meter as a result of much testing and experimentation, was unable to get international agreement on this value. (For details of this testing and experimentation by the United States and of the rationale supporting them, see FCC *Ship Power Hearing*, November 14–18, 1938, *Report of Commissioner T.A.M. Craven in Docket 5212*, dated May 9, 1939, and *Order* dated July 27, 1939, in Docket 5212. A portion of this material has been summarized in paragraph 3 above.) Accordingly, the United States agreed to the use of the lower value by foreign-flag vessels. It has retained the higher value for application to U.S.-flag vessels since no comparable subsequent study has come up with a more trustworthy value.

[6] These considerations are well known and often lead to the selection, in some circumstances, of less sensitive (and less expensive) receivers than the maximum than the state of the art affords. For example, CCIR recommends:

"When, however, either the external noise level or the input signal level is high, the internal receiver noise is less important. For this reason, some receivers (e.g., many broadcast receivers) are not designed to have the best possible relative values of reference sensitivity. . . ." Paragraph 5, Annex II of Recommendation 331.4 of Volume I of CCIR XIV Plenary Assembly, Kyoto, 1978.

[8] Section 83.444(c) of the Rules and Regulations of the Commission. This requirement is based on paragraphs 7931 (old 973) and 7932 (old 974 MAR) of the Radio Regulations of the International Telecommunication Union (ITU), and paragraph (h) of Regulation 10, Chapter 4, of SOLAS.

[9] Paragraph (f) of Regulation 10, Chapter 4, of SOLAS.

[8] By Appendix 3 of the ITU Radio Regulations, the Necessary Bandwidth, Bn, equals BK + 2M where B is beads, K is a constant (in this case 3) and M is the modulating frequency.

[8] By Appendix 3 of the ITU Radio Regulations, the tolerance specified for ship emergency transmitters and survival craft stations is 5000 parts per million or 2500 Hz at 500 kHz.

[10] Paragraph 3138 (old 80) of the Radio Regulations of the ITU reads: "3.11 Assigned Frequency Band: The frequency band within which the emission of a station is authorized: the width of the band equals the necessary bandwidth plus twice the absolute value of the frequency tolerance. . . ."

compensating for the weakness of another.

Second, even in the main installation, a greater increase in the power input to an inefficient antenna can lead to excessive voltage buildup, corona, arcing and insulation breakdown.[11]

F. *Cost of Equipment.* Replacement costs of new antennas are high enough to warrant a comparision of benefits derived and costs incurred. The distress system will be replaced in the not-too-distant future. However, if there are reasonable assurances of substantial short-term benefits during the period before the international negotiations are concluded, the proposal would be justified. Mackay's conservative estimate of a $6,000,000 price tag to the industry does not even include the cost of new equipment—main and emergency transmitters, batteries, auxiliary devices—that may follow in its wake. Nor does it include the cost to the government of enforcing the proposed regulation.

G. *FCC Implementation.* AIMS asks the Commission's intentions with respect to measurements of field strengths in enforcing the proposed regulation. When a ship fails to develop the required field strength by a substantial amount, the FCC has called for immediate corrective measures. Where a marginal deficiency exists the FCC has given time in which to reach compliance. For example, in the case cited by AIMS where antenna performance deteriorates to the point where the field strength is only 29 mV/m, the case could be handled similarly to that of the long-wire antenna. Under the proposed regulation a Notice of Unsatisfactory Condition could be issued which would in essence give the licensee a reasonable period to repair or replace the antenna or otherwise meet the requirements. If performance by the antenna-transmitter combination—as shown, for example, by the antenna current—appears to be adequate, there may be little point to making field strength measurements once the characteristics of the installation and its normal capacity have been determined. On the other hand, an installation that is known to be marginal might require testing of its field strength at every annual and special inspection. This is a necessary consequence of the draft regulation being based on the performance of the individual ship's antenna instead of, as in the past, basing itself on the average performance of a large population of antennas.

12. There are considerable difficulties either with continuing with the status quo of a gradually eroding level of antenna efficiencies, or with adopting the proposal as it stands, which could be a costly procedure whose benefits are not assured. We are deferring decision between them pending a reevaluation of "average antenna efficiency" (and, perhaps simultaneously, of "normal conditions and circumstances" and "clearly perceptible signal") in as objective a manner as possible. Our Field Operations Bureau is planning to test, over the course of the next few years, the field strengths of the signals radiated by many United States vessels. This will provide a measure of the antenna efficiencies of the vertical antenna installations and a comprision with long wire antennas.

13. If vertical antenna efficiencies are substantially up to those of long wire antennas, we need not amend our rules. If, on the other hand, they are shown to be considerably less, we may have to again propose new rules.

14. The Commission directs the publication of the appended Public Notice.

15. Regarding questions on matters covered in this document contact Charles D. Fisher at the telephone number (202) 632-7175.

16. Accordingly, *It Is Ordered,* That pursuant to the authority contained in Section 4(i), 303(f) and 303(r) of the Communications Act of 1934, as amended, the instant proposal is vacated, the attached appendix is adopted, effective April 27, 1981 and this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

[No. 28950]

The Commission this date approved a Report and Order terminating without prejudice the proceedings in Docket No. 78-185 which would have required all compulsory telegraph vessels to be capable of generating a field strength of 30 mV/m at a distance of one nautical mile for all long-wire and vertical antennas. It has decided to institute a series of tests to determine the antenna efficiencies of U.S. flag vessels. When these tests are completed and the results analyzed, the Commission will return to a consideration of how to implement the two hundred and one hundred nautical mile range requirements of Title III, Part II of the Communications Act of 1934, as amended.

By Direction of the Commission.

[FR Doc. 81-9315 Filed 3-26-81; 8:45 am]

BILLING CODE 6712-01-M

[11] It was for this reason that the Commission did not pursue a tentative of this nature that had been proposed in 1969 in Docket 18570.

Notices

Federal Register
Vol. 46, No. 59
Friday, March 27, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

Plant Variety Protection Board; Closed Meeting

AGENCY: Agricultural Marketing Service, Agriculture.

ACTION: Notice of closed meeting.

SUMMARY: The Plant Variety Protection Board was established by Congress under the provisions of section 7 of the Plant Variety Protection Act (PVPA) (7 U.S.C. 2327).

The Board advises the Secretary concerning the adoption of rules and regulations to facilitate the proper administration of the Act and makes advisory decisions on all appeals from the Examiner or Commissioner. When making advisory decisions on appeals, the Board may act through a panel of its members rather than as the full Board.

DATE: April 15, 1981, closed meeting will begin at 9:30 a.m.

ADDRESS: U.S. Department of Agriculture, Room 2092, South Agriculture Building, 1400 Independence Avenue, SW., Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Bernard M. Leese, Commissioner, Plant Variety Protection Office, National Agricultural Library Building, Room 500, Beltsville, Maryland 20705 (301/344–2518).

SUPPLEMENTARY INFORMATION: The Plant Variety Protection Board is a 14-member advisory committee established by the PVPA. The Board's membership consists of individuals appointed by the Secretary, who are experts in various areas of varietal development within the scope of the PVPA. In addition to serving as advisor to the Secretary with respect to the adoption of rules and regulations, the Board also functions as advisor on all appeals from the Commissioner's decisions denying applications for variety protection. When making advisory decisions on appeals, section 7(B)(2) of the Act permits the Board to act through a panel it selects rather than as a full Board.

The closed meeting being announced in this Notice, is being held for the sole purpose of having the Board, acting through a three member panel it selected, review and advise the Secretary with regard to a specific appeal from the Commissioner's decision denying an application for plant variety protection. Review of this application in closed session is required to maintain the confidentiality of the application and its contents as required in section 56 of the Act (7 U.S.C. 2425), and is permitted pursuant to the authority in section 10(d) of the Federal Advisory Committee and section 552b(c)(3) of the Administrative Procedure Act (5 U.S.C. 552b(c)(3)).

A copy of the Determination to Hold a Closed Meeting is available for public inspection and copying in the Office of the Director, Livestock, Poultry, Grain, and Seed Division, AMS, USDA, Room 2092, South Building, 1400 Independence Avenue, SW., Washington, D.C. 20250 (202/447–5705).

Signed at Washington, D.C. on March 24, 1981.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

BILLING CODE 3410-02-M

Agricultural Stabilization and Conservation Service

Feed Grain Donations for the Blackfeet Indian Tribe in Montana

Pursuant to the authority set forth in Section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427) and Executive Order 11336, I have determined that:

1. The chronic economic distress of the needy members of the Blackfeet Indian Tribe in Montana has been materially increased and become acute because of severe and prolonged drought substantially reducing range forage and hay production, thereby creating a serious shortage of feed and causing increased economic distress. This reservation is designated for Indian use and is utilized by members of the Blackfeet Indian Tribe for grazing purposes.

2. The use of feed grain or products thereof made available by the Commodity Credit Corporation for livestock feed for such needy members of the tribe will not displace or interfere with normal marketing of agricultural commodities.

3. Based on the above determinations, I hereby declare the reservation and grazing lands of the tribe to be acute distress areas and authorize the donation of feed grain owned by the Commodity Credit Corporation to livestock owners who are determined by the Bureau of Indian Affairs, Department of the Interior, to be needy members of the tribe utilizing such lands. These donations by the Commodity Credit Corporation may commence upon signature of this notice and shall be made available through May 31, 1981, or to such other time as may be stated in a notice issued by the Department of Agriculture.

Signed at Washington, D.C. on March 19, 1981.

Edward Hews,

Acting Administrator, Agricultural Stabilization and Conservation Service.

BILLING CODE 3410-05-M

Food and Nutrition Service

Maternal, Infant and Fetal Nutrition Advisory Council; Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Council meeting:

Name: National Advisory Council on Maternal, Infant and Fetal Nutrition.

Date and time: 9:00 a.m., April 13–15, 1981.

Place: Conference Room No. 645, GHI Building, 500 12th Street, SW., Washington, D.C. 20250.

Purpose of meeting: The Council will continue its study of the Special Supplemental Food Program for Women, Infants and Children (WIC) and the Commodity Supplemental Food Program (CSFP), and will discuss a wide range of matters concerning the operations of these two programs.

Proposed agenda: The agenda items will include the following issues: funding and caseload management; regulatory review; demonstration projects and program evaluations; and general program operations.

This meeting will be open to the public. As time permits, members of the public may participate in the meeting.

Persons wishing additional information about this meeting should contact Mary Hemler Sloane, Supplemental Food Programs Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 447-8421.

Dated March 24, 1981.

G. William Hoagland

Administrator, Food and Nutrition Service.

Soil Conservation Service

Great Plains Conservation Program, Intent To Prepare a Program-type Environmental Impact Statement

AGENCY: Soil Conservation Service, Department of Agriculture.

ACTION: Notice of Intent To Prepare a Program-type Environmental Impact Statement, Great Plains Conservation Program.

FOR FURTHER INFORMATION CONTACT: Guy D. McClaskey, Soil Conservation Service, P.O. Box 2890, Washington, D.C. 20013, telephone (202) 447-2324.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Guidelines (40 CFR 1500), and the Soil Conservation Service Guidelines (7 CFR 650), the Soil Conservation Service, U.S. Department of Agriculture, gives notice that a program-type environmental impact statement (EIS) is being prepared for the Great Plains Conservation Program (GPCP). GPCP was enacted in 1956 by the 84th Congress (Pub. L. 84-1021, 16 U.S.C. 590p, as amended) and is to terminate on September 30, 1981.

The environmental evaluation of GPCP, which was started in November 1980 (see FR 81210, Vol. 45, No. 230, Wednesday, December 10, 1980) indicates that implementation of GPCP has significant cumulative impacts on the human environment. As a result of this evaluation, Norman A. Berg, Chief, Soil Conservation Service, has determined that the preparation and review of a program-type EIS is needed for this program.

GPCP gives assistance under long-term contracts to land users in 516 designated counties of 10 Great Plains States. Its purpose is to provide economic stability to the farm unit by providing needed protection and improvement of soil, water, land, plant, and wildlife resources of the Great Plains Area, which is plagued with recurring drought and wind erosion problems. Installing complete conservation treatment and management systems on farms and ranches helps stabilize individual enterprises and, consequently, the local economy.

A draft of the program-type EIS will be prepared and distributed for review and comment by Federal, State, and local agencies and the public in general. The Soil Conservation Service invites the public to participate in the decisionmaking process by reviewing and providing substantive comments and suggestions on the draft EIS when it is issued.

(Catalog of Federal Domestic Assistance Program No. 10.900, Great Plains Conservation Program. Office of Management and Budget Circular A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is not applicable)

Cletus J. Gillman,

Deputy Chief, for State and Local Operations.

BILLING CODE 3410-16-M

CIVIL AERONAUTICS BOARD

Air Service Certificate; Application All-Cargo

March 19, 1981.

In accordance with Part 291 (14 CFR Part 291) of the Board's Economic Regulations (effective November 8, 1978), notice is hereby given that the Civil Aeronautics Board has received an application, Docket 39438, from Two Americas Trading Co., Inc. d/b/a ICB International Airlines, Suite 104, 1020 Manhattan Beach Boulevard, Manhattan Beach, California 90266 for an all-cargo air service certificate to provide domestic cargo transportation.

Under the provisions of § 291.12(c) of Part 291, interested persons may file an answer in opposition to this application on or before April 17, 1981. An executed original and six copies of such an answer shall be addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. It shall set forth in detail the reasons for the position taken and must relate to the fitness, willingness, or ability of the applicant to provide all-cargo air service or to comply with the Act or the Board's orders and regulations. The answer shall be served upon the applicant and state the date of such service.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

[Docket 39285; Order 81-3-100]

Texas International-Continental Acquisition Case; Order Instituting Investigation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 19th day of March, 1981.

By its application of February 20, 1981, Texas International Airlines, Inc. asked us to approve its acquisition of control of Continental Air Lines, Inc., pursuant to section 408 of the Federal Aviation Act, as amended.[1] In contemporaneously filed pleadings, TI requested expedited consideration via the use of show-cause procedures, a limited exemption from Part 315 of our Procedural Regulations [2], and withholding from public disclosure of certain materials submitted in accordance with Part 315. Continental and BCCP raised the issue of the application's completeness. Continental, Western, and several labor groups opposed the use of show-cause procedures. In the following paragraphs, we will treat the various pleadings and discuss the labor and international matters that are at issue in addition to the competitive questions customarily explored in section 408 proceedings.

Continental asked in its March 2, 1981 motion that we dismiss TI's application on the grounds that it fails to comply substantially with the requirements of Part 315 of our Procedural Regulations. Continental contended that the application does not include relevant documents required by §§ 315.10(g) and 315.13 that were prepared by or for TI's parent companies and controlling persons [3] or for TI itself. It alleged that TI omitted to supply all of the materials required under § 315.10(g) that were prepared for the three years prior to the filing of the application. Other missing items, according to Continental, include documents on the financing of the acquisition, minutes of board of directors or executive committee meetings or discussions relating to Continental or the acquisition, and the dates of preparation, names and

[1] 49 U.S.C. 1378.

[2] 14 CFR Part 315.

[3] These include Texas Air Corporation, Jet Capital Corporation, Francisco Lorenzo, and Robert Carney.

positions of preparers, and recipients of numerous documents. Continental argued that, in sum, these omissions establish that TI's application is materially deficient and should therefore be dismissed.

In its March 6 answer, TI characterized Continental's allegations and objections as "super-technical" and an inadequate basis for dismissal of the application. It amended the application so that Texas Air, Jet Capital, Mr. Lorenzo, and Mr. Carney join it in seeking authority to acquire control of Continental, but it denied that the original omission of these persons prejudices Continental or establishes that its original application does not substantially comply with Part 315. It claimed that Jet Capital has § 315.10(g) or § 315.13 documents, and it filed the information on Jet that Part 315 requires contemporaneously with its answer. It also filed several documents it claimed were overlooked during its original search.[4] TI argued that omission of these documents has not prejudiced Continental, since the latter had already obtained them in the course of the court discovery process conducted in its suit against TI in the United States District Court for the Central district of California. TI noted that it has already submitted a copy of its loan commitment agreement with Manufacturers Hanover Trust Company and claimed that no other documents of the type exist. Although it did not read § 315.10(g) as requiring minutes, it nonetheless submitted portions of these minutes of board of directors meetings that contain discussion of the acquisition and that have been adopted by the board.[5] It claimed that as in the case of the previously overlooked documents, Continental had already obtained these minutes through discovery in connection with its suit in federal court in California. Finally, TI argued that the omission of names of preparers, dates, and recipients of some studies is trivial at best, and it proceeded to supply this information in the answer.

We agree with TI that its original application complies substantially with the requirements of Part 315, and we thus deny Continental's motion to dismiss it. We have said that we will not dismiss section 408 applications that are deficient only in minor respects.[6] Not only is the quantity of the material TI submitted on March 6 inconsiderable relative to the volume of the original application, but it adds little of substance that will aid us in determining whether the proposed acquisition is consistent with the public interest or likely to lessen competition substantially. Furthermore, the omissions cannot have prejudiced Continental, since it had already gained possession of most of the materials omitted.

In its motion for expedited consideration by show-cause order, TI asserted that there is no need for an oral evidentiary hearing, since virtually every relevant, significant fact concerning Continental's system is set forth in the record of the second *Continental-Western Merger Proceeding*, Docket 38733, along with extensive evidence on the current state of competition in the airline industry. It contended that its application presents few, if any, material issues of fact and that, consequently, there is no need for another round of expensive, time-consuming, plenary proceedings. The Bureau of Compliance and Consumer Protection (BCCP) filed an answer in support of TI's request for a show-cause order, contending that TI's application can be handled using show-cause procedures because there are no outstanding anticompetitive implications to the proposed acquisition.

Continental Air Lines, Western Air Lines, the City and County of Denver, and six union groups [7] all filed answers generally in opposition to the use of show-cause procedures. Continental asserted that a hearing is necessary because there are several unresolved material issues of fact as to both the competitive effect of the proposed acquisition and TI's plans. In addition, Continental disputed TI's contention that the record developed in the second Continental-Western merger proceeding is sufficient for resolution of the issues that TI's application raises. Western also expressed concern about the competitive consequences of the proposed transaction at Houston as well as in various Texas-Mexico markets. The Denver parties voiced concern about the lack of specificity in TI's plan and argued that a hearing is necessary to ascertain what TI intends to do with Continental.

The union groups contended that we must hold a hearing unless we indicate at the outset that we intend to impose labor protective provisions in the event that we approve the acquisition. Otherwise, they insist that we must hold a hearing because of TI's present unwillingness to accept the provisions and the uncertainty as to its plans. In addition, the Continental Pilots Master Executive Council asserted that a hearing is necessary because TI's application presents substantial antitrust issues.

We have decided to deny TI's motion and to hold a hearing: we believe that oral evidentiary hearing procedures will be the most expeditious and efficient means to process the application. The section 408 cases for which we have recently utilized show-cause procedures (*i.e.*, Republic's acquisition of Hughes Airwest and Air Florida's proposed acquisition of Air California) have involved uncontested applications. We are not persuaded by TI's argument that show-cause procedures in this case would enable us to handle its application more quickly. Our decision to afford parties a full evidentiary hearing will not delay our action to any significant extent, since we are required under section 1010 of the Federal Aviation Act to act by August 31, 1981.

Having determined that TI's application complies with Part 315 and denied its request for show-cause procedures, we now address its petition for a limited exemption from that part and its motions to withhold from public disclosure. TI submitted two copies of its SEC reports, collective bargaining agreements, pension plans, and ERISA reports as required by §§ 315.11, 315.17(f), and 315.17(g), but requested an exemption from sec. 315.(a)'s requirement that 20 copies of these documents be filed. We will grant this exemption, so long as TI agrees to provide them upon request. The public has access to these materials in the docket, and requiring TI to produce 20 copies would therefore burden it unnecessarily.[8] As for confidential treatment of documents filed under part 315, the administrative law judge has full authority to rule on TI's motions to withhold from public disclosure.[9] We will provide interim confidential treatment pending the judge's ruling. The documents are already available to attorneys of record and their experts who file the requisite affidavit under §315.4. The administrative law judge will also rule on the attorney-client privilege issue.

Although applicants in recent section 408 cases have requested that we attach the standard labor protective provisions

[4] TI requested confidential treatment for three of these and, in a separate pleading, claimed the attorney-client privilege for four other documents.

[5] Minutes of more recent meetings have not been adopted, and TI has not submitted them.

to our approval, TI has not done so. Instead, it has indicated its intention to treat the labor ramifications of the acquisition through negotiation. Various employee groups have argued in response that the standard provisions are the only practicable means of solving the problems this acquisition will create for employees of both carriers and that the public interest thus requires that we impose them.[10]

We have expressed on more than one occasion our reluctance to impose labor protective provisions now that Congress has provided for the deregulation of the air transportation industry.[11] We did so first in our order in the Texas International-National and Pan Am-National cases. In subsequent cases, when both labor and management requested the provisions and management has stated that it would adopt them even if we did not impose them, we have agreed to impose them even while reiterating our disinclination to do so. This case differs from its predecessors in that it is the first post-deregulation §408 case in which managment has in fact asked that we not impose labor protective provisions and has indicated its willingness to investigate alternate solutions to acquisition related labor problems. Under these circumstances, imposition of labor protection in the other post *National* cases does not necessarily constitute precedent for their imposition here.

The issue of the imposition of labor protective provisions contains questions of law and policy which we expect the parties to address in their briefs to the administrative law judge and to us. As for its factual aspects, we expect more than the evidence that has been submitted in other recent cases: predictions of the consolidation's effects on employees and expert testimony that successful intergration of two separate work forces would be difficult or impossible without the provisions. We are particularly concerned that the record contain, to the extent possible, evidence on the relative costs and benefits produced by the labor protective provisions. Specifically, we need to know how long intergration has taken under the provisions; how smoothly it has proceeded; whether or not integration has been completed in post-deregulation mergers and acquisitions, and if not, why not; the magnitude of the direct costs labor protection has imposed on these consolidations; and the nature and magnitude of the indirect costs, such as an inability to integrate and rationalize operations, that they may have caused. Such practical evidence, along with explication of the legal and policy arguments on both sides of the issue, will help us to make an informed decision on whether to condition approval of this acquisition on TI's acceptance of the standard labor protective provisions.[12]

Also at issue in this proceeding is whether our approval of this acquisition should be conditioned upon the nontransfer of certain international routes. We have the same concern over a possible loss in intergateway competition between the United States and Mexico as that which prompted us to condition our approval of the Pan American-National acquisition upon nontransfer to Pan American of National's Miami-London route.[13] Bilateral agreements between the United States and Mexico limit U.S. designations,[14] so we further our procompetitive policy by promoting intergateway competition in U.S.-Mexico service.[15] TI and Continental each hold significant U.S.-Mexico route authority, some awarded with the specific design of fostering intergateway competition.[16] This design would be frustrated were we to approve the acquisition and permit complete amalgamation of the two carriers' route authority without first assessing the effects on competition such amalgamation would likely produce.

We are concerned about this acquisition's likely effects on competition in service between Texas and the Yucatan. We have awarded DFW-Yucatan authority to TI [17] and Houston-Yucatan authority to Continental [18], and we have said that "the same carrier should not serve both Dallas and Houston because that could have a serious anticompetitive effect on Western U.S.-Yucatan service." [19] Consistent with this analysis, we tentatively conclude that if we approve TI's acquisition of Continental, we should condition our approval on nontransfer of TI's DFW-Yucatan route. We have already taken note of Continental's system strength at Houston [20]; this strength would pass to TI and give it heightened traffic-generating capability for the Houston-Yucatan route. TI's Houston headquarters also gives it incentive to develop the route. In addition, we anticipate that more carriers would vie for the DFW-Yucatan route than for the route from Houston, since DFW has greater and more diversified feed to support service to the Yucatan than does Houston.

We are also concerned about this acquisition's likely effect on competition in service between the U.S. and Western Mexico. Continental has authority from Albuquerque and El Paso to Loreto, La Paz, San Jose del Cabo, Puerto Vallarta, Manzanillo, and Acapulco.[21] TI has authority from Houston to these points and two others.[22] We tentatively conclude that if we approve the acquisition, we should condition our approval on nontransfer to TI of Continental's Albuquerque/El Paso-Western Mexico route, so as best to fulfill our policy of promoting intergateway competition in limited-entry international markets. The strengths TI would have in Houston upon acquiring Continental provide a firm basis for leaving the former's Houston-Western Mexico authority intact. The administrative law judge who recommended TI for that award emphasized TI's ability to provide competition against the other carriers selected for other U.S.-Western Mexico routes.[23] He warned against the anticompetitive effects of control by the same carrier of every gateway to Mexican resort destinations along the U.S. border between Albuquerque and the Gulf of Mexico,[24] but something close to this would result were we to allow TI to retain Continental's authority in addition to its own.

In the event that we approve this acquisition and finalize the above tentative conclusion, we shall then institute a proceeding to determine what carriers should be awarded the route authority not transferred to TI.

---

[10] This position has been taken by the Texas International Master Executive Council, the Association of Flight Attendants, the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, the Airline Pilots Association, the Continental Air Lines Pilots Master Executive Council, and the Union of Flight Attendants.

[11] *See* Orders 79-12-103/104/105, at 66-68, 80-5-108, at 9, 80-8-163, at 5, and 80-9-65, at 5.

[12] Parties should feel free to argue that some but not all of the provisions must be imposed—we are not bound to impose all of them or none.

[13] *See* Order 79-12-103/104/105 at 47-52.

[14] Order 79-6-66 at 2.

[15] Order 80-12-18 at 4.

[16] *Id.* at 4-5 (Continental's Houston-Yucatan authority).

[17] Order 81-1-63.

[18] Order 80-12-18.

[20] Order 80-12-18.

[21] *California/Southwest-Western Mexico Route Proceeding*, Order 79-6-66.

[22] *Texas/Southeast-Western Mexico Route Proceeding*, Docket 34139 (tentative decision submitted to the President on February 23, 1981 and served on March 9, 1981).

[23] Docket 34139, Recommended Decision at 23.

[24] *Id.* at 22.

We decide at this time to take discretionary review of the administrative law judge's decision. We grant the judge the discretion to limit the form of his decision to findings of fact or findings of fact and conclusions of law. The option of writing less than a full opinion should give the judge added scheduling flexibility.

Accordingly: 1. We institute the *Texas International-Continental Acquisition Case* in Docket 39285 to consider the application of Texas International Airlines, Inc., *et al.*, for approval of the acquisition of Continental Air Lines, Inc., and we set this case for hearing before an administrative law judge of the Board;

2. We deny TI's motion for show-cause;

3. We deny Continental's motion to dismiss;

4. We grant TI's February 20, 1981 and March 6, 1981 motions to withhold specified documents from public disclosure pending a decision by the administrative law judge. Access to the documents may be had according to the requirements in § 315.4 of our Rules;

5. We will permit the parties to appeal within two working days the judge's denial of an application to take a deposition or for issuance of a subpoena or the grant of a motion to quash or modify a subpoena. Reply comments may be filed within one working day;

6. The administrative law judge in this proceeding may issue his decision in the form of findings of fact or findings of fact and conclusions of law;

7. Petitions for reconsideration of this order shall be filed within 10 days of the date of service of this order, and replies shall be filed 5 days thereafter;

8. We shall serve this order on the United States Departments of Justice and Transportation, the Federal Trade Commission, and all certified air carriers.

We shall publish this order in the Federal Register.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

Maritime Administration

[Docket No. S-668]

United States Lines, Inc.; Application for Operating-Differential Subsidy

Notice is hereby given that United States Lines, Inc. (USL), a Delaware corporation, has filed an application, dated February 17, 1981, as amended, (the Application) with the Maritime Subsidy Board (the Board) pursuant to Title VI (46 U.S.C. 1171–1183) of the Merchant Marine Act, 1936, as amended (the Act), for a 20 year, long-term operating-differential subsidy agreement (ODSA) to aid in the operation of 15 container vessels which are to be used on essential services in the foreign commerce of the United States, i.e., (1) on combined Trade Route Nos. (TRs) 5–7–8–9 and 11 (U.S. North and South Atlantic/United Kingdom and Continent) with four vessels, and (2) on combined TRs 12 and 29 (U.S. Atlantic/Pacific/Far East) with 11 vessels. If awarded, the contract will run for 20 years from the date of such award. USL has requested expedited treatment in the form of a show cause notice based upon it existing services.

USL currently provides weekly service on a subsidized basis on TRs 5–7–8–9 with four C8–S–1wc container vessels under Operating-Differential Subsidy Agreement (ODSA), Contract No. MA/MSB–483 (MA/MSB–483).

USL also currently provides approximately weekly, and has existing, services on an unsubsidized basis (1) on combined TRs 5–7–8–9 and 11 with four C8–S–1wc container vessels, and (2) on combined TRs 12 and 29 with two C7–S–68c, three C7–S–68d, three C7–S–68e and one C8–S–81e container vessels. In April 1981, USL proposes to put into service and operate two C8–S–85a container vessels on combined TRs 12 and 29. Although 11 vessels rather then nine vessels will be operated on TRs 12/29, USL plans to reduce the sea speed of all vessels and continue approximately weekly service.

USL proposes to continue its existing service on combined TRs 5–7–8–9 and 11 with the four container vessels with subsidy up to a maximum of 53 sailings annually. U.S. ports served by USL on combined TRs 5–7–8–9 and 11 include Boston, New York, Savannah, Jacksonville and Charleston. The regular foreign ports of call for USL include Rotterdam, Felixstowe, LeHavre, with connection service to Grangemouth which encompasses ports on combined TRs 5–7–8–9 and 11.

USL proposes to continue its existing service on combined TRs 12 and 29 between the United States East Coast/United States Pacific Coast (California) and the Far East, including calls at ports in Panama, the State of Hawaii and Guam, with 11 container vessels with subsidy up to a maximum of 53 sailings annually. U.S. ports served by USL on combined TRs 12 and 29 include New York, Norfolk, Baltimore, Savannah, Long Beach, Oakland, Honolulu and Guam. The regular foreign ports of call for USL incude Panama, Kaohsiung, Hong Kong, Kobe, Yokohama, with connecting service to Whampo and Busan, which encompasses ports on combined TRs 12 and 29.

In connection with MA/MSB–483, USL was granted written permission under section 805(a) of the Act to continue the following operations: (1) intercoastal service between the U.S. east coast and the U.S. west coast on a weekly service via the Panama Canal as part of its unsubsidized service on a round voyage from the Atlantic Coast of the United States to the Orient, and (2) between the U.S. east coast and/or U.S. west coast and the State of Hawaii as a part of its unsubsidized service on a foreign trade voyage on a weekly service westbound only (and in any event westbound calls at Hawaii will not exceed 52 per year). USL proposes to increase westbound calls at Hawaii to 53 per year (due to the fact that in certain years weekly service could result in 53 sailings) as a part of the subsidized service if the Application be granted.

In connection with MA/MSB–483, USL was granted waivers under section 804(b) of the Act to continue (a) chartering and operating the German-flag vessel NAUTILUS, of approximately 150 TEUs capacity, between ports in the United Kingdom, France, the Netherlands and West Germany, as a feeder vessel transshipping cargo to and from its vessels operating on TRs 5–7–8–9 and 11, (b) chartering out the Liberian-flag vessel AMERICAN MOHAWK which operates between the Far East and Africa, and (c) chartering out the Liberian-flag vessels FORMOSA CONTAINER and STRAIT CONTAINER which operate between Hong Kong and Taiwan, the Board having determined that the vessels under (b) and (c) do not presently compete with any essential U.S.-flag service within the meaning of section 804(a) of the Act and, regardless, there are special circumstances and good cause for the grant of such waivers. USL proposes to continue these activities with such waivers if the Application be granted.

USL requests that the following be included in any Contract that may be awarded pursuant to this Application: (i) the full interchange (substitution) or transfer of any of its vessels to be operated as subsidized vessels on subsidized voyages on and among its subsidized routes; (ii) to allow its subsidized and unsubsidized vessels on voyages on combined TRS 12 and 29 service to make calls at ports in

Panama, U.S. Pacific (California), Guam and weekly westbound only calls at the State of Hawaii during said voyages; (iii) to permit an unrestricted number of voyages without subsidy, by new or existing vessels of USL or an affiliated company, on trade routes and services for which it receives subsidy or on trade routes and services for which it does not receive subsidy, so long as USL fulfills its obligations under its subsidy agreement. USL recognizes that the essential trade routes are severable and may stand on their own for the purpose of awarding an ODSA.

The U.S.-flag operators which compete with USL on its TRs 12/29 service are American President Lines, Ltd. (APL), Lykes Bros. Steamship Co., Inc. (Lykes), Waterman Steamship Corporation (Waterman) and Sea-Land Services, Inc. (Sea-Land).

APL has contractual rights to call its ships at U.S. Atlantic ports, but does not normally serve the U.S. Atlantic with its ships providing direct service, rather utilizing unit trains for intercoastal cargo movements; thus APL operates on TR 29, with its 22-vessel fleet of 17 containerships and five breakbulk ships. APL provides four basic services from the U.S. Pacific on TR 29, three of which are containership services; one containership service serves TR 29 in conjunction with TR 17. APL's four services on TR 29 and TR 29/17 in 1980 performed 150 sailings; in 1979, 150 sailings; in 1978, 144 sailings.

Lykes serves TR 29 with two RO/RO vessels and TR 29/17 with four breakbulk vessels. In 1980 Lykes performed 35 sailings on these two services; in 1979, 38 sailings; in 1978 the service was provided by States Steamship Company at a level of 49 sailings before it filed for bankruptcy in December 1978.

Waterman currently serves TR 12 in conjunction with its TR 12/22 subsidized service, utilizing two LASH vessels. In 1980, Waterman performed nine sailings with LASH and C4 breakbulk ships, which were being phased out of service; in 1979, 11 sailings were performed, utilizing LASH and C4's. In 1978, 10 sailings were performed with LASH and C4's.

Sea-Land currently operates on TR 29 with 10 containerships. Sailings are advertised on a twice weekly frequency, which equates to 104 annual sailings.

The only direct U.S.-flag competitor of USL on USL's service on TRs 11 and 5–7–8–9 is Sea-Land, which provides weekly containership sailings, that is, a level of 52 sailings annually, which call at both TR 11 an TR 5–7–8–9. Sea-Land operates four containerships exclusively on this service.

Sea-Land also provides service on TR 11 in connection with its TR 21 (U.S. Gulf/Western Europe) service. Sea-Land performs weekly sailings from the U.S. Gulf with five containerships, calling outbound at Jacksonville en route to Europe, a level of 52 sailings annually.

In addition to services described above, Sea-Land provides a service on TR 5–7–8–9 of weekly containership sailings, a level of 52 sailings annually. Sea-Land operates three containerships exclusively on this service.

Waterman has provided a nonsubsidized service on TRs 5–7–8–9 and 6 and 11, in conjunction with its subsidized service on TR 21. Waterman performed one sailing in 1978 on TR 21 which included unsubsidized calls at both TRs 5–7–8–9 and 11 and one sailing which included unsubsidized calls at TR 5–7–8–9 only. In 1979 Waterman made seven sailings on TR 21 which included unsubsidized calls at TRs 5–7–8–9 and 11 ports. In addition, Waterman made three sailings on TR 21 which included unsubsidized calls exclusively at TR 5–7–8–9 ports and two unsubsidized calls exclusively at TR 11 ports. Because of the unavailability of cargo and the Soviet boycott, Waterman severely curtailed service on TR 21 in 1980, and no service was provied to the TR 5–7–8–9/11 area. Waterman utilizes C4 breakbulk ships on this service.

During the years 1978, 1979 and the first nine months of 1980, U.S.-flag vessels carried 28.4%, 29.5% and 32.2%, respectively, of the inbound cargo carried on combined TRs 5–7–8–9 and 11 and 25.3%, 27.5% and 26.2%, respectively, of the outbound cargo on combined TRs 5–7–8–9 and 11. On combined TRs 12 and 29, U.S.-flag vessels carried, during the years 1978, 1979 and the first nine months of 1980, 28.8%, 24.7% and 24.6%, respectively of the inbound cargo and 25.5%, 22.3% and 21.3% of the outbound cargo.

USL plans, advertises and schedules a weekly service on TRs 5–7–8–9/11 and 12/29. USL's U.S.-flag vessels provided the following number of sailings during calendar years (CY) 1978, 1979 and 1980.

	TR's 5–7–8–9 and 11	TR's 12 and 29
CY 1978	35	50
CY 1979	47	50
CY 1980	51	50

In 1978, USL was short a vessel from its normal complement of vessels assigned to the U.S. Atlantic-Europe service. The shortage resulted from transfer of a vessel to the Far East service while awaiting introduction into service of the AMERICAN TRADER. To eliminate the shortage, USL chartered a foreign-flag vessel which operated on TRs 5–7–8–9/11. USL also chartered other foreign-flag vessels on occasion when it became necessary to sustain integrity of its scheduling. The combination of U.S.-flag and foreign-flag vessels enabled USL to maintain weekly service. In addition, USL occasionally made sailings which served only TR 29 rather than the combined TRs 12 and 29. USL now has an adequate fleet to meet its weekly schedules on both its TRs 5–7–8–9/11 and TRs 12/29 services.

Interested parties are hereby given an opportunity to show cause why the Board should not find, under section 605(c) of the Act, that the effect of a subsidy contract to USL for an existing service on combined TRs 5–7–8–9 and 11 to the extent of a maximum of 53 subsidized sailings annually and on combined TRs 12 and 29 to the extent of a maximum of 53 subsidized sailings annually, would not be unduly prejudicial or give undue advantage as between citizens of the United States operating U.S.-flag vessels on such essential services. Any person, firm or corporation having an interest in the Application who desires to submit such showing of cause is invited to file a written statement, in triplicate, with the Secretary, Maritime Subsidy Board, Room 3099–B, Department of Commerce building, 14th and E Streets, N.W., Washington, D.C. 20230 by the close of business on or before April 27, 1981.

All allegations of factual issues, including specifically those relating to undue prejudice or unfair advantage, which a party wishes the Board to consider shall include: (1) a clear and concise statement of the issues raised; and (2) the grounds upon which such allegations rest in such detail as to permit the Board to determine the exact nature of the allegations.

The Board will consider the submissions of all interested parties and will determine the disposition to be made of the matters hereby noticed, including, in the discretion of the Board, the ordering of an evidentiary hearing or other administrative process.

(Catalog of Federal Domestic Assistance Program No. 11.504, Operating-Differential Subsidy (ODS)).

By Order of the Maritime Subsidy Board.

Dated: March 18, 1981.

Robert J. Patton, Jr.,

Secretary.

BILLING CODE 3510-15-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1981; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Addition to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1981 a commodity to be produced by and services to be provided by workshops for the blind and other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: April 29, 1981.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher (703) 557-1145.

SUPPLEMENTARY INFORMATION:

This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodity and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity and services to Procurement List 1981, November 12, 1980 (45 FR 74836):

Class 3990

Pallet, Hardwood, 3990-00-NSH-0010 (35" × 45½" × 5½") (Requirements for Tooele Army Depot, Tooele, Utah only)

SIC 7369

Commissary Shelf Stocking and Custodial Service, Little Rock Air Force Base, Jacksonville, Arkansas

SIC 7699

Pallet Repair, Naval Supply Center, Norfolk, Virginia

Sponge Rubber Mattress Rehabilitation (Requirements for GSA Region 3 only)

E. R. Alley, Jr.,

Acting Executive Director.

BILLING CODE 6820-33-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Montana Power Co.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of action taken and opportunity for comment on consent order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order and on potential claims against the refunds deposited in an escrow account established pursuant to the Consent Order.

DATES: Effective date: December 1, 1980. Comments by: April 27, 1981.

ADDRESS: Send comments to Kenneth E. Merica, District Manager of Enforcement, Economic Regulatory Administration, P.O. Box 26247, Belmar Branch, Lakewood, Colorado, 80226.

FOR FURTHER INFORMATION CONTACT: Kenneth E. Merica, District Manager of Enforcement, Economic Regulatory Administration, P.O. Box 26247, Belmar Branch, Lakewood, Colorado, 80226. (303) 234-3195.

SUPPLEMENTARY INFORMATION: On December 1, 1980 the Office of Enforcement executed a Consent Order with Montana Power Company (MPC) of Butte, Montana. Under 10 CFR 205.199J(b), a Consent Order which involves a sum of less than $500,000 in the aggregate, excluding penalties and interest, becomes effective upon its execution.

I. The Consent Order

MPC, with its home office located in Butte, Montana, is the owner of the Dry Creek natural gas processing plant located in Carbon County, Montana. Beginning March 1, 1979, MPC sold natural gas liquids from the Dry Creek Plant which were subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR 212.163 and 212.164. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic Regulatory Administration as a result of its audit of MPC, the Office of Enforcement of ERA and MPC entered into a Consent Order, the significant terms of which are as follows:

1. ERA alleged that certain sales of natural gas liquids from the Dry Creek Plant were made in violation of 10 CFR 212.163 and 212.164 during the period March 1, 1979 through July 31, 1980 (audit period).

2. MPC, without admission of any facts or of any violation of DOE rules or regulations, has agreed to pay $77,187 into a special escrow fund administered by ERA in settlement of the alleged violation in sales of natural gas liquids from subject plant for the period March 1, 1979 through July 31, 1980.

3. MPC has agreed to pay a civil penalty of $1,813.00.

4. The provisions of 10 CFR 205.199J are applicable to the Consent Order.

II. Disposition of Refunded Overcharges

In this Consent Order, MPC agrees to refund in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA, arising out of MPC's sales of natural gas liquids from the Dry Creek Plant during the audit period, the sum of $77,187 within ten (10) days after the effective date of this Order.

Refund of those overcharges will be in the form of a certified check made payable to the United States Department of Energy and will be delivered to the Assistant Administrator for Enforcement, ERA. These funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 CFR 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, it is likely that overcharges have been passed through as higher prices to subsequent purchasers. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 CFR 205.199I(a).

III. Submissions of Written Comments

A. *Potential Claimant:* Interested persons who believe that they have a claim to all or a portion of the settlement amount specified in I.2., above, should provide written notification of the claim to the ERA at this time. Proof of claims is not now being required. Written

notification to the ERA at this time is requested primarily for the purpose of identifying valid potential claims to the refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

B. *Other Comments:* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order.

You should send your comments or written notifications of a claim to Kenneth E. Merica, District Manager of Enforcement, Economic Regulatory Administration, P.O. Box 26247, Belmar Branch, Lakewood, Colorado, 80226. You may obtain a free copy of this Consent Order, with proprietary information deleted, by writing to the same address or by calling (303) 234–3195.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation, "Comments on Montana Power Company Consent Order." We will consider all comments we receive by 4:30 p.m., local time, on April 27, 1981. You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Lakewood, Colo., on the 1st day of December 1980.

Bob J. Jones,

Acting District Manager, Rocky Mountain District, Economic Regulatory Administration.

Concurrence by: James A. Forrester,

Acting Regional Counsel.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. ER81-340-000]

Appalachian Power Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that American Electric Service Corporation (AEP) on March 16, 1981, tendered for filing on behalf of its affiliate Appalachian Power Company (Appalachian), Modification No. 12 dated February 22, 1981 to the Interconnection Agreement dated February 1, 1948 between Virginia Electric and Power Company and Appalachian, Appalachian's Rate Schedule FERC No. 16.

Sections 1 and 2 of Modification No. 12 provides for an increase in the demand charge for Short Term and Limited Term Power from $0.85 to $1.05 per kilowatt per week and $4.50 to $5.50 per kilowatt per month respectively. Both schedules proposed to become effective February 23, 1981.

Applicant states that since the use of Short Term Power and Limited Term Power cannot be accurately estimated, for the twelve-month period succeeding the date of filing, it is impossible to estimate the increase in revenues resulting from its modification for such period. Applicant's Appendix V which was included with the filing of this modification, demonstrate that the increase in revenues which would have resulted had the modification been in effect during the twelve-month period ending December 1980 would have been $2,490,476.22 (i.e., from $58,581,646.52 to $61,062,124.74) for Short Term Power and $5,800,000.00 (i.e., from $109,723,906.50 to $115,523,906.50) for Limited Term Power.

Copies of the filing were served upon Virginia Electric and Power Company, The Virginia State Corporation Commission and The Public Service Commission of West Virginia.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before April 13, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-345-000]

Arizona Public Service Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that on March 16, 1981, Arizona Public Service Company (APS) tendered for filing the cancellation of an Agreement with the Navajo Tribal Utility Authority (NTUA) whereby the City of Farmington, NM (City) was served through the 69kV line operated by the NTUA, FPC Rate Schedule No. 6, to the City's Fruitland Substation. The City completed its 115kV Substation and disconnected from the 69kV line January 14, 1981. APS states cancellation provides for no change of rate and is not a rate increase.

Copy of the filing was served upon the NTUA and the Arizona Corporation Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 13, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Arizona Public Service Co.; Proposed Change of Rate

March 23, 1981.

The filing Company submits the following:

Take notice that Arizona Public Service Company (Company) on March 16, 1981, tendered for filing Amendment No. 1 dated December 30, 1980 to the Interruptible Transmission Service Agreement between the Department of Water and Power of the City of Los Angeles (Los Angeles) and Company.

Waiver is requested under the provisions of Section 35.11 so that this Amendment becomes effective as of January 1, 1981 in accordance with its terms.

A copy of this filing was served upon Los Angeles and the Arizona Corporation Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8

and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 13, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. ER81-337-000]

Arkansas Power & Light Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that on March 13, 1981, Arkansas Power & Light Company (AP&L) tendered for filing a Notice of Cancellation of Arkansas-Missouri Power Company's Rate Schedule FERC No. 40, providing for service to Gideon-Anderson Lumber Company. AP&L and Arkansas-Missouri Power Company (Ark-Mo) were consolidated as of January 1, 1981, and the latter company was dissolved. AP&L states that this cancellation became effective on that date.

Gideon-Anderson Lumber Company, a small distribution system, was acquired by Ark-Mo in 1978. Thereafter, Ark-Mo provided service at retail to the customers formerly served by Gideon-Anderson. Since January 1, 1981, AP&L has been providing that same service. Therefore, Ark-Mo Rate Schedule FERC No. 40 is obsolete.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-85-M

[Project Nos. 4119-000 and 4142-000]

Beaver Valley Co. and Shenango Valley Power Co., Borough of Grove City, Pa.; Application for Preliminary Permit

March 20, 1981.

Take notice that Beaver Valley Power Company and Shenango Valley Power Company filed on February 5, 1981, and the Borough of Grove City, Pennsylvania, filed on February 6, 1981, applications for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project Nos. 4119 and 4142 to be known as the Shenango Dam Project located on the Shenango River in Mercer County, Pennsylvania. The proposed project would utilize Federal lands and a Federal dam under the jurisdiction of the U.S. Army Corps of Engineers. The application is on file with the Commission and is available for public inspection. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Correspondence With Applicants—Correspondence with the Beaver Valley Power Company should be directed to: Mr. L. Gerald Tarantino, President, Shenango Valley Power Company, P.O. Box 561, Sixth Street and Second Avenue, Beaver Falls, PA 15010. Correspondence with the Borough of Grove City should be directed to Mr. Philip J. Movish, Project Engineer, Daverman and Associates, P.C., 500 South Salina Street, Syracuse, New York 13202.

Project Description—Each Applicant proposes to utilize the U.S. Army Corps of Engineers' existing Shenango River Dam and Reservoir. Each project would consist of: (1) a penstock; (2) a powerhouse; and (3) appurtenant facilities, Project No. 4119 would have an installed generating capacity of 2800 KW and an average annual energy output of 10,400,000 KWH. Project No. 4142 would have an installed generating capacity of 1500 KW and an average annual energy output of 5,252,600 KWH.

Purpose of Project—Energy from Project No. 4119 would be provided to the U.S. Army Corps of Engineers or sold to a local public utility or municipity. Energy from Project No. 4142 would be used by the Borough of Grove City for public utility purposes.

Proposed Scope and Cost of Studies Under Permit—Each Applicant seeks a preliminary permit for a period of 36 months, during which time it would perform surveys, environmental assessment studies, and economic and recreational studies, as well as develop preliminary plans. Beaver Valley Power Company and Shenango Valley Power Company estimates that such studies would cost at least $45,000. The Borough of Grove City estimates that such studies would cost $75,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary

studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, state and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—These applications were filed as competing applications to Hydro Corporation of Pennsylvania, Shenango Dam Project No. 3290, filed on August 4, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protect with the Commission, in accordance with the requirements of its rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 21, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4119 and 4142. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's Regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commisison, 825 North Capitol Street, NE., Room 208 RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

[FR Doc. 81-9269 Filed 3-26-81; 8:45 am]
BILLING CODE 6450-85-M

[Project 3689-000]

Blackstone Valley Electric Co., Application for Exemption From Licensing of a Small Hydroelectric Project of 5 Megawatts or Less

March 23, 1981.

Take notice that on December 4, 1980, the Blackstone Valley Electric Co. (Applicant) filed an application, under Section 408 of the Energy Security Act of 1980 (Act) [Public Law 96-294, 94 Stat. 611] (U.S.C. 2705, and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under part I of the Federal Power Act. The proposed Pawtucket No. 2 small hydroelectric project (FERC Project No. 3689) would be located at the existing Blackstone Valley Electric Co. Dam in the city of Pawtucket, in Providence County on the Blackstone River and the Seekonk (tidal) River, Rhode Island. Correspondence with the applicant should be directed to: Stanley S. Ribb, President, Blackstone Valley Electric Company, Box 111, Lincoln, Rhode Island 02865 and Maurice A. Zilber, Esquire, Peabody, Brown, Rowley & Storey, One Boston Place, Boston, Massachusetts 02108.

Project Description—The proposed run-of-the-river project would consist of existing project works including: (1) a brick and timber dam, about 200 feet long and 4 feet high, constructed at the top of waterfalls about 13 feet high; (2) a reservoir of negligible storage at spillway crest elevation 59.41 feet m.s.l.; (3) an intake structure and brick-lined underground tunnel (penstock) 17.5 feet in diameter and 130 feet long; (4) a brick and granite hydroelectric station building, 175 feet long and 90 feet wide, consisting of a subsurface forebay, a gatehouse, a powerhouse containing 5 water wheels and 5 generators with a total installed capacity of 1,000 kW, and a tailrace, 90 feet long and 45 feet wide; and (5) other appurtenances. The Applicant proposes to remove the existing waterwheels and generators and to install two tube-type turbine-generators with a total maximum operating capacity of 1,675 kW (one 600 kW unit, and one 1,075 kW unit). Applicant estimates that the average annual energy output would be 6,220,000 kWH.

Purpose of the Project—Project energy would be sold by the Applicant, a public utility, to customers in its service area.

Competing Application—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before May 7, 1981, either a competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than September 4, 1981. Applications for a preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for exemption. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of an exemption and consistent with the purpose of an exemption as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's

Rules. Any comments, protest, or petition to intervene must be received on or before May 7, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", OR "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for exemption for Project No. 3669. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, NW., Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Project No. 4092-000]

Brazos River Authority; Application for Preliminary Permit

March 23, 1981.

Take notice that Brazos River Authority (Applicant) filed on January 30, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 4092 to be known as Stillhouse Hollow Project located on the Lampasas River in Bell County, Texas. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Carson H. Hoge, General Manager, Brazos River Authority, 4400 Cobbs Drive, Post Office Box 7555, Waco, Texas 76710. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize the existing U.S. Army Corps of Engineers' Stillhouse Hollow Dam and would consist of: (1) a penstock located along the left (North) bank; (2) a powerhouse containing generating unit (s) having a total rated capacity of 2,760–kW; (3) a tailrace; and (4) appurtenant facilities. Project energy would be transmitted to existing power lines serving the dam or to Texas Power and Light Company's 138–kV transmission lines about two miles from the project.

The Applicant estimates that the average annual energy output would be 6,016 MWh.

Purpose of Project—Project energy would be sold either to Texas Power and Light Company or Brazos Electric Power Cooperative, Inc.

Proposed Scope and Cost of Studies Under Permit—Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic, and recreational aspects of the project. Depending upon the outcome of th studies, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be in excess of $50,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Application—This application was filed as a competing application to that of Continental Hydro Corporation Project No. 3336, filed on August 19, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 23, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4092. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Project No. 4103-000]

City Utilities of Springfield, Missouri; Application for Preliminary Permit

March 24, 1981.

Take notice that the City Utilities of Springfield, Missouri (Applicant) filed on February 2, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 4103 to be known as Pomme de Terre Lake

Waterpower Project located on the Pomme de Terre River in Hermitage, Hickory County, Missouri. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: J. L. McMahan, General Manager, City Utilities of Springfield, Missouri 301 East Central Street, P.O. Box 559, Jewell Station, Springfield, Missouri 65801. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize an existing U.S. Army Corps of Engineers' dam and reservoir. Project 4103 would consist of: (1) a proposed penstock extending from an existing conduit to the proposed powerhouse; (2) an proposed powerhouse located on the right (north) bank of the river; (3) transmission lines; and (4) appurtenant facilities. Applicant estimates the capacity of the project would be 8,700 kW, and the annual energy output would be 17,930,000 kWh.

Purpose of Project—Energy produced at the proposed project would be sold to the residential, commercial and industrial consumers of the Applicant.

Proposed Scope and Cost of Studies Under Permit—Applicant has requested a 36 month permit, during which time studies would be made to determine the engineering, environmental, and economic feasibility of the project, secure financing commitments, consult with Federal, State and local government agencies for information, comments and recommendations, relevant to the project, and prepare an application for FERC license, including an environmental report. The Applicant estimates the cost of the studies to be $140,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant). Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—This application was filed as a competing application to the Continental Hydro Corporation Project No. 3354, filed on August 25, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before *April 24, 1981.*

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE," as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4103. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kennth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy, Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-85-M

[Project No. 4165-000]

Cogeneration, Inc., Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

March 23, 1981.

Take notice that on February 10, 1981, Cogeneration, Inc. (Applicant) filed an application, under Section 408 of the Energy Security Act of 1980 (Act) [Public Law 96-294, 94 Stat. 611] (16 U.S.C. 2705, and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The Rock Creek Hydro Project (FERC Project No. 4165) would be located on Rock Creek in Twin Falls County, Idaho. Correspondence with the Applicant should be directed to: Barber Engineering, 250 South Beechwood, Suite III, Boise, Idaho 83709.

Project Description—The proposed project would consist of: (1) a 5-foot by 5-foot square cross section inlet structure; (2) a 48-inch diameter, 1,500-foot long penstock; (3) a powerhouse containing three generating units with total rated capacity of 1,182 kW; and (6) appurtenant facilities.

Purpose of Project—Project energy would be sold to Idaho Power Company.

Agency Comments—The U.S. Fish and Wildlife Service and the Idaho Department of Fish and Game are requested, for the purposes set forth in Section 408 of the Act, to submit appropriate terms and conditions to protect any fish and wildlife resources. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilites. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before *May 11, 1981,* either the competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely

notice of intent allows an interested person to file the competing license application no later than *September 8, 1981.* Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before *May 11, 1981.*

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4165. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

[FR Doc. 81-9239 Filed 3-26-81; 8:45 am]
BILLING CODE 6450-85-M

[Project No. 4182-000]

Cogeneration, Inc.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

March 23, 1981.

Take notice that on February 11, 1981, Cogeneration, Inc. (Applicant) filed an application, under Section 408 of the Energy Security Act of 1980 (Act) [Public Law 96-294, 94 Stat. 611] (16 U.S.C. 2705, and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The Shoshone Hydro Project (FERC Project No. 4182) would be located on Little Wood River in Lincoln County, Idaho. Correspondence with the Applicant should be directed to: Barber Engineering, 250 South Beechwood, Suite III, Boise, Idaho 83709.

Project Description—The proposed project would consist of: (1) an existing 3-foot high, 50-foot long concrete and rock diversion structure; (2) a 42-inch diameter, 4,500-foot long penstock; (3) a powerhouse containing two generating units with total rated capacity of 150 kW; and (4) appurtenant facilities.

Purpose of Project—Project energy would be sold to Idaho Power Company.

Agency Comments—The U.S. Fish and Wildlife Service and the Idaho Department of Fish and Game are requested, for the purposes set forth in Section 408 of the Act, to submit appropriate terms and conditions to protect any fish and wildlife resources. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before May 11, 1981, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file a such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than September 8, 1981. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before May 11, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4182. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street NW., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative

of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-332-000]

Commonwealth Edison Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that Commonwealth Edison Company, on March 12, 1981, tendered for filing proposed changes in its FERC Electric Tariff. The proposed changes revise Electric Service Contract between Commonwealth Edison Company and the City of Batavia, Illinois, to provide for a fourth point of electric supply to the City by the Company.

A copy of the filing has been served upon the City of Batavia, Illinois.

Any person desiring to be heard or to protest the application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-342-000]

Consolidated Edison Co. of New York, Inc.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that Consolidated Edison Company of New York, Inc. (Con Edison) on March 16, 1981, tendered for filing as a supplement to its Rate Schedule FERC No. 59 an executed agreement between Con Edison and the companies of the Northeast Utilities system (The Connecticut Light and Power Company, The Hartford Electric Light Company, and Western Massachusetts Electric Company, hereinafter collectively called NU). The Rate Schedule provides for the sale of power and energy by Con Edison.

The supplement makes only nominal changes in the Rate Schedule.

Con Edison requests waiver of the notice requirements of Section 35.3 of the Commission's Regulations so that the proposed rate schedule can be made effective January 3, 1981 in accordance with the actual utilization by the parties.

Con Edison states that a copy of its filing was served on NU.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 13, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 81-9280 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 3848-000]

Continental Hydro Corp.; Application for Preliminary Permit

March 24, 1981.

Take notice that Continental Hydro Corporation (Applicant) filed on December 9, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 3848 to be known as the Sugar Loaf Project located on the Lake Fork River near the town of Malta in Lake County, Colorado. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. A. Gail Staker, President, Continental Hydro Corporation, 141 Milk Street, Suite 1143, Boston, Massachusetts 02109.

Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize the existing Water and Power Resources Service's Sugar Loaf Dam and would consist of: (1) a modified headworks; (2) a penstock 100 feet long through the existing outlet conduit; (3) a powerhouse located on the western bank of the existing stilling basin containing a generating unit having a rated capacity of 2,000 kW; and (4) appurtenant facilities. Transmission lines near the project site are owned by the Public Service Company of Colorado. The Applicant estimates that the average annual energy output would be 10,000,000 to 12,500,000 kWh.

Purpose of Project—Project energy would be sold to the Public Service Company of Colorado, public institutions or industrial users.

Proposed Scope and Cost of Studies Under Permit—Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would prepare studies of the technical, hydraulic, construction, economic, environmental, recreational, and historic aspects of the project, and would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $52,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before June 1, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than July 31, 1981. A

notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest or petition to intervene must be received on or before June 1, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable.

Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 3848. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9281 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ER81-336-000]

The Dayton Power and Light Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that on March 13, 1981, The Dayton Power and Light Company (DP&L) requested authority to recognize a temporary increase in the excise tax on gross receipts imposed by Section 5727.38 of the Ohio Revised Code pursuant to the Tax Adjustment provision contained in DP&L's Rate Schedule FERC No. 34 for service to the City of Piqua, Ohio under an Interconnection Agreement dated as of May 10, 1972. The temporary increase in the excise tax is for one year and the proposed revision which shall become effective May 1, 1981 is limited to the recovery of this temporary increase.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 81-9282 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 3939-000]

City of Denton; Application for Preliminary Permit

March 20, 1981.

Take notice that City of Denton (Applicant) filed on January 7, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 3939 to be known as Ray Roberts Dam Project located on the Elm Fork of the Trinity River in Denton County, Texas. The application is on file with the commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Robert E. Nelson; Director of Utilities, City of Denton, Texas, Municipal Building, Denton, Texas 76201. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize the Army Corps of Engineers' proposed Ray Roberts Dam and Reservoir and would consist of: (1) a new penstock leading to; (2) a new powerhouse having an installed generating capacity between 1,200 kW and 5,000 kW; (3) a new tailrace structure; (4) approximately 2000 feet of new transmission lines; and (5) appurtenant works. The Applicant estimates that the average annual energy output would be between 9,000 kWh and 12,000,000 kWh.

Purpose of Project—Project energy will be utilized by the Applicant.

Proposed Scope and Cost of Studies Under Permit—Applicant seeks issuance of a preliminary permit for a period of three years during which time Applicant would investigate project design alternatives; financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of studies under the permit would be between $41,000 and $69,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or

before May 7, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than July 6, 1981. A notice of intent must conform with the requirements of 18 CFR § 4.33(b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before May 7, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 3939. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street NW., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-312-000]

Detroit Edison Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that Detroit Edison Company (Detroit Edison) on March 10, 1981, tendered for filing a Certificate of Concurrence with the filing by American Electric Power Service Corporation on behalf of Indiana & Michigan Electric Company (I&M) of Amendment No. 20 to an Operating Agreement dated March 1, 1966 among Consumers Power Company, Detroit Edison and I&M. This Operating Agreement is designated Detroit Edison Company Rate Schedule FERC No. 12.

Detroit Edison states that Amendment No. 20 provides for an increase of approximately 22% in rates charged for Short-Term Power and Limited-Term Power, effective February 23, 1981.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 81-9381 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ER81-330-000]

The Detroit Edison Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that The Detroit Edison Company on March 12, 1981, tendered for filing an Amendment to the Interconnection Agreement between the City of Wyandotte and The Detroit Edison Company. This amendment will increase the rates for Emergency Power, Short Term Power, and Displacement Power, and Transmission Service to normal current industry levels and also will bring the agreement into compliance with the Commission's Rule 64 B.

The proposed changes are desirable by the parties to assure adequate and fair compensation for services rendered and to encourage the availability of the full range of services.

Any person desiring to be heard or to protest said Agreement should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this Agreement are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-331-000]

Duke Power Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that Duke Power Company (Duke Power) tendered for filing on March 12, 1981 a supplement to the Company's Electric Power Contract with Little River Electric Cooperative, Inc. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FERC No. 145.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following increase in designated demand: Delivery Point No. 5 from 3,000 KW to 3,600 KW.

Duke Power indicates that this supplement also includes an estimate of sales and revenue for twelve months immediately preceding and for the twelve months immediately succeeding the effective date. Duke Power proposes an effective date of May 19, 1981.

According to Duke Power copies of this filing were mailed to Little River Electric Cooperative, Inc., and the South Carolina Public Service Commission. Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 81-9277 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP81-219-000]

East Tennessee Natural Gas Co.; Application

March 20, 1981.

Take notice that on March 2, 1981, East Tennessee Natural Gas Company (Applicant), P.O. Box 10245, Knoxville, Tennessee 37919, filed in Docket No. CP81-219-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale on an interruptible basis of natural gas to both the Orange and Rockland Utilities Inc. (Orange and Rockland) of Pearl River, New York, and the Public Service Electric and Gas Company (Public Service), of Newark, New Jersey, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes herein to sell on an interruptible basis up to 50,000 Mcf of natural gas per day each to Orange and Rockland and Public Service. It is asserted that these sales are proposed to occur during the periods June 1, 1981, through October 31, 1981, and April 1, 1982, through October 31, 1982. Applicant states that it was previously authorized to sell gas to Orange and Rockland and Public Service pursuant to the Commission's Order No. 30 which authorization would expire on May 31, 1981.

Applicant further seeks authorization to sell customers other than Orange and Rockland and Public Service any portion of the daily volume that each of these two customers is unable to purchase or which transporting pipelines are unable to deliver. It is stated that Applicant purchases its entire long-term supply of natural gas from Tennessee Gas Pipeline Company, a Division of Tenneco Inc. which imposes a minimum bill obligation in the amount of 66⅔ percent of contract demand. It is further asserted that Applicant has experienced a substantial loss of load during the summer period due to conservation and loss of industrial loads and has no system storage. Applicant states, however, that its customers subscribe to a storage service provided by Consolidated Gas Supply Corporation. The sale proposed herein, it is stated, would enable Applicant to avoid its minimum bill obligation.

Applicant states that it would attempt to market that volume each month in order to avoid the minimum bill charges. Applicant states that the proposed rate would be pursuant to Applicant's Zone 1 Commodity Rate, 34th Revised Sheet No. 4 of 8th Revised Volumes No. 1 of Applicant's FERC Gas Tariff, or any revision thereof.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 10, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9272 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4134-000]

Enagenics; Application for Preliminary Permit

March 24, 1981.

Take notice that Enagenics (Applicant) filed on February 16, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for proposed Project No. 4134 to be known as the Unity Dam Project located on the Burnt River in Baker County, Oregon. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Thomas H. Clarke, President, Enagenics, 1727 Q Street NW., Washington, D.C. 20009. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would consist of a powerhouse containing a single 700-kw generating unit located adjacent to the existing outlet works of the Water and Power Resources Service's Unit Dam and approximately 2 miles of transmission line.

The Applicant estimates that the average annual energy output would be 1,960 MWh.

Purpose of Project—Project power would be sold to an appropriate power purchaser.

Proposed Scope and Cost of Studies Under Permit—Applicant would conduct a detailed feasibility study including engineering, environmental, and marketing analysis. Applicant estimates the cost of its proposed study to be $30,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and

environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—This application was filed as a competing application to Cascade Waterpower Development Corporation's Project No. 3382 filed on August 25, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protests, or petition to intervene must be received on or before April 24, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTESTS", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4134. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Room 208 RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

[FR Doc. 81-8882 Filed 3-26-81; 8:45 am]
BILLING CODE 6450-85-M

[Project No. 3980-000; Project No. 4017-000]

Enagencies and the City of Pittsburgh; Application for Preliminary Permit

March 23, 1981.

Take notice that Enagenics (EN) and the City of Pittsburgh (CP) (Applicant) filed on January 12, 1981 and January 14, 1981, respectively, competing applications for a preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project Nos. 3980 and 4017, respectively, to be known as Allegheny Lock and Dam No. 2 Hydro Project located on the Allegheny River in Allegheny County, Pennsylvania. The applications are on file with the Commission and are available for public inspection. Correspondence with the Applicants should be directed to: Mr. Thomas H. Clarke, Jr., President, Enagenics, 1727 Q Street NW., Washington, D.C. 20009 (EN) and Mr. Louis Gaetano, Director, Department of Public Works, City of Pittsburgh, 301 City-County Building, Pittsburgh, Pennsylvania 15219 (CP). Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—Each proposed project would utilize the exising U.S. Army Corps of Engineers' Allegheny Lock and Dam No. 2 and would consist of (1) new penstocks near the right dam abutment; (2) a new powerhouse containing generating units having a total rated capacity of 12,480 kW (EN) or 15,400 kW (CP); (3) a tailrace; (4) a new transmission line; and (5) appurtenant facilities. The Applicants estimate that the average annual energy output would be 89,600,000 kWh (EN) or 114,000,000 kWh (CP).

Purpose of Project—Project energy would be sold to a local utility and to industries in the area.

Proposed Scope and Cost of Studies Under Permit—Applicants each seek issuance of a preliminary permit for a period of three years, during which time either would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicants would prepare an application for an FERC license. Applicants estimate the cost of the studies under the permit would be $50,000 (EN) or between $50,000 and $75,000 (CP).

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—This application was filed as a competing application to Noah Corporation's application for Project No. 3494 filed on September 23, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10. for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a

party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 23, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made a response to this notice of application for preliminary permit for Project Nos. 3980 and 4017. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Room 208, RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9270 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4054-000]

Village of Endicott, New York; Application for Preliminary Permit

March 20, 1981.

Take notice that Village of Endicott, New York (Applicant) filed on January 23, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 4054 to be known as the Whitney Point Project located on the Otselic River in Broome County, New York. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Philip J. Movish, Project Engineer, Daverman and Associates, P.C., 500 South Salina Street, Syracuse, New York 13202. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize the existing U.S. Army Corps of Engineers' Whitney Point Dam and would consist of: (1) a new powerhouse containing a generating unit(s) having a total rated capacity of 750-kW; (2) approximately one-mile of 34.5-kV transmission line; and (3) appurtenant facilities.

The Applicant estimates that the average annual energy output would be 2,600,000 kWh.

Purpose of Project—Project energy will be sold to New York State Electric and Gas Corporation or used by Applicant in its facilities.

Proposed Scope and Cost of Studies Under Permit—Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time it would perform technical and economic feasibility studies, investigations, and the work involved to prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $65,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—This application was filed as a competing application to that of Continental Hydro Corporation for Project No. 3293, filed on August 4, 1980 under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 22, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4054. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9277 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4118-000]

City of Farmington; Application for Preliminary Permit

March 20, 1981.

Take notice that the City of Farmington (Applicant) filed on February 5, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 4118 to be known as the Conchas Project located on the Canadian River in San

Miguel County, New Mexico. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Robert S. Culpepper, Mayor, P.O. Box 900, Farmington, New Mexico 87401. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize the existing U.S. Army Corps of Engineers Conchas Dam and Reservoir and would consist of a powerhouse with one or more generating units having a total rated capacity of 1.2 MW at the main dam and a powerhouse at the irrigation headworks in the south dike containing turbine-generator units with a total rated capacity of 1 MW, and a transmission line. The project would be capable of generating up to 6,300,000 kWh annually.

Purpose of Project—Energy generated at the project would likely be used by the Applicant for distribution to its customers through interchange agreements with the local utility at the project.

Proposed Scope and Cost of Studies Under Permit—The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies, Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $250,000. Applicant has requested a preliminary permit term of 27 months.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—This application was filed as a competing application to the Conchas Project No. 3392, filed on August 27, 1980 by Sequoia Energy Corporation under 18 CFR 4.33 (1980), and, therefore, no further competing applicaions or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 C.F.R. § 1.8 or § 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 21, 1981.

Filing and Services of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 4118. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-335-000]

Florida Power & Light Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that Florida Power & Light Company (FPL) on March 13, 1981 tendered for filing a document entitled "Amendment Number One to Contract for Interchange Service Between Florida Power Corporation and Florida Power & Light Company." Also enclosed in the filing was a certificate of concurrence to the proposed Amendment by Florida Power Corporation (Corp).

FPL states that pursuant to the Amendment FPL and Corp will modify their existing 230 kV interconnection facilities between Corp's North Longwood Substation and FPL's Sanford Plant, so as to increase the inter-system power transfer capability of the interconnection facilities, reduce losses and improve the reliability of the bulk power supply system for the customers of both Corp and FPL in the area. FPL states that while the cost of such modifications has not been fully determined, it is anticipated that expenditures by Corp and FPL will be comparable. FPL states that the proposed amendment will have no effect on sales, services or revenues.

FPL requests waiver of the Commission's Regulations to the extent necessary to permit the proposed Amendment to become effective as of the date of filing. FPL states that such waiver is necessary in order to allow the parties to improve reliability of service in the area as soon as possible. In the event such waiver is denied, FPL requests that the Amendment be placed into effect no later than sixty days after the date of filing. FPL states that copies of the filing were served on the Vice President of Corp.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the

appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 81-9382 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Project Nos. 4070 and 4193]

Franklin County, Indiana and Hoosier Energy Rural Electric Cooperative, Inc.; Application for Preliminary Permit

March 20, 1981.

Take notice that Franklin County, Indiana (Franklin), and Hoosier Energy Rural Electric Cooperative, Inc. (Hoosier), respectively, filed an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Projects Nos. 4070 and 4193, respectively, to be known as Brookville Dam located on the existing U.S. Army Corps of Engineers' Brookville Dam on the East Fork Whitewater River near Brookville, Franklin County, Indiana. The applications are on file with the Commission and are available for public inspection. Correspondence with Franklin should be directed to: Mr. Francis Schuck, Auditor, Franklin County Courthouse, Brookville, Indiana 47012. Correspondence with Hoosier should be sent to: Mr. Virgil E. Peterson, Executive Vice President and General Manager, Hoosier Energy Rural Energy Cooperative, Inc., P.O. Box 908, Bloomington, Indiana 47402. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—Franklin's proposed project would consist of: (1) a proposed penstock 300 feet long to connect the existing outlet structure to the proposed powerhouse; (2) a proposed powerhouse containing generating units with a total installed capacity of 4.1 MW; (3) proposed transmission lines; and (4) appurtenant facilities. Franklin estimates that the average energy output would be 25,200 MWh.

Hoosier's proposed project would consist of: (1) a proposed penstock 700 feet long to connect the existing outlet structure to the proposed powerhouse; (2) a proposed powerhouse containing 3 generating units with a total installed capacity of 6.4 MW; (3) proposed transmission lines approximately 3,500 feet long; and (4) appurtenant facilities. Hoosier estimates that the average annual energy output would be 24,000 MWh.

Purpose of Project—Franklin would sell its project power to the utilities serving the area. Hoosier plans to market the power from its project to its wholesale members.

Proposed Scope and Cost of Studies Under Permit—Both Applicants have requested 36-month permits to prepare definitive project reports, including preliminary design and economic feasibility studies, and soil and foundation data. The costs of the aforementioned activities along with obtaining agreements with other Federal, State, and local agencies are estimated by Franklin to be $45,000, while Hoosier's costs are estimated to be $50,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Application—This application was filed as a competing application to Continental Hydro Corporation Project No. 3393 filed on August 27, 1980, under 18 CFR (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10. for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 16, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made a response to this notice of application for preliminary permit for Projects Nos. 4070 and 4193. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No ER81-338-000]

Idaho Power Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that on March 13, 1981, the Idaho Power Company tendered for filing in compliance with the Federal Energy Regulatory Commissision's Order to October 7, 1978, a summary of sales made under the Company's 1st Revised FERC Electric Tariff, Volume No 1 (Supersedes Original Volume No 1) during January, 1981, along with cost justification for the rate charged.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street,

N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket Nos. RP74-11, RP76-8, RP77-5, RP78-10, RP79-8, and RP80-8]

Kansas-Nebraska Natural Gas Company, Inc.; Informal Settlement Conference

March 20, 1981.

Take notice that on March 26, 1981, at 2:00 p.m., an informal conference of all interested persons will be convened to (1) discuss the Refund Report filed on February 2, 1981, by Kansas-Nebraska Natural Gas Company, Inc. (Kansas-Nebraska) which provides the amount of refunds Kansas-Nebraska believes is due regarding liquid product revenues for Docket Nos. RP74-11, RP76-8, RP77-5, RP78-10 and RP79-8; and (2) resolve or establish further procedures regarding Kansas-Nebraska's inclusion of the Unallowable Hugoton Gas Trust Payments in the computation of federal income taxes for Docket Nos. RP79-8, RP80-8.

The conference will be held at the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. in Room 5001. Customers and other interested persons will be permitted to attend the above-mentioned informal conference, but if such persons have not previously been permitted to intervene by order of the Commission, attendance at the conference will not be deemed to authorize intervention as a party in the proceeding.

Lois D. Cashell,

Acting Secretary.

[Docket No. ER81-341-000]

Kentucky Utilities Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that on March 17, 1981, Kentucky Utilities Company (KU) filed changes in its contracts for wholesale service with various all requirements customers and with the City of Paris, Kentucky designed to increase its present revenues. KU requests an effective date of June 1, 1980 and states that, on the basis of Period I data, the changes will result in increased annual revenues of $12,519,109.

Any person desiring to be heard or to protest said filing should file a petiton to intervene or protest with the Federal Eenrgy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 13, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Project No. 3900-000; Project No. 3970-000]

Borough of Kittanning and Pennsylvania Renewable Resources, Inc. and Enagencis; Application for Preliminary Permit

March 23, 1981.

Take notice that Borough of Kittanning and Pennsylvania Renewable Resources, Inc. (BKPR) and Enagencis (EN), (Applicants) filed on December 30, 1980 and January 12, 1981, respectively, competing applications for a preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for proposed Project No. 3900 and Project No. 3970, respectively, to be known as Allegheny Lock and Dam No. 7 Hydro Project located on the Allegheny River in Armstrong County, Pennsylvania. The applications are on file with the Commission and are available for Public inspection. Correspondence with the Applicants should be directed to: Mr. Jeffrey M. Kossak or Mr. Edward Curland, Pennsylvania Renewable Resources, Inc., Suite 1900, 14 Wall Street, New York, New York 10005 (BKPR), and Mr. Thomas H. Clarke, Jr., President, Enagenics, 1727 Q Street, N.W., Washington, D.C. 20009 (EN). Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed projects each would utilize the existing U.S. Army Corps of Engineers' Lock and Dam No. 7 and would consist of: (1) new penstocks near the left dam abutment; (2) a new powerhouse containing generating units having a total rated capacity of 20,900 kW (BKPR) or 13,200 kW (EN); (3) a tailrace; (4) a new transmission line; and (5) appurtenant facilities. The Applicants estimate that the average annual energy output would be 98,900,000 kWh (BKPR) and 69,000,000 kWh (EN).

Purpose of Project—Project energy would be sold to a local utility.

Proposed Scope and Cost of Studies Under Permit—Both applicants seek issuance of a preliminary permit for a period of three years, during which time they would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicants would prepare an application for an FERC license. Applicants estimate the cost of the studies under the permit would be $150,000 (BKPR) and $50,000 (EN).

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described applications for preliminary permit. (A copy of the application may be obtained directly from the Applicants.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Application—These applications were filed as competing applications to Noah Corporation's application for Project No. 3404 filed on September 23, 1980, under 18 CFR (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about these applications should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10. for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 23, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made a response to this notice of application for preliminary permit for Project Nos. 3800 and 3870. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Room 208 RB Building, Washington, D.C. 20426. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-[illegible] Filed 3-26-81; 8:45 am]

BILLING CODE [illegible]

[Project No. 3862-000]

City of LeClaire; Application for Preliminary Permit

March 24, 1981.

Take notice that the City of LeClaire (Applicant) filed on December 10, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 3862 to be known as the Mississippi Lock and Dam No. 14 located on the Mississippi River in Scott County, Iowa. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Edwin N. Choate, City Administrator, City Hall, LeClaire, Iowa 52753. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize an existing dam owned by the U.S. Army Corps of Engineers. Applicant's facilities will be located mostly on U.S. lands. Project No. 3862 would consist of: (1) a proposed powerhouse, located at the east end of the existing dam, containing generating units having a total installed capacity of 25 MW; (2) proposed transmission lines; and (3) appurtenant facilities. Applicant estimates the average annual energy output for the project would be 107,310,000 KWh.

Purpose of Project—The power generated at the project would be sold to Iowa Power and Light Company.

Proposed Scope and Cost of Studies Under Permit—The Applicant seeks issuance of a preliminary permit for a period of 12 months, during which time it proposes to conduct economic, environmental, and engineering studies, consult with Federal, State and local government agencies concerning the environmental effects of the project, apply for DOE funds, and prepare an application for FERC license. The Applicant estimates the cost of the studies for the project to be approximately $60,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—This application was filed as a competing application to Mitchell Energy Company, Inc., Project No. 3597 filed October 10, 1980 under 18 CFR 4.33 (1980), and, therefore, no further competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protest. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 24, 1981.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letter the title "COMMENTS", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 3862. Any comments, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications

Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-8237 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 4058]

The Metropolitan Water District of Southern California; Application for Exemption of Small Conduit Hydroelectric Facility

March 23, 1981.

Take notice that on January 22, 1981, The Metropolitan Water District of Southern California (District) filed an application under Section 30 of the Federal Power Act (Act) [16 U.S.C. Section 823(a)], for exemption of a proposed hydroelectric project from requirements of Part I of the Act. The proposed Sepulveda Canyon Power Plant (FERC Project No. 4058) would be located on the Sepulveda Feeder Pipeline (part of the District's water distribution system which receives water from the California Aqueduct) approximately 1.8 miles north of the intersection of the Sunset Boulevard and the San Diego Freeway in Los Angeles County, California. Correspondence with the Applicant should be directed to: Mr. Evan L. Griffith, General Manager, The Metropolitan Water District of Southern California, P.O. Box 54153, Terminal Annex, Los Angeles, California 90054.

Purpose of Project—Project energy would be either sold to a public or private utility in Southern California or used by the applicant.

Project Description—The proposed project would consist of: (a) a powerhouse containing a single generating unit with a rated capacity of 8.6 MW; and (b) a substation adjacent to the powerhouse. The power plant would produce approximately 53.2 million kilowatt-hours of energy per year.

Agency Comments—The U.S. Fish and Wildlife Service and the California Department of Fish and Game are requested, pursuant to Section 30 of the Federal Power Act, to submit appropriate terms and conditions to protect any fish and wildlife resources. Other Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before May 11, 1981. The Commission's address is: 825 North Capitol Street, N.E., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-8283 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP 81-221-000]

Michigan Wisconsin Pipe Line Co.; Application

March 23, 1981.

Take notice that on March 3, 1981, Michigan Wisconsin Pipe Line Company (Applicant), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP81-221-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the interruptible sale of natural gas to Faustina Pipe Line Company (Faustina), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to a gas service agreement dated January 9, 1981, Applicant proposes to sell to Faustina on an interruptible basis surplus supplies of natural gas in excess of its firm requirements which Applicant would deliver to Transcontinental Gas Pipe Line Corporation (Transco) at an existing point of interconnection between Applicant and Transco in Acadia Parish, Louisiana. Transco, it is asserted, would transport the gas for the account of Faustina pursuant to Subpart B of Part 284 of the Commission's Regulations under the Natural Gas Policy Act of 1978.

Applicant states that Faustina would pay a rate of $3.25 per million Btu of natural gas which is equivalent to the weighted average of Applicant's rates to its resale customers under its rate Schedules CD-1, SGS-1 and LVS-1. Applicant further states that no new facilities would be required to execute the agreement.

Applicant asserts that the subject sale would provide it with a market for short-term surpluses of available natural gas supplies.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 13, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be

unnecessary for Applicant to appear or be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-327-000]

Montaup Electric Co.; Filing

March 23, 1981.

The Filing Company submits the following:

Take notice that Montaup Electric Company ("Montaup") on March 12, 1981, tendered for filing a letter agreement amendment to a purchase power contract between Montaup and the town of Middleborough, Massachusetts ("Middleborough").

The letter agreement amends the September 1, 1977 contract between Montaup and Middleborough to reduce Montaup's assignment to Middleborough of purchase power under the New Brunswick unit purchase power agreements from 2,500 kW to 900 kW for the period from January 1, 1981 until October 31, 1981 when the assignment ceases. The amendment is necessary to recognize the reduction in the total share of the New Brunswick purchase power to Montaup and to the other New England Power Pool participants from 400 MW to 133 MW.

Montaup requests waiver of the Commission's sixty (60) day notice requirement in order to allow an effective date of January 1, 1981.

Copies of this filing have been served on Middleborough and the Massachusetts Department of Public Utilities.

Any person wishing to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-328-000]

Montaup Electric Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that Montaup Electric Company (Montaup) on March 12, 1981, tendered for filing a supplement to a transmission service agreement between Montaup and the Taunton Municipal Lighting Plant (Taunton). The supplement specifies that at certain times during the day 31 MW and 5 MW of power from Boston Edison Company's New Boston Unit Nos. 1 and 2 will be transmitted by Montaup for Taunton. Taunton's purchase began on February 20, 1981, on an emergency basis due to a breakdown of its generating equipment. The emergency purchase will remain in effect until cancelled by 30 days notice by either Boston Edison Company or Taunton.

Montaup requests waiver of the Commission's 60-day notice requirement in order to allow an effective date of February 20, 1981.

Copies of this filing have been served on Taunton and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-329-000]

Montaup Electric Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that Montaup Electric Company ("Montaup") on March 12, 1981, tendered for filing a letter agreement amendment to a purchase power contract between Montaup and the Town of Middleborough, Massachusetts ("Middleborough").

The letter agreement amends the January 1, 1976 contract between Montaup and Middleborough for the purchase and transmission of power from Montaup's Somerset Unit No. 6. The amendment provides that Middleborough's share of purchase power from Somerset Unit No. 6 will increase from 4 MW to 5.6 MW on January 1, 1981 when the rating of Somerset Unit No. 6 will increase from 126, 200 kW to 128,540 kW. The amendment will remain in effect from January 1, 1981 until October 31, 1981.

Montaup requests waiver of the Commission's 60-day notice requirement in order to allow an effective date of January 1, 1981.

Copies of this filing have been served on Middleborough and the Massachusetts Department of Public Utilities.

Any person wishing to be heard or to protest said application should file a petition to intervene or protest with the

Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR §§ 1.8, 1.10). All such petitions or protest should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Acting Secretary.

[FR Doc. 81-9288 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 3593-000; Project No. 3623-000]

Noah Corp. and Borough of Seven Springs, Pa.; Application for Preliminary Permit

March 23, 1981.

Take notice that competing applications have been filed for a preliminary permit for a proposed water power project to be known as the Youghiogheny River Dam Project, located on the Youghiogheny River in Fayette County, Pennsylvania. The Applicants are the Noah Corporation, application filed October 20, 1980, and designated Project No. 3593-000, and the Borough of Seven Springs, Pennsylvania, application filed October 29, 1980, and designated Project No. 3623-000. The applications were filed under the Federal Power Act, 16 U.S.C. 791(a)-825(r). The project would utilize Federal lands and a Federal dam under the jurisdiction of the United States Army Corps of Engineers.

Correspondence with Applicants—Correspondence with the Noah Corporation should be directed to Mr. James B. Price, Noah Corporation, P.O. Drawer 640, Aiken, South Carolina 29801. Correspondence with the Borough of Seven Springs, Pennsylvania should be directed to Mr. Herman Dupre, Manager, Borough of Seven Springs, Champion, Pennsylvania 15622.

Proposed Scope and Cost of Studies Under Permit—Each of the Applicants seeks a perliminary permit for a period of 24 or 36 months. During that time they would perform surveys, environmental assessment studies, sub-surface explorations, and market studies, as well as develop preliminary plans. Noah Corporation estimates that such studies would cost $100,000, and the Borough of Seven Springs estimates the studies would cost $80,000.

Description of Youghiogheny River Dam—Each Applicant proposes to utilize the U.S. Army Corps of Engineers' existing Youghiogheny River Dam and Reservior. The dam is an earthfill structure with a maximum height of 185 feet from the downstream invert of the outlet tunnel. At the normal summer reservoir water surface of 1,439 feet msl, the reservoir stores 155,000 acre-feet.

Project Description—The proposed by each Applicant, the project would consist of: (1) a proposed penstock extending from an existing water control structure to (2) a powerhouse to be located on the western bank of the Youghiogheny River; and (3) appurtenant facilities.

The Noah Corporation (Project No. 3593-000) estimates that the project would have an installed capacity of 7,500 kW and an average annual energy production of 23,000 MWh. The Borough of Seven Springs, Pennsylvania estimates that the project would have an installed capacity of between 7,000 and 15,000 kW and an average annual energy production 20,000 and 40,000 MWh.

Purpose of Project—Each Applicant proposes to sell project power to local public utilities. In addition, the Borough of Seven Springs, Pennsylvania proposes to sell project power to a local resort development.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—The application for Projects Nos. 3547 and 3623 are competing applications to the Youghiogheny Project No. 3288 filed on August 4, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about these applications should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 23, 1981.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-9272 Filed 3-26-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP81-75-000]

Northern Natural Gas Co., Division of InterNorth, Inc.; Petition To Amend

March 23, 1981.

Take notice that on March 11, 1981, Northern Natural Gas Company, Division of InterNorth, Inc. (Petitioner), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP81-75-000 a petition to amend the order issued December 19, 1980,[1] in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to authorize natural gas service under its Rate Schedule ERS-1 on any day to the extent that such quantities of natural gas are available regardless of whether it is providing service under its Rate Schedule AOS-1, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that by order issued December 19, 1980, it was authorized to render Economy Replacement Service (ERS) to its utility customers on a daily basis. Petitioner states that such service was provided pursuant to Petitioner's

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

Rate Schedule ERS–1. The stated purpose of such service was to reduce or eliminate to the extent that such quantities of natural gas are available the production of more expensive peak shaving gas by the utilities or to meet their firm gas requirements in excess of their daily firm entitlements. It is asserted that under Petitioner's Rate Schedule ERS–1 utilities can purchase natural gas during the period October 27 through April 26 but ERS–1 gas cannot be released on days gas is available under Petitioner's Rate Schedule AOS–1.

Petitioner proposes herein to make ERS–1 gas available on the same days that AOS–1 gas is available. Petitioner contends that such activity would enhance the needs of its utility customers which periodically find the AOS–1 gas supplies inadequate, thereby forcing them to seek alternative and more expensive sources of gas to meet their firm requirements.

Petitioner avers that it is in a position to provide such service because it generally has additional volumes available due to excess supplies not needed by its AOS–1 customers and irregular weather patterns and operating flexibility even though Petitioner may not have sufficient volumes available to increase the overall level of overrun volumes released. Petitioner contends that while the demand for such ERS–1 volumes is expected to be *de minimis*, such service would nevertheless be important to some utilities in meeting their firm customers' requirements at a cost which would be commensurate with the cost of gas available to other utility customers which have the diversity to satisfy similar requirements.

Petitioner further avers that it would submit to the Commission in the future a revised rate schedule for the service proposed herein.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before April 13, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Lois D. Cashell,
Acting Secretary.

[FR Doc. 81-9079 Filed 3-26-81; 8:45 am]
BILLING CODE 6450-85-M

[Docket No. CP81-235-000]

Northern Natural Gas Co., Division of InterNorth, Inc.; Application

March 23, 1981.

Take notice that on March 16, 1981, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP81–235–000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of natural gas on a limited-term and best-efforts basis to Faustina Pipeline Company (Faustina), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to a gas sales agreement dated February 23, 1981, Applicant proposes to sell up to 100,000 Mcf of natural gas per day to Faustina on a best-efforts basis. Applicant asserts that the proposed sale would extend through October 26, 1983. It is further asserted that the gas to be sold to Faustina would be surplus to the needs of Applicant's existing customers during the term of the sale and that such volumes would be marketed from Applicant's general system supply without jeopardizing service to Applicant's customers.

Applicant proposes to deliver the subject gas to Transcontinental Gas Pipe Line Corporation (Transco) at a primary delivery point at the Starks Station, Calcasieu Parish, Louisiana, and at a secondary delivery point in the Ship Shoal Block 70 and 72, offshore Louisiana. It is stated that Transco would make further delivery to Faustina pursuant to Subpart B of Section 284 of the Regulations under the National Gas Policy Act of 1978 (NGPA). It is asserted that no new facilities would be required.

Applicant proposes to charge Faustina a price which would be the higher of the then currently effective Section 102 price of the NGPA or Applicant's then-effective Zone 1 Commodity Rate under Rate Schedule CD–1 of Applicant's FERC Gas Tariff, 3rd Revised Volume No. 1. It is further stated that Faustina would reimburse Applicant for transportation costs at a current rate of 36.3 cents per Mcf and for any Louisiana First Use Tax payments at the current rate of 7.0 cents per Mcf.

Applicant asserts that in instances when it cannot provide total requested deliveries to its off-system sales customers due to the volume demand of its general system requirements, it would apply any excess volumes in a *pro rata* manner to off-system customers.

It is stated that Faustina would resell the subject gas to various large volume agricultural and industrial customers all located in the state of Louisiana.

Applicant further seeks authorization for its proposed treatment of revenues to be received from the proposed off-system sale. It is asserted that Applicant would refund all off-system sales revenues received that are in excess of the sum of: (a) any incremental cost incurred in making the sales, (b) the variable cost reflected in Applicant's rates, and (c) certain offsets for Applicant's actual cost of service not recovered through the sales refunds obligation provisions in Docket No. RP80–68 Stipulation and Agreement approved by the Commission on February 20, 1981.

It is stated that the proposed sale would reduce Applicant's take-or-pay deficiency payments and would provide a market for Applicant's short-term surplus of gas.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 13, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the National Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public

convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-85-M

[Docket No ER81-334-000]

Oklahoma Gas and Electric Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that on March 13, 1981, Oklahoma Gas and Electric Company (OG&E) tendered for filing a new Agreement intended to supersede OG&E's Rate Schedule FERC No. 107. This Agreement is the contract between OG&E and the Southwestern Power Administration (SWPA). The new rate is identical to the old rate, and provides for the sale of Replacement Energy and Emergency Service by OG&E to SWPA.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E, Wahington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedrue (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. ER76-205]

Southern California Edison Co.; Filing

March 20, 1981.

The filing company submits the following.

Take notice that on December 4, 1980, Southern California Edison Company (Edison) submitted for filing a revised supplemental compliance filing. Said filing is being submitted so as to avoid confusion which may have occurred as a result of Edison's previous compliance filing in this docket.

Edison further submits that the present filing consists of revised tariff sheets for its R resale rate schedules, in terms consistent with the Commission's order in this proceeding.

A copy of this filing has been sent to the Public Utilities Commission of California and the Arizona Corporation Commission.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before April 2, 1981. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

[Project No. 4029-000]

Utah Municipal Power Agency; Application for a New Major License

March 20, 1981.

Take notice that the Utah Municipal Power Agency (Applicant) filed on January 19, 1981, an application for a new major license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for the constructed Olmsted Hydroelectric Project, FERC No. 4029, located on the Provo River, in Utah County, Utah, near the Cities of Orem and Provo, Utah. The project affects lands of the United States, within the Uinta National Forest. The original license held by Utah Power and Light Company expired on October 20, 1975.

Correspondence concerning the application should be directed to: Mr. Grant Whitehead, Chairman, Utah Municipal Power Agency, P.O. Box 418,

Payson, Utah 84651, with copies to Emerson Duncan, Esquire, Duncan, Allen & Mitchell, 1575 Eye Street, NW., Washington, D.C. 20005 and to Richard G. Foltz, P.E., Burns & McDonnell Engineering Company, P.O. Box 173, Kansas City, Missouri 64141.

Project Description—The run-of-the-river Olmsted Hydroelectric Project consists of: (1) a concrete diversion dam having a 15-foot maximum height and an 80-foot length, including a 62-foot long spillway having a crest elevation of 5,176.16 USGS datum topped by variable height stop-log flashboards; (2) a screened water intake structure 104 feet in length along the northwest (right) bank of the river leading to; (3) a 4.91-mile long, 8.5-foot diameter steel or concrete gravity pipeline including (a) a Taintor gate control and screening structure, (b) a sand trap, (c) two siphons, (d) a siphon spillway, and (e) five 8-inch metal or PVC pipes feeding spring and creek waters into the main pipeline; (4) a wood and/or concrete lined tunnel 950 feet long, 13 feet wide, and 10 feet high opening into; (5) a concrete and steel "pressure box" structure 50 feet long, 50 feet wide, and 60 feet high with trash screens and four Taintor gates connecting to; (6) three 730-feet long steel penstocks varying in diameter from 60 to 48 to 54-inches and a 730-foot long, 6-foot diameter steel penstock; (7) a concrete, brick and steel powerhouse containing three 2,400-kW generating units and a 5,500-kW generating unit; (8) a tailrace 800 feet long; (9) electrical facilities connecting to a 44-kV switchyard; and (10) appurtenant facilities.

The application proposes to continue the historic operation of the project while performing routine maintenance and structural repairs. Applicant will also investigate the feasibility of reactivating Unit No. 3 and other methods of increasing power plant output and efficiency.

Purpose of Project—All power generated by the project will be used to satisfy the power needs of the Applicant.

Competing Applications—This application was filed as a competing application to that of Utah Power and Light Company Project No. 596 filed on April 7, 1975 and most recently revised on April 25, 1980, under 18 CFR 4.33 (1980), and, therefore, no further competing applications or notices of intent to file a competing application will be accepted for filing.

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before April 22, 1981. The Commission's address is: 825 North Capitol Street, N.E., Washington, D.C. 20426. The application is one file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. CP81-222-000]

United Gas Pipe Line Co.; Application

March 20, 1981.

Take notice that on March 4, 1981, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP81-222-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the continued sale of natural gas to Trans Louisiana Gas Company (Trans Louisiana) as successor-in-interest to Central Louisiana Electric Company, Inc. (CLECO), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to a letter by CLECO dated January 28, 1981, Applicant proposes to sell a maximum daily quantity of 4,075 Mcf of natural gas per day to Trans Louisiana as successor-in-interest to CLECO's distribution system. It is asserted that Trans Louisiana would continue to provide natural gas service to the municipalities of Many, Pleasant Hill, and Zwolle in Sabine Parish, and Pelican and Oxford in Desoto Parish, Louisiana.

Applicant states that it would continue service to Trans Louisiana under its Rate Schedule G-N and that such service would not affect Applicant's service to other customers in that area.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 10, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-333-000]

The Washington Water Power Co.; Filing

March 23, 1981.

The filing Company submits the following:

Take notice that on March 13, 1981, Washington Water Power Company (WWP) tendered for filing a letter agreement between WWP and Southern California Edison Company (SCE) dated January 7, 1981, which provides for the sale of Energy produced by WWP's share of the Centralia coal-fired steam plant which is surplus to WWP's needs. WWP states that at its option, the

energy will either be sold outright or on a recallable basis. If WWP recalls the energy prior to April 1, 1981, WWP shall refund to Edison the price originally paid by Edison plus a storage charge of four mills/kwh. The four-mill storage charge is in accordance with Edison's rate schedule FERC #121.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 10, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-01-C

The above
were recei
jurisdictio
Energy Re
to the Nat
and 18 CF
determina
after the s
production
feet (MMc
control nu
purchaser
notice.

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" after the section code. Estimated annual production (PROD) is in million cubic feet (MMcf). An (*) preceding the control number indicates that other purchasers are listed at the end of the notice.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before April 13, 1981.

Please reference the FERC Control Number (JD No.) in all correspondence related to these determinations.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" after the section code. Estimated annual production (PROD) is in million cubic feet (MMcf). An (*) preceding the control number indicates that other purchasers are listed at the end of the notice.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential uder 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street N.E., Washington, D.C. 20426.

Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before April 13, 1981.

Please reference the FERC Control Number (JD No.) in all correspondence related to these determinations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" after the section code. Estimated annual production (PROD) is in million cubic feet (MMcf). An (*) preceding the control number indicates that other purchasers are listed at the end of the notice.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before April 13, 1981.

Please reference the FERC Control Number (JD No) in all correspondence related to these determinations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" after the section code. Estimated annual production (PROD) is in million cubic feet (MMcf). An (*) preceding the control number indicates that other purchasers are listed at the end of the notice.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before April 13, 1981.

Please reference the FERC Control Number (JD No) in all correspondence related to these determinations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-1790-6]

Availability of Environmental Impact Statements

AGENCY: Office of Federal Activities (A-104), US Environmental Protection Agency.

PURPOSE: This notice lists the Environmental Impact Statements (EISS) which have been officially filed with the EPA and distributed to federal agencies and interested groups, organizations and individuals for review pursuant to the Council on Environmental Quality's regulations (40 CFR Part 1506.9) during the week of March 16, 1981 to March 20, 1981.

Review Periods: The 45-day review period for Draft EIS's listed in this notice is calculated from March 27, 1981 and will end on May 11, 1981. The 30-day review period for Final EIS's as calulated from March 27, 1981 will end on April 27, 1981.

EIS Availability: To obtain a copy of an EIS listed in this notice you should contact the federal agency which prepared the EIS. If a federal agency does not have the EIS available upon request you may contact the Office of Federal Activities, EPA, for further information. Copies of EIS's previously filed with EPA or CEQ which are no longer available from the originating agency are available with charge from the following source: Information Resources Press, 1700 North Moore Street, Arlington, Virginia 22209 (703) 558-8270.

FOR FURTHER INFORMATION CONTACT: Kathi L. Wilson, Office of Federal Activities, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 245-3006.

Dated: March 24, 1981.

William N. Hedeman, Jr.,

Director, Office of Federal Activities (A-104).

US Department of Agriculture

APHIS: Draft—Cooperative Imported Fire Ant Program (EIS Order No. 810209); this EIS should have appeared in the March 20, 1981 Federal Register—therefore the comment period will end on May 4, 1981.

US Army Corps of Engineers

Draft—Grand Bayou Reservoir/Water Supply, Red River Parish, Louisiana (EIS Order No. 810220).

Final—Monroe Harbor Modification, Lake Erie, Monroe County, Michigan (EIS Order No. 810223).

Final Supplement—Cooper Lake and Channels Multipurpose Project, Texas (EIS Order No. 810218).

Department of the Navy

Draft Supplement—Naval Regional Medical Center, San Diego County, California (EIS Order No. 810221).

Department of Commerce

NOAA: Draft—Deep Seabed Mining Program, Pacific Ocean (EIS Order No. 810225); the review period for this EIS has been extended until May 29, 1981.

Extension: Shrimp Fishery FMP, Gulf of Mexico, published Federal Register March 13, 1981—review period extended until April 17, 1981. (No. 810182).

Environmental Protection Agency

Region 10: Draft—Wastewater Management for Boise, Eagle and Ada County, Idaho (EIS Order No. 810206).

Extension: Spokane County WWT Management Plan, WA, published in Federal Register February 20, 1981—review extended until May 29, 1981 (No. 810109).

Federal Energy Regulatory Commission

Draft—Terror Lake Hydroelectric Project, Kodiak National Wildlife Refuge, Alaska (EIS Order No. 810222); NOTATION—anyone desiring to protest or file a petition to intervene with the FERC on the basis of this EIS should do so in accordance with the requirements of FERC's Rules of Practice and Procedure, 18 CFR 1.8, 1.10 (1979), within the time period set forth in this notice, unless otherwise stated.

Department of Housing and Urban Development

Draft—Cottonwood Housing Development Mortgage Insurance, Douglas County, Colorado (EIS Order No. 810219).

Final—Rancho Isabella Subdivision, Mortgage Insurance, Brazoria County, Texas (EIS Order No. 810211).

Final—Oquirrh Shawdows Subdivision, Mortgage Insurance, Salt Lake County, Utah (EIS Order No. 810215).

Final—Echo Farms Subdivision, Mortgage Insurance, New Hanover County, North Carolina (EIS Order No. 810217).

Department of the Interior

BLM: Draft—OCS Oil and Gas Lease Sales No. 67 and No. 69, Gulf of Mexico. (EIS Order No. 810227).

BLM: Draft—Prairie Potholes Vegetation Allocation, Several Counties, Montana (EIS Order No. 810213); the review period for this EIS has been extended until May 22, 1981.

BIA: Draft—Crow/Shell Coal Lease Agreement, Crow Reservation, Big Horn County, Montana and Sheridan County, Wyoming (EIS Order No. 810212); the review period for this EIS has been extended until May 24, 1981.

Nuclear Regulatory Commission

Final Supplement—Allens Creek Nuclear Generating Station, Permit, Austin County, Texas (EIS Order No. 810224).

US Department of Transportation

FHWA: Final—Farias Road to Butler Road Connector, Multnomah County, Oregon. (EIS Order No. 810210).

FHWA: Final—US 54 Improvement and I-235 Interchange Addition, Sedgwick County, Kansas. (EIS Order No. 810216).

Withdrawal: Newburgh Riverfront Arterial, Orange County, NY, published Federal Register December 7, 1979 has been officially withdrawn by DOT (No. 791195).

Correction

In FR Doc. 5607, on page 13036, in the issue of Thursday, February 19, 1981, in the last column, under the section designated as the "SUPPLEMENTARY INFORMATION," the first paragraph, the eighth line from the bottom of the paragraph, correct "FAP 9H5235" to read "FAP 9H5232".

BILLING CODE 1505-01-M

[OPTS-51237; TSH-FRC 1783-6]

Toxic Substances Control; Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Section 5(d)(2) requires EPA to publish in the Federal Register certain information about each PMN within 5 working days after receipt. This Notice announces receipt of two PMN's and provides a summary of each.

DATES: Written comments by:
PMN 81-69—April 12, 1981.
PMN 81-71—April 14, 1981.

ADDRESS: Written comments to: Document Control Officer (TS-793), Management Support Division, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-401, 401 M St., SW., Washington, DC 20460, (202-426-2610).

FOR FURTHER INFORMATION CONTACT: Rachel Diamond, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-221, 401 M St., SW., Washington, D.C. 20460, (202-426-3960).

SUPPLEMENTARY INFORMATION: Section 5(a)(1) of TSCA [90 Stat. 2012 (15 U.S.C. 2604)], requires any person who intends to manufacture or import a new chemical substance to submit a PMN to EPA at least 90 days before manufacture or import commences. A "new" chemical substance is any substance that is not on the Inventory of existing substances compiled by EPA under section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notices of availability of the Inventory were published in the Federal Register of May 15, 1979 (44 FR 28558-Initial) and July 29, 1980 (45 FR 50444-Revised). The requirement to submit a PMN for new chemical substances manufactured or imported for commercial purposes became effective July 1, 1979.

EPA has proposed premanufacture notification rules and forms in the Federal Register issues of January 10, 1979 (44 FR 2242) and October 16, 1979 (44 FR 59764). These regulations, however, are not yet in effect. Interested persons should consult the Agency's Interim Policy published in the Federal Register of May 15, 1979 (44 FR 28564) for guidance concerning premanufacture notification requirements prior to the effective date of these rules and forms. In particular, see page 28567 of the Interim Policy.

A PMN must include the information listed in section 5(d)(1) of TSCA. Under section 5(d)(2) EPA must publish in the Federal Register nonconfidential information on the identity and use(s) of the substance, as well as a description of any test data submitted under section 5(b). In addition, EPA has decided to publish a description of any test data submitted with the PMN and EPA will publish the identity of the submitter unless this information is claimed confidential.

Publication of the section 5(d)(2) notice is subject to section 14 concerning disclosure of confidential information. A company can claim confidentiality for any information submitted as part of a PMN. If the company claims confidentiality for the specific chemical identity or use(s) of the chemical, EPA encourages the submitter to provide a generic use description, a nonconfidential description of the potential exposures from use, and a generic name for the chemical. EPA will publish the generic name, the generic use(s), and the potential exposure descriptions in the Federal Register.

If no generic use description or generic name is provided, EPA will develop one and after providing due notice to the submitter, will publish an amended Federal Register notice. EPA immediately will review confidentiality claims for chemical identity, chemical use, the identity of the submitter, and for health and safety studies. If EPA determines that portions of this information are not entitled to confidential treatment, the Agency will publish an amended notice and will place the information in the public file, after notifying the submitter and complying with other applicable procedures.

After receipt, EPA has 90 days to review a PMN under section 5(a)(1). The section 5(d)(2) Federal Register notice indicates the date when the review period ends for each PMN. Under section 5(c), EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that an extension is necessary, it will publish a notice in the Federal Register.

Once the review period ends, the submitter may manufacture the substance unless EPA has imposed restrictions. When the submitter begins to manufacture the substance, he must report to EPA, and the Agency will add the substance to the Inventory. After the substance is added to the Inventory, any company may manufacture it without providing EPA notice under section 5(a)(1)(A).

Therefore, under the Toxic Substances Control Act, summaries of the data taken from the PMN's are published herein.

Interested persons may, on or before the dates shown under "DATES", submit to the Document Control Officer (TS-793), Management Support Division, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-401, 401 M St., SW., Washington, DC 20460, written comments regarding these notices. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS-51237]" and the specific PMN number. Comments received may be seen in Rm. E-106 at the above office between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: March 20, 1981.

Edward A. Klein,

Director, Chemical Control Division.

PMN 81-69

The following information is taken from data submitted by the manufacturer in the PMN.

Close of Review Period. May 12, 1981.

Manufacture's Identity. International Harvester Corporation, c/o Solar Turbine International, 2200 Pacific Highway, San Diego, CA 92138.

Specific Chemical Identity. Claimed confidential business information. Generic name: Benzophenone tetracarboxylic dianhydride copolyimide.

Use . The manfacturer states that the PMN substance will be used in a commercial and consumer use as seat cushions and mattresses and used in an industrial and commercial use as

thermal insulation, protective cushioning, and rigid paneling.

Production Estimates. Claimed confidential business information.

Physical/Chemical Properties. No data were submitted.

Toxicity Data. The manufacturer states that acute screening tests for the new substance were run for oral and dermal toxicity with no indication of toxicity observed; eye and skin irritation tests showed no unusual irritation. The manufacturer also states that an Ames mutagenicity test indicates the new chemical is non-mutagenic.

Expose. The manufacturer states that at sites controlled by the submitter, eight manufacturing and processing workers will have inhalation and skin exposure 8–24 hr/da, 300 da/yr, and that an unknown number of workers using and disposing of the new chemical will have skin exposure for an unknown duration.

The manufacturer also states that an unknown number of commercial users could have indirect skin exposure to the new substance.

Environmental Release/Disposal. The manufacturer states that at a site controlled by the submitter, 100–1,000 kg/yr of the new substance will be released into the air 24 hr/da, 300 da/yr, and from 1,000–10,000 kg/yr will be released into the land.

PMN 81–71

The following information is taken from data submitted by the manufacturer in the PMN.

Close of Review Period. May 14, 1981.

Manufacturer's Identity. Ethyl Corporation, 451 Florida Blvd., Baton Rouge, LA 70801.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: Alkenylpyrolidinedione.

Use. Claimed confidential business information.

Production Estimates. Claimed confidential business information.

Physical/ Chemical Properties.

Appearance—Light tan to dark brown waxy solid.

Color (ASTM D–1500 Dil)—3

Flash point, COC—390°F.

Crystallization point—32°C.

Specific gravity 60/60°F—0.922

Viscosity:

At 100°C—15.25 cSt

At 40°C—176.7cSt

Neutralization number, acid, meg/gm—1.95 typical.

Solubility:

Water—Insoluble.

70% ethanol—Insoluble.

Toxicity Data.

Ames Salmonella/Microsomal—Non-mutagenic.

Acute oral LD_{50} (Wistar rats)—> 14 g/kg.

Acute dermal LD_{50} (albino rabbits)—> 20 g/kg.

DOT skin corrosion (albino rabbits)—Non-corrosive, mild irritant.

Eye irritation (rabbits)—Moderate irritation.

Exposure. The manufacturer states that the PMN substance will be manufactured in an enclosed system with minimal worker exposure and that the new chemical will be present only in trace amounts in the final product.

Environmental Release/Disposal. The manufacturer states that the new chemical will be released into an approved, licensed landfill and the water of a privately owned (Ethyl) waste H_2O BOD treatment system.

BILLING CODE 6560-31-M

[OPTS-51243; TSH-FRL 1790-2]

Toxic Substances Control; Methylenebis-(Diisopropylaniline); Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Section 5(d)(2) requires EPA to publish in the **Federal Register** certain information about each PMN within 5 working days after receipt. This notice announces receipt of a PMN and provides a summary.

DATE: Written comments by April 13, 1981.

ADDRESS: Written comments to: Document Control Officer (TS–793), Management Support Division, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–401, 401 M St., SW., Washington, DC 20460, (202–426–2610).

FOR FURTHER INFORMATION CONTACT: Rachel Diamond, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–221, 401 M St., SW., Washington, DC 20460, (202–426–3980).

SUPPLEMENTARY INFORMATION: Section 5(a)(1) of TSCA (90 Stat. 2012 (15 U.S.C. 2604)), requires any person who intends to manufacture or import a new chemical substance to submit a PMN to EPA at least 90 days before manufacture or import commences. A "new" chemical substance is any substance that is not on the Inventory of existing substances compiled by EPA under section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notice of availability of the Inventory were published in the **Federal Register** on May 15, 1979 (44 FR 28558—Initial) and July 22, 1980 (45 FR 50544—Revised). The requirement to submit a PMN for new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

EPA has proposed premanufacture notification rules and forms in the **Federal Register** issues of January 10, 1979 (44 FR 2242) and October 16, 1979 (44 FR 59764). These regulations, however, are not yet in effect. Interested persons should consult the Agency's Interim Policy published in the **Federal Register** of May 15, 1979 (44 FR 28564) for guidance concerning premanufacture notification requirements prior to the effective date of these rules and forms. In particular, see page 28567 of the Interim Policy.

A PMN must include the information listed in section 5(d)(1) of TSCA. Under section 5(d)(2), EPA must publish in the **Federal Register** nonconfidential information on the identity and use(s) of the substance, as well as a description of any test data submitted under section 5(b). In addition, EPA has decided to publish a description of any test data submitted with the PMN and EPA will publish the identity of the submitter unless this information is claimed confidential.

Publication of the section 5(d)(2) notice is subject to section 14 concerning disclosure of confidential information. A company can claim confidentiality for any information submitted as part of a PMN. If the company claims confidentiality for the specific chemical identity or use(s) of the chemical, EPA encourages the submitter to provide a generic use description, a nonconfidential description of the potential exposures from use, and a generic name for the chemical. EPA will publish the generic name, the generic use(s), and the potential exposure descriptions in the **Federal Register.**

If no generic use description or generic name is provided, EPA will develop one and after providing due notice to the submitter, will publish an amended **Federal Register** notice. EPA immediately will review confidentiality claims for chemical identity, chemical use(s), the identity of the submitter, and

for health and safety studies. If EPA determines that portions of this information are not entitled to confidential treatment, the Agency will publish an amended notice and will place the information in the public file, after notifying the submitter and complying with other applicable procedures.

After receipt, EPA has 90 days to review a PMN under section 5(a)(1). The section 5(d)(2) Federal Register notice indicates the date when the review period ends for each PMN. Under section 5(c), EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that an extension is necessary, it will publish a notice in the Federal Register.

Once the review period ends, the submitter may manufacture the substance unless EPA has imposed restrictions. When the submitter begins to manufacture the substance, he must report to EPA, and the Agency will add the substance to the Inventory. After the substance is added to the Inventory, any company may manufacture it without providing EPA notice under section 5(a)(1)(A).

Therefore, under the Toxic Substances Control Act, a summary of the data taken from the PMN is published herein.

Interested persons may, on or before April 13, 1981, submit to the Document Control Officer (TS-793), Management Support Division, Office of Pesticides and Toxics Substances, Environmental Protection Agency, Rm. E-401, 401 M St., SW., Washington, D.C. 20460, written comments regarding this notice. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS-51243]" and the PMN number. Comments received may be seen in Rm. E-106 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: March 20, 1981.

Edward A. Klein,

Director, Chemical Control Division.

The following summary is taken from the data submitted by the manufacturer in the PMN.

Close of review period. April 28, 1981.

Manufacturer's Identity. Ethyl Corp., 451 Florida Blvd., Baton Rouge, LA 70821.

Specific Chemical Identity. Methylenebis-(diisopropylaniline).

Use. Chain extender for polyurethene elastomers.

Production Estimates. Claimed confidential business information.

Physical Chemical Properties.

Molecular weight—366.6.

Appearance—Dark amber, viscous liquid.

Odor—Negligible.

Density at 29°C—0.96 g/ml.

Flash point (PMCC)—219°F.

Boiling point at: 2.0 mm—246°C.

3.2 mm—253°C.

4.1 mm—273°C.

5.1 mm—281°C.

6.6 mm—286°C.

Viscosity (at 25°C-80°C Range)—470,000-81 cps.

Solubility at 25°C—Miscible in ethanol, toluene, and *n*-heptane. Insoluble in water and 10% NaOH. Percent soluble in 10% HCl—0.15 weight.

Toxicity Data.

Dermal LD_{50} (rabbits)—>20g/kg.

Oral LD_{50} (rats)—350-620 mg/kg.

Ames *Salmonella*/microsomal—No mutagenic activity.

In-vitro carcinogenicity—No transformation activity with or without metabolic activation.

Exposure. Claimed confidential business information.

Environmental Release/Disposal. Claimed confidential business information.

BILLING CODE 6560-01-M

[OPTS-51208A; TSH-FRL 1769-7]

Toxic Substances Control; 2-Propanol, 1-Methoxy-Acetate; Premanufacture Notice; Voluntary Suspension of Review Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substance Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before beginning to manufacture or import. During that 90-day review period, EPA evaluates the potential health and environmental effects of the PMN chemical. This notice announces that the submitting company had voluntarily suspended the review period for PMN P-80-360, pending the development and evaluation of additional information.

FOR FURTHER INFORMATION CONTACT: Richard Green, Chemical Control Division (TS-794), Environmental Protection Agency, Rm. E-308, 401 M St., SW., Washington, DC 20460 (202-426-8815).

SUPPLEMENTARY INFORMATION: Under section 5 of TSCA, EPA is allowed 90 days to evaluate the potential health and environmental effects of a PMN chemical. The review period may be extended up to an additional 90 days under section 5(c) if the Agency can show "good cause".

Section 5(c) of TSCA allows the Agency to regulate a PMN chemical if it determines that available information is insufficient to permit a reasoned evaluation of health and environmental effects, and the chemical (1) may present an unreasonable risk or (2) will be produced in substantial quantities with substantial or significant environmental or human exposure. Section 5(f) authorizes Agency action to control substances which it determines will present an unreasonable risk. Proposed orders regulating a PMN chemical under section 5(e) or section 5(f) of TSCA must be issued no less than 45 days before the end of the review period. Proposed rules or injunctions obtained pursuant to section 5(f) must become effective before the expiration of the review period.

On December 12, 1980, the Dow Chemical Company submitted PMN P-80-360 for the substance 2-propanol, 1-methoxy-acetate. In conjunction with the PMN, the company submitted an interim report on tests which it was conducting to determine certain health and environmental effects of the PMN chemical. On February 18, 1981, the company voluntarily suspended the 90-day review period in order to allow it to submit, and for EPA to evaluate, a final testing report and other information which was requested by the Agency. The review period had been suspended indefinitely, pending further notice from the company.

Dated: March 20, 1981.

Edward A. Klein,

Director, Chemical Control Division.

BILLING CODE 6560-01-M

FEDERAL MARITIME COMMISSION

[Docket No. 81-23]

Gulf-United Kingdom Freight Conference (Agreement No. 161-31); Rates and Practices; Order of Investigation and Hearing

On January 11, 1980, the Commission conditionally disapproved Agreement No. 161-31 which would have authorized the members of the Gulf-United Kingdom Freight Conference to establish rates and practices for certain activities

associated with the movement of intermodal cargoes from U.S. Gulf ports including service to inland points in the United Kingdom, and to agree with other conferences regarding certain inland services in Europe. The Commission concluded that the modification had been inadequately justified under the *Svenska* test,[1] and disapproved the Agreement subject to Proponents' right to seek a further hearing under certain conditions. On March 24, 1980, such further hearing request was filed.

The January 11, 1980 Order provided that, if Proponents sought a further hearing, they were to: (1) furnish a detailed recital of the facts which they intended to prove at the hearing; (2) describe the evidence which they intended to use to prove the recited facts; (3) explain why the furnished facts supported approval of the Agreement; and (4) state whether and why trial-type proceedings were considered necessary. Proponents' March 24 Request answers Point 4 by stating that trial-type proceedings are not believed to be necessary. However, the specific evidence by which Proponents intend to prove their case has not been described. Instead, they express a willingness to eliminate specific portions of the Agreement's text found objectionable by the Commission or to add provisions which the Commission has suggested as necessary or desirable. Moreover, Proponents confine any explanation of how they will prove their position to an assumption that such an explanation is inherent in any response to the requirements of proof set forth in the Commission's Order.

Proponents have therefore technically not met at least one and perhaps two of the four requirements for grant of a further hearing set forth in the January 11, 1980 Order. Nevertheless, a further hearing will be granted. This hearing shall be structured in such a fashion, however, as to produce sufficient information to allow the Commission to assess the Agreement's practical impact upon other ocean carriers and the shipping public.

Of major importance is the fact that the document now before the Commission is the fourth version of Agreement No. 161–31 submitted by Proponents, and the actual changes Proponents seek to make in their currently approved organic agreement are unclear and vague. The latest version of Amendment No. 31 uses terms which are not specifically defined and whose meaning may not be generally understood. For example, "inland delivery charges" may mean local drayage at the destination terminal, but might be construed to include line-haul surface movements in the United Kingdom, and "transportation via U.S. Gulf ports" could be construed to authorize U.S. intermodal operations which allegedly are not covered by Amendment No. 31. Accordingly, Proponents shall be ordered to furnish a complete republication of Agreement No. 161–31 which shows the deletions and additions from Proponents' existing Agreement in the manner specified by 46 CFR 522.4(a), and which identifies with clarity and specificity the express ratemaking activities in which Proponents wish to engage.

In addition to requiring that the agreement itself be refiled, we are also requiring the filing of affidavits and legal memoranda in order that several unanswered issues may be addressed.

Because some vessels serving the Gulf/U.K. trade serve adjacent trades on the same voyage, it is unclear how much of the total traffic carried aboard Proponents' vessels is attributable to the Gulf/U.K. trade. Accordingly, the record in this proceeding is expected to reveal whether Proponents allocate vessel space between trades and, if so, the amount of container space allocated to each trade. Even if there is no formal allocation of container space, the Commission needs to have a breakdown by trade of cargo historically carried on voyages in the Gulf/U.K. trade. The type of cargo carried in these trades and the utilization of Proponents' vessels are also relevant factors and it will be necessary to establish what percentage of conference cargo is now containerized and what percentage of this cargo moves to inland destinations in Europe and the United Kingdom.

The nature of competition in the Gulf/U.K. trade is another critical element which has not been demonstrated by Proponents. They will be expected to furnish the names and service offerings of competing lines in both the Gulf/U.K. trade and adjacent trades and the conference's market share of both total traffic and containerized traffic. An estimate of the intermodal cargo carryings of nonconference lines is also necessary.

Any instances of rate instability or overtonnaging relied upon by Proponents must be identified and the manner in which Amendment No. 31 would operate to reduce or eliminate such instability must be demonstrated.

Finally, the benefits Amendment No. 31 will produce for the shipping public have not been established. Among the unanswered questions are whether Proponents' present conference service has been satisfactory to shippers; whether shippers have requested that the conference offer intermodal service; and whether Amendment No. 31 will provide shippers with benefits that are not available from nonconference intermodal services. In addressing these questions, it is expected that Proponents will describe the details of their proposed United Kingdom intermodal service, including the points to be served, the commodities to be carried, the frequency of service, and the general rate levels contemplated.

A further hearing will give Proponents a final opportunity to come forward with the necessary evidence to resolve the questions discussed above and otherwise support Amendment No. 31.

Therefore, It is ordered, That pursuant to sections 15 and 22 of the Shipping Act, 1916 (46 U.S.C. 814, 821), an investigation and hearing is ordered to determine whether Agreement No. 161–31 should be approved, disapproved or modified; and

It is further ordered, That the member lines of the Gulf-United Kingdom Freight Conference listed in the Appendix are designated as the Proponents of Agreement No. 161–31; and

It is further ordered, That in accordance with 46 CFR 502.42, the Commission's Bureau of Investigation and Enforcement shall be a party to this proceeding; and

It is further ordered, That the parties address, *inter alia*, the following issues:

1. how does the Gulf/U.K. trade interrelate with liner operations in adjacent trades in defining the relevant market within which Agreement No. 161–31 would operate?

2. What effect would approval of Agreement 161–31 have on competition among carriers operating in the relevant market?

3. What benefits would approval of Agreement 161–31 have on the shipping public?; and

It is further ordered, That this proceeding be limited to the submission of affidavits of facts and memoranda of law and replies thereto. Oral argument may also be scheduled if deemed necessary by the Commission. Should any party believe an evidentiary hearing is required, that party must accompany any request for such hearing with a statement setting forth in detail the facts to be proven, their relevance to the issues in this proceeding and why such proof cannot be submitted through affidavit; and

It is further ordered, That the republished agreement together with affidavits of fact and a memorandum of

[1] *Federal Maritime Commission* v. *Aktiebolaget Svenska Amerika Linien*, 390 U.S. 238 (1968).

law shall be filed by Proponents and served upon all parties of record no later than the close of business on May 15, 1981; and

It is further ordered, That the Bureau of Investigation and Enforcement shall file a reply memorandum and supporting affidavits of fact by the close of business on June 15, 1981; and

It is further ordered, That an answering memorandum and supporting affidavits shall be filed by Proponents no later than close of business on June 30, 1981. Requests for hearing or for oral argument shall be filed on or before July 7, 1981; and

It is further ordered, That this Order be published in the Federal Register and a copy be served upon all parties of record; and

It is further ordered, That any person other than parties of record having an interest in this proceeding may file a petition for leave to intervene in accordance with 46 CFR 502.72, and, if said petition is granted, shall adhere to the filing schedule established for the party or position supported by the intervenor; and

It is further ordered, That all future notices, orders, or decisions issued by or on behalf of the Commission in this proceeding shall be mailed directly to all parties of record; and

It is further ordered, That all documents submitted by any party of record in this proceeding shall be filed in accordance with 46 CFR 502.118, as well as mailed directly to all parties of record.

By the Commission.*

Joseph C. Polking,
Acting Secretary.

*Commissioner Peter N. Teige not participating.

Matson Navigation Co.; Application for Permission To Submit Alternative Data

The Federal Maritime Commission hereby gives notice that Matson Navigation Company (Matson) has filed an application with the Commission for permission to submit alternative data pursuant to 46 CFR 512.2(d).

In support of general rate changes, carriers are required by the Commission's General Order 11, Revised, to submit actual and projected financial data. Matson proposes to submit certain fuel costs, consumption data and a certification as alternative data in support of general rate changes related to increased fuel costs.

Interested parties may inspect the data submitted in support of the application at the Washington Office of the Federal Maritime Commission, 1100 L Street, NW., Washington, D.C. Interested parties may submit comments on the application to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before April 16, 1981. A copy of any comments should also be forwarded to Matson Navigation Company, P.O. Box 3933, San Francisco, California 94119, and the comments should indicate that this has been done.

Dated: March 24, 1981.

Joseph C. Polking,
Acting Secretary.

BILLING CODE 6730-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Animal Drugs; Central Soya Co., Inc.; Monensin and Roxarsone Premix; Withdrawal of Approval of NADA

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) withdraws approval of a new animal drug application (NADA) providing for use of a premix containing monensin and roxarsone for use in chicken feed. The sponsor, Central Soya Co., Inc., requested withdrawal of approval.

EFFECTIVE DATE: April 6, 1981.

FOR FURTHER INFORMATION CONTACT: Howard Meyers, Bureau of Veterinary Medicine (HFV-218), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4093.

SUPPLEMENTARY INFORMATION: Central Soya Co., Inc., 1300 Fort Wayne Bank Bldg., Fort Wayne, IN 46802, is the sponsor of NADA 91-912 which provides for use of a premix containing monensin and roxarsone for use in the feed of chickens. The application was originally approved April 27, 1973. In a letter dated November 1, 1980, the firm requested that approval of NADA 91-912 be withdrawn because the product is no longer being manufactured or marketed.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345-347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.84), notice is given that approval of NADA 91-912 and all supplements for monensin and roxarsone premix is hereby withdrawn, effective April 6, 1981.

In a separate document published elsewhere in this issue of the Federal Register, § 556.355(b)(4) is amended to remove that portion of the regulation which reflects approval of this NADA.

Dated: March 13, 1981.

Gerald B. Guest,
Acting Director, Bureau of Veterinary Medicine.

BILLING CODE 4110-03-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Interstate Land Sales Registration

[Docket No. N-81-1065]

Certification of a State Land Sales Program

AGENCY: Office of Interstate Land Sales Registration, HUD.

ACTION: Notice of Certification of the Land Sales Program of the State of California Department of Real Estate.

SUMMARY: The Secretary gives public notice that the State of California Department of Real Estate has applied for certification of its land sales program under 24 CFR 1710.502, published June 13, 1980. A determination has been made to accept the application and certify the land sales program, and a formal agreement was entered into on January 6, 1981, commencing the effect of the certification. The purpose of this public notice is to advise the public, and particularly California land developers and other state agencies with land sales regulatory responsibilities, of the terms

of the agreement and the agreement's effect upon land sales businesses.

EFFECTIVE DATE: January 6, 1981.

ADDRESSES: HUD Office of Interstate Land Sales Registration, Room 4130, 451 7th Street, SW., Washington, D.C. 20410. California Department of Real Estate, 1719—29th Street, P.O. Box 160009, Sacramento, California 95816.

FOR FURTHER INFORMATION CONTACT: Ann Lawhead, U.S. Department of Housing and Urban Development (202) 755–6314.

SUPPLEMENTARY INFORMATION: The agreement between the California Department of Real Estate (DRE) and the HUD Office of Interstate Land Sales Registration (OILSR) affects those land subdivisions located in California for which both a California Subdivision Final Public Report and a Federal Statement of Record and Property Report (a federal registration) are required.

The federal requirements will be satisfied, and a registration for the particular subdivision automatically becomes effective upon receipt of a certified copy of the California Subdivision Final Public Report in proper form, a copy of the DRE's fee card and a federal registration fee in the amount set out in existing regulations governing administration and enforcement of the Interstate Land Sales Full Disclosure Act. The certified Public Report and fee card copy may be submitted by either the subdivision developer or by the DRE. No other documentation will be required. Federal rescission language will be incorporated into the body of the Public Report, as appropriate, and in sales contracts. No separate federal disclaimer page, no agent certification or separate information relative to costs or special risks, no financial statements, activity reports or conversions to 1979 federal regulatory requirements will be required of California developers using the certification progress. The federal effective date will not appear on the Public Report.

Developers of California subdivisions with currently effective pass-through registrations must either continue to attach to their Public Reports the separate federal disclaimer and rescission page or may apply to the DRE to incorporate the federal rescission language directly into the Public Report. They are not required to continue attaching financial statements, agent and cost certification pages or Risks of Buying Land.

BACKGROUND: Prior to June 1980, HUD was authorized to accept as meeting the registration requirements of the Interstate Land Sales Full Disclosure Act those materials filed with state authorities who were responsible for regulating land sales, provided the Secretary determined that such action was appropriate in the public interest. These materials would be in lieu of the Statement of Record and Property Report a developer otherwise would have to submit in making a federal registration. Since the authority was linked to registration requirements, HUD took the position that state disclosure documents must meet federal standards in order to be accepted. With the exception of a brief period in 1975, subdivision materials filed with California have been accepted by HUD for registration purposes; however, *all* of the materials filed with the State were required to be duplicated and until recently, a complete examination of those materials was made at the federal level, in addition to the processing by the State.

In December 1979, the Interstate Land Sales Full Disclosure Act was amended. HUD was given the authority to certify states if either disclosure requirements or substantive regulation or a combination of the two gives land purchasers protection substantially equivalent to that provided by administration of the federal law. Once a state is certified, HUD may accept a state's disclosure materials, and any documentation required, and declare these effective as a federal registration.

Rules were adopted in June 1980 setting out procedures and criteria for certifying state land sales programs and allowing a long lead time for applications. The only applications received thus far are from the States of California and Oregon. An affirmative decision has been made regarding the California application, and a formal agreement was signed on January 6, 1981, immediately following the close of a 60 day public comment period announced in the **Federal Register** on November 4, 1980. No comments were received. The formal agreement is as follows:

Be It Known That: The State of California, Department of Real Estate (DRE) and the U.S. Department of Housing and Urban Development Office of Interstate Land Sales Registration (OILSR)

Agree as Follows:

1. That the State of California has adopted and is effectively administering a land sales program that gives lot purchasers and lessees protection at least equivalent to that given them by the Federal Interstate Land Sales Program.

2. That the State of California's land sales program is certified. A developer or subdivider who is issued a California Subdivision Public Report for a subdivision located in the State may satisfy the registration requirements of the Interstate Land Sales Full Disclosure Act by filing or having filed with the Secretary of HUD a final public report, DRE fee card and fee in lieu of the federal Statement of Record and Property Report. A California subdivision will be considered registered with OILSR upon OILSR's receipt of a certified current Public Report and a fee in the amount specified in OILSR Regulations.

3. That each agency agrees to notify the other within 30 days of any modification or amendment to its laws, regulations or administrative procedures, or of any substantial changes in its administrative capabilities, and to send copies of the pertinent documents, if any, effecting the modifications or amendments, including legal opinions.

4. That each agency agrees to notify the other of any action taken to suspend sales in a subdivision covered by this agreement subsequent to the issuance of a Public Report and to send to the other copies of Desist and Refrain Orders, Suspension Orders and injunctions obtained.

5. That the DRE will certify as true and currently in effect and send to OILSR copies of all Public Reports including amended and renewed reports as needed by subdividers to comply with the Interstate Land Sales Full Disclosure Act, and will also send a copy of the DRE's fee card with the address of the subdivider listed thereon.

6. That while additional documents will not be required to be certified and sent as a matter of course, the DRE will cooperate with OILSR by sending copies of any additional documents that are specifically requested.

7. That the DRE will cooperate with any other states obtaining HUD certification of land sales programs in the same fashion as set forth in 5 and 6 above.

8. That the DRE will accept a property report covering land located in another state but offered for sale in California if the property report has been approved by the other state, provided the other state's land sales program has been certified, and the other state property report will be the only property report (public report) required by the DRE with respect to the sale or lease of the subdivided lots.

9. That the balance of both Federal and California requirements apply, the substance of this agreement being limited to disclosure documents required by both agencies and not intended as a substitute for the substantive requirements of the State of California or of the enforcement authority of either agency. Thus the DRE is not required to accept as an issued public report a property report from another certified state when the subdivision in question and its operation do not meet the substantive requirements of California law. In addition, the OILSR is not precluded from beginning an investigation or from entering administrative, civil or criminal proceedings.

10. That OILSR will not certify the land

sales program of any other state unless that state's program offers to purchasers and lessees protection which is substantially equivalent (either in terms of required disclosure or substantive protection or some combination of the two) to that offered through administration of the Interstate Land Sales Full Disclosure Act.

11. That the DRE will exert its best efforts to maintain the level of administration upon which certification is based.

12. That the DRE will take care to assure that purchasers are advised in both public reports and contracts of sale or lease of rescission rights accruing to them under Federal law, and that no representations will be made by subdividers that they will install or complete roads, sewers, water, gas, or electric service, or recreational amenities unless the subdividers stipulate in their contracts of sale or lease that they will provide or complete such services or amenities—the purpose of which is to assure that purchasers have a private right of action as vested in them by federal law.

13. That complaints received by OILSR from Californians concerning California subdivisions will be sent to the DRE, and that the DRE will advise OILSR of any action taken or resolution of each complaint and OILSR a copy of the DRE's reply to the complainant. Where such complaints clearly address only federal requirements, however, OILSR will handle the complaint directly. The DRE and and OILSR will cooperate where both have a direct interest in the complaint.

14. That each agency agrees to cooperate to the maximum extent possible and legally feasible in enforcement matters. OILSR will send to DRE copies of California subdivision site inspections performed by its field representatives. DRE will do on-site inspections of new subdivisions prior to issuing public reports when the subdivisions also will be registered with OILSR.

15. That OILSR will apprise the DRE of any investigations it engages in affecting California subdivisions or subdividers.

16. That this agreement does not affect the authority of either agency to assess or collect fees, particularly for filing and registration purposes.

17. That the Secretary of HUD is required periodically to review the laws and regulations and administration thereof of any state whose land sales program is certified, that the Secretary may withdraw certification upon a determination that the state's program no longer offers purchasers equivalent protection to that offered by the Interstate Land Sales Full Disclosure Act, that prior to withdrawal of certification the Secretary must issue to the state a notice of intent to withdraw certification, which notice shall afford the state an opportunity for hearing prior to withdrawal.

18. That the DRE may withdraw its own certification by notice to the Secretary.
